Z	Zimmermann catalogue [Purcell]
zar(s)	zarzuela(s)
zargc	*zarzuela género chico*

Bibliographical Abbreviations

All bibliographical abbreviations used in this dictionary are listed below, following the typography used in the text of the dictionary. Broadly, *italic* type is used for periodicals and for reference works; roman type is used for anthologies, series etc. (titles of individual volumes are italicized).

Full bibliographical information is not normally supplied in the list below if it is available elsewhere in the dictionary. Its availability is indicated as follows: D – in the list of 'Dictionaries and encyclopedias of music'; E – in the list of 'Editions, historical'; and P – in the list of 'Periodicals'; these lists are located in vol.28. For other items, in particular national (non-musical) biographical dictionaries, basic bibliographical information is given here; and in some cases extra information is supplied to clarify the abbreviation used.

Festschriften and congress reports are not generally covered in this list. Although Festschrift titles are sometimes shortened in the dictionary, sufficient information is always given for unambiguous identification (dedicatee; occasion, if the same person is dedicatee of more than one Festschrift; place and date of publication; and name(s) of editor(s) if known). For fuller information on musical Festschriften up to 1967 see W. Gerboth: *An Index to Musical Festschriften and Similar Publications* (New York, 1969). The published titles of congress reports are generally reduced to their essentials, but sufficient information is always given for purposes of identification (society or topic; place and date of occurrence; journal issue if published in a periodical; editor(s) and publication details in unfamiliar cases). A comprehensive list of musical and music-related 'Congress reports' appears in vol.28. Further information can be found in J. Tyrrell and R. Wise: *A Guide to International Congress Reports in Music, 1900–1975* (London, 1979).

Library Sigla

The system of library sigla in this dictionary follows that used by Répertoire International des Sources Musicales, Kassel, as listed in its publication *RISM-Bibliothekssigel* (Kassel, 1999). Below are listed the sigla to be found; a few of them are additional to those published in the RISM list, but have been established in consultation with the RISM organization. Some original RISM sigla that have now been changed are retained here.

More information on individual libraries is available in the libraries list in volume 28.

In the dictionary, sigla are always printed in *italic*. In any listing of sources a national sigillum applies without repetition until it is contradicted.

Within each national list, entries are alphabetized by sigillum, first by capital letters (showing the city or town) and then by lower-case ones (showing the institution or collection).

A Note on the Use of the Dictionary

This note is intended as a short guide to the basic procedures and organization of the dictionary. A fuller account will be found in the Introduction, vol. l, pp.xix–xxix.

Abbreviations in general use in the dictionary are listed on pp.vii–xi; bibliographical ones (periodicals, reference works, editions etc.) are listed on pp.xiii–xviii and discographical abbrevations on pp.xix–xx.

Alphabetization of headings is based on the principle that words are read continuously, ignoring spaces, hyphens, accents, bracketed matter etc., up to the first comma; the same principle applies thereafter. 'Mc' and 'M'' are listed as 'Mac', 'St' as 'Saint'.

Bibliographies are arranged chronologically (within section, where divided), in order of year of first publication, and alphabetically by author within years.

Cross-references are shown in small capitals, with a large capital at the beginning of the first word of the entry referred to. Thus 'The instrument is related to the BASS TUBA' would mean that the entry referred to is not 'Bass tuba' but 'Tuba, bass'.

Signatures where the article was compiled by the editors or in the few cases where an author has wished to remain anonymous are indicated by a square box (□).

Work-lists are normally arranged chronologically (within section, where divided). Italic symbols used in them (like *D-Dl* or *GB-Lbl*) refer to the libraries holding sources, and are explained on pp.xxi–xxxvii; each national sigillum stands until contradicted.

Contents

S

[continued]

Scott, Cyril (Meir) (*b* Oxton, Cheshire, 27 Sept 1879; *d* Eastbourne, 31 Dec 1970). English composer, writer and pianist. He showed early musical talent and at the age of 12 was sent to the Hoch Conservatory, Frankfurt, to study under Lazzaro Uzielli and Humperdinck. He returned to England 18 months later and continued his studies under Steudner-Welsing in Liverpool. A second period of study at Frankfurt began in 1895, this time under Iwan Knorr. Fellow composition students included Grainger, Norman O'Neill, Roger Quilter and Balfour Gardiner, who, together with Scott, were soon to be referred to as the 'Frankfurt Group'. It was during this period that he formed a close friendship with the poet Stefan George, whose work he later translated.

Scott left Frankfurt in 1898, returning to Liverpool and teaching. In 1900 his *Heroic Suite* was performed in Manchester and Liverpool by Richter, and his First Symphony in Darmstadt under Willem de Haan. Although well received at the time, both works, together with much of the chamber music he had written during this period, were later withdrawn. Scott's London début came in 1901 with a performance of the Piano Quartet in E minor. His Second Symphony (later reworked as *Three Symphonic Dances*) was conducted by Wood at a Promenade Concert in 1903. He signed a contract with Elkin for songs and piano pieces, and in 1909 a similar agreement was made with Schott for large-scale works. Many of the original manuscripts of works published in Germany were destroyed during World War II. The long series of Impressionist piano pieces and songs that followed the Elkin agreement, together with frequent recitals and his own strikingly romantic appearance, established his reputation as a 'modernist' composer. His most outstanding achievement in the pre-war period was the Piano Concerto which Beecham introduced at the British Music Festival of 1915.

In 1921 Scott married the novelist Rose Allatini. By this time he had begun to take a serious interest in Indian philosophy, which led to his becoming a Vedantist and finally a follower of the Higher Occultism. He also became absorbed in the study of naturopathy, osteopathy and homeopathy. He was to write successfully and frequently on all these topics, his work being translated into many languages. His literary output included several volumes of poetry (much influenced by Swinburne and Dowson), a large number of unpublished plays, and an entertaining autobiography, *My Years of Indiscretion* (1924).

Between the wars Scott's music was much performed on the Continent, and a highpoint in his career came with the production of his one-act opera *The Alchemist* at Essen in 1925 under Felix Wolfe. In England, large-scale works for chorus and orchestra were heard at the 1936 Norwich Festival (*Let us Now Praise Famous Men*) and the 1937 Leeds Festival (*La belle dame sans merci*). But by now his music had begun to lose something of its appeal as a novelty. The rich harmonies, languorous melodic lines and rhapsodic diffuseness of form that had once seemed daring and very un-English, came to be regarded simply as part of a period tendency which had seen its most successful expression in the music variously of Debussy and Skryabin. Though still in demand as an interpreter of his own music (he made recital tours all over the world), his reputation as a significant composer went into partial decline.

By 1944 Scott had decided to abandon composition, but according to his own account (1969), a 'significant occult sign' led him to continue. The fruits of this renewed activity included the opera *Maureen O'Mara* (1946), an oratorio *Hymn of Unity* (1947), and a considerable quantity of orchestral and chamber music.

In 1962 a group of friends and admirers formed the Cyril Scott Society with the object of arousing interest in his work, but their efforts did not lead to any large-scale revival. A performance of a piano concerto in 1969, however, revealed a work that for all its rhapsodic opulence was stronger than had been suspected, and the *Hourglass Suite* made a similarly favourable impression in 1971. These performances and a 1993 recording of five major orchestral works suggest that a thorough-going examination of his life's work is long overdue. In the meantime his reputation is kept alive in England by a handful of songs and piano pieces, though abroad his chamber music still commands respect. The importance of his achievement was acknowledged, during his lifetime, by the International Academy (MusD, FIA 1956), the American Conservatory in Chicago (DMus 1959) and the RAM (1969).

WORKS

(*selective list*)

STAGE

The Alchemist (op, 1, Scott), 1917; The Incompetent Apothecary (ballet), 1923; The Saint of the Mountain (op, 1, Scott), 1925; Karma (ballet), 1926; The Masque of the Red Death (ballet, after E.A. Poe), 1932–?; Maureen O'Mara (op, 3, Scott), 1946

ORCHESTRAL

Sym. no.1, 1900; Sym. no.2, 1903 [rev. as 3 Symphonic Dances]; Aubade, 1911; 2 Passacaglias on Irish Themes, 1912; Pf Conc., 1915; Vn Conc., 1927; Vc Conc., 1931; 2 vn concs., c1935; Hpd Conc., 1937; Sym. no.3 'The Muses', 1939; Ob Conc., 1946; Sinfonietta, str, org, hp, 1954; Pf Conc. no.2, 1958; Neopolitan Rhapsody, 1960; Sinfonietta, str, 1962; many ovs. and suites

CHORAL AND VOCAL

Nativity Hymn (R. Crashaw), chorus, orch, 1913; La belle dame sans merci (J. Keats), Bar, chorus, orch, 1916; The Ballad of Fair Helen of Kirkconnel (trad.), Bar, orch, 1925; Rima's Call to the Birds (W.H. Hudson), S, orch, 1933; Mystic Ode (A. Lundy, C. Scott), chorus, orch, 1933; Let us Now Praise Famous Men, chorus, orch, 1935; Ode to Great Men (Scott), T, orch, 1936; Hymn of Unity (Scott), solo vv, chorus, orch, 1947; over 100 songs

CHAMBER AND SOLO INSTRUMENTAL

2 pf qnts, 1924, 1952; Cl Qnt, 1953; 4 str qts, 1920, 1958, 1960, 1968; Pf Qt, e, 1900; 2 str trios, 1931, 1949; 3 pf trios, 1920, 1950, 1957; Sonata, 2 vn, pf, 1963; 4 sonatas, vn, pf, 1910, 1950, 1955, 1956; Sonata, vc, pf, 1950; Sonata, fl, pf, 1961; 3 pf sonatas, 1910, 1932, 1956; 160 pf pieces

MICHAEL HURD

Scott, Francis George (*b* Hawick, 25 Jan 1880; *d* Glasgow, 6 Nov 1958). Scottish composer. Educated at Edinburgh University and at Moray House College of Education, Edinburgh, Scott took the Durham MusB in 1909 and also studied briefly with Roger-Ducasse in the early 1920s. He taught English and primary subjects in Langholm, Dunoon and Glasgow before his appointment (1925–46) as music lecturer at Jordanhill College, Glasgow. His earliest ambitions were as much literary as musical, and the inspiration of his music was almost always verbal: although he wrote a few rather clumsy orchestral pieces (only the brash and vivid *Renaissance* overture merits revival), it is as a song composer with a searching literary insight that he will be remembered. He was a committed nationalist, and Scottish speech rhythm, folk poetry, folk music and pibroch were the sources of his art. All of these elements were blended into a musical language which also showed a keen awareness of Bartók and Schoenberg.

Scott's work is variable in quality. Although he made many fine settings of Dunbar and Burns, his best music is perhaps to be found in his settings of Hugh MacDiarmid, who had been his pupil at Langholm Academy. In such songs as *The Watergaw*, *Country Life*, *The Eemis Stane*, *Moonstruck* and *Milkwort and Bog-cotton* (the last three from *Scottish Lyrics*, book 3) he created a startlingly personal word–music synthesis and a chromatic idiom of great subtlety and strength.

WORKS

3 Short Songs, medium/high v, pf (London, 1920); Scottish Lyrics, 1v, pf, 5 vols. (London and Glasgow, 1922–39); The Ballad of Kynd Kittock (W. Dunbar), Bar, orch, 1934; Renaissance, ov., orch, 1937; The Seiven Deadly Sinnis, dance suite, orch, 1941; Lament for the Heroes, str orch, 1941; Edward (Scottish ballad), Bar, orch, 1943; 7 Songs, Bar, pf (London and Glasgow, 1946); 35 Scottish Lyrics and Other Poems (Glasgow, 1949)

MS collections: Scottish Music Information Centre, Glasgow

NEIL MACKAY

Scott, James (Sylvester) (*b* Neosho, MO, 12 Feb 1885; *d* Kansas City, KS, 30 Aug 1938). American ragtime composer and pianist. His parents had been slaves and had come from North Carolina to Neosho, where Scott took music lessons from John Coleman. After moving to Carthage, Missouri, about 1901, his father bought him a piano, and Scott honed his pianistic skills by 'sitting in' between dance sets at the Lakeside Amusement Park and by performing in local saloons. In 1902 he began working for the Dumars Music Company and was soon promoted to sales clerk and song demonstrator. The following year Dumars published two rags by Scott, *A Summer Breeze* and *The Fascinator*. In 1906 he reportedly journeyed to St Louis and met Scott Joplin, who is said to have introduced him to the publisher John Stark. That year Stark issued *Frog Legs Rag*, which proved popular, and thereafter his firm became almost the sole publisher of Scott's works. During the 1910s Scott continued to write piano rags for Stark and to work for Dumars, and also travelled as far as Kansas City and St Louis to perform. By 1920 Scott had moved to Kansas City, Kansas, where he opened a teaching studio. He reportedly continued to compose, but his last rag was issued in 1922. In the 1920s he played for silent films and then with pit orchestras in Kansas City, Missouri; when sound films displaced the theatre orchestras, he formed a dance band and continued to play until shortly before his death.

Scott's rags have a number of traits traditional to American music: pentatonicism, blue notes, call-and-response patterns and jazz-like breaks. They are generally structured around two-bar motifs, and demand greater virtuosity than the works of Joplin or Joseph Lamb. In Scott's later rags his textures became richer and his bass lines more varied. He was not well known in his lifetime and his music had less circulation than Joplin's: apparently none of Scott's rags were recorded on discs before the 1920s, although a number were issued on piano rolls. In

1939 Jelly Roll Morton recorded his *Climax Rag*, and in the 1940s several of Scott's other rags were recorded by dixieland jazz bands. A revival of interest in his works followed the publication in 1950 of Blesh and Janis's *They All Played Ragtime*.

WORKS
(*selective list*)

Pf rags: The Fascinator (1903); A Summer Breeze, march and two step (1903); On the Pike, march and two step (1904); Frog Legs Rag (1906); Kansas City Rag (1907); Grace and Beauty (1909); Great Scott Rag (1909); The Ragtime Betty (1909); Sunburst Rag (1909); Hilarity Rag (1910); Ophelia Rag (1910); Quality (A High Class Rag) (1911); Princess Rag (1911); Ragtime Oriole (1911); Climax Rag (1914); Evergreen Rag (1915); Honeymoon Rag (1916); Prosperity Rag (1916); Efficiency Rag (1917); Paramount Rag (1917); Dixie Dimples, ragtime fox trot (1918); Rag Sentimental (1918); New Era Rag (1919); Peace and Plenty Rag (1919); Troubadour Rag (1919); Modesty Rag (A Classic) (1920); Pegasus (A Classic Rag) (1920); Don't Jazz Me (I'm Music) (1921); Victory Rag (1921); Broadway Rag (A Classic) (1922); Calliope Rag (1966)

Other pf: Hearts Longing Waltzes (1910); Suffragette Waltz (1914); Springtime of Love Valse (1919)

Songs: She's my girl from Anaconda (Dumars) (1909); Sweetheart Time (Dumars) (1909); Take me out to Lakeside (I. Millet) (1914); The Shimmie Shake (C. Wilson) (1920)

Principal publishers: Dumars, Stark

JOHN EDWARD HASSE

Scott, John (i) (*b c*1775; *d* Jamaica, 1815). English composer and organist. He worked in London so briefly and with so little effect that contemporary references to him are of extreme rarity. He studied the organ under William Sexton at St George's, Windsor, where he had been a chorister, and became deputy organist at Westminster Abbey under Samuel Arnold. In 1796 or 1797 he was appointed pianist (i.e. répétiteur) at Sadler's Wells Theatre, for which he composed some short burlettas, pantomimes and ballets; none of the music survives. Scott's only publications seem to have been a set of glees (*c*1799) and a comic song, *Abraham Newland*, about the chief cashier of the Bank of England. The words were by Charles Dibdin junior, who recorded in his memoirs (London, 1956, p.35) that its popularity at Sadler's Wells brought him the beginnings of fame and enough money on which to get married; its piracy by another publisher, Dale, led to a famous lawsuit. But the tune was already popular, and Scott did no more than provide it with a simple accompaniment. In 1800 Dibdin became manager of Sadler's Wells but did not think well enough of Scott to extend his contract there. From 1806 to 1813 he ran his own theatre, possibly called the Sans Pareil, which stood between Heathcock Court and Bullen Court. According to the Lord Chamberlain's accounts he was licensed to produce burlettas, pantomimes, 'Dancing Song & Recitation with Optical & Mechanical Exhibitions' (see *BDA*). Scott then left for Jamaica to be organist at Spanish Town.

Sadler's Wells's records are far from complete at this time; Scott wrote the music for four works for the theatre, but nothing seems to be known about them: *The Magician and the Invisible Lover* (burletta, 1797), *The Mountain of Miseries, or Harlequin Tormentor* (pantomime, 1797), *The Master of the Cave, or Harlequin and the Fay* (pantomime, 1798) and *The Oracle of Delphi, or Hercules' Vagaries* (1799). According to *Grove's Dictionary*, 1st edn, he also composed 'the well-known anthem, "Praise the Lord, O Jerusalem"'.

ROGER FISKE/R

Scott, John (Gavin) (ii) (*b* Wakefield, 18 June 1956). English organist. He was organ scholar at St John's College, Cambridge, from 1974 to 1978, and his principal teachers were Ralph Downes and Gillian Weir. He gave his London début recital at the Proms in 1977. In 1978 he won the Manchester Organ Competition and, in 1985, first prize in the International J.S. Bach Competition, Leipzig. He became assistant organist of Southwark and St Paul's cathedrals in 1978, then sub-organist of St Paul's in 1985, where he was appointed organist and director of music in 1990. Scott has given first performances of organ works by William Mathias and Kenneth Leighton, from whom he received dedications, and by Petr Eben. He has conducted the choir of St Paul's in recordings of anthems and psalms from the Anglican repertory and has recorded organ works by Duruflé, Dupré, Mendelssohn and English late Romantic composers.

IAN CARSON

Scott, (Patrick) John (Michael O'Hara) (iii) (*b* Bristol, 1 Nov 1930). English arranger, composer, conductor and performer. As a young man Scott was a highly respected flautist and arranger with bands such as those of Heath, Ambrose and Herman. For a while he was a member of the John Barry Seven, and played on several soundtracks by Barry, including some early films in the 'James Bond' series. He accompanied many leading singers on commercial recordings, including Matt Monro, Tom Jones and Shirley Bassey. Much in demand as a session player, he worked with Mancini on several film scores and the experience persuaded him to concentrate on composing for the cinema. An operation on his jaw in 1971 ended his playing career.

Scott's first feature, *A Study in Terror* (1965), led to numerous commissions, including *Antony and Cleopatra* (1972), *England Made Me* (1973) and *Greystoke* (1984), and in the early 1980s he embarked upon a long series of Jacques Cousteau documentaries. He also contributed many short pieces to publishers' mood music libraries, and several became well known as signature tunes, for example those of the television programmes 'Tonight' and 'Nationwide'. His style seemed ideally suited to nature programmes, and was used by the BBC for 'The World About Us' and in Anglia Television's 'Survival'. Scott's music for television has won him two Emmy awards.

DAVID ADES

Scott, Marion M(argaret) (*b* London, 16 July 1877; *d* London, 24 Dec 1953). English musicologist. From 1896 to 1904 she studied at the RCM, where she was taught the violin by Arbos; she remained for many years closely associated with the college. She was a founder of the Society of Women Musicians in 1911 and its president from 1915 to 1916.

Marion Scott had a wide-ranging and creative mind and personality. She published a book of poems in 1905, wrote much music, and was a sensitive and discerning music critic (e.g. for the *Musical Times*). An associate of Joachim and later of Tovey, she led her own string quartet, organized concerts of British chamber music (between 1900 and 1920), and was for a time leader of the Morley College orchestra under Gustav Holst's direction. At the age of 50 she turned to musical scholarship. Her book on Beethoven is a masterly biographical and critical study, and her articles on Haydn are of great documentary importance. The studies and original research that they required were intended to go towards a book on Haydn, but only three chapters of this were completed at the time of her death. Her collection of Haydn scores and Haydn pictures was bequeathed to the Cambridge University Library. Her writings are remarkable for their grace and distinction of style, qualities which also appeared in her occasional programme notes.

ERIC BLOM/PETER PLATT

Scott, Mrs. English mezzo-soprano. *See* YOUNG family, (6).

Scott, Ronnie [Schatt, Ronald] (*b* London, 28 Jan 1927; *d* London, 23 Dec 1996). English jazz night-club owner, tenor saxophonist and bandleader. He first played the soprano saxophone and took up the tenor instrument at the age of 15. After touring with the trumpeter Johnny Claes (1944–5), Ted Heath (1946) and others, he was one of a number of British players who worked on transatlantic liners (1946–8) solely to travel to the USA to hear the music played by such musicians as Dizzy Gillespie, Charlie Parker and Bud Powell. From 1948 he played in a number of bands including the Club Eleven, the Jazz Couriers (which he co-led with Tubby Hayes) and the Clarke-Boland Big Band, as well as leading his own quartets and quintets.

In 1959, he established Ronnie Scott's night club in Gerard Street in Soho. It became the most important venue for jazz performance in the UK, especially after it moved to Frith Street in 1967. In the informal surroundings, Scott presented American soloists such as Art Blakey, Coleman Hawkins, Gillespie and Sonny Rollins, as well as the big bands of Count Basie, Maynard Ferguson, Buddy Rich and others. The club's promotion of British jazz has also been of supreme significance and many British musicians appear there regularly. In 1981 Scott was awarded the OBE.

CHARLES FOX/DIGBY FAIRWEATHER/R

Scott, Stephen (*b* Corvallis, OR, 10 Oct 1944). American composer. He studied at the University of Oregon with Homer Keller (BA 1967) and at Brown University with Paul Nelson and Shapiro (MA 1969); he studied traditional African music in Ghana, Tanzania and Zimbabwe in 1970. In 1969 he began teaching at Colorado College, where he founded the Pearson Electronic Sound Studio and the New Music Ensemble. His awards include the New England Conservatory-Rockefeller Foundation chamber music prize (1980, for *Arcs*), the Kayden Arts Award (1983) and an NEA fellowship (1985).

Scott's interest in African music and the works of Steve Reich and Terry Riley has influenced his own compositions, which are built around melodic repetition and gradual rhythmic change. In 1977 he developed a 'bowed piano' technique: as many as ten players excite the strings of an open piano with monofilament bows and sticks coated with resin. The sounds produced resemble that of a mass of string instruments or a giant accordion, or occasionally electronic effects. His works in this medium range from short studies to the concert length *Vikings of the Sunrise*. His Bowed Piano Ensemble has toured extensively in the USA, Europe and Australia.

WORKS
(*selective list*)

Bowed pf (10 players): Music 1, 1977; Music 2, 1978; Music 3, 1979; Arcs, 1980, rev. 1984; Rainbows, 1981; Minerva's Web, 1985; The Tears of Niobe, 1986; Bowed Rosary, bowed pf, elec kbd, 1990; Thirteen, bowed pf tuned to just intonation, 1990; A Rosary of Islands, bowed pf tuned to just intonation, 1991; Music for Bowed Pf and Chbr orch, 1993; Vikings of the Sunrise, 1995

INGRAM D. MARSHALL

Scott, Sir **Walter** (*b* Edinburgh, 15 Aug 1771; *d* Abbotsford, 21 Sept 1832). Scottish poet and novelist. His writings inspired a large quantity of music, and his work is now exceeded only by Shakespeare's in terms of the number of compositions, especially operas, it has inspired.

A not-very-realistic image of Scotland had been a major influence on the Romantic movement in Europe. In about 1770 Goethe was swept off his feet by Herder's translations of *Border Ballads* (from Percy's *Reliques*), especially by *Edward*, which Goethe used to recite at parties. At the same time the epics attributed to the Celtic harpist Ossian

were being translated into German and other languages, and compared, not to their disadvantage, with the *Odyssey*. Scotland, the source of these strange poems, had the further fascination of being a little-known land on the very edge of Europe, and so the first Scotsman who wrote in attractive detail of his country's customs and history was welcomed with enthusiasm. By the 1820s Scott was being read in translation all over Europe.

Scott was over 40 when he became dispirited with his long narrative poems and turned to novels, and of these the earlier ones about the Lowlands of Scotland are now thought to be the best. *Ivanhoe* was the first that he based on English history, and its success led him thereafter to write as many novels set in England as in Scotland. The better novels proved ideal for stage treatment. Their characters were heroic yet realistic, and they were set sufficiently far in the past to make operatic treatment acceptable. *Ivanhoe* and *Kenilworth* were especially popular as models for librettos. Scott himself was in Paris in 1826 and saw *Ivanhoé*, a pastiche concocted from Rossini's music without the composer's permission. He wrote: 'It was superbly got up ... It was an opera, and of course the story greatly mangled, and the dialogue in a great part nonsense'. Scott's view was predictable: a libretto can hardly hope to preserve his vivid dialogue at all social levels, the interesting historical detail, the geographical reality, and the flow of the narrative. If the plot sinks as well, then there can be nothing of the original left. In the *Ivanhoe* opera that Scott saw, Rowena and Richard Coeur de Lion do not appear, and Ivanhoe marries Rebecca. The libretto of Bizet's *La jolie fille de Perth* never mentions the two main events of the story, and makes Scott's heroine go mad at the end. Much of the powerful plot survives in Donizetti's *Lucia di Lammermoor*, the best of the Scott operas, but Cammarano leaves out Scott's most memorable villainess, Lucy's mother, and at the climax the opera fashions the novel's crazy heroine into a powerful, mythic figure, melding her image with that of Ophelia.

The operas that were staged in London very soon after the publication of the earlier novels did do some justice to the plots, but their spoken dialogue was written in stage fustian; the blank verse dialogue in the first of these operas (taken from *The Lady of the Lake*) was especially deplorable. The music often included some fine old Scots songs, and the eventual popularity of *Auld lang syne* owed much to its being sung in Davy's *Rob-Roy*. Scott himself was unexpectedly sympathetic towards these adaptations; he even wrote some new lyrics for the operatic *Guy Mannering*, perhaps in fear of others writing something worse.

Schubert's seven settings of lyrics from *The Lady of the Lake* are outstanding (two of them are partsongs). Schubert had read the whole poem with care, and, as his accompaniments show, he knew that Ellen in her cave above Loch Katrine sings her *Ave Maria* to harp accompaniment, and that Norman is hurrying as quickly as possible to answer Roderick Dhu's call to arms. *Normans Gesang* would be more popular if modern audiences knew their Scott as well as Schubert did and appreciated the clash between the calm words and the hurrying piano part. Unfortunately Schubert set translations that sometimes alter Scott's rhythms; his songs cannot be sung to the original words.

When George Thomson was compiling his volumes of National Songs, he asked Scott to write 11 new lyrics to fit old tunes, most of them Welsh or Irish, and this gave Scott a tenuous relationship with their arranger, Beethoven (who once contemplated an opera on *Kenilworth*). Thomson rewarded Scott with presents rather than money, and complained that he seemed incapable of making all his verses rhythmically the same. Scott had no knowledge of music. He enjoyed national songs, especially when he knew something of their historical background, but he was never heard to sing a tune. Yet his novels are full of songs. There is a vivid, unsentimental account of massed bagpiping in *The Legend of Montrose*, and this rather slapdash novel also contains some scholarly remarks about Annot Lyle's 'clairshach' (harp). Schubert set one of her songs, 'Wert thou, like me, in life's low vale', but Scott said he took the words from Andrew M'Donald.

Scott's popularity on the Continent had waned by the time symphonic poems became popular, and his plots inspired very few examples. In his early *Waverley*, Berlioz attempted only a generalized picture of a young man in search of military honour; he wrote on the score two lines of a poem on the subject alleged to be by Scott's hero, Edward Waverley. He composed his *Rob-Roy* overture in Nice soon after meeting Mendelssohn in Florence. Almost certainly they had discussed programme music, in particular the very detailed programme behind the overture to *A Midsummer Night's Dream*. *Rob-Roy* begins romantically with a Scots song tune on four horns, 'Scots wae hae wi' Wallace bled', but the song has nothing to do with Rob Roy, nor has the long central 'song' for english horn and harp. Nobody in the novel sings to a harp accompaniment, and it may be that the composer's later dissatisfaction with this overture stemmed in part from his discovery that he had been thinking of another book. 'When I conducted it in Paris', he wrote, 'it was so badly received that I put the score in the fire on the night of the concert'. Supposing he would not be detected, he used two of the themes, including the english horn 'song', for *Harold in Italy*, but there was a second score of *Rob Roy* in the Paris Conservatoire, and this has survived.

WRITINGS

with certain exceptions, this list does not include the numerous songs and partsongs setting words by Scott, nor all the known overtures and incidental music for plays based on his works

for further information see Gooch and Thatcher

titles of larger works are omitted when they are the same as Scott's

POEMS

The Lay of the Last Minstrel (1805): cant. by H. MacCunn, Glasgow, 1888

Marmion (1808): ov. by A. Sullivan, London, 1867; Lochinvar, 'Idylle romantique' by F.R. Kelly, Salerno, 1887; incid music by A. Mackenzie, Glasgow, 1891; Young Lochinvar, cants. by A. Arnott, 1893, and L. Lehmann, 1898; Lochinvar, ballet by G. Jacobi, London, *c*1898; Lochinvar, cant. by Haydn Wood, 1911

The Lady of the Lake (1810): The Knight of Snowdoun, op by H. Bishop, London, 1811; La donna del lago, ops by Rossini, Naples, 1819, and J. Vesque von Püttlingen, Vienna, 1830; 7 Gesänge, D835–9, 843, 846 by Schubert, 1825; pastiche from ops of Rossini, 1846; cant. by G.A. Macfarren, Glasgow, 1877; Das Feuerkreuz, cant. by M. Bruch, Berlin, 1889; Das Mädchen vom See, op by O.A. Klauwell, 1889; Coronach, 4vv, chorus, orch by F. Simpson, 1891

Rokeby (1813): Rokeby Castle, op by W. Reeve, London, 1813; op sketched by Glinka

The Bridal of Triermain (1813): op by J. Ellerton, 1831, unperf.; operetta by A.P. Close, Dublin, 1862; cant. by F. Corder, Wolverhampton, 1886
The Lord of the Isles (1815): by G. Rodwell, London, 1834; La fidanzata delle isole, op by P. Candio, Verona, 1835; Edita di Lorno, op by G. Litta, Genoa, 1853; Robert Bruce, pastiche from ops of Rossini, Paris, 1948

NOVELS

Waverley (1814): op by G. Rodwell, London, 1824; pastiche from ops of Rossini, Paris, 1825; ov. by Berlioz, Paris, 1828; Première fantasie romantique d'après le roman Wawerley op.240 by Czerny; Die Hochländer, op by F. von Holstein, Mannheim, 1876 (revision of Die Gastfreunde, 1852, unperf.); Mottoes from the Waverleys, nar, choir, pf by H. Perkins, 1955
Guy Mannering (1815): ops by H. Bishop with T. Attwood, London, 1816 and L. Bertin, Bièvres, 1825; La strega di Dernecleugh, op by D. Pogliani-Gagliardi, Naples, 1830; Deuxième fantasie romantique d'après le roman Guy Mannering op.241 by Czerny; op by L. Lackey, 1980
Guy Mannering (1815) and *The Monastery* (1820): La dame blanche, op by A. Boieldieu, Paris, 1825; La donna bianca di Avenello, ops by S. Pavesi, Milan, 1830, and by C. Galliera, Cremona, 1854; L'écossais de Chatou, op by Delibes, Paris, 1869; Der Erbe von Morley, op by Holstein, Leipzig, 1872
The Antiquary (1816): opera by H. Bishop, London, 1820
The Black Dwarf (1816): The Wizard, op. by C.E. Horn, London, 1820; L'uomo del mistero, op by G. Pacini, Naples, 1841
Old Mortality (1816): The Battle of Bothwell Brig, op by H. Bishop, London, 1820; L'exile, ops by A. Adam, Paris, 1825, and A. Peellaert, Brussels, 1827; I puritani di Scozia, op [very distantly related] by Bellini, Paris, 1835; Froissart op.19, ov. by Elgar, 1890
Rob Roy (1817): op by J. Davy, London, 1818; Diane de Vernon, op by H.-L. Blanchard, Paris, 1831; ov. by Berlioz, Paris, 1831; Quatrième fantasie romantique d'après le roman Rob-roy op.243 by Czerny; ops by Curmi, Malta, 1833, F. Flotow, Royaumont, 1836, R. de Koven, New York, 1894, and C.E. Grieve, 1950
The Heart of Mid-Lothian (1818): op by H. Bishop, London, 1819; La prison d'Edimbourg, op by M. Carafa, Paris, 1833; La prigione d'Edimburgo, op by F. Ricci, Trieste, 1838; Le lutin de Culloden, op by A. Berlijn, unperf., 1848; Jeanie Deans, op by H. MacCunn, Edinburg, 1894; op by L. Lackey, Edinboro, PA, 1979
The Bride of Lammermoor (1819): Le Caleb de Walter Scott, op by A. Adam, Paris, 1827; Le nozze di Lammermoor, op by M. Carafa, Paris, 1829; La fidanzata di Lammermoor, ops by L. Rieschi, Trieste, 1831, and A. Mazzucato, Padua, 1834; Oblubienica z Lammermooru, op by J. Damse, Warsaw, 1832; A bruden fra Lammermoor, op by I. Bredel [lib by H.C. Andersen], Copenhagen, 1832; Ida, op by G. Bornaccini, Venice, 1833; Lucia di Lammermoor, op by Donizetti, Naples, 1835; Evelia, op by V. Cappelli, Pistoia, 1885; Ravenswood, incid music by A. Mackenzie, London, 1890; Wishes, Wonders, Portents, Charms, vv, chorus, insts, by W. Bergsma, 1974
A Legend of Montrose (1819): Montrose, op by H. Bishop, collab. W.H. Ware and J. Watson, London, 1822; Lied der Anna Lyle D830 by Schubert, 1825; Allan Mac-Aulay, op by M. Aspa, Naples, 1838; Anna Campbell, op by E. Torriani, Milan, 1854
Ivanhoe (1819): op by J. Parry (ii), London, 1820; Maid Marian, op by H. Bishop, London, 1822; Ilda d'Avenel, ops by F. Morlacchi, Venice, 1824, and G. Nicolini, Bergamo, 1828; pastiche from ops of Rossini, Paris, 1826; Romanze des Richard Löwenherz D907 by Schubert, 1827; Der Templer und die Jüdin, op by H. Marschner, Leipzig, 1829; op by G. Pacini, Venice, 1832; Il templario, op by O. Nicolai, Turin, 1840; Adelaide di Borgogna al castello di Canossa, op by A. Gandini, Modena, 1841 (incl. ballet scene after Scott); Troisième fantasie romantique d'après le roman Ivanhoe op.242 by Czerny; Ivanoé, op by T. Sari, Ajaccio, 1863; Rebecca, op by B. Pisani, Milan, 1865; ballet by E. Bianchi, Florence, 1869; Rébecca, op by A. Castegnier, *c*1882; op by A. Ciardi, Prato, 1888; op by A. Sullivan, London, 1891; op by V. Fedeli, unperf.
The Abbot (1820): Marie Stuart en Ecosse, op by F.-J. Fétis, Paris, 1823; Le château de Lochleven, op by P.-J. de Volder, Ghent, 1826
Kenilworth (1821): Leicester, op by Auber, Paris, 1823; ballets by F. Mirecki, Milan, *c*1825, and by M. Costa, London, 1831; Elisabetta al castello di Kenilworth, op by Donizetti, Naples, 1829; Elisabetta, op by P . Sogner, Malta, 1830; Zamek Kenilworth, op by J. Damse, Warsaw, 1832; Festen paa Kenilworth, op by C. Weyse [lib by H.C. Andersen], Copenhagen, 1836; Emmy, op by C. Loewe, 1842, unperf.; Das Fest zu Kenilworth, op by E. Seidelmann, Wrocław, 1843; op by V. Schira, 1848, unperf.; Il conte di Leicester, op by L. Badia, Florence, 1851, and by A. Baur, Parma, 1858; masque by A. Sullivan, Birmingham, 1864; Amy Rosart, ops by G. Caiani, Foiano della Chiana (Arezzo), 1878, I. de Lara, London, 1893, and A.L. Schiuma, Buenos Aires, 1920; ops by G.A. Macfarren, 1880, unperf., B.O. Klein, Hamburg, 1895, and H. Löhr, 1905–6 unperf.; Suite for Brass Band by A. Bliss, 1936
The Pirate (1822): Gesang der Norna D831 by Schubert, 1825
The Fortunes of Nigel (1822): Nigel, op by H. Bishop, London, 1823
Peveril of the Peak (1823): op by C.E. Horn, London, 1826; Fenella, op by S. Pavesi, Venice, 1831
Quentin Durward (1823): ops by H. Laurent, London, 1848, F.A. Gevaert, Paris, 1858, and A. Maclean, Newcastle upon Tyne, 1920; The King's Prize, op by A. Maclean, London, 1904
St Ronan's Well (1823): La Contessa di S Ronano, op by O. Frangini, Florence, 1874
Redgauntlet (1824): Le Revenant, op by J.M. Gomiz, Paris, 1833
The Betrothed (1825): I fidanzati, op by G. Pacini, Naples, 1829; Il contestabile di Chester, ops by G.B. Rabitti-Sangiorgio, Reggio d'Emilia, 1840, and N. Fornasini, Naples, 1845; La dama del castello, op by E. Dominguez, 1845
The Talisman (1825): The Knights of the Cross, op by H. Bishop, London, 1826; König Richard in Palästina, op by P.J. Riotte, Vienna, 1827; Il talismano, op by G. Pacini, Naples, 1829; Malek-Adhel, op by C. Loewe, Stettin, 1832; Richard en Palestine, op by A. Adam, Paris, 1844; The Knight of the Leopard, op by M. Balfe, inc., arr. M. Costa as Il talismano, London, 1874
Woodstock (1826): Alice, op by F. Flotow, Paris, 1837
The Highland Widow (1827): Sara, op by A. Grisar, Paris, 1836; Deborah, op by J.A.H. Devin-Duvivier, Paris, 1867
The Fair Maid of Perth (1828): La guantaia di Perth, op by C.Z. Caffarecci, Naples, 1839; La jolie fille de Perth, op by Bizet, Paris, 1867; La bella fanciulla di Perth, op by D. Lucilla, Rome, 1877

LYRICS

The Eve of St John (1800): op by A. Mackenzie, Liverpool, 1924
Donald Caird (1818): Donald Caird ist wider da, cant. by A. Jensen, op.54, 1875; cant. by G. Jacob, 1930
10 songs, duets and trio arr. Beethoven, 1810–18, pubd in Thomson's collections of Scottish, Irish and Welsh songs, London, 1814–17
God protect brave Alexander, written by Scott to fit Haydn's *Emperor's Hymn* for the Tsar's visit to Edinburgh, 1819
Waken, lords and ladies gay (1803): Jagdlied op.120 no.1, male vv, by Mendelssohn, 1837

ROGER FISKE/GEORGE BIDDLECOMBE

Scott-Heron, Gil (*b* Chicago, 1 April, 1949). American poet and musician. He grew up in the Bronx and first found fame with poetry highlighting the plight of black Americans and the inadequacies and inequalities of life in the early 1970s. He was at the forefront of the black arts movement with early raps including *The Revolution Will Not Be Televised*, *Sex Education Ghetto Style* and *The Get Out of the Ghetto Blues*. These became even more well known when he recited them for a début album, *Small Talk at 125th and Lenox* (Flying Dutchman, 1970). 1970s 'blaxploitation' was defined by this and other of his works, including *The Bottle*, *Angel Dust*, *Winter In*

America and the album *Pieces of a Man* (Flying Dutchman 1971) for which he collaborated for the first time with the pianist Brian Jackson. By the 1980s, his politics diversified to include songs covering nuclear disarmament, alcoholism, Iran and Watergate as well as racial injustice. He also diversified musically and by the 1980s his records included as much singing as recital. Personal crises led to retirement until a comeback in the mid-1990s. Although new material was a relative commercial failure, the formation of his own record label Rumal-Gia kept the memory of his groundbreaking early recordings successfully alive.

IAN PEEL

Scotti, Antonio (*b* Naples, 25 Jan 1866; *d* Naples, 26 Feb 1936). Italian baritone. A pupil of Ester Triffani Paganini, he made his début at the Circolo Filarmonico, Naples, in March 1889 as Cinna in Spontini's *La vestale*. The first part of his career, spent in Madrid, South America, Russia and the major Italian cities, ended with his début at La Scala (1898–9). During this period, smooth delivery, variety of colour, a fine legato and facility in the upper register were his chief qualities, together with the elegance of his acting, in a repertory that, as well as the typically 'noble' baritone roles in *Don Giovanni*, *Les Huguenots*, *I puritani*, *La favorite*, *Ernani* and *Don Carlos*, also included Falstaff and Tonio. After his début at Covent Garden (1899) and at the Metropolitan Opera (1899–1900), Scotti's performances were largely confined to London (until 1910, and in 1913–14) and New York, where he sang regularly until 1933, making his farewell appearance as Cim-Fen in Franco Leoni's *L'oracolo*, a role he had created in 1905. His later career coincided with the ascent of the actor over the singer and of the 'character' over the 'noble' baritone roles – Iago, Marcello, Scarpia, Sharpless, as well as Falstaff and Tonio. In this transformation, his voice soon lost its beauty, becoming thick and inflexible; but his already remarkable abilities as singer and actor were further refined, and explained his continuing hold over the New York public. In 1919 he formed, with colleagues from the Metropolitan, the Scotti Grand Opera Company, which for four seasons undertook tours of the USA and Canada.

Scotto. Italian family of booksellers, music printers and composers.

(1) **Ottaviano Scotto (i)** (*b* Monza; *d* Venice, 24 Dec 1498). Printer, publisher and bookseller. He came to Venice sometime before 1479, when his first imprint appeared; as a member of a patrician family, he styled himself 'nobilis vir'. Philosophy, medicine, law and classical literature were prominent among his publications, and he was an important publisher of liturgical incunabula containing printed notes and staves. Scotto's 1481 edition of the Roman Missal has spaces for music and, in some copies, printed staves on which music has been added by hand. Three books printed by Scotto in 1482 (two Roman Missals and a Dominican Missal) include black musical notation and red four-line staves, printed in two impressions, essentially the same method as that used by Petrucci. At least ten other printers occasionally worked for Scotto, and on his commission Johann Hamman printed, in the smaller octavo format, Roman Missals (1493 and 1497) and a Dominican Missal (1494 or 1495), all containing music and possibly printed from Scotto's type. Scotto's missals were notable achievements: that of 1481 was perhaps the second illustrated book to be printed in Venice; those of 1482 made him the first to print music from movable type in Venice; and his missal of 1493 was the first in octavo format. The delicacy of his note forms and the accuracy of his registration set standards infrequently surpassed in the next three centuries of liturgical music printing. His printer's mark was an orb-and-cross device with the initials O[ctavianus] S[cotus] M[odoetiensis].

Ottaviano Scotto's heirs were his nephews, who published under the imprint 'heirs of Ottaviano Scotto' until 1532. Amadio Scotto (*fl* 1498–1532) supported Petrucci financially. Paolo Scotto (*fl* 1507–14), bother of Girolamo and Ottaviano (ii), was a composer as well as a bookseller (Petrucci printed several frottolas and a *lauda* by him), but neither published any music.

(2) **Ottaviano Scotto (ii)** (*b* Milan, *c*1495; *d* ?Venice, after 1566). Printer and bookseller, cousin of Amadio and nephew of (1) Ottaviano (i). His connection with music publishing began in 1516 when, according to a Roman contract, he was the financial backer of Andrea Antico's *Liber quindecim missarum*. In 1533 he took over the firm's main branch, presumably after Amadio's death, and from then until 1539 dominated Venetian music printing. Works by Verdelot, Willaert, Festa and Arcadelt, mostly madrigals, motets and chansons, make up the bulk of his 14 extant editions. The music for these was printed from woodcut blocks supplied by Antico.

Although he remained an owner of the press until at least 1566, Ottaviano left its active management to his brother (3) Girolamo in 1539, possibly because of his interests in medicine and philosophy, or because of illness, suggested by his drawing up of a will in 1544 and again in 1547. Very few books, none containing music, were printed by him after 1539. His last surviving publication is an Aristotelian commentary issued jointly with Girolamo in 1552. Ottaviano died some time between 1567, when he was named in a contract, and 1569, when Girolamo referred to himself as sole owwer of the press. Respected as an editor and scholar, Ottaviano is mentioned in the writings of several men of letters including

Pietro Aretino, Antonio Minturno and Antonfrancesco Doni.

In 1539 Ottaviano (iii) (*fl* 1539–63) and Brandino Scotto, Amadio's sons, printed Antico's last music publication, Willaert's second book of four-voice motets. The following year they issued a music treatise, Giovanni del Lago's *Breve introduttione di musica misurata* (1540/*R*). From 1541 until at least 1558 Ottaviano (iii) ran his own press, issuing publications in several subjects, many duplicating those of the family's main branch. He also worked as an agent for his cousin Girolamo. Ottaviano di Amadio probably had a hand in the printing of 18 unsigned musical works of 1545 to 1547.

(3) **Girolamo** [Gerolamo, Geronimo, Hieronymus] **Scotto** (*b* Milan, *c*1505; *d* Venice, 3 Sept 1572). Printer, bookseller and composer, nephew of (1) Ottaviano Scotto (i) and brother of (2) Ottaviano Scotto (ii). He is first named in a petition for a printing privilege of 1536. He assumed directorship of the press in 1539, when he issued seven music editions and an Aristotelian commentary, and financed a liturgical book. The advent of single-impression printing enabled him to make the house of Scotto one of the foremost music publishers of the 16th century. Of the over 800 publications that emanated from his press during his 33-year tenure, some 409 music editions survive, a number rivalled only by the output of his contemporary, Antonio Gardano.

Scotto favoured music editions devoted to individual composers rather than the anthologies so popular in northern European centres. His earliest books feature works by Willaert as well as by composers outside the Venetian orbit, including Gombert, Morales and Jacquet of Mantua. In 1540 he published Veggio's *Madrigali a quatro voci . . . con la gionta di sei altri di Arcadelth della misura a breve*, the first book of *note nere* madrigals to acknowledge the new style in its title. The following year he introduced a new genre to Venetian music printing with the publication of Nola's first and second books of *Canzoni villanesche*. This 'Neapolitan' genre was to become hugely popular. In 1544 Scotto experimented with the layout of his publications. He issued Doni's *Dialogo della musica*, a musico-literary work, and five other editions in upright rather than the usual oblong quarto format. The upright orientation was not used again until 1564, after which all his quarto publications were upright.

A curious gap occurred in Girolamo's production of music in 1545–7, when only one music theory book, Pietro Aaron's *Lucidario*, was signed by him. During these same years 22 music editions, including six lute books, were issued without a printer's name. Title-pages to four of them contain a woodcut of a salamander amid flames, a device used by Girolamo and other printers on several non-music publications (a larger version of this woodcut had appeared in Scotto's 1543 edition of Lupacchino's *Madrigali a quattro*). Typographical and archival evidence suggests that a consortium of bookmen delegated 18 of the editions to the house of Scotto. But Girolamo, busy with at least 56 non-music items, probably sub-contracted the music to other printers, in particular his cousin Ottaviano di Amadio (iii).

Scotto continued to emphasize motets and madrigals in the 1550s and 1560s, turning to the works of a new generation of composers including Rore, Donato, Ruffo, Hoste da Reggio, Lassus and Striggio. He also printed liturgical collections by Contino, Phinot and Jacquet of Mantua, and in 1556 brought out *Villancicos de diversos autores* (the so-called 'Cancionero de Upsala'), one of the few 16th-century editions of Spanish song to be printed outside Spain and the only Scotto publication in choirbook format.

Scotto issued many anthologies of *canzoni villanesche*, changing their format in 1561 from oblong quarto to upright octavo. Between 1565 and 1568 the singer Giulio Bonagiunta published several important anthologies at the Scotto press. Of special interest is the *Corona della morte*, a collection commemorating the death of the poet Annibale Caro to which 15 composers and poets contributed madrigals, many based on Caro's name. Other significant editions include Maddalena Casulana's two books of four-voice madrigals (1568, 1570), the first extant publications by a woman composer; Vincenzo Galilei's *Fronimo: Dialogo* (1568), one of four music works issued by Girolamo in folio; and *Musica de virtuosi* (1569), an anthology assembled by Massimo Troiano containing madrigals by Lassus and others at the Bavarian court.

Girolamo printed over 220 of his own works, including five books of madrigals and two books of *canzoni alla napolitana*. A book of three-voice madrigals containing the *Vergine* cycle is now lost. He was a skilled madrigal composer who kept up with the latest trends. For his *Madrigali a quattro voci* (1542) he wrote six *note nere* and seven *voci pari* madrigals, genres in vogue in the early 1540s, possibly because Scotto fostered them with his publications. Later, when lighter secular forms and the madrigal cycle gained in fashion, three-voice *canzoni alla napolitana* and multi-part *canzoni* predominated his editions. Girolamo excelled in writing two- and three-voice madrigals. He set many popular texts employed by other composers. While he paraphrased a few madrigals, such as Verdelot's 'S'io pensassi madonna che mia morte' and Arcadelt's 'Non v'accorget'amanti', most of the duos and trios are freely composed. His *Primo libro a due voci* proved the most popular, being printed at least five times from 1541 to 1572. The didactic purpose of this and of his three-voice madrigals is unmistakable, since Scotto organized and labelled the pieces according to genre and mode.

Although Scotto frequently changed the designs of his title-pages (fig.1), initials and text founts, he employed the same music fount for nearly 20 years. He probably owned the punches and sold or leased the matrices to several other printers (including Gardano who used the fount briefly in the 1540s). In 1554 he introduced a larger music fount ('stampa grosetta'), which he used more frequently in the 1560s.

Girolamo owned nearly 20 different printer's marks. There are three main designs, which incorporated symbols of Venice and appeared in sizes to match various formats: a device depicting Fame with the initials O.S.M.; an anchor set in a log (symbolizing stability on sea and land) surrounded by a palm frond (virtue) and an olive branch (peace) with the initials S[ignum] O[ctaviani] S[coti]; and another of Peace atop a globe (fig.2).

Scotto maintained close relationships with several music printers, including Francesco Rampazetto, whose music fount and initials appear in two Scotto publications of 1555 and 1556, Ricciardo Amadino, who witnessed Girolamo's will, and possibly Antonio dell'Abbate (? di

Rovigo), who was the publisher of *La courone et fleur des chansons a troys* (1536). His precise connection with Antonio Gardano is more difficult to ascertain. Scotto underwrote Gardano's 1541 edition of Jhan Gero's *Madrigali italiani, et canzoni francese a due voci*, which was in fact a reprint of a 1540 edition printed by Scotto. Throughout their long careers Scotto and Gardano reprinted a significant number of each other's titles, occasionally in the same year. Accusations of piracy have been levelled at one or the other, but no evidence substantiates a bitter rivalry between the two. Scotto and Gardano obviously prospered from this relationship, since they maintained a near monopoly on Italian music printing for over 30 years.

Music printing was only one aspect of Girolamo's business. He also marketed books throughout Europe, had a financial interest in retail shops in several Italian cities and acted as a publisher by underwriting the editions of other printers. He continued to issue liturgical books and works in law, medicine, classical literature, theology, and vernacular history and literature. The speciality that won him respect and financial success was scholasticism, notably the Latin translations, commentaries and interpretations of Aristotle. In his *Pandectarum* of 1548 the Swiss bibliographer Conrad Gesner dedicated the preface on civic philosophy to Scotto, whose importance as a printer and publisher did not go unnoticed by his peers. In 1571 he was elected the first Prior of the Venetian Guild of Printers and Booksellers.

1. *Title-page of Rossetto's 'Il lamento di Olimpia' (Venice: Girolamo Scotto, 1567)*

2. *Two of Girolamo Scotto's printer's marks from reprints (1558, 1551) of his own 'Il primo libro de i madrigali a due voci' (Venice, 1541)*

WORKS
published in Venice

Il primo libro de i madrigali, 2vv (1541; partly repr. 1562 as Il terzo libro delli madrigali)
I madrigali, con alcuni alla misura breve, 3vv (1541; rev. and enlarged 1562 as Il secondo libro delle muse)
Madrigali, 4vv, con alcuni a la misura breve, et altri a voci pari (1542)
Il secondo libro delli madrigali, 2vv (1559)
Madrigali, 3vv (1570)
Corona: il secondo libro delle canzoni alla napolitana, 3vv (1571)
Corona: il terzo libro delle canzoni alla napolitana, 3vv (1571)
Works in 1541[4], 1545[7], 1549[14], H. Ghibel: Primo libro dei madrigali, 3vv (1551)
Vergine, 3vv, lost

(4) Melchiorre [Marchiore, Marchiò] **Scotto** (*b* Milan, *c*1540; *d* Venice, 1613). Printer and bookseller, nephew and heir of (3) Girolamo Scotto. He acted as an agent for the Scotto press as early as 1565, and managed it after Girolamo's death. He continued to print music in great quantity, with especially numerous editions of Asola, Palestrina, Ferretti, Giovannelli, Lassus, Monte and Alessandro Striggio (i), as well as numerous anthologies and lute tablatures. He issued almost no music in the new concertato genres. Among his most elaborate books are the reprint of Gasparo Fiorino's *La nobiltà di Roma*, with part-music and lute tablature on facing pages; three volumes of compositions by Fernando de Las Infantas (1578–9); and a reprint of Galilei's *Fronimo* (1584). His output represents the more conservative side of the market, both in his editions of earlier music and in his choice of contemporary composers. He continued the family's practice of printing non-musical books, although in much smaller numbers, and of engaging in joint ventures for specific expensive publishing projects. He used printer's marks and devices already associated with the firm and two new ones, one a gryphon with the head of a cat or leopard (instead of an eagle), the other the more frequently seen device showing the three Graces, with the motto 'Virtus in omni re dominatur'. He published a trade list in 1596. In his will he named his natural son Baldissera as heir, but after 1613 only a few religious books appeared with the imprint 'Heredi di Girolamo Scotto'. Baldissera died in 1615, but because of his illegitimate birth the authorities refused to recognize his will and sold the property at public auction. However, at least one book with the imprint 'Scotus' appeared later, in 1619.

THOMAS W. BRIDGES (1, 4), JANE A. BERNSTEIN (2, 3)

Scotto, Renata (*b* Savona, 24 Feb 1933). Italian soprano. After studying in Milan, she made her début in 1952 at Savona as Violetta, repeating the role at Milan (Teatro Nuovo) in 1953. She first sang at La Scala in 1954 as Walter (*La Wally*), then appeared in Rome and Venice. In 1957 she made her London début (Stoll Theatre) as Mimì, then sang Adina, Violetta and Donna Elvira. The same year she replaced Callas as Amina in one performance of *La sonnambula* at Edinburgh for La Scala, with whom she later sang Elvira (*I puritani*), Antonida (*A Life for the Tsar*), Marguerite, Nannetta and Bellini's Giulietta. She made her American début (1960) in Chicago as Mimì and her Covent Garden début (1962) as Butterfly; later roles included Gilda, Manon, Amina and Lady Macbeth. At the Metropolitan (1965–87) Scotto took on heavier roles from 1974, singing Leonora (*Il trovatore*), Luisa Miller, Amelia (*Ballo in maschera*), Hélène (*Les vêpres siciliennes*), Desdemona, Elisabeth de Valois, Manon Lescaut, Musetta, Giorgetta (*Il tabarro*), Angelica, Lauretta, Berthe (*Le prophète*), Adriana Lecouvreur, La Gioconda, Francesca da Rimini and Norma. Her repertory also included *Lucia di Lammermoor*, *Maria di Rohan*, *Anna Bolena* and *La straniera*.

One of the leading Italian *lirico spinto* sopranos of her day, Scotto invested her roles with a rare combination of vocal agility and dramatic power. Pathos, as in the second act of *La traviata* or the last of *La sonnambula* and *Madama Butterfly*, was her particularly strong suit, and few sopranos have encompassed so easily the qualities called for by both Lucia and Butterfly (which she recorded in a classic version under Barbirolli). Among Scotto's other operatic recordings are eloquent interpretations of Violetta, Gilda and Desdemona.

ALAN BLYTH

Scotto, Vincent (*b* Marseilles, 20 April 1876; *d* Paris, 15 Nov 1952). French composer and songwriter. The son of Neapolitan immigrants, he learned the guitar as a child and began writing simple songs. Having no formal training, he never learned to read music and always relied on friends to transcribe his works. One of his songs, *Le navigatore*, was picked up by the singer Polin, who transformed it into *La petite Tonkinoise*, whereupon it became a hit throughout France, and eventually around the world. After this immense early success, the teenage Scotto moved to Paris in 1895 and in due course became the leading composer of popular chansons for Parisian music-hall performers, including Mistinguett, Maurice Chevalier, Josephine Baker, Tino Rossi and Edith Piaf. In the 1910s and 20s, Scotto steadily wrote operettas for the Parisian café-concerts.

In 1931 he returned to Marseilles and presented the operetta *Au pays du soleil*, which became an immediate success owing to its cheerful southern charm, regional comedy and colourful songs. Thereafter, Scotto became a mainstay of Marseilles operetta, writing a string of successful works including *Trois de la marine* (1933) and *Un de la Canebière* (1935), all set in the south of France: many of these remain in the French repertory. In 1932 the playwright-director Marcel Pagnol asked him to write the score for his film *Fanny*. Thus began a collaboration between the two Marseillais that would span more than two decades and over a dozen films, most prominently *Angèle* (1934), *César* (1936), *Topaze* (1936) and *La femme du boulanger* (1938). Scotto wrote scores for over 200 films, including many of the great works of the golden age of French cinema, such as Duvivier's *Pépé le Moko* (1937) and *L'homme du jour* (1940).

Unlike many film composers during this period, Scotto did not see himself as part of the high cultural tradition of French music. Rather, his leanings were more towards the popular language and style of the café-concert and the operetta that characterized the *belle époque*. His songs usually reflected Parisian urban sophistication, while his operettas and film scores captured the charm of Provence, its warmth and the colourfulness of its inhabitants. Later

Scotto turned to more substantial stage works, composing three large-scale operettas which adopted a more dramatic musical language, including his most successful work: *Violettes impériales* (1948). He is credited with over 4000 songs, including *Ah! si vous voulez de l'amour* (1907), *Les ponts de Paris* (1913), *Le plus beau tango du monde* (1934) and *La java bleue* (1938). He was made a Chevalier of the Légion d'Honneur in the late 1940s.

WORKS

Stage: Hugues (1910); Suzie (1912); Charlot de la chapelle (1919); L'amour qui rôde (1920); Zo-Zo (1922); Coeur d'artichaut (1924); La Princesse du Moulin-Rouge (1924); La poule des Folies-Bergère (1925); La famille Banaste (1925); Au pays du soleil (1931); Trois de la marine (1933); Arènes joyeuses (1934); Zou le Midi bouge (1934); Un de la Canebière (1935); Les gangsters du Château d'If (1936); Le roi des Galéjeurs (1938); Les Gauchos de Marseilles (1946); Violettes impériales (1948); La danseuse aux étoiles (1949); Les amants de Venise (1953)

Film: Over 200 film scores, incl. Le Roman de Renard (1930); Fanny (1932); Marie, légende hongroise (1932); Tavaszi Zapor (1932); L'agonie des aigles (1933); Léopold le Bien-Aimé (1933); Tren de las 8'47 (1934); Angèle (1934); Joffroi (1934); Marseille (1934); Zouzou (1934); Cigalon (1935); Merlusse (1935); César (1936); Topaze (1936); Cinderella (1937); Naples au baiser de feu (1937); Sarati the Terrible (1937); Pépé Le Moko (1937) Algiers (1938); La femme du boulanger (1938); Battement de coeur (1939); Monsieur Brottoneau (1939); Fausse alerte (1940); La fille du puisatier (1940); L'homme du jour (1940); The Kiss of Fire (1940); Un chapeau de paille d'Italie (1940); Nais (1945); La belle meunière (1947); L'ingénue libertine (1950)

MARK BRILL

Scozzese, Agostino (*b* Lecce, *c*1550; *d* ?Bitonto, nr Bari, after 1584). Italian composer and priest. The little that is known about his life derives from the title-pages and dedications of his two extant publications: *Il primo libro di canzoni alla napolitana a tre a quattro & a cinque voci* (Venice, 1579) and *Il primo libro de madrigali a cinque voci* (Venice, 1584). In the dedication to the set of 28 canzoni he states that within a few months of resuming his studies he was again plagued by a long-standing illness. He dedicated his madrigals (a total of 29 pieces) to the chief priest of Bitonto, whom it is clear from the dedication that he then served.

PATRICIA ANN MYERS

Scraper (Fr. *racle*, *racleur*, *râpeur*; Ger. *Raspel*, *Schrapidiophon*; It. *raspa*; Sp. *raspador*). An idiophone with a corrugated surface that is scraped by a non-sonorous object. In the classification system of Hornbostel and Sachs (reproduced under IDIOPHONE) scrapers are grouped as follows: scraped sticks (usually bone or wood, bone scrapers having been used in Stone Age Europe as well as in Aztec ceremonies); scraped tubes (e.g. the Venezuelan *charrasca*, made from a bull's horn); scraped vessels (e.g. the Cuban GÜIRO, made by cutting or burning a row of notches on a gourd); and scraped wheels (*see* COG RATTLE and RATCHET) that have a tongue fixed in a frame which strikes the teeth of a wheel (see illustration). The improvised scraper made from a washboard (*see* WASHBOARD BAND), which originated among black Americans in the 19th century, belongs to none of these categories. Scrapers are found in most continents. They are in widespread use in Africa, Asia and the Americas. In Europe they have all but disappeared but the Afro-American *güiro* has now been adopted by Western rhythm bands. In Oceania scrapers are most common in Papua

French cog rattle (crécelle), 15th–16th centuries (Metropolitan Museum of Art, New York)

New Guinea; they are found there wherever the chewing of betelnut is practised. Lime eaten with the nut is contained in decorative gourds, the associated notched 'licking stick' of which is scraped across the opening to accompany singing. In the Banks Islands of Vanuatu scrapers were used to produce spirit voices.

□

Scratching. The use of record turntables as musical instruments, first developed by hip hop DJs in the late 1970s (*see* DJ(ii)) who developed rhythmic backing for early rappers by pushing and pulling records on the turntable to create backward sections, short stabs, loops and musical bursts. This worked to best effect when using two turntables and a mixer to cut and fade between the two. It also provided the backing to the break dancers who emerged at the same time. Malcolm McLaren's single *Buffalo Girls* (1982) introduced scratching to UK audiences, and by the late 1980s thousands of dance records had been produced using this technique, and many more incorporated short samples of scratching in their production. Notable early scratch DJs include Shortkut, DJ Flare (inventor of the 'flare' scratch) and Mix Master Mike. The annual Disco Mix Club (DMC) DJ championships were founded in 1987, most famously launching the 1991 winner, Q Bert. Its own terminology and styles range from the 'baby scratch' (a sharp forward, backwards movement) to the 'crab scratch' (a complex four-finger movement of the fader at the same time as the record is scratched).

IAN PEEL

Scratch Orchestra. An orchestra devoted to the performance, composition, understanding and dissemination of experimental music, founded in 1969 by the English composer Cornelius Cardew with Michael Parsons and Howard Skempton. The orchestra's immediate precursors were the English improvisation group AMM and

Cardew's class on experimental music at Morley College; its manifesto was published in the *Musical Times* in 1969, and contains a list of potential compositions for performance, among them works by American experimentalists Young, Riley and Cage.

At its height the orchestra numbered over 100 members. Membership was not limited to those with musical training but open to all with an interest in experimental music, creating a group with a diversity of musical backgrounds. The unique make-up of the orchestra led to the creation of its own genre, 'scratch music', a quiet music written or improvised independently by each member and then performed simultaneously, either during meetings or concerts. Other pieces written for and performed by the orchestra include Christian Wolff's *Burdocks* and Cardew's *The Great Learning*.

For the first two years the group's anarchical social and political structure meant that all musical and organizational ideas were accepted equally. After two years, discontent among the members brought about the politicization of the orchestra in a Marxist direction: works to be performed had now to contain Marxist elements such as political texts or proletariat work songs. This politicization led by Cardew and other core members, was partially responsible for the orchestra's disbandment by the mid-1970s. Despite its troubled end, many former members are committed to maintaining the ideals of the orchestra in their work up to the present day.

KATHRYN GLEASMAN PISARO

Scriabin, Alexander Nikolayevich. *See* SKRYABIN, ALEKSANDR NIKOLAYEVICH.

Scribanus, Iohannes. *See* ESCRIBANO, JUAN.

Scribe, (Auguste) Eugène (*b* Paris, 24 Dec 1791; *d* Paris, 20 Feb 1861). French dramatist and librettist.

1. LIFE. Scribe attended the Collège Sainte-Barbe in Paris, where he won a number of prizes. He then entered the law firm of Guillonné-Merville; however, instead of studying, he spent his time writing *comédies-vaudevilles* in collaboration with his friend from Sainte-Barbe, Germain Delavigne. His first work to be produced (unsuccessfully) was *Le prétendu sans le savoir, ou L'occasion fait le larron*, performed on 13 January 1810 at the Théâtre des Variétés and published under the pseudonym of Antoine. He had more success with *Les derviches* (1811) and *L'auberge, ou Les brigands sans le savoir* (1812), both written with Delavigne for the Théâtre du Vaudeville. The following year he wrote the first of three melodramas; the final one, *Les frères invisibles* (1819) for the Théâtre de la Porte Saint Martin, was the most successful. In 1813 he also wrote his first *opéra comique* libretto, *La chambre à coucher*, with music by L. Guénée. In 1817 one of his friends and collaborators, Delestre-Poirson, became director of the new Théâtre du Gymnase-Dramatique, which aimed to provide opportunities for promising new writers and actors. On 15 March 1820 an agreement was reached between Scribe and the theatre whereby he undertook to write exclusively for it among the secondary theatres. This contract, which still left him free to write plays for the major theatres of Paris, led to the production of a great number of vaudevilles, many of which were also performed successfully abroad.

In the 1820s Scribe wrote a large number of dramas for the major theatres. His first work for the Théâtre Français was *Valérie* (1822), and many works for the Opéra-Comique followed, including *Le neige*, *Léocadie*, *La fiancée*, *Le maçon* and *Fra Diavolo*, all with music by Auber, and *La dame blanche*, set by Boieldieu. His first libretto for the Opéra, the three-act *Le comte de Claros* (1823), was accepted but never set to music; however, his first scenario for a ballet-pantomime, *La somnambule, ou L'arrivée d'un nouveau seigneur* (written in collaboration with the choreographer Jean Aumer), was set to music by Ferdinand Hérold and staged at the Opéra in 1827. The following year his five-act libretto of *La muette de Portici* (written in collaboration with Delavigne, who had drafted the first, three-act version) was staged, with music by Auber. Not only was it his first serious opera to be set to music, but it was also the first in the new genre of grand opera. In the same year *Le comte Ory*, with a score composed and arranged by Rossini, was produced at the Opéra. During these years Scribe also published some successful novels in serial form in the *Revue de Paris*, the *Journal des débats*, *Le siècle* and *Le constitutionnel.*

From 1830, Scribe was an important dramatist and the leading librettist of French opera, with particularly successful relationships with Auber and Meyerbeer. As a successful author with a shrewd eye to his contracts, he made a large fortune, and had no difficulty in reconciling artistry with capitalism. He kept careful accounts of the high fees he earned, and amassed huge sums of money. However, he also set up a fund for former colleagues in need, and other impoverished musicians and dramatists, into which he paid 13,000 francs a year. After 1832 he spent most of his time at his fine country estate of Montalais, and later at his large property in Séricourt, which had a château, a *chalet du théâtre* and several lakes. He invited his colleagues there and welcomed composers and operatic directors on working visits. His closest collaborator, Germain Delavigne, lived on his country estates for some time; Auber often visited at weekends, and occasional visits from Meyerbeer are mentioned in their correspondence.

His importance was recognized as early as 1827, when he was awarded the Légion d'Honneur, and although he was far from fitting the image of the Romantic idealistic artist, he was elected a member of the Académie Française in 1836. In his acceptance speech for the latter, he began by expressing disagreement with the view that a writer of *comédies* was also a historian who should make historical truth the subject of his works. Instead, he declared that *comédie* served to depict moral truths, independently of any particular period and usually without engaging in social realism. It should be fictional, and the truth should be left to vaudeville and popular chansons. He also

redefined the purpose of theatre, suggesting that the public no longer went to the theatre to be instructed according to the 18th-century ideal, but to be diverted and entertained.

Although it has often been suggested that the Opéra and Opéra-Comique had what amounted to a monopoly of established composers and dramatists, Scribe in fact worked at both theatres with many young composers and writers who were not of the first rank. At the Opéra-Comique, for example, although he wrote 28 works for Auber, he also provided librettos for more than 30 other composers, including Adam, Carafa, Rudolph Kreutzer, Louise Bertin and Offenbach. In addition, he wrote *opéras comiques* for the Gymnase-Dramatique, the Théâtre Lyrique, the Bouffes Parisiens, and for the Koninklijke Franse Opera in The Hague. Similarly, at the Opéra, although his best-known works were written for Auber, Halévy, Meyerbeer and Donizetti, he also produced librettos for Verdi, Gounod and a number of inexperienced composers, as well as four texts for foreign opera houses. His literary collaborators on plays and librettos were even more numerous; 70 names appear on the title pages of his published texts, although only Germain Delavigne, Delestre-Poirson, Mazères, Mélesville and Saint-Georges worked with Scribe in all genres.

2. WORKS.

(i) Creative process. Unlike many Italian librettists, Scribe did not revise texts written by other dramatists, but turned novels, historical events or even his own vaudevilles into librettos, by a process of very free adaptation. This often involved the merging of different sources, to a point where it is almost impossible to identify them. He kept the various versions of his works carefully, from the initial plan through the drafts of individual vocal pieces, to the final, clean copy, and he often preserved the drafts of his colleagues and copyists, and relevant correspondence and contracts. These manuscripts were given to the Bibliothèque Nationale by his son-in-law in 1911, and, together with additional materials, they constitute the Scribe Archive in the Manuscripts Department (*F-Pn* n.a.fr.22480–22650).

The correspondence of Scribe and Auber provides much evidence of the librettist's musical competence. Auber would not only give him and Delavigne scores and ask their opinion, but he would also visit Séricourt to play them passages he had just composed; furthermore, the librettists closely tailored roles for individual singers. Auber often composed certain pieces in advance, and gave Scribe a *monstre*, a provisional text providing only the general outline of the verses required. Meyerbeer also valued Scribe's musical proficiency, describing his librettos (ii, p.125) as 'tailor-made for the music, full of dramatic, emotional and also merry situations', that contained 'excellent parts' for the available singers. In addition, Scribe's versatility is illustrated by his desire to write an *opéra comique* libretto for Meyerbeer on the story of *Le portefaix*. He suggested (ii, pp.205–6) that the composer might put together an opera from musical numbers he had already composed: 'whatever these pieces may be like, it will be my business to create a text which can be adapted to them, and shall have a success which will enrich the theatre and cost you no time or trouble'. However, nothing came of this project, despite Scribe's attempts to convince Meyerbeer that it could be suitably adapted for the Opéra.

Scribe's work during rehearsals and his strict control over the first performances after the première were both valued and feared. Adam writes (p.22), for example, 'Scribe made me rewrite the finale of the first act three times, and then, after the dress rehearsal, he improvised a fourth version, which I had to rewrite in a single night'. Similarly, Meyerbeer notes (ii, p.161): 'Scribe alone has made so many changes to the piece during rehearsals that they affected the score itself, in a ricochet effect, and parts of my previous version could not be used'. However, after *Robert le diable* (1831) Scribe found collaboration with Meyerbeer increasingly difficult, as a letter written to the composer on 2 April 1835 (ii, 450) makes clear: 'My fear that you would not be satisfied constantly prevented me from being satisfied myself'. Indeed, Verdi's complaints about Scribe's indifference to his wish to change the last act of *Les vêpres siciliennes*, and disputes with Gounod, seem to be typical of the aging librettist.

(ii) Genres. Scribe was the pioneer of vaudeville, a genre that developed during the Restoration in reaction to the emotional and unrealistic nature of Romantic drama. His 'well-made plays' depended upon careful preparation, whereby events were made to seem both logical and unpredictable to the audience. He entertained his typically bourgeois audiences with surprise and intrigue, and had such success that he was able to live on the income from his vaudevilles from an early age.

The musical component in vaudevilles included numbers drawn from operas and other musical genres of the time that were in the public domain, and original compositions. In *Les derviches*, for example, Scribe used 21 pre-existing melodies, known as *timbres*, some performed in dialogue or with a chorus, as well as a duet, a vaudeville finale and two original compositions by the music director of the Théâtre du Vaudeville, Joseph Doche. In *Estelle, ou Le père et la fille* (1834), there are ten *timbres* and three numbers from Auber's opera *Gustav III, ou Le bal masqué*. Like the popular *chansonniers* of the 18th and early 19th centuries, Scribe was able to parody *timbres* and dance or other instrumental movements, and his contemporaries thus regarded him as the representative of a literary tradition to which Favart, Panard, Théaulon and other writers belonged (Castil-Blaze, ii, p.168). Sainte-Beuve (i, p.260) described Scribe as 'the most skilful dramatic engineer of our age'.

Scribe's *opéras comiques* run from light, purely entertaining material to ironic and even tragic subjects, and have been popular internationally. They have been described as having better dialogue and more interesting characterizations than his grand operas (Smith, p.289), a fact which no doubt reflects his experience with vaudeville. Although it has not been established to what extent Scribe's texts for the genre were political, in some works he clearly refers to contemporary ideological issues. The 19th-century anti-Wagnerian critic W.H. Riehl noted (pp.108–9):

> [*Le dieu et la bayadère*] is full of humorous references to bad legal practices, ecclesiastical stupidity, etc. Hatred of the Jesuits is expressed in the earthly passages, as is bitter opposition to rule by violence in the Italian and Swiss references, and incidentally the Christian dogma of God made man is mocked in some detail in the figure of the Indian deity wandering on earth as an extremely plaintive tenor.

Although Scribe and Auber turned to more serious and difficult pieces later in their careers, rather than signalling a decline in their creative powers as is often suggested,

this was part of their wish to assist the changes necessary in the field of *opéra comique*.

Scribe brought about a revolution in music drama with his grand opera librettos and won a new audience for the Opéra. The Christian Middle Ages superseded mythological subjects, and the Catholic Church and faith, with all its implications, thereby gained access to the stage. In addition, opposition between different social or philosophical groups was at the root of Scribe's plots. A new link with contemporary aesthetics was formed as dramatic and musical ideas were introduced into grand opera from other genres, such as melodrama and Romantic drama. This was combined with a new attention to the talents of everyone involved in opera, including the *metteur en scène*, and a new recognition of the importance of rehearsal. It is generally agreed that a decisive step was taken with *La muette de Portici*, which dealt with a 17th-century uprising: a dumb woman was the protagonist in the manner of a melodrama, spectacular situations were placed at the centre of the action, and there was an alternation between the public and private strands of the plot. Its status as a national work was emphasized by its frequent performance at times of national crisis, when patriotic songs were introduced into the third act. The history of the libretto, however, proves that the closing chorus, which turns the interpretation of the revolution upside down, was the result of censorship (Schneider and Wild, 1993).

Although Scribe's ballet scenarios make up only a small part of his dramatic writing, some of those written in collaboration with Aumer and featuring Marie Taglioni are among the most important of Romantic ballets. *Manon Lescaut* (1830), for example, includes, 'Le triomphe de l'amour', an *intermède* after the first act, which satirizes mythology and 18th-century opera.

Scribe has always had his critics, notably among men of letters including Théophile Gautier and Théodore de Banville, who accused him of being the ultimate in bourgeois art and philistinism, pleasing the masses and writing 'théâtre vide'. However, his dramatic technique and his mastery of dramatic proportions and of many different genres have been more generally acknowledged. Gustave Bertrand, for example, particularly praises his ability to combine the various elements of a scenario, which often led to dramatic situations of a very new and powerful nature. He also notes the political significance of the subjects. Often criticized for lapses of grammatical style, Scribe often achieved new dramatic boldness on such occasions. His influence has been noted on Wagner.

LIBRETTOS

Edition: *Eugène Scribe: oeuvres complètes* (Paris, 1874–85) [75 vols.]
first performed in Paris unless otherwise stated

OPÉRAS COMIQUES

La chambre à coucher, ou Une demi-heure de Richelieu, Guénée, 1813
La redingote et la perruque, R. Kreutzer and Kreubé, 1815
La comtesse de Troun, Guénée, 1816
La meunière (with Mélesville [A.-H.-J. Duveyrier]), García, 1821
Le paradis de Mahomet, ou La pluralité des femmes (with Mélesville), R. Kreutzer and Kreubé, 1822
La petite lampe merveilleuse (with Mélesville), A. Piccinni, 1822
Leicester, ou Le château de Kenilworth (with Mélesville), Auber, 1823
Le valet de chambre (with Mélesville), Carafa, 1823
La neige, ou Le nouvel Eginhard (with G. Delavigne), Auber, 1823
Les trois genres, Auber and Boieldieu, 1824
Concert à la cour, ou La débutante (with Mélesville), Auber, 1824
Peau d'âne, 1824
Léocadie (with Mélesville), Auber, 1824
Le maçon (with G. Delavigne), Auber, 1825
La dame blanche, Boieldieu, 1825
La vieille (with G. Delavigne), Fétis, 1826
Le timide, ou Le nouveau séducteur (with J.X.B. Saintine), Auber, 1826
Fiorella, Auber, 1826
Le loup-garou (with Mazères), Bertin, 1827
La lettre posthume (with Mélesville), Kreubé, 1827
La fiancée, Auber, 1829
Les deux nuits (with N. Bouilly), Boieldieu, 1829
Fra Diavolo, ou L'hôtellerie de terracine, Auber, 1830
L'enlèvement, ou Les Guelfes et les Gibelins (with Saint-Victor and d'Espagny), P.-J.-G. Zimmermann, 1830
L'amazone (with Delestre-Poirson and Mélesville), Beauplan, 1830; after vaudeville: *Le petit dragon*, 1817
La marquise de Brinvilliers (with Castil-Blaze), Auber, Batton, Berton, Blangini, Boieldieu, Carafa, Cherubini, Hérold and Paer, 1831
La médecine sans médecin (with Bayard), Hérold, 1832
La prison d'Edimbourg (with E. de Planard), Carafa, 1833
Lestocq, ou L'intrigue et l'amour, Auber, 1834
Le fils du prince, A. de Feltre, 1834
Le chalet (with Mélesville), Adam, 1834
Le cheval de bronze, Auber, 1835
Le portefaix, Gomis, 1835
Actéon, Auber, 1836
Les chaperons blancs, Auber, 1836
Le mauvais-oeil (with G. Lemoine), Puget, 1836
L'ambassadrice (with Saint-Georges), Auber, 1836
Le domino noir, Auber, 1837
Le fidèle berger (with Saint-Georges), Adam, 1838
Marguerite (with Planard), L. Boieldieu, 1838
La figurante, ou L'amour et la danse (with H. Dupin), Clapisson, 1838
Régine, ou Deux nuits, Adam, 1839
Les treize (with P. Duport), Halévy, 1839
Polichinelle (with C. Duveyrier), Montfort, 1839
Le shérif, Halévy, 1839
La reine d'un jour (with Saint-Georges), Adam, 1839
Zanetta, ou Joueur avec le feu (with Saint-Georges), Auber, 1840
L'opéra à la cour (with Saint-Georges), Grisar, L. Boieldieu, 1840
La guitarréro, Halévy, 1839
Les diamants de la couronne (with Saint-Georges), Auber, 1841
Le main de fer, ou Un mariage secret (with de Leuven), Adam, 1841
Le diable à l'école, Boulanger, 1842
Le duc d' Olonne (with Saintine), Auber, 1842
Le code noir, Clapisson, 1842
Le kiosque (with Duport), Mazas, 1842
La part du diable, Auber, 1843
Le puits d'amour (with de Leuven), Balfe, 1843
Lambert Simnel (with Mélesville), Monpou and Adam, 1843
Cagliosto (with Saint-Georges), Adam, 1844
Oreste et Pylade (with Dupin), Thys, 1844
Le remplaçant (with Bayard), Batton, 1844
La sirène, Auber, 1844
La barcarolle, ou L'amour et la musique, Auber, 1845
Le ménétrier, Labarre, 1845
La charbonnière (with Mélesville), Montfort, 1845
Ne touchez pas à la reine (with G. Vaëz), Boisselot, 1847
Le sultan Saladin (with Dupin), Bordèse, 1847
Haydée, ou Le secret, Auber, 1847
La nuit de noël, ou L'anniversaire, Reber, 1848
La fée aux roses (with Saint-Georges), Halévy, 1849
Giralda, ou La nouvelle Psyché, Adam, 1850
La chanteuse voilée (with de Leuven), Massé, 1850
La dame de pique, Halévy, 1850
La statue équestre, Clapisson, Lyons, 1850
Mosquita la sorcière (with Vaëz), Boisselot, 1851
Le vieux château, Van der Doës, The Hague, 1852
Les mystères d'Udolphe (with G. Delavigne), Clapisson, 1852
Marco Spada, Auber, 1852
La lettre au bon dieu (with F. de Courcy), Duprez, 1853
Le nabab (with Saint-Georges), Halévy, 1853
L'étoile du nord, Meyerbeer, 1854
La fiancée du diable (with H. Romand), Massé, 1854
Jenny Bell, Auber, 1855
Jacqueline (with L. Battu and E. Fournier), Comte d'Osmond and J. Costé, 1855

Manon Lescaut, Auber, 1856
La chatte métamorphosée en femme (with Mélesville), Offenbach, 1858
Broskovano (with H. Boisseaux), L. Deffès, 1858
Les trois Nicolas (with B. Lopez and G. de Lurieu), Clapisson, 1858
Les petits violons du roi (with H. Boisseux), Deffès, 1859
Yvonne, Limnander, 1859
Le nouveau Pourceaugnac (with Delestre-Poirson), A. Hignard, 1860
Barkouf (with Boisseaux), Offenbach, 1860
La circassienne, Auber, 1861
Madame Grégoire (with Boisseaux), Clapisson, 1861
La beauté du diable (with E. de Najac), G. Alary, 1861
La fiancée du roi de Garbe (with Saint-Georges), Auber, 1864
L'ours et le pacha (with Saintine), F. Bazin, 1870

OPERAS

Robin des bois, ou Les trois balles (with Castil-Blaze and T. Sauvage), music arr. from Weber's Der Freischütz, 1824
La muette de Portici (with G. Delavigne), Auber, 1828
Le comte Ory (with Delestre-Poirson), Rossini, 1828; after vaudeville, 1816
Alcibiade, C.L.J. Hanssens, Brussels, 1829
Le dieu et la bayadère, ou La courtisane amoureuse (opéra-ballet), Auber, 1830
Le philtre, Auber, 1831
Robert le diable (with G. Delavigne), Meyerbeer, 1831
Le serment, ou Les faux-monnayeurs (with Mazères), Auber, 1832
Gustav III, ou Le bal masqué, Auber, 1833
Ali-Baba, ou Les quarante voleurs (with Mélesville), Cherubini, 1833
La Juive, Halévy, 1835
Les Huguenots, Meyerbeer, 1836
Guido et Ginevra, ou La peste de Florence, Halévy, 1838
Le lac des fées (with Mélesville), Auber, 1839
Xacarilla, A. Marliani, 1839
Le drapier, Halévy, 1840
Les martyrs, Donizetti, 1840
La favorite (with A. Royer and Vaëz), Donizetti, 1840
Carmagnola, Thomas, 1841
Dom Sébastien, roi de Portugal, Donizetti, 1843
Jeanne la folle, Clapisson, 1848
Le prophète, Meyerbeer, 1849
La tempête, Halévy, London, 1850
L'enfant prodigue, Auber, 1850
Zerline, ou La corbeille d'oranges, Auber, 1851
Florinde, ou Les maures en Espagne, Thalberg, London, 1851
Le Juif errant (with Saint-Georges), Halévy, 1852
La nonne sanglante (with G. Delavigne), Gounod, 1854
Les vêpres siciliennes (with Duveyrier), Verdi, 1855
L'Africaine, Meyerbeer, 1865

BALLET-PANTOMIMES

Hamlet de M. le public (with Delestre-Poirson), 1816
La somnambule, ou L'arrivée d'un nouveau seigneur (with J. Aumer), Hérold, 1827
La belle au bois dormant (with Aumer), Hérold, 1829
Manon Lescaut (with Aumer), Halévy, 1830
L'orgie (with Coralli), Carafa, 1831
La volière, ou Les oiseaux de bocage (with T. Elssler), C. Gide, 1838
La tarentule (with Coralli), Gide, 1839
Marco Spada, ou La fille du bandit (with Mazillier), Auber, 1857
Le cheval de bronze, Auber, 1857

OTHER WORKS

*c*250 vaudevilles incl.: *Le prétendu sans le savoir, ou L'occasion fait le larron*, Variétés, 1810 [under pseudonym 'Antoine']; *Les derviches* (with Delavigne), Vaudeville, 1811; *L'auberge, ou Les brigands sans le savoir* (with Delavigne), Vaudeville, 1812; *Flore et Zéphire* (with Delestre-Poirson), Vaudeville, 1816; *Le comte Ory* (with Delestre-Poirson), Vaudeville, 1816; *Le nouveau Pourceaugnac* (with Delestre-Poirson), Vaudeville, 1817; *Wallace, ou La barrière Mont-Parnasse* (with H. Dupin and Delestre-Poirson), Vaudeville, 1817); *Les nouvelles danaïdes* (with Dupin), Variétés, 1817; *Une visite à Bedlam* (with Delestre-Poirson), Vaudeville, 1818; *Les vêpres siciliennes* (with Mélesville), Vaudeville, 1819; *L'ours et le pacha* (with X.-B. Saintine), Variétés, 1820; *Le vampire* (with Mélesville), Vaudeville, 1820; *Le boulevard Bonne-Nouvelle* (with Moreau and Mélesville), Gymnase, 1820; *Trilby, ou Le lutin d'Argail* (with Carmouche), Gymnase, 1823; *Rossini à Paris, ou Le grand dîner* (with Mazères), Gymnase, 1823; *La haine d'une femme, ou Le jeune homme à marier*, Madame, 1824; *La chatte métamorphosée en femme* (with Mélesville), Madame, 1827; *Yelva, ou L'orpheline russe* (with Devilleneuve and Desvergers), Madame, 1828; *La favorite*, Gymnase, 1831; *Le paysan amoureux* (with Bayard), Gymnase, 1832; *Clermont, ou Une femme d'artiste* (with E. Vander-Burch), Gymnase, 1838; *Madame Schlick* (with Varner), Gymnase, 1852

3 melodramas: *Koulikan, ou Les tartares* (under pseudonym 'Amédée de Saint-Marc', with Mélesville and Delestre-Poirosn), Gaîté, 1813; *Le songe, ou La chapelle de Glenthorn* (with Delestre-Poirosn), Ambigu, 1818; *Les frères invisibles*, Porte Saint Martin, 1819

HERBERT SCHNEIDER

Scrittura (It. 'writing', 'contract'). A *scrittura teatrale* can be the contract for the engagement of any sort of theatre artist, but in musical contexts the term is most often used

to refer to the engagement of a composer to write an opera. □

Scrivano, Juan. *See* ESCRIBANO, JUAN.

Scronx, Gérard (*fl* Liège, early 17th century). Flemish musician. His family, prominent in Liège during the 16th and 17th centuries, produced several ecclesiastics, clerks and musicians (among them Lambert Scronx, who worked on the revision of the Liège Breviary in the early 17th century). He was a monk at the monastery of the Crutched Friars, Liège. Dart showed that he was there between 1619 and 1621; he may have been a pupil of the blind organist of the monastery, Guillaume Huet. He was most likely the copyist of a manuscript of 1617 containing organ pieces by such composers as Andrea Gabrieli, Peter Philips, Sweelinck and Merulo (*B-Lu* 153, olim 888). He included an echo of his own composition, which Dart described as 'competent, but entirely uninspired'; the manuscript also includes 38 anonymous pieces, some of which may be by him. Dart was probably wrong in identifying the 'Griffarius Scronx' cited in the monastery records of 1619 with Gérard.

JOSÉ QUITIN/PHILIPPE VENDRIX

Scronx, Lambert. Flemish musician, related to GÉRARD SCRONX.

Scruton, Roger (*b* Buslingthorpe, Lincs., 27 Feb 1944). British philosopher, writer, political activist and amateur composer. He was educated at Cambridge University (1962–5, 1967–9), and took the doctorate there in 1973; he thereafter trained at the Inner Temple (1974–6). From 1971 until 1991 he taught at the philosophy department of Birkbeck College, London, where he was made professor in 1984, and at Boston University (1992–5), after which he became a freelance writer and business consultant in government relations. He has also held visiting posts at many academic institutions in the USA, Canada and Europe. He is well known for his role as a conservative political thinker, and his conservatism is also evident in some aspects of his musical aesthetics.

Scruton's contribution to aesthetics lies in the analytic tradition of philosophy. In *Art and Imagination* (1974) he extends Ludwig Wittgenstein's account of seeing 'aspects' in an ambiguous visual image, such as the Gestalt duck/rabbit ('seeing as'), to cover cases of hearing different aspects in a musical phrase ('hearing as'). *The Aesthetic Understanding* (1983) seeks to explain the function of metaphor in aesthetic description. Metaphor is found to be intrinsic to any musical description, including such basic terms as the 'movement' of a sound in aural 'space'. This use of metaphor indicates the attitude of a perceiver, in hearing sounds as organized according to spatial categories. Hearing X (sound) as Y (metaphorical description) constitutes an 'intentional attitude'. If metaphor is basic to musical description, Scruton argues, then music itself must be understood ontologically as the object of an intention (an 'intentional object'), that is, as something known as perceived under a metaphorical description. His most extended treatment of aesthetic issues relating to musical expression and interpretation (*The Aesthetics of Music*, 1997) includes a rapprochement with some aspects of formal and cognitive music theory, but it is made largely in order to defend his own view of music as a medium to be understood metaphorically. Formal descriptions, including linguistically-derived analytic tools, are viewed by him as inadequate, and semiotic or semantic techniques as irrelevant.

NAOMI CUMMING

Scudo, P. [Pierre, Pietro, Paul or Paulo] (*b* Venice, 8 June 1806; *d* Blois, 14 Oct 1864). French critic, writer on music and composer, of Italian birth. He grew up in Germany and about 1824 entered Choron's Institution Royale de Musique Classique et Religieuse in Paris. He sang a minor role in Rossini's *Il viaggio a Reims* (1825) with little success and returned to Choron's school until the July Revolution (1830). He then played second clarinet in a military band. In the 1830s he established himself in Paris as a singing teacher, composer of *romances*, and writer on various topics; from about 1840 he wrote on music. He contributed to the *Revue de Paris*, *Revue indépendante*, *Art musical*, several other journals and two contemporary encyclopedias, but was most influential as music critic for the *Revue des deux mondes*. Many of his articles also appeared in three published collections. He wrote *Le Chevalier Sarti* (a novel that discusses music) and published annual reviews of Parisian musical life: *L'année musicale* (1860–62) and *La musique en … 1862* (1863). In his final summer he was committed to an asylum.

Scudo was renowned for his extreme conservatism; he liked little music written after 1830 and urged the revival of 18th-century works. He idolized Mozart and disdained Wagner, Liszt and, particularly, Berlioz, about whom he wrote 'Not only has he no melodic ideas, and for that reason … has sought to cover his indigence with an unnecessary, excessive sonority, but when an idea does come to him, he does not know how to treat it because he does not know how to write' (*Revue indépendante*, vi/2, 1846, p.92). Scudo was a talented writer; many of his reviews (lengthy articles emphasizing works rather than their performance) include extensive historical information, observations on musical–dramatic relationships and interesting discussions of aesthetics, but his comments on music tend to generalize and reveal little insight. Of Scudo's several *romances* Fétis wrote 'there is not one idea or phrase of merit'; few critics have disagreed.

JEFFREY COOPER

Scudus, Aegidius. *See* TSCHUDI, AEGIDIUS.

Sculthorpe, Peter (Joshua) (*b* Launceston, Tasmania, 29 April 1929). Australian composer. Of all Australian composers since Grainger, he is seen by the Australian musical public as the most nationally representative. He studied at the University of Melbourne (BMus) and later at Wadham College, Oxford (1958–60), where his teachers included Rubbra and Wellesz. In 1963 his music was performed at a conference of composers held in Tasmania. Although his works were not the most daring of those presented – he had by this time explored and largely rejected serial techniques – they exhibited a clarity and polish that identified him as a persuasive intermediary between the new wave of Australian composers and a generally conservative public. After the conference, he was offered a lectureship at the University of Sydney.

Sculthorpe introduced himself to a wider musical audience with the String Quartet no.6 (1965), commissioned by Musica Viva Australia. *Irkanda IV* (1961), a passionately elegiac work written on the death of his father, shares with the Quartet many of the stylistic traits that define his early musical vocabulary: an overall mood of sombre intensity articulated through strongly accented descending minor 2nds and minor 3rds; frequent and sometimes elaborate performance directions in Italian; occasional passages of spectral, stiffly jerking puppetry; and short phrases. He remarked at the time that he composed in small units that came together 'by accretion'. An additional aspect of his early style, important in establishing its frequent tone of smouldering unease, is the unaccented positioning of melodic phrases. The clarity and effectiveness of his textures appear as if inseparable from the quasi-fanatical neatness of his musical manuscripts (sometimes in the hand of students or other young assistants).

Sculthorpe's arduous compositional pace gave his early music a consistency of style and manner that allowed him to transfer passages easily from one work to another; he acknowledged, for example, that the String Quartet no.6 was in part a compendium of his best work up to that time. If he was open at times to charges of stylistic limitation, his consistency guaranteed that his listeners would always recognize his works. One of his favourite chords, a stack of 3rds intersected by an augmented 4th (sometimes used in sequence with a parallel construction a semitone or tone away), became such a prominent feature of his music that his students named it the 'Woollahra chord' after the Sydney suburb where he lived.

In 1965 Sculthorpe was commissioned to write a piece for the Sydney SO to play on their European tour. This project led him to explore successive 'sound events' (discrete inventions in timbre and density), such as those employed in Penderecki's music of the early 1960s. The resulting work, *Sun Music*, the first of a series of orchestral pieces with this title, inflects aggregates of string pitches by (approximate) quarter-tones to suggest quivering columns of light. Brass instruments provide signals and rhythmic tremors. One brief section for brass transcribes a passage Sculthorpe had used in class and on an educational television programme to illustrate integral serialism. In its final form the *Sun Music* series comprised: *Sun Music I* (1965); the more animated and effectively contrasting *Sun Music IV* (1967) in a closely related style; the scherzo-like *Sun Music II* (1969), a free transcription of the Balinese monkey dance *Ketjak*; and the lustrous *Sun Music III* (1967, originally *Anniversary Music*), which takes its point of departure from Balinese gamelan music. Other related works include *Sun Music* for voices, piano and percussion (1966, originally *Sun Music II*), which draws on a view of historical Mexico (as does the String Quartet no.7, 1966) and the orchestral *Sun Song* (1984). Some of the pieces in the *Sun Music* series were assembled to form the score for a ballet (1968) based on Japanese conventions.

Similar in style to the *Sun Music* series, *Music for Japan* (1970) does not simulate or pay tribute to Japanese music; it serves instead as an essay in Australian sensibility (bound up with a mystical apprehension of landscape) for Japanese listeners. Sculthorpe's simulation of Balinese traditional music, fuelled by his reading of Colin McPhee's

Peter Sculthorpe

A House in Bali, is his most sustained exercise in Asian culture. First made prominent in the smoothly chiming patterns of *Sun Music III*, references to Balinese music recur in a number of subsequent works including *Tabuh tabuhan* for wind ensemble (1968), the title of which is borrowed from McPhee, and the String Quartet no.8 (1968, originally titled *String Quartet Music*), in which fast rhythmic passages imitate traditional rice-pounding patterns of Balinese farmers.

Although Sculthorpe's adoption of Balinese patterns, inflections and timbres represents a metaphorical turning away from European tradition, the elegiac music that persists in many works remains deeply rooted in European convention. Sculthorpe explained his fondness for an accented semitone descent, for example, as a recollection of the 'Abschied' of Mahler's *Das Lied von der Erde*. His later discovery that Kepler had arrived at the pitch sequence G–A♭–G in his attempts to calculate the harmony of the spheres confirmed his obsession with this motif and strengthened his conviction that by using these pitch classes he could characterize the earth in a ecological way. Among other works, the motif appears in the powerful *Earth Cry* for orchestra (1986).

Sculthorpe's abiding concern for much of his career, however, has been to establish a nexus between his music and a sense of Australia. His use of Aboriginal titles, legends and sacred places reflects that purpose. Unlike earlier composers, he adopted a view approaching that of an Adelaide-centred group of writers (publishers of a *Jindyworobak* journal and anthology, and often identified with that title) who believed that the invocation of Aboriginal words and concepts gives a kind of magical access, built up over tens of thousands of years, to an identification with the land. Sculthorpe's string trio *The Loneliness of Bunjil* (1954, rev. 1964), otherwise notable for its use of quarter-tones, is an early essay invoking an imaginary Aboriginal presence. The Piano Sonatina that followed a year later, employing many of the distinctive traits of his moody, introspective manner, bears an inscription with Aboriginal references: 'For the journey of Yoonecara to the land of his forefathers, and the return to his tribe'. The *Irkanda* series (1955–61) contains in its title an Aboriginal reference to 'a remote and lonely place', and the text for *Rites of Passage* (1973) is taken from the language of the Southern Aranda tribe of central Australia. *The Song of Tailitnama* (1974), which introduced a longer-breathed, more rhythmically impetuous character into his lyrical writing, conforms in its principal melody to the contours of many Australian Aboriginal songs.

The importance of place in Sculthorpe's musical imagination became evident early on in works such as *The Fifth Continent* (1963), in which a narrator reads poetic text from D.H. Lawrence's *Kangaroo* while an orchestra mimics the swell of the ocean and Lawrence's response to the bush and a township's war memorial. That preoccupation reasserted itself in *Mangrove* (1979), an orchestral piece that ranks as one of his most finely proportioned. In addition to ideas of renewal and transformation, the work celebrates the rich fecundity of mangrove tidal flats at a time when these trees were looked on as untidy impediments to clean-limbed tourist development. One of a small number of scores drawing on Japanese court melodies of the *saibara* tradition, *Mangrove* suggests ancient, weathered music that crumbles into place rather than falling into neatly organized patterns. Although he has long made Sydney the base of his professional career, Sculthorpe has continued to draw inspiration from his Tasmanian origins. *Mountains* (1980) matches in character the rugged southwest of the island, while the String Quartet no.14 (1998) embodies his memories of northern Tasmanian landmarks and stories. Other works respond to national occasions: *Child of Australia* (1988), to words by Thomas Kenneally, salutes without vainglory the bicentenary of European settlement in Australia; *Port Arthur* (1996) laments a mass killing at one of the most notorious prisons of the convict era, now a tourist site.

Sculthorpe's homage to Aboriginal legends and sacred sites, and his love for the often harshly outcropped Australian terrain merge in a series of works that coincided with gains in Aboriginal rights to traditional land ownership. *Songs of Sea and Sky* (1987) vividly evokes the vast, cloud-fringed peacefulness of tropical seascapes; *Kakadu* (1988) embodies in often exuberant and always magically evocative orchestral terms Sculthorpe's response to the possible dedication of the Northern Territory wilderness as a national park; *Nourlangie* (1989), originally a guitar concerto written for the Australian-born John Williams, was inspired by Aboriginal drawings on a Kakadu rockface; and *Jabiru Dreaming*, which came into being as a percussion quartet (1989–92), the String Quartet no.11 (1990) and the Third Sonata for string orchestra (1990–94), refers to the legendary *jabiru*, a long-legged swamp bird. Increasingly Sculthorpe extended his resources by quoting or paraphrasing characteristic melodies, as in his simulations of Aboriginal themes and rhythms. *Songs of Sea and Sky* makes use of Torres Strait song melody, while *Port Essington* (1977) communicates the failure of a northern Australian colonial settlement by allowing music representing the terrain and its Aboriginal inhabitants to encroach inexorably on genteel salon music.

Sculthorpe's formal structures are relatively straightforward; many works adopt simple binary or ternary forms. A common feature of compositions from the 1970s to 90s is the use of string harmonics, suggesting the cries of a suddenly roused flock of birds, to punctuate and frame the melodic or rhythmic momentum of emotionally charged paragraphs. Never alienating listeners with technical cleverness, he persuades through a haunted poetry born of deep concern for human beings and their natural world. His melodic gift, particularly notable in the delicate loping phrases of *Small Town* (1963–76) and the slowly released oboe theme of *Sun Music III* (1967), has helped to convince the public of the validity and importance of his work. An elegiac tone, unerring and persistent, spans his whole career, achieving an extended state of equilibrium between sorrow and consolation in his Requiem for solo cello (1979), a work in which quotations from traditional chant melodies frame personal grief.

WORKS
(selective list)

DRAMATIC

Sun Music (ballet, 5 pts, choreog. R. Helpmann), 1968, Sydney, 2 Aug 1968; Rites of Passage (theatre piece, Aboriginal), 1972–3, Sydney, 27 Sept 1974; Quiros (TV op, B. Bell), 1982, ABC broadcast, 1 July 1982; Burke and Wills Suite (film music), concert band, 1985 [arr. brass band, 1986]; radio scores

ROGER COVELL

Scutta, Andreas (*b* Vienna, 1806; *d* Prague, 24 Feb 1863). Austrian composer, actor and singer. The experience of taking part in a performance of Rossini's *Mosè* at the Theater an der Wien determined him to take up music as a career. He studied singing at Count Palffy's conservatory, and in 1824 went to Graz (and later to Linz and Zagreb) to gain experience. Illness cost him his fine and expressive singing voice in 1829 and he began to take comic parts in plays. After two years in the provinces he was engaged at the Theater in der Leopoldstadt after a successful guest appearance in 1831, soon making a name for himself not only as a skilful comic actor but as the composer of music for a long line of farces and parodies. In 1831 he married Therese (Josephine) Palmer, widow of his former director, who as a 13-year-old girl had created the role of Cinderella in Isouard's *Cendrillon* at the Theater an der Wien in 1811. He left the Theater an der Wien in 1845, and after some years of successful guest appearances in various theatres he went to Prague in 1852 and performed in the German theatre there for ten years.

Among Scutta's 30-odd scores, written mainly for the Theater in der Leopoldstadt but including also some for the Theater an der Wien and Theater in der Josefstadt, the following (all Theater in der Leopoldstadt) were the most successful: *Der Zauberdrache* (pantomime, J. Fenzl), 1831; *Robert der Wau Wau* (J. Schickh), 1833, a parody of Meyerbeer's *Robert le diable*; *Der errungene Preis* (pantomime, Fenzl) and *Der Wasserfall im Feenhain* (D.F. Reiberstorffer), both 1835; and *Eisenbahnheiraten* (Nestroy), 1844 – with nearly 60 performances, his most often-heard score.

Searle, Humphrey (*b* Oxford, 26 Aug 1915; *d* London, 12 May 1982). English composer and writer on music. He was educated at Winchester (1928–33), at Oxford (1933–7) where he was a classical scholar, at the RCM (1937) under Jacob, Morris and Ireland, and at the New Vienna Conservatory (1937–8). While in Vienna he also studied privately with Webern. In 1938 he joined the music staff of the BBC as a programme producer, returning there after his army service (1940–46), part of which he had spent in the intelligence service, part in training paratroopers. After the war, while still in Germany, he assisted Trevor-Roper in the research for his book *The Last Days of Hitler*. Searle left the BBC in 1948 and worked freelance until 1951, when he became music adviser to Sadler's Wells Ballet, remaining a member of the music panel until 1957. He was actively connected with most of the British organizations for modern music (the London Contemporary Music Centre, the Society for the Promotion of New

Music, the Composers' Guild, etc.). He was general secretary of the ISCM (1947–8), and in 1950 he became honorary secretary of the newly formed Liszt Society; he was one of the leading authorities on Liszt.

In his *Night Music* op.2, written in 1943 for Webern's 60th birthday, Searle had already come very near to 12-note technique. But from the Intermezzo for 11 instruments of 1947 on, all his compositions use the 12-note method. From Webern he learnt his fastidious regard for every sound, inheriting his fine ear for chamber instrumentation. It is this that makes his Quartet for clarinet, bassoon, violin and viola, as well as the other works already mentioned, so euphonious in their effortless flow. But it is with the dramatic and Romantic Schoenberg that Searle's particular affinities lay. This is reflected, along with his admiration for Liszt, in the immensely demanding piano works – the scintillating First Concerto, the Ballade and the superlative Sonata. This last work, written in 1951 for the 140th anniversary of Liszt's birth and first performed on that day at the Wigmore Hall, is in one movement, closely modelled on the pattern of Liszt's own Sonata. It uses the Lisztian idea of thematic transformation, but within the 12-note method. Even the thematic material shows, intentionally, some resemblance to Liszt's, but the result is one of the most original and impressive piano sonatas of the period.

As Schoenberg before him, Searle wrote a trilogy of works for narrator and orchestra – *Gold Coast Customs*, *The Riverrun* and *The Shadow of Cain*. *The Riverrun* employs a 12-note passacaglia throughout suggesting the relentless flow of the river Liffey; it is a highly evocative and often strangely beautiful piece, an exemplum of Searle's blend of natural Romanticism and contemporary technique. Such a mixture is evident too in the *Poem* for 22 strings (1950) with its glowing warmth and occasional sonorities which suggest electronic music. But although he made a limited use of actual electronics (to depict irrationality or madness in his operas), and introduced a short passage of collective improvisation in his Symphony no.4, he continued to write mainly in a conventional 12-note idiom. While the highly demanding and intense Symphony no.1 – the first strictly serial symphony – employs a derived row, based on the B–A–C–H motif, later works made little use of such construction. The first three symphonies all exhibit a romantic exuberance and dramatic scoring, but this was to contrast with a move towards the gentle more meditative style of the Symphony no.5, which recalls the restraint of earlier instrumental works.

Searle composed three operas to his own librettos. Words are generally set at conversational speed, without set numbers or formal divisions. The macabre and fantastic inventions of Gogol and Ionesco allowed him to express, effectively and memorably, violent and disordered emotions, and to exploit a vein of humour already foreshadowed in *The Owl and the Pussy-Cat* of 1951. *The Photo of the Colonel* in particular exhibits great wit within a form of driving continuity. In *Hamlet*, all themes are based on a single asymmetrical series, first heard in its authentic form in the 'To be or not to be' soliloquy. Motifs derived from this series are assigned to the principal characters, and are also associated with particular instruments or groups of instruments. Searle followed Shakespeare very closely in his libretto, and the free arioso style makes for maximum clarity and intelligibility. The supernatural episodes and the play within the play (set as a Romantic burlesque) are theatrically the most effective parts of an opera which functions as a musical commentary on the play rather than as a newly thought and autonomous work of art. In his final years, he composed music of immediate aural accessibility, including the splendid *Fantasia on British Airs* for five military bands, *Tamesis* – a musical history of the river Thames, and *Three Ages* which is a similar account of the 20th century.

Searle was continuously active as a teacher, counting among his pupils Finnissy, Elias, LeFanu and Rihm. He was appointed a professor of composition at the RCM in 1965, and worked abroad as guest professor at Stanford University, California (1964–5), Aspen Music Festival, Colorado (1967), and the Staatliche Hochschule für Musik, Karlsruhe (1968–72). He was made a CBE in 1968 and an honorary FRCM in 1969.

WORKS

STAGE

The Diary of a Madman (op, 1, Searle, after N.V. Gogol), op.35, Berlin, Staatsoper, 1959 [Ger. version]; Sadler's Wells, 26 April 1964

The Photo of the Colonel (op, 1, Searle, after E. Ionesco), op.41, BBC radio, 8 March 1964; staged, Frankfurt, Staatsoper, 3 June 1964

Hamlet (op, 3, Searle, after W. Shakespeare), op.48, Hamburg, Staatsoper, 4 March 1968 [Ger. version]; Toronto, Royal Conservatory of Music, 12 Feb 1969

Ballets: Noctambules, op.30, 1956; The Great Peacock, op.34a, 1956 [after Variations and Finale, op.34]; Dualities, op.39, 1963

INSTRUMENTAL

5 syms.: op.23, 1953; op.33, 1958; op.36, 1960; op.38, 1962; op.43, 1964

COLIN MASON/HUGO COLE/DAVID C.F. WRIGHT

Seashore, Carl E(mil) (*b* Mörlunda, 28 Jan 1866; *d* Lewiston, ID, 16 Oct 1949). American psychologist and musician of Swedish birth. His family emigrated to the USA in 1869. Having studied the organ as a child, he served as a church organist from the age of 14; he attended Gustavus Adolphus College, Minnesota (BA 1891), and Yale University (PhD 1895), where he studied psychology and worked as an assistant in the psychological laboratory (1895–7). He was subsequently appointed (1902) to the University of Iowa, where he stayed for the rest of his career, as professor and (from 1905) head of the department of psychology and of the psychological laboratory, and for two periods (1908–37 and 1942–6) as dean of the graduate college. He was a pioneer in experimental psychology, and with his students developed many instruments for the measurement of visual, aural and kinesthetic perception, and for the graphic representation of such aspects of musical performance as rhythm, pitch, timbre and vibrato. This latter information was used in performance analysis, with special emphasis on the vibrato, and eventually influenced Seashore's theories of musical aesthetics.

Seashore's interest in music and in measurable psychophysiological phenomena led him to devise a test for identifying musical talent through measurement of independent, presumably innate skills: tonal memory, perception of pitch and of loudness, sense of time passing, of rhythm, of 'consonance' (in the earlier version) and of timbre (in the later one). Although widely used, the test has been criticized, both on technical grounds and for its apparent assumption that musical talent can be described in terms of an aggregation of discrete skills.

RAMONA H. MATTHEWS

Seattle. City in Washington State, USA. It is the largest metropolis in the Pacific north-west and a major port. It was named after a chief of the local native Squamish and Duwanish peoples, Sealth (1786–1866), a singer who was baptized (1841) and led his people in morning and evening prayers. The town in its present location was laid out in 1853. In the 1860s touring groups – Excelsior's Minstrels, Stars Minstrels, Congo Minstrels and the USS Pensacola Band – performed in Henry Yesler's Mill Cook House (also called Hall or Pavilion). Squire's Opera House (1879–83), Frye's Opera House (cap. 1300; 1884–9), the Seattle Opera House (1890–93) and the Seattle Theater (1892–1915) hosted a constant stream of entertainers. The first locally formed troupe was the Seattle Minstrels (1880). Callender's Colored Georgia Minstrels (1882)

headed a long list of touring all-black troupes that gave 13 Seattle seasons between 1889 and 1911.

Operas and operettas given in the 1870s and 80s by visiting companies included Offenbach's *La Grande-Duchesse de Gérolstein*, Wallace's *Maritana*, Balfe's *The Bohemian Girl*, Flotow's *Martha*, Donizetti's *La fille du régiment* and Gounod's *Faust*, as well as *La sonnambula*, *Il trovatore* and *Le nozze di Figaro*. Touring soloists visited the city in the same period, including the violinist Ede Reményi, the pianist Julie Rivé-King and the sopranos Adelina Patti, Nellie Melba and Emma Calvé. Scandinavian, Swiss and German immigrants fostered a strong choral tradition; the Norwegian Male Chorus was founded in 1889.

The Seattle SO gave its first concert in 1903 in the ballroom of the Arcade Building, conducted by the violinist Harry F. West. Most of its members also played for musical theatre performances in the Madison Street auditorium (1400 seats) and later the Moore Theater (1650 seats). The 1904–5 symphony season in John Cort's Grand Opera House concluded with John Hamilton Howe's chorus of 200 joining the orchestra for the *Creation*. Michael Kegrize conducted the orchestra from 1907 to 1909 and brought such soloists as Maud Powell, Mischa Elman and Lillian Nordica. During the Alaska–Yukon Exposition at the University of Washington in the summer of 1909, the soloists at the Sunday concerts conducted by Henry Hadley included Fritz Kreisler, Josef Hofmann, Teresa Carreño and Johanna Gadski, the latter singing some of Hadley's own songs. Hadley, who conducted the orchestra until 1911, composed his *North, East, South, and West* symphony in Seattle. His successor John Spargur conducted an orchestra of 85 that disbanded before the close of the 1919–20 season. In the hiatus from 1921 to 1926 the violin teacher Mme Davenport Engberg organized and conducted the Seattle Civic Orchestra. Karl Krueger conducted the revived symphony orchestra from 1927. After he resigned in 1931 the conductors were Basil Cameron (1932–8), Nicolai Sokoloff (1938–40) and Sir Thomas Beecham. Beecham gave frequent performances of Delius and Sibelius interspersed with Mozart concertos played by Betty Humby, whom he married after divorce proceedings in 1943. Virulent personal attacks in the *Post-Intelligencer*, whose critic of the time rarely published a kind word, hastened Beecham's mid-season departure in 1942; his successor Carl Bricken continued until the 1947–8 season. Later conductors included Eugene Linden, Milton Katims (1954–76) and Gerard Schwarz (from 1984), whose tenure brought the orchestra international acclaim.

After one year with the Seattle SO, Linden became conductor for the Pacific Northwest Grand Opera Company (1950–55), which brought Bidú Sayão and Regina Resnik to Seattle for *La bohème* and *Carmen*. Linden also engaged Glynn Ross, director of the San Francisco summer opera, as stage director. Returning in 1964 as general director of the newly formed Seattle Opera Company, a post that he retained until 1983, Ross gave a complete *Ring* in 1975, with cycles in both German and English. Premières during his tenure included Carlisle Floyd's *Of Mice and Men* (1970) and Thomas Pasatieri's *Black Widow* (1972). His successor Speight Jenkins maintained the tradition of *Ring* cycles with a new production in 1986, repeated in 1991. Under him productions such as *Pelléas et Mélisande* in 1993, with Gerard Schwarz conducting, marked a new peak in cooperation between orchestra and opera. The 1995–6 season included *La Cenerentola*, *Elektra* and *Andrea Chénier*. The Seattle Center Opera House (cap. 3100), converted in 1962 from the former Civic Auditorium, was shared until 1998 by the opera and the symphony orchestra.

Vocal instruction was offered at the newly established University of Washington beginning in 1861, and piano in 1862; in 1889 when Washington became a state, Julia Chamberlain, a graduate of New England Conservatory, headed a music faculty teaching the mandolin and the guitar as well as the violin. A school of music was established in 1891. On the eve of the move in 1894 from the city centre to a new campus, music was listed first among three 'special' departments in the university catalogue drafted by the registrar, Edmond S. Meaney. For him is named the 1200-seat Meaney Hall for the Performing Arts, the chief university concert venue; in the same building is a 270-seat theatre. The present music building (occupied 1950) houses the Brechemin recital hall (cap. 225) and a library of 60,000 volumes (1996). The department head from 1994 was the pianist Robin McCabe. The department's ethnomusicology programme attracts students from Africa and Asia. William Bolcom and Alan Stout were both pupils of John Verrall (at the university 1948–73). The visiting professor of conducting in 1995–6 was Milton Katims.

The Cornish Institute of the Performing and Visual Arts (previously the Cornish School of Allied Arts) was founded in 1914 by Nellie Centennial Cornish. Teaching music, theatre, broadcasting, dance and the visual arts, it was the acknowledged centre of arts instruction in the northwestern USA when in 1938 it hired John Cage. During his two years there Cage began giving recitals using prepared pianos and initiated his association with the school's leading student dancer Merce Cunningham. Cage worked occasionally with the leading University of Washington faculty composer (1941–68), George Frederick McKay (1899–1970), whose pupils included Earl Robinson.

The rock guitarist Jimi Hendrix grew up in Seattle. Kurt Cobain (1967–94) headed the group Nirvana, which made Seattle grunge rock a world phenomenon. Soundgarden (formed in 1984), Alice in Chains (1987), Pearl Jam (1990) and the Presidents of the United States of America (1994) confirmed Seattle as the epicentre of creative rock in the decade of their emergence.

Maxine Cushing Gray, who settled in Seattle in 1946, served as art and music critic for the weekly *Argus* and then founded and edited the fortnightly *Northwest Arts* (1975–87). She had earlier powerfully endorsed the Seattle residency (1965–70) of the ballet company gathered by the Seattle native Robert Joffrey (*b* 1930). Joffrey's ballet *Astarte*, with rock music credited to Crome Cyrcus, had its première in Seattle and went on to New York, achieving national renown.

The early 1990s saw the flourishing of the Seattle Classical Guitar Society, the Seattle Consortium of Harpers, the Seattle Girls' Choir, the Seattle Women's Ensemble and the Seattle Youth SO. By the end of the decade the wealth attracted to the area by the aircraft and computer industries had enabled financiers to underwrite notable arts projects. Symphonic music found a new home in the S. Mark Taper Auditorium, rated as 'one of the ten best in the world' by acoustician Cyril M. Harris, and

smaller-scale performances were accomodated in the Illsley Ball Nordstrom recital room (cap. 541). This wealth elevated the Seattle SO to second in the nation in terms of its private charitable support and close to the first in terms of adventurous programming. Equally adventurous in another direction were the 23 and 24 June 2000 concerts that inaugurated Experience Museum Project Seattle, founded and financed by Microsoft partner Paul Allen. At the Memorial stadium the first concert intergrated among other headliners Metallica, Dr Dre with with Eminem and Snoop Doggy Dogg, Red Hot Chili Peppers, Kid Rock and Filter. The second concert included the more recently emerged Matchbox Twenty, No Doubt, Alanis Morissette, Beck and the Eurythmics. These events further strengthened Seattle's already established reputation as a milieu geared to the musical interests of youth.

ROBERT STEVENSON

Seave. *See* SAYVE family.

Seay, Albert (*b* Louisville, 6 Nov 1916; *d* Colorado Springs, CO, 7 Jan 1984). American musicologist. He took the BA and the BM from Murray State College in 1937, and the MM at Louisiana State University in 1939. After teaching at South-Western Louisiana Institute (1946–9), he resumed graduate work at Yale University under Leo Schrade and was awarded the doctorate in 1954. He began teaching at Colorado College in 1953 and was appointed chairman of the music department in 1967 and professor in 1972; he retired in 1982.

Seay's interest in the music and theory of the Middle Ages and the Renaissance has resulted in a wide range of editions, translations and articles. He edited the collected works of Arcadelt (for which he received the Otto Kinkeldey Award in 1972) and Carpentras, and the writings of Hothby, Tinctoris and Ugolino of Orvieto for the American Institute of Musicology. He also published practical transcriptions from the collections of Attaingnant, Gardano and Moderne, and was an editor of the Colorado College Music Press Series, which published translations and editions of important early theoretical treatises.

PAULA MORGAN

Sébastian, Georges [Sebestyen, György] (*b* Budapest, 17 Aug 1903; *d* La Hauteville, nr Paris, 12 April 1989). French conductor of Hungarian birth. He studied with Bartók, Kodály and Weiner at the Budapest Academy, and then attended Walter's conductors' course at Munich in 1922. He joined the music staff of the Munich Opera in 1922 (where Walter was musical director), and of the Metropolitan Opera in 1923. He then held conducting posts with the Hamburg Theatre (1924–5), the Leipzig Gewandhaus Orchestra (1925–7) and the Berlin Städtische Oper (principal conductor, 1927–31), where he again came under Walter's influence. During this period Sébastian began to specialize in the Viennese and German Classical and Romantic repertory; but he also gave some important first Berlin performances, notably of Bartók's *Bluebeard's Castle* and Krenek's *Jonny spielt auf*. In 1931 he was appointed musical director of Moscow Radio and conductor of the Moscow PO, with whom he performed Tchaikovsky's entire symphonic output on the 40th anniversary of the composer's death (1933). From 1938 to 1945 he conducted in the USA, Argentina and Brazil, notably at the San Francisco Opera, and in 1946 he settled in Paris, becoming principal conductor of the Opéra and conducting at the Opéra-Comique and with the Orchestre National, meanwhile making several foreign tours.

Sébastian's eloquent and impassioned conducting was strongly influenced by the Viennese tradition of Mahler and Walter. His repertory consisted mainly of the symphonies of Beethoven, Brahms, Bruckner and Schumann and the works of Richard Strauss and Wagner (he conducted important Wagner performances at the Opéra with Kirsten Flagstad).

CHRISTIANE SPIETH-WEISSENBACHER

Sebastiani, Claudius (*b* Metz; *fl* 1557–65). German music theorist. From 1557 until 1565 he was organist in Fribourg, where Homer Herpol was Kantor. According to Gerber, Sebastiani had also been an organist in Metz, but when he described himself in 1563 as 'Metensis, Organista' he was working in Fribourg. In his *Bellum musicale inter plani et mensuralis cantus reges* (Strasbourg, 1563) he depicted the theories of plainchant and polyphony in the unusual form of a war between the 'kings' of the two 'provinces' about who should succeed Apollo to become supreme in the realm of music. Both kings deploy all their resources; the battle reveals all the advantages but also all the mistakes and weaknesses of each. Sebastiani named as his immediate model Guarna's *Grammaticae opus novum seu bellum grammaticale*. Ornithoparchus (*Musicae activae micrologus*) had described *accentus* and *concentus* in the form of a similar fable. Sebastiani not only adopted several sections (on *accentus*, concord, counterpoint and cadences, as well as the ten rules of singing) from Ornithoparchus, but also the characteristics that Ornithoparchus had ascribed to his 'kings': thus the 'king' of plainchant was 'gravis, fecundus, severus' and the 'king' of polyphony was 'hilaris, iucundus, amabilis'. He used Coclico's classification of musicians into four genera, placing Herpol and Sermisy in the third category alongside, strangely, Gregory, Berno and St Bernard. In discussing various tablatures he gave two examples of keyboard tablature: in the first each part has its own staff, in the second the parts are combined on two staves. Both examples have bar-lines throughout. Also noteworthy is a section for young organists on improvising variations on a given melody, in which he recommended changes of beat, tempo, mode and number of parts.

MARTIN RUHNKE

Sebastiani, Johann (*b* nr Weimar, 30 Sept 1622; *d* Königsberg [now Kaliningrad], spring 1683). German composer. He is reputed to have studied in Italy. He settled in Königsberg in about 1650 and became Kantor at the cathedral in 1661. In 1663 the Elector of Brandenburg appointed him court Kapellmeister, and he retired with a pension in 1679.

Sebastiani's responsibilities to both church and court produced a preponderance of sacred music and occasional pieces intended for public commemorations. *Das Leyden und Sterben unsers Herrn und Heylandes Jesu Christi nach dem heiligen Matthaeo*, composed no later than 1663, is by far his most famous composition. It includes the traditional Passion characters, a five-part chorus and an instrumental ensemble of two violins, four viols and continuo. This large-scale *St Matthew Passion* is representative of Passions of the second half of the 17th century such as those of Heinrich Schütz, Christian Flor, Funcke, Pfleger and Theile. On the whole it is conservative in style. Certain general characteristics of Baroque opera – the *stile recitativo*, arias and small instrumental forces – are found in it, but more detailed elements such as the dramatic *stile concitato* and bold angular melodies are absent. Sebastiani shunned chromatic harmonies and added only slight expressive tension at such dramatically apt places as the choral answer to Pontius Pilate, 'Lass ihn kreuzigen!'. There is little text repetition, the voices are always doubled by instruments, and Sebastiani's retention of the five-part chorus indicates his regard for the *stile antico*.

Not unlike other Passion composers of this time, Sebastiani had the strings accompanying all the utterances of the soloists – Bach's later use of them to accompany only Christ's words in his *St Matthew Passion* is an exception. Sebastiani did, however, reserve a special string sound for Christ by specifying the sweet tone of the violins and letting the more strident tone of the viols accompany the narrator and the minor characters. He further heightened the drama and symbolism, as Bach did in his own *St Matthew Passion*, by silencing the violins at the words 'Eli, Eli, lama sabachthani', which underscores the utter despair of Christ. Smallman pointed out that Sebastiani's Passion is the earliest extant one to have simple chorales included in the score. They appear 13 times as a single vocal line (five of them designated for solo voice) with instrumental accompaniment. Sebastiani used eight different melodies; the repetition of several of them demonstrates an early awareness of the unity chorales can provide, a device developed by composers of oratorio Passions in the 18th century.

Although most of Sebastiani's vocal writing is lyrical, it is not highly florid. The syllabic settings in his two-volume collection of songs in the *Parnass-Blumen* are typical and are in the folksong style of the Hamburg school headed by Johann Rist. Their simplicity extends to Sebastiani's purely instrumental compositions, as can be

seen in the four-part sinfonia appended to the funeral hymn on which it is based, *Wer, o Jesu, deine Wunden* (1666). Similarly the instrumental sinfonias of the *St Matthew Passion* are affected by the ideal of a simple vocal setting; the style is specially evident in the choral responses, where it forms an aesthetic link with the unadorned chordal writing of 16th-century Lutheran composers such as Johann Walter (i).

WORKS

all printed works published in Königsberg, unless otherwise stated

Das Leyden und Sterben unsers Herrn und Heylandes Jesu Christi nach dem heiligen Matthaeo, 5vv, 6 insts, bc (1672); ed. in DDT, xvii (1904/*R*)

Erster Theil der Parnass-Blumen oder [60] geist- und weltliche Lieder, 1672[4] [incl. pieces by H. Albrecht, J. Reinhard and J. Weichmann]

Ander Theil der Parnass-Blumen (Hamburg, 1675) [incl. 6 pieces by 'J.G.']

Funeral songs, 5vv, bc: Mein Gott, ich sehe wie die Welt (1663); Mir fället, Jesu, immer ein (1663), ed. in J. Zahn, *Die Melodien der deutschen evangelischen Kirchenlieder* (Gütersloh, 1889–93/*R*1963); Sei gnädig mir, o Herr, mein Gott (1663); Ich komm', o Gott der Gnaden (1664); Wer, o Jesu, deine Wunden (1666) [arr. of composition by J. Weichmann], ed. in EDM, 2nd ser., *Ostpreussen und Danzig*, i (1939); Herr, es gehen deine Plagen (1667); Herr, vergnüge mit der Welt (1670); Wie selig ist doch der (1670); Mein Freund ist mein (1676); Ich bin ein armer Wandersmann (1678); Gott tu mit mir, was ihm gefällt (1679); Herr, du nimmst dich unser an (1679); Meine Seele, gib dich nu wiederum zufrieden (1679); Wo soll mein' Zuflucht (1679); Soll ich, Jesu, diesem Leben (1680); Herr, wie ist dein' Gnad' so gross (1680)

Christlicher Leich-Text: Dennoch bleibe ich stets an dir, dialogue, a 15 (1673)

Tanzen ist der Liebe Schul, wedding dance (1678)

11 melodies in Preussisches neu verbessert-vollständiges ... Gesangbuch (1675); ed. in J. Zahn, *Die Melodien der deutschen evangelischen Kirchenlieder* (Gütersloh, 1889–93/*R*1963)

4 motets, 7–15vv, *D-Bsb*, *S-Uu*

*c*85 occasional works, pubd 1653–82, and 4 MSS with sacred works, formerly in *RUS-KA*, now lost, cited in Müller, Küsel and Piotrowski; 7 other works cited in inventories, see Mitjana, Küsel, Davidsson (1952)

WRITINGS

Kurtze Nachricht, wie die Passion am Char-Freytage in einer recitirenden Harmonie abgehandelt und nebst denen darin befindlichen Liedern gesungen wird, der Gemeinde zum besten zusammengezogen, woraus sie selbstens mitlesen und singen kann (Königsberg, 1686); authorship doubtful, attrib. Sebastiani in *EitnerQ*; see Smallman, 81, and Blankenburg, col.920

JOHN D. ARNN/DOROTHEA SCHRÖDER

Sebastian z Felsztyna (*b* Felsztyn, ?1480–90; *d* after 1543). Polish music theorist and composer. In 1507 he entered Kraków University, and in 1509 he took the BA. It has been suggested that he was taught by Jerzy Liban, or by Heinrich Finck, who lived in Kraków until 1510. Sebastian also studied theology, and about 1528 he was appointed priest at Felsztyn, and possibly later at Przemyśl. While at Felsztyn he kept in touch with the important Herburt family and with their support he became the parish priest of Sanok about 1536. His treatise *Directiones musicae ad cathedralis ecclesia premislensis usum* (Kraków, 1543), now lost, was dedicated to Mikołaj Herburt.

Sebastian's collection of hymns, *Aliquot hymni ecclesiastici* (Kraków, 1522), probably containing polyphonic works, is lost. Three motets have survived. They are among the earliest examples of Polish four-voice music. All three are based on plainchant melodies which appear in the tenor in long note values. Sebastian used both florid counterpoint and note-against-note technique, and occasionally some imitation. The Capella Rorantistarum of Wawel Cathedral, Kraków included Sebastian's compositions in their repertory.

Sebastian's theoretical writings are concerned with plainchant and mensural theory. The treatises on chant, *Opusculum music compilatum noviter* (Kraków, before 31 October 1517) and *Opusculum musices noviter congestum* (Kraków, 1524–5), were once regarded as two editions of the same treatise, but there are important differences between them. The first demonstrates a number of treatments typical of Kraków choral manuals from the beginning of the 16th century, including the classification of music and interval theory. It contains three- and four-voice music examples, which also indicate a familiarity with Wollick's *Opus aureum*. The second treatise in effect brings up to date the theory of *musica plana* in the spirit of the views of Burchardi and Ornithoparchus. Sebastian dispensed here with polyphonic examples, but cited an extensive choral repertory (fragments of more than 100 works).

The *Opusculum music mensuralis* (published presumably after 31 October 1517) contains six chapters dealing with all aspects of mensural notation. Although some of the ideas seem to have been derived from other writers, notably Melchior Schanppecher, much of the work is considered original. Sebastian is also credited with the authorship of the anonymously published *Modus regulariter accentuandi lectiones*, which contains rules for accenting liturgical texts.

WORKS

THEORETICAL WORKS

Opusculum music compilatum noviter (Kraków, n.d./*R*1978 in MMP, ser.D, ix)

Opusculum utruisque musicae tam choralis quam etiam mensuralis (Kraków, 1519 [lost]

Opusculum music mensuralis (Kraków, n.d./*R*1979 in MMP, ser.D, x) [? pt ii of lost treatise of 1519]

Opusculum musices noviter congestum (Kraków, 1524–5/*R*1976 in MMP, ser.D, iv) [later pubd with M. Kromer: *De musica figurata* (Kraków, 1534, 2/1539)]

ed.: *S Augustini De musica dialogi VI* (Kraków, 1536) [lost]
Directiones musicae ad cathedralis ecclesiae premislensis usum (Kraków, 1544) [lost]

Modus regulariter accentuandi lectiones matutinales prophetias necnon epistolas et evangelia (Kraków, 1518/R1979 in MMP, ser.D, v, 2/1525) [pubd anonymously; thought to be by Sebastian]

MOTETS

Aliquot hymni ecclesiastici vario melodiarum genere editi (Kraków, 1522), lost
Alleluia ad Rorate cum prosa Ave Maria, 4vv, ed. Z. Szweykowski, *Muzyka w dawnym Krakowie* (Kraków, 1964)
Alleluia, Felix es sacra virgo Maria, 4vv, ed. H. Feicht, *Muzyka staropolska* (Kraków, 1966)
Prosa ad Rorate tempore paschali virgini Mariae laudes, 4vv, ed. in Monumenta musices sacrae in Polonia, ii (Poznań, 1887)

Sebenico, Giovanni [Šibenčanin, Ivan] (*b* ?Šibenik, Dalmatia, *c*1640; *d* Cividale del Friuli or Córbola, Veneto, 19 Sept 1705). Composer, organist and tenor of Croatian origin. He was probably a pupil of Legrenzi. He worked as *vicemaestro di cappella* at Cividale del Friuli from 1660 to 1663 and as a tenor at S Marco, Venice, from 29 July 1663 to 1666. He was at Charles II's court in London between April 1666 and the summer of 1673: in 1668 he was 'Master of Italian Music' and was mentioned by Pepys (on 28 September) as a singer; Roger North heard him play the organ with Locke. He returned to Italy in 1673 to become *maestro di cappella* at the court of Savoy in Turin, a position he held until 1690. He was then most probably in Venice for two years before returning to Cividale del Friuli in 1692 as *maestro di cappella*. Towards the end of his life he ceased working because of illness and also lived for a time in Córbola.

In his own day Sebenico was best known as a performer and as a composer of operas. The three he is known to have written were performed in Turin: *L'Atalanta* (6 December 1673, Teatrino della Venaria Reale, to a libretto by B. Biancó), *Gli Amori delusi da amore* in three acts (1688, Teatro Regio) and *Leonida in Sparta*, also in three acts (Carnival 1689, Teatro Regio) and rearranged as *L'oppresso sollevato* for performance in Venice (winter 1692, Teatro SS Giovanni e Paolo). The music seems not to have survived, though we do have printed librettos of the last two. Three sacred works were discovered in 1971 in the chapter archives at Cividale del Friuli: an unpretentious *Messa chiamata 'L'imitazione zoccolantissima'* for two two-part choirs (soprano and bass) with continuo; a rather operatic *Responsorio di S Antonio di Padova* for solo voice, two violins and continuo (ed. in Župančić, 1978); and the motet *Lauda, Jerusalem, Dominum*, a luxuriant score, with rich harmony and a good deal of solo writing (ed. in Župančić, 1971). A fourth work, *O dolor, o moeror*, for three voices and continuo, is in the Moravské múzeum, Brno; it appears to date from Sebenico's Turin years.

LOVRO ŽUPANOVIĆ

Sebestyen, György. *See* SÉBASTIAN, GEORGES.

Sebök, György (*b* Szeged, 2 Nov 1922). Hungarian pianist. He gave his first public performance at 14, and at 16 entered the Franz Liszt Academy in Budapest, where his teachers included Székely, Keéri-Szántó, Weiner and Kodály. After making his concerto début under Enescu (1946, Bucharest) and winning first prize at the Berlin International Competition, he embarked on a successful career as a soloist. He has taught at the Béla Bartók Conservatory in Budapest, the Toho Gakuen School of Music in Tokyo, at Indiana University, the Hochschule in Berlin and the Banff Centre for the Arts, Canada, and has given internationally acclaimed masterclasses. Sebök has made many recordings, notably of cello and violin sonatas with Janos Starker and Arthur Grumiaux, and, among other honours, received the Liszt Prize of the Hungarian Government (1953) and was made a Chevalier de l'Ordre des Arts et des Lettres, Paris (1996).

JEREMY SIEPMANN

Šebor, Karel (Richard) [Schebor, Carl] (*b* Brandýs nad Labem, 13 Aug 1843; *d* Prague, 17 May 1903). Czech composer. A child prodigy, he attended the Prague Conservatory from the age of 11, studying the violin with Mořic Mildner and composition with J.B. Kittl. By 1859 he had already completed his first symphony. He gained a reputation as an excellent violinist, performing in chamber music concerts in and around Prague. However, in 1860, after he was found to be suffering from a heart defect, he left the conservatory and gave up any hope of pursuing a career as a violinist. A year later he moved to the Polish estate of Baron Puget-Puzet at Samianka, working as a music teacher, after which (1863) he obtained his first theatre post as a conductor in Erfurt.

In 1865 Šebor began his important association with Czech opera. He was installed at the Provisional Theatre as chorus master and second conductor, and his first opera, *Templáři na Moravě* ('The Templars in Moravia'), was staged with great success. This was the first performance of an original Czech opera at the Provisional Theatre, and it established Šebor as a leading Czech composer and potential rival of Smetana. Over the next three years he consolidated his position with further national operas, *Drahomíra* (1867), and *Nevěsta husitská* ('The Hussite Bride', 1868), which proved to be his most popular stage work. His next opera, *Blanka* (1870), was a failure. This was partly due to inherent weaknesses in its libretto, but perhaps also because Šebor became a victim of a burgeoning dispute between the aesthetically conflicting factions of Smetana and František Pivoda; his opera was attacked for exhibiting italianate style, a weak plot, and for its being based upon a poorly translated libretto resulting in faulty declamation and text underlay. The

situation was exacerbated by disagreements with the theatre management, and probably compounded by as yet unknown personal difficulties. As a result he surrendered his post and left Bohemia.

He spent the next 24 years in voluntary exile, initially as conductor of opera in Lemberg (now L'viv, Ukraine), and from 1873 as music director of an infantry regiment. For a brief period he conducted at the Carltheater in Vienna. He remained active as a composer, producing some chamber works and many orchestral dances and marches. He revised *The Hussite Bride*, and an attempt was made by the former Intendant of the Provisional Theatre, František Rieger, to lure him back to composition for the Czech stage. This resulted in the comic opera *Zmařená svatba* ('The Frustrated Wedding', 1879), which, despite public success, was soon withdrawn from the repertory because of a dispute over Šebor's financial demands. He finally returned to Prague in 1894, founded a private music school, and became composer and music director of the national gymnastics institution Sokol. Apart from performances of *The Hussite Bride* until the mid-1890s, his only connection with Czech opera was as a member of the committee which decided the Prague National Theatre's repertory. After his death Šebor's music dropped from public awareness. His contribution to the development of Czech music still remains to be thoroughly evaluated.

Šebor was one of the most talented and significant of Czech Romantic composers. His creative style, which was founded upon French and Italian influences, especially Auber, Meyerbeer and Bellini, was notable for its spontaneity, evocative and strongly lyrical melodic writing, and an acute sense of orchestral colour. These characteristics were already evident in his early symphonies and overtures of the early 1860s, the former works representing an important anticipation of Dvořak's first works in the genre. However, his primary significance was as an opera composer, a medium to which his style was inherently suited. He demonstrated remarkable dramatic understanding, an ability to delineate character and to sustain long periods of dramatic argument and controlled climax. Unfortunately, he never fulfilled the promise of his early talent, tending to work too fast and without reflection. His later works, including *The Frustrated Wedding* and the mature chamber music, are often disappointingly superficial.

KARL STAPLETON

Sec (Fr.: 'dry'). A term used by several French composers, particularly Debussy, to indicate that a note or chord should be struck and released abruptly. It is applied particularly to harp, piano and percussion music. It also appears in French scores from the late 18th century: in Le Sueur's operas it applies to the whole orchestra.

Secco (It.: 'dry'). Short for *recitativo secco*. A 19th-century term for recitative accompanied (normally) by a keyboard instrument instead of by the orchestra. For the practice of using a cello and a double bass in such contexts *see* RECITATIVE.

Sechter, Simon (*b* Friedberg [now Frimburk], Bohemia, 11 Oct 1788; *d* Vienna, 10 Sept 1867). Austrian theorist, composer, conductor and organist. Sechter went to Vienna in 1804 and soon became known as a harmony and counterpoint teacher. In 1810 he began teaching the piano and singing at the Educational Institute for the Blind. He was appointed assistant court organist in 1824, and principal court organist in 1825. Schubert, shortly before his death (1828), took one counterpoint lesson with Sechter. In 1851, Sechter was appointed professor of thoroughbass and counterpoint at the Vienna Conservatory. Bruckner studied with Sechter, 1855–61, eventually succeeding him at the conservatory and passing on his methods. Other pupils were Marxsen (Brahms's teacher),

Nottebohm, C.F. Pohl, Thalberg, Carl Umlauf and Henry Vieuxtemps.

A prolific composer, Sechter was said to have written a fugue every day. He apparently wrote more than 8000 pieces, of which the masses and oratorios written after 1825 became the best-known. His compositions exemplify the harmonic progressions he advocated in his treatises.

Sechter was the most influential Viennese music theorist of the 19th century. His main treatise, in three volumes, is *Die Grundsätze der musikalischen Komposition* (1853–4). The first volume, *Die richtige Folge der Grundharmonien*, introduces many of Sechter's principal ideas. He adopted the fundamental bass concept from Rameau, Kirnberger and J.A.P. Schulz, in which chord progressions and transformations, even highly chromatic ones, are based on roots belonging to the diatonic scale. Thus, he fits into the *Stufentheorie* ('step theory') tradition.

Sechter, like Rameau, treated the authentic cadence as the model for harmonic progressions (the 'Sechter'sche Kette' or 'Sechter circle' is a descending circle of 5ths); also among the 'correct' progressions are diatonic root connections by ascending 5ths and descending or ascending 3rds. A root progression by step requires a stated or implied intermediate chord (*Zwischenakkorde*) that contains the pitches of the first chord and approaches the second by a descending 5th. In such a situation, the stated first chord would be considered the (root) representative (*Stellvertreter*) for the unstated intermediate chord. For example, the progression C–E–G to D–F–A in C major requires the intermediate chord A–C–E–G. In some circumstances an apparent conjunct progression could be attributed to simultaneous chordal arpeggiation and non-harmonic notes. A proponent of just intonation, Sechter considered the interval of the 5th from the second to the sixth degrees of the major scale to be a dissonance. Also significant was Sechter's treatment of augmented 6th chords as 'hybrid chords' (*Zwitterakkorde*), belonging to two key areas.

The first two volumes of *Die Grundsätze* include sophisticated ideas about the relationship between metre and harmony. The third contains a tour de force of contrapuntal technique, including an impressive 165-page treatment of double counterpoint at many intervals and in various combinations.

Sechter's work influenced later theorists, including Cyrill Hynais, Carl Mayrberger and Josef Schalk, who attempted to analyse late Romantic harmony, especially that of Wagner. Schoenberg's *Stufentheorie*, his discussion of root progressions and interpolated roots, and his derivation of augmented 6th chords are indebted to Sechter. Along different lines, Schenker's *Stufentheorie* also rests upon Sechter's.

Sechzehntel-Note (Ger.). *See* SEMIQUAVER (16th-note). *See also* NOTE VALUES.

Seckendorff, Karl Siegmund, Freiherr **von** (*b* Erlangen, 26 Nov 1744; *d* Ansbach, 26 April 1785). German courtier, writer and composer. He studied literature and law at Erlangen University, and perhaps music at the Bayreuth music academy. From 1761 he was an officer in the service of Austria and from 1765 to 1774 he served in Sardinia. He then joined the court of Duchess Anna Amalia at Weimar in late 1775 as chamberlain and steward, and was there entrusted with the artistic and practical direction of the Hofkapelle. By 1784 he had apparently tired of court life at Weimar (which he satirized in *Leben des Herrn von Gicks zum Gackelstein*), and went as Prussian emissary to Ansbach, where he died shortly after assuming the post.

Seckendorff was instrumental in introducing Handel's works to Weimar (*Messiah* and *Alexander's Feast*, 1780), but his greatest significance lay in his close association with E.W. Wolf, Duchess Anna Amalia and Goethe in the early years of Singspiel. Despite some unpleasant incidents which were marked by rivalry and ambition on both sides, Seckendorff collaborated with Goethe a number of times: he translated *Werther* into French, composed the earliest known settings of *Der Fischer*, *Das Veilchen*, *Der untreue Knabe* and *Der König in Thule* (13 settings appear in Goethe's manuscript Liederbuch of 1777–8 alongside the original texts), and wrote music for several of Goethe's stage works. He also orchestrated compositions by the duchess, including her setting of Goethe's *Erwin und Elmire* (first version), wrote a shadow play *Minervens Geburt, Leben und Taten* on the occasion of Goethe's birthday (1781) and produced an opera libretto *Superba* for E.W. Wolf (1784). His works show the influence of Classicism (e.g. in his various contributions on music and aesthetics to the *Teutscher Merkur* and *Tiefurter Journal*) and of Herder's folklorism, which inspired the settings in his *Volks- und andere Lieder* (1779–82) and infuses much of his stage music, including his own operetta *Der Blumenraub* (1784). Seckendorff also composed a number of chamber works in a conventional pre-Classical idiom.

WORKS

STAGE

Le marché [La foire] du village (ballet comique), 1776, *D-WRtl*, *DS*

Lila (Spl, 4, J.W. von Goethe), Weimar, Neues, 1777, *WRtl* [first version of text, now lost]

Proserpina (monodrama, 1, Goethe), Weimar, Neues, 30 Jan 1778, *DS* [included in Act 4 of *Der Triumph der Empfindsamkeit* (1778)]

Jery und Bätely (Spl, 1, Goethe), Weimar, Neues, 12 July 1780, lib pubd, music lost

Der Geist der Jungend (comédie-ballet), Weimar, 30 Jan 1782, lost

Der Blumenraub (operette, 2, Seckendorff), Weimar, Neues, 1784, lost

Second (Fr. *seconde*; Ger. *Sekunde*; It. *seconda*). The INTERVAL between any adjacent diatonic scale degrees (e.g. C–D, D–E♭, E♭–F, F♯–G). If the interval is equal to a whole tone (*see* TONE (i)), it is called a major 2nd; if it is equal to a SEMITONE it is called a minor 2nd. A major 2nd that has been increased by a chromatic semitone is called an augmented 2nd (e.g. C–D♯, G♭–A). Intervals such as F♯–G♭ and B♯–C could be called 'diminished 2nds'; but the usual term for them is ENHARMONIC equivalent.

Second, Sarah. English singer. *See* MAHON family.

Seconda pratica (It.). A term used in opposition to PRIMA PRATICA.

Secondary dominant. *See* APPLIED DOMINANT.

Seconda volta (It.: 'second time'). *See* VOLTA (iii).

Second subject group (Ger. *Nebensatz*). *See* SUBJECT GROUP.

Second Viennese School. A term used most often to refer collectively to Schoenberg, Berg and Webern, though sometimes understood more broadly to include Schoenberg's other Viennese students of the period before World War I (such as Wellesz, Jalowetz, Karl Horwitz and Erwin Stein) and even composers who studied later with Schoenberg in Berlin (such as Skalkottas). While the idea of a school constituted by Schoenberg, Berg and Webern harbours the obvious danger of minimizing the individuality of each composer's achievement, evidence of a strong commonality of purpose is provided by their close, if frequently strained, personal association (at least up until Schoenberg's move to Berlin in 1925), their joint public activities (for instance in the Verein für Musikalische Privataufführungen) and their parallel but distinct explorations of ATONALITY and TWELVE-NOTE COMPOSITION, practices which became central to the evolving historical definition of the school. While Second Viennese School has proved the most enduring designation in English-language texts, a number of other terms have enjoyed currency, including Young Viennese School (possibly the earliest in provenance, employed by Wellesz as far back as 1912), Schoenberg School, New Vienna School or simply Vienna School. These alternatives (and their foreign-language equivalents) have the advantage of circumventing the precarious concept of a 'First Viennese School', though the implication that Schoenberg and his circle were natural heirs to Haydn, Mozart and Beethoven, as well as to later 19th-century Austro-German tradition,

was one that the composers and their apologists did much to foster in their theoretical and analytical writings.

Secoria, Elfa (*b* Garut, Java, 20 Feb 1959). Indonesian composer and jazz pianist. At the age of eight he appeared on Indonesian TV playing the piano and vibraphone in his jazz trio; in his teens he formed many jazz groups and studied composition and orchestration with F.A. Warsono in Bandung. In 1978 Secoria founded and conducted Orkes Chandra, an orchestra which played an important role in acquainting a wider audience with Indonesian pop in an orchestral form through its monthly concerts on TV, broadcast until 1981. In 1981 he became a teacher at the Indonesian Music Foundation in Bandung. The Elfa Music School, which he founded and taught at, has trained many pop musicians and singers. Later he led the Elfa Secoria Big Band, which has appeared at festivals from the Jakarta International Jazz Festival to the North Sea Jazz Festival. In his works for jazz combo, big band and orchestra Secoria has endeavoured to fuse elements of Indonesian traditional music (Balinese, Betawi and Minangkabau) with Latin American rhythms. For example, at the 1995 Jakarta festival his big band included a player of the *saluang* (Minangkabau flute) as a prominent soloist. He is one of the best known jazz pianists and composers in Indonesia.

Sedaine, Michel-Jean (*b* Paris, 2 June 1719; *d* Paris, 17 May 1797). French librettist and playwright. He was probably the most important and influential librettist of *opéra comique* in the later 18th century, taking a major role in the transformation of that genre from its mid-century identity (dominated by Favart) to its operatic maturity at the outset of the Revolution.

Sedaine began his career at 16, on his father's death, as a stone-mason and apprentice architect. By his 30s he was writing poetry while still engaged on building projects. In 1752 his *Pièces fugitives* were published, and in 1756 his 'poème didactique' *Le vaudeville*, setting out his critique of the current *opéra comique*. His comedy *Le diable à quatre* (1756) was a natural outcome of interest in music and the stage; set mainly in vaudevilles it was succeeded by musical comedies in a new style, emphasizing an integrated approach to action and ensembles. Sedaine was extremely particular about the need to work exclusively with a chosen composer, and selected three collaborators of consequence (Philidor, Monsigny and Grétry) with whom all his main works were created. Each opera was regarded as a unique collaborative outcome, capable of no further musical resetting.

Sedain's creative career can be seen in terms of his progressive erosion of the established dramatic genres, and continual expansion in range of the subject matter of his operas. A pivotal work was *Le déserteur* (set by Monsigny, 1769), which enjoyed universal success. Its daring English-influenced mixture of comedy and near-tragedy was articulated through a variety of scenes and ensembles, with a through-composed finale involving the chorus.

In 1765 the Comédie-Française produced Sedaine's best play, *Le philosophe sans le savoir*, and in 1766 *Aline, reine de Golconde* succeeded at the Opéra: Sedaine thus had major works running simultaneously on the three leading stages of France. In the 1770s he developed his interest in subjects from the Middle Ages; the outstanding operatic results were *Aucassin et Nicolette* (1779) and *Richard Coeur-de-lion* (1784). Later works developed themes from myth as well as history, and *Guillaume Tell* is an outstanding combination of the latter, as well as a contribution to the aims of the Revolution, made explicit in the libretto's preface. Sedaine was appointed 'perpetual secretary' of the Académie Royale d'Architecture in 1768 and was elected to the Académie Française in 1786, when he expressed the wish for 'a man gifted with the sublime talents of poetry and of music, carried to the same degree'. Sedaine's reputation suffered a decline after his death (Hoffman criticized his themes of imprisonment and rescue) but scholarly interest revived in the later 19th century.

In Germany C.F. Weisse adapted two Sedaine works for J.A. Hiller: *Blaise le savetier* (*Der Dorfbalbier*) and *Le roi et le fermier* (*Die Jagd*). The latter was also adapted by Goldoni for Galuppi's setting, *Il re alla caccia*. *Alcine, reine de Golconde* was adapted by C.B. Zibet for F. Uttini's Swedish opera of the same name.

WORKS

LIBRETTOS

Anacréon (pastorale-héroïque en vaudevilles), 1754; *Le diable à quatre, ou La double métamorphose* (oc, partly 'en vaudevilles'), Baurans, F.-A.D. Philidor and J.-L. Laruette, 1756 (Gluck and others, 1759; B. Porta, 1790; J.-P. Solié 1809); *Blaise le savetier* (oc), Philidor, 1759; *L'huître et les plaideurs, ou Le tribunal de la chicane* (oc), Philidor, 1759; *Les troqueurs dupés* (cmda), C. Sodi, 1760; *On ne s'avise jamais de tout* (oc), P.-A. Monsigny, 1761; *Le bon compères, ou Les bons amis* (oc), J.-B. de La Borde, 1761, as Les bons amis; *Le jardinier et son seigneur* (oc), Philidor, 1761

Le roi et le fermier (comédie mêlée de morceaux de musique), Monsigny, 1762; *L'anneau perdu et retrouvé* (oc), La Borde, 1764 (L.-C.-A. Chardiny, 1788); *Rose et Colas* (comédie en prose et musique), Monsigny, 1764; *Aline, reine de Golconde* (ballet-héroïque), Monsigny, 1766; *Philémon et Baucis* (opéra), Monsigny, 1766; *Les sabots* (oc, after J. Cazotte), E. Duni, 1768; *Le déserteur* (drame mêlé de musique), Monsigny, 1769; *Thémire* (pastorale mêlée d'ariettes), Duni, 1770; *Le faucon* (oc), Monsigny, 1771

Le magnifique (comédie mise en musique, after J. de La Fontaine), A.-E.-M. Grétry, 1773; *Ernelinde* (tragédie-lyrique, after A.A.H. DAVID CHARLTON

Sedak, Eva (*b* Zagreb, 17 July 1938). Croatian musicologist. She studied at the Zagreb Academy of Music (Diploma 1963, MA 1982), and took the PhD at Zagreb University in 1986 with a dissertation on Josip Slavenski. She joined Radio Zagreb (later Hrvatski radio) in 1961 as journalist and was producer of its Treći Program (Programme III, 1963–90) and chief producer of its music programme (1990–92). Since 1965 she has been associated with the Zagreb Music Biennale. She has taught in the musicology department of the Zagreb Academy of Music since 1981 and was appointed director of its Institute of Systematic Musicology in 1994. Since 1996 she has taught at the Faculty of Education in Pula. She founded the musicological section of the Croatian Music Institute in 1988 and in the same year founded a project to document Croatian music, which she led until 1989 and again from 1997. She has served on the editorial boards of *Zvuk*, *Arti musices*, the *International Review of the Aesthetics and Sociology of Music* and the edition of Slavenski's works.

Sedak's musicological interests include Croatian music in Yugoslav and European contexts and the Croatian musical heritage of the 19th and 20th centuries. She has produced numerous radio and television programmes on Croatian music, on which many works were first performed.

ZDRAVKO BLAŽEKOVIĆ

Sedany. *See* DARGASON.

Sedecima (?It.). *See under* ORGAN STOP.

Sedlak, Wenzel (*b* Jezbořice, Bohemia, 4 Aug 1776; *d* ?Vienna, 20 Nov 1851). Bohemian composer and clarinettist. He was employed as a clarinettist by Prince Auersperg in about 1805, and by Prince Liechtenstein from 1808 until the temporary dissolution of his Harmonie in June 1809. He may have resumed employment with Prince Auersperg as Kapellmeister before being re-engaged by Prince Liechtenstein as Kapellmeister and clarinettist by the time his Harmonie was reconstituted on 1 April 1812: Sedlak held this post until its dissolution on 1 May 1835 when he was given a pension. A prominent soloist in Vienna, in 1821–2, he was a member of Sedlatzek's Harmonie-Quintett, the Viennese counterpart of Reicha's Parisian wind quintet.

Sedlak is remembered most for his transcriptions of opera and ballet scores for Harmonie. He was Vienna's foremost exponent of this art for some 25 years. Over 60 works survive including several from originals by Rossini, Bellini, Donizetti and Auber (now in *A-Ee*, *Wgm*, *Wn*, *CZ-KRa*, *CZ-Bm*, *Pnm*, *H-Bn*, *I-Fc*, *PL-LA*); documents referring to the now lost Liechtenstein music library mention several others not found elsewhere. His transcriptions were scored for various Harmonie combinations up to a maximum of pairs of oboes, clarinets, bassoons, horns and trumpets, with a double bassoon and trombone. None of his five published transcriptions – Duport's *Der blöde Ritter*, Liverati's *David*, Hummel's *Die Eselshaut*, Persuis's *Nina* and Beethoven's *Fidelio* (all 1812–15) – includes parts for trumpets or trombone. Undoubtedly

the most important of these is that of *Fidelio*, which Beethoven himself authorized and may have actually supervised. Sedlak also composed a concerto for second horn, some ländler for clarinet, marches for trumpets, and some original dances and variations for piano and small chamber combinations.

ROGER HELLYER

Sedrā. A category of Syrian chant. *See* SYRIAN CHURCH MUSIC, §3.

Sedulius [Caelius Sedulius] (*fl* first half of 5th century). Christian Latin poet. He is known principally for his *Carmen paschale*, a biblical epic in five books of dactylic hexameter, probably written in the period 425–50. It was well known by the end of the 5th century and remained popular until at least the 12th; it was frequently copied and quoted, and was the source for the text of the introit of the Votive Mass of the Virgin, *Salve, sancta parens*, and the Christmas antiphon *Genuit puerpera regem*.

Two shorter poems are also attributed to Sedulius: a text on salvation history, *Cantemus socii Domino* (variously designated 'hymnus', 'versus' and 'carmen' in the manuscripts), and the famous abecedarian iambic hymn *A solis ortus cardine*, which recounts the life of Christ from the Incarnation to the Ascension and is found in liturgical manuscripts from the 10th century onwards. The latter text was often divided into sections for different liturgical occasions: the first seven strophes were used for Christmas, the next four (beginning 'Hostis Herodes impie') for Epiphany, and the following four (beginning 'Katerva matrum personat') for the Feast of the Holy Innocents. Both *A solis ortus cardine* and the *Carmen paschale* had a significant influence on medieval poets.

LAWRENCE GUSHEE/SUSAN BOYNTON

Seede, Brice (bap. Bisley, Glos., 14 April 1710; *d* Bristol, 10 Dec 1790). English organ builder. Seede was first active as an architect (Painswick Church, 1741) and wood carver (Westbury Court, 1745) before working as an organ builder in association with Henry Millar at Cirencester (1750–53). His first instrument was erected at Chippenham Parish Church (1752) where the surviving case reflects the work of John Strahan for the 1725 Harris-Byfield organ at St Mary Redcliffe, Bristol. On the death of Thomas Swarbrick in 1753 Seede moved to Bristol and developed extensive tuning and maintenance connections in the city, particularly at the Cathedral (where he repaired the Chair organ in 1763), St Mary Redcliffe and throughout the West Country. The largest of his modest output of new instruments, the Bodmin Parish Church organ (1775), has not survived, but a substantial chamber organ at Powderham Castle (1769) awaits restoration. Brice Seede's organs were not innovative but continued the tonal, technical and casework styles of the school of Renatus Harris. From 1771 he worked in partnership with his son Richard (1743–1823) whose surviving instruments include Lulworth Castle Chapel (1785–6, restored by Drake, 1986–9).

CHRISTOPHER KENT

Seedo [Sidow] (*b c*1700; *d* Potsdam, *c*1754). German composer. In the fifth edition of *Grove's Dictionary* Alfred Loewenberg cited a letter from the Prussian ambassador in London, C.W. von Borcke, which shows that 'Seedo' was the son of Samuel Peter Sidow, a musician employed by the Elector of Brandenburg, who may have come to London as early as 1700, perhaps with Pepusch (the letter is in *Tonkünstler-Lexicon Berlin's*, Berlin, 1860–61). By the mid-1720s Seedo was working at the Little Theatre in the Haymarket. In 1727 he married the singer Maria Manina, who had small parts in London's Italian operas from 1711. After Pepusch had helped to make *The Beggar's Opera* a success at Lincoln's Inn Fields, Seedo worked on Drury Lane imitations from 1731 to 1734.

The Devil to Pay failed in its full-length version (42 airs), but as an afterpiece (16 airs) it was by far the most popular ballad opera of the century, apart from *The Beggar's Opera*; it was given regular London performances until well into the 19th century. In a translation by von Borcke it became popular in Germany as well, and was a major influence on the development of Singspiel. Like most ballad operas, it was originally published with only the melodies of the airs; for provincial productions someone on the spot must have provided the accompaniments. Thus it is that two early sets of manuscript parts survive for *The Devil to Pay* with completely different basses, and sometimes with instrumental preludes and postludes of a different length (*GB-Lbl* R.M. 21.c.43 and *Lcm* 2232). On 20 October 1740 the engraver George Bickham advertised in the *London Daily Post* a new edition 'with the Scene engrav'd in Picture Work on the top of each Song, as represented at the Old Playhouse', and 'a new Bass to the Whole'.

Bickham's basses cannot be by Seedo, and it may well be that the ones in the manuscript sets are not by him either. But Seedo arrangements (without preludes and postludes) were published anonymously for the 21 songs in *The Devil of a Duke*; an advertisement in other ballad opera librettos, for instance Robert Drury's *The Fancy'd Queen*, says they were 'Sett by Mr Seedo for the Spinnet, Harpsichord, German Flute, Violin & Hautboy, and a thorough bass to each Tune'. Seedo directed the band for

all these ballad operas, and in the Drury Lane revival of Fielding's *The Author's Farce* he even spoke:

LUCKLESS: Mr Seedo, have you not provided a new overture for the occasion?
SEEDO [*in the orchestra pit*]: I have provided one.

This does not survive, and nor does the music for three more of Seedo's stage works: *Venus, Cupid and Hymen* (which included Mrs Seedo's only appearance at Drury Lane, though she had sung occasionally in masques at Lincoln's Inn Fields), *The Mother-in-Law* and *Harlequin in the City*. About 1736, deep in debt, Seedo went to Potsdam to work with the Royal Band.

WORKS

BALLAD OPERAS
all performed in London

music lost

The Devil to Pay (C. Coffey), afterpiece version, 16 Aug 1731, 1 song
The Lottery (H. Fielding), 1 Jan 1732, 10 out of 19 songs
The Mock Doctor (Fielding, after Molière), 23 June 1732, 3 out of 10 songs
The Devil of a Duke (R. Drury), 17 Aug 1732, 1 song (orig. an addition to S. Johnson: *Hurlothrumbo*)
The Boarding School, or The Sham Captain (Coffey), 29 Jan 1733, 3 songs
The Author's Farce (Fielding), revival, 15 Jan 1734, ov. and act tunes, 1 song

OTHER STAGE WORKS
all performed in London

music lost

Venus, Cupid and Hymen (masque), Drury Lane, 21 May 1733
The Judgement of Paris, 1733
Ov. and incid music to The Mother-in-Law (comedy, J. Miller), Haymarket, 20 Feb 1734
Harlequin in the City (pantomime), Goodman's Fields, 25 Sept 1734

ROGER FISKE/IRENA CHOLIJ

Seedo, Maria. *See* MANINA, MARIA.

Seefried, Irmgard (*b* Köngetried, nr Mindelheim, 9 Oct 1919; *d* Vienna, 24 Nov 1988). Austrian soprano of German birth. She received her first music lessons from her father and at the age of 11, three years after her first public appearance, sang Gretel in Humperdinck's opera. After study at the Augsburg Conservatory she was engaged by Karajan for the Aachen Opera in 1939; while at Aachen she also sang in performances at the cathedral, under Theodor Rehmann. In 1943 she made her début at the Vienna Staatsoper as Eva in *Die Meistersinger* under Karl Böhm, and then remained a member of the company. In 1944 she sang the Composer in the performance of *Ariadne auf Naxos* at Vienna in honour of Strauss's 80th birthday. (Her supreme interpretation of this role is preserved on recordings with Böhm and Karajan.) After the war she began the series of guest appearances that took her to the opera houses and concert halls of Europe and North and South America; she also undertook concert and recital tours of India, Australia, Japan and South Africa. She first sang at Covent Garden with the Vienna Staatsoper in September 1947 (Fiordiligi and Susanna), returned to sing Susanna and Eva with the Covent Garden company in the 1948–9 season, and soon became a regular soloist at such festivals as Salzburg, Edinburgh and Lucerne. In 1964 she and her husband Wolfgang Schneiderhan gave the first performance of Henze's *Ariosi* at the Edinburgh Festival, and in 1968 they took part in the first performance of Martin's *Magnificat* (written for and dedicated to them) at Lucerne. Her last stage appearance was in the title role of *Kát'a Kabanová* in Vienna in 1976.

Seefried's combination of a beautiful lyric soprano voice, charm and pleasing stage deportment made her a favourite with audiences, although she sometimes overplayed the soubrette aspects of some of her favourite Mozart and Strauss roles. She was also a gifted, highly individual lieder singer, as can be heard on many recordings.

PETER BRANSCOMBE/R

Seeger. American family of musicians.

(1) Charles (Louis) Seeger (*b* Mexico City, 14 Dec 1886; *d* Bridgewater, CT, 7 Feb 1979). Musicologist, composer, conductor, critic and musical philosopher. His initial interest was in composition and conducting, and he joined numerous young American composers in Europe in the years immediately following his graduation from Harvard (1908). He spent a season (1910–11) as a conductor at the Cologne Opera before returning to the USA as a composer and chairman of the department of music at the University of California, Berkeley (1912–19), where he gave the first American courses in musicology in 1916. Several of his compositions were destroyed in the Berkeley fire (1923). Subsequently he was a lecturer and instructor at the Institute of Musical Art, New York (1921–33), the forerunner of the Juilliard School, and lecturer at the New School for Social Research (1931–5), where, with Henry Cowell, he taught the first courses in ethnomusicology given in the USA (1931). Concurrently he was active in the organization and development of the Composers Collective and other programmes devoted to the growth and dissemination of American composition. One of his outstanding students, RUTH CRAWFORD, later became his second wife. His own compositions written at this time include a number of songs, with piano or orchestral accompaniment, as well as many instrumental works. He also worked as a music critic for several American newspapers and journals, including the *Daily Worker*, for which he wrote under the pseudonym Carl Sand.

In 1935 Seeger moved to Washington, DC, where he served as music technical adviser in Roosevelt's Resettlement Administration (1935–7), deputy director of the Federal Music Project of Roosevelt's Works Progress Administration (1937–41), and chief of the music division of the Pan-American Union (1941–53). Under his energetic and far-sighted supervision, much fieldwork was done in North and Latin America, followed by many publications and recordings. He returned to university teaching, as research musicologist at the Institute of Ethnomusicology at the University of California, Los

Angeles (1960–70), and lecturer at various New England universities, including Brown, Harvard and Yale. He was a founder (and chairman, 1930–34) of the New York Musicological Society, reorganized with his help in 1934 as the American Musicological Society (of which he was president in 1945–6), as well as the American Society for Comparative Musicology (president, 1935), the Society for Ethnomusicology (president, 1960–61; honorary president from 1972), the International Society for Music Educators, the College Music Society and the International Music Council; he was also vice-president of the Gesellschaft für Vergleichende Musikwissenschaft (1934–6).

Seeger concentrated on general ethnomusicology and its theory, in which he had considerable influence as a largely prescriptive and philosophical writer. He pointed out that the evaluation of all music in terms of Western art music is a cultural anachronism, and emphasized that in much non-Western music the performer, rather than a 'composer', is the main creator or re-creator. In his 'Preface to the Critique of Music' (1963) he criticized the habit of assessing both art and folk music by way of value judgments in the absence of an objective descriptive method, and in 'The Music Process' (1966) he approached the fundamental difficulty of describing music through the distorting medium of speech. The same essay set out his strictures on classifying peoples according to social strata, and on the limitations of the expression 'national music'. In the 1930s he became interested in the development of machines for music analysis, and he considered the value of automatic music writing (using 'Seeger melographs') as an aid to the objective perception and understanding of unfamiliar music. His lifelong interest in American folk music has been continued in his children's work; he recorded and, with his second wife, Ruth Crawford, transcribed and edited American folksongs, and with Ruth, and John and Alan Lomax he produced a major study of American folk music, *Folk Song: USA* (New York, 1947/*R*, 2/1975).

The freshness of Seeger's thinking, his constant concern for the balance between society and the individual, and the extent and variety of his work have made an outstanding impact on both American and international attitudes to music and its place in society.

(2) Ruth (Porter) Crawford Seeger. *See* CRAWFORD, RUTH.

(3) Pete(r R.) Seeger (*b* New York, 3 May 1919). American folksinger, banjo player and songwriter, son of (1) Charles (Louis) Seeger. As a teenager he assisted the folksong collector J.A. Lomax, then joined the Alamanac Singers, so meeting Woody Guthrie, Lee Hays and others. During the early 1950s he recorded such hit records as *Kisses Sweeter than Wine*, *Wimoweh* and *So long, it's been good to know you* with the vocal quartet the Weavers. Following his appearance before the House Committee on Un-American Activities, he was blacklisted by concert halls and broadcasters. In the 1960s Seeger further established his pivotal role in the American folk revival, promoting its ideals and, through concerts and recordings, encouraging others to sing and play. He founded the Newport Folk Festival, published tutors for the banjo and 12-string guitar and has contributed regularly to the magazine *Sing Out!* since 1954.

As a songwriter, Seeger was adept at making musical settings for works as diverse as a section of Ecclesiastes (*Turn, Turn, Turn*), Jose Marti's *Guantanamera* and *The Bells of Rhymney* by the Welsh poet Idris Davies. The best known of his own compositions include the anti-war song *Where have all the flowers gone?*, *If I had a Hammer* (written with Hays), *Last Train to Nuremberg* and *Waist Deep in the Big Muddy*.

(4) Mike [Michael] **Seeger** (*b* New York, 15 Aug 1933). Folksinger and instrumentalist, son of (1) Charles Louis Seeger and Ruth Crawford. He received no formal instruction in music, but learned to play a number of folk instruments (including the fiddle, guitar, five-string banjo, autoharp, and jew's harp) from observing and imitating first other members of his family and then traditional musicians. Beginning in the early 1950s he sought to document folk music traditions of the mountains of the Southeast through field recordings and his own playing; he was responsible for the first recording of the guitarist and songwriter Elizabeth Cotten, and his own early recording of banjo playing in the style of Earl Scruggs is regarded as a classic in its field. With John Cohen and Tom Paley in 1958 he founded the New Lost City Ramblers, a pioneering traditional music group, and through it exerted a strong influence on the string-band revival that began in the 1960s; in 1968 he organized the Strange Creek Singers. He served on several boards of directors, including those of the Newport Folk Foundation (1964–70), the John Edwards Memorial Foundation at UCLA (1962–), and the Southern Folk Cultural Revival Project, Atlanta and Nashville (1973–86). He has received several NEA grants for performance, a Smithsonian Institution Visiting Scholar Research Fellowship (1983), and a Guggenheim Fellowship (1984). Throughout his career he has promoted an authentic folksong style and sound, by means of concerts, film and video documentaries and over 40 recordings and has shown himself committed to the perpetuation of the traditional music and culture of rural America.

(5) Peggy [Margaret] **Seeger** (*b* New York, 17 June 1935). Folksinger, song collector and songwriter, daughter of (1) Charles (Louis) Seeger. As a child she had formal training in both classical and folk music, and at Radcliffe College she studied music and began performing folksongs publicly. After studies and travels throughout Europe (1955–6) and China, she moved to Britain in 1956, becoming a British subject in 1959. As a solo performer and with her husband, Ewan MacColl [James Henry Miller] (*b* Auchterarder, Perthshire, 25 Jan 1915), she has helped lead the British folk music revival, extending traditional styles to modern media. Both separately and together they have performed in concerts, festivals and folk clubs, made many records and written music (for radio, films and television) and books.

WRITINGS

ed., with E. MacColl: *Travellers' Songs from England and Scotland* (London and Knoxville, TN, 1977)
ed., with E. MacColl: *Shellback: Reminiscences of Ben Bright, Mariner* (Oxford, *c*1980)

(6) Anthony Seeger (*b* New York, 29 May 1945). American ethnomusicologist, grandson of (1) Charles (Louis) Seeger. He was educated at Harvard University (BA 1967), studying with Albert Lord, and at the University of Chicago, where he earned the MA (1970) and the PhD in anthropology, with a dissertation on social organization of the Suyá (1974), under Victor Turner and Terence Turner. From 1975 to 1982 he was a member of the department of anthropology at the Museu Nacional, Rio de Janeiro and an occasional professor at the Conservatório Brasileiro de Música (1979–82). In 1982 he became associate professor in the department of anthropology at Indiana University, where he also served as the director of the Archives of Traditional Music. In 1988 he became the curator and director of the Smithsonian Folkways Recordings at the Smithsonian Institution in Washington, DC. The main focus of his work has been the study of social processes influenced by and influencing musical performance, principally among the Indians of

Brazil. Other areas of interest have included the recording industry, archiving practices for audio and video, and anthropological approaches to music. He has served as president of the Society for Ethnomusicology (1991–3) and the Commisão Pro-Indio in Rio de Janeiro (1978–80). He has been a member of the executive board of the International Council for Traditional Music (1991–7), the American Institute of Indian Studies Ethnomusicology Committee (1986–) and the advisory board of the Traditional Music Archives, Sudan (1994–). In 1983 he was elected a fellow of the American Academy of Arts and Science.

ANN M. PESCATELLO (1, 5), DAVE LAING (3), JUDITH ROSEN (4), GREGORY F. BARZ (6)

Seeger, Horst (*b* Erkner, nr Berlin, 6 Nov 1926; *d* Berlin, 3 Jan 1999). German musicologist and critic. After working as a teacher (1946–50), he studied musicology at the Humboldt University and the Berlin Musikhochschule with Meyer, Vetter and Dräger (1950–55) and took the doctorate at Berlin in 1958 with a dissertation on folklore and the 20th-century composer. As visiting lecturer in an advisory capacity, he was entrusted with the task of setting up the institute of music education at Greifswald University (1958–9). He had also been a music critic since 1950 and was briefly (1959–60) editor-in-chief of *Musik und Gesellschaft* in Berlin. After this he worked as chief Dramaturg of the Berlin Komische Oper (1960–73) and in 1961 founded its *Jahrbuch* (later titled *Musikbühne*, 1974–7, then *Oper heute* from 1978), which he also edited. In 1973 he became Intendant of the Dresden Staatsoper, where he was responsible for presenting the first production of Schoenberg's *Moses und Aron* in eastern Europe. He retired in 1983 due to illness and was made an honorary member of the Dresden Staatsoper in 1984. His chief research interests were the history and aesthetics of opera, and music lexicography (see his *Musiklexikon*, 1966 and *Opernlexikon*, 1978). He was also responsible for up-to-date translations of opera librettos (e.g. *Rigoletto*, *Queen of Spades*, *Oberon*, *Bluebeard's Castle*), some in collaboration with Felsenstein, and wrote the libretto for Siegfried Matthus's *Lazarillo vom Tormes* (1964).

Seelen, Johann Heinrich von (*b* Asel, East Friesland, 8 Aug 1688; *d* Lübeck, 22 Oct 1762). German theologian and philosopher. Son of Pastor Erich Zacharias von Seelen, he studied at the Gymnasium in Stade. In 1711 von Seelen attended the University of Wittenberg where he studied theology with Valentin Ernst Löscher and philosophy with Johann Christoph Wolf. He was appointed assistant rector in Flensburg in 1713, rector in Stade in 1716, and rector of the Katharinenkirche in Lübeck, 21 December 1717, a position he retained for the rest of his life. He declined several university professorships, including one at the University of Göttingen in 1737. Von Seelen wrote numerous books and articles, principally devoted to theological and philosophical subjects. Some of these involve discussions of music from both a biblical and

more general theological standpoint, and they provide important clues regarding the musical training and thought of a well-educated theologian and schoolmaster in early 18th-century Protestant Germany. Of his more than 350 works, those involving music are listed below.

GEORGE J. BUELOW

Seeling, Josef Antonín. *See* SEHLING, JOSEF ANTONÍN.

Segal, Uri(el) (*b* Jerusalem, 7 March 1944). Israeli conductor. He studied the violin and conducting at the Rubin Conservatory in Jerusalem, and then conducting at the Guildhall School of Music in London, 1966–9, winning the 1969 Dimitri Mitropoulos Competition in New York. This brought him a season's engagement as assistant to Szell and Bernstein with the New York PO, preparing performances but not conducting. His début was with the Zealand Orchestra in Copenhagen in 1969 and he then appeared with the Israel PO. From 1970 he began touring in Europe, making his first appearances in Britain that year with the BBC Welsh Orchestra in Cardiff, and in London with the English Chamber Orchestra in 1971. He first appeared in the USA with the Chicago SO at the 1972 Ravinia Summer Festival and made his opera début at Santa Fe in 1973 with *Der fliegende Holländer*. In 1970 he moved to London and in 1973 was appointed a regular guest conductor with the South German Radio Orchestra in Stuttgart. Segal held posts with the Bournemouth SO (1980–83) and the Philharmonia Hungarica (1981–5); in 1982 he was appointed principal conductor of the Israel Chamber Orchestra and in 1989 principal conductor of the Osaka Orchestra, Japan. Among his recordings are works by Stravinsky, piano concertos by Mozart and Beethoven, and oboe concertos by Françaix, Honegger and Ibert.

ARTHUR JACOBS/NOËL GOODWIN

Segal, Vivienne (Sonia) (*b* Philadelphia, 19 Apr 1897; *d* Beverly Hills, CA, 29 Dec 1992). American singer and actress. She studied music and drama at Philadelphia's Sisters of Mercy Academy and in 1914 she appeared as Carmen and Siébel (Gounod's *Faust*) in productions of the Philadelphia Operatic Society. In 1915 she was asked to take over the ingénue lead in Eysler and Romberg's *The Blue Paradise* when the singer originally booked proved unsuitable; it was rumoured that her father, a wealthy doctor and arts patron, had agreed to finance the show in order to secure his daughter's Broadway début.

Segal continued to play similar leads in Broadway operettas such as Friml's *The Little Whopper* (1919), Kálmán's *The Yankee Princess* (1922), Romberg's *The Desert Song* (1926) and Friml's *The Three Musketeers* (1928). She would have introduced the song *Bill* in Kern's *Oh, Lady! Lady!* (1918) had it not been dropped during tryouts. It was not until 1938, however, that her latent comedic talents were utilized, when Rodgers and Hart gave her a character role in *I Married an Angel*. The worldly Countess Palaffi was kin to her next role as Vera Simpson in *Pal Joey*, Rodgers and Hart's 1940 story of a young nightclub entertainer kept by an older, jaded socialite. Segal's knowing, yet vulnerable performances of the songs *Bewitched*, *Take him* and *What is a man?* were repeated for the successful 1952 revival, which netted her that year's New York Drama Critics Award; she had also appeared in the 1943 revival of Rodgers and Hart's *A Connecticut Yankee*, in which the role of Morgan Le Fay had been expanded for her with Hart's murderous catalogue song, *To Keep My Love Alive*. Segal also appeared in a handful of musical films, most notably the 1934 version of Kern's *The Cat and the Fiddle*. Her last public appearances were on Alfred Hitchcock's CBS televison series in 1960 and 1961.

Although Segal's few recordings were made during the last decade of her career, they reveal a rich, fruity mezzo-soprano; only the somewhat unsteady vibrato gives away her years. Her operatic training produced a fine command of legato and clean transitions between registers, and her wide range included a rather startling *f* in *To Keep My Love Alive*. Her phrasing was extremely flexible and varied, although it never stretched over the bar line in the manner of her jazz-influenced colleagues.

HOWARD GOLDSTEIN

Seger, Johann Baptista. *See* SERRANUS, JOHANN BAPTISTA.

Seger [Czegert, Secrt, Seeger, Seegr, Segert, Sekert, Zekert], **Josef (Ferdinand Norbert)** (*b* Řepín, nr Mělník, bap. 21 March 1716; *d* Prague, 22 April 1782). Czech composer, organist and educationist. He attended the Jesuit Gymnasium in Prague and graduated in philosophy at the university. He was an alto singer at the Minorite convent church of St Jakub, and later a violinist at St Martín. A letter written by his pupil Václav Pichl to G.B. Martini (27 July 1782) confirms that he studied the organ with B.M. Černohorský and counterpoint with Jan Zach and František Tůma; according to Dlabač he also studied thoroughbass with Felix Benda. He was appointed organist of the Týn Church (*c*1741) and the Crusaders' church (1745) in Prague, posts he held simultaneously until his death. Burney, who met him at Prague in September 1772, respected both his character and his musical abilities. Emperor Joseph II valued his organ playing while at Prague in 1781 and determined to give him a court appointment in Vienna, but Seger died before the confirming document arrived.

Seger was the most prolific Czech organ composer of the 18th century, though none of his works was published in his lifetime. His numerous preludes, toccatas and fugues reflect the diverse stylistic features of late Baroque organ composition. (The numerical prevalence of the preludes and general brevity of the fugues accord with the limitations imposed by the Catholic liturgy on solo organ music.) His works show rich harmonic imagination and

expressivity, and demand a skilled organist. An archaic contrapuntal texture dominates the sacred works. A detailed evaluation of his output is made difficult by the attribution of many of his organ works to Brixi, Černohorský, Linek, Muffat and other composers. His supposed authorship of several fugues on J.S. Bach's themes appears to be unfounded. The report that Bach himself recommended Matěj Sojka (1740–1817) to study with Seger also seems improbable on the basis of chronological evidence. As a teacher of composition and the organ Seger was very influential; his thoroughbass lessons were copied and used by generations of organ teachers, as can be seen from the large number of extant manuscripts. Seger's most distinguished pupils in composition were Josef Jelínek, Karel Kopřiva, J.A. Kozeluch, Jan Kuchař, Vincenc Mašek, Josef Mysliveček and Václav Pichl.

WORKS

KEYBOARD

Edns: 8 Toccaten und Fugen, ed. D.G. Türk (Leipzig, 1793/*R*), also ed. in Organum, iv/22 (Lippstadt, 1951); 2 preludes, in Sammlung von Präludien, Fugen, ausgeführten Chorälen … von berühmten ältern Meistern, i (Leipzig, 1795); [10] Praeludien, org/pf (Prague, *c*1803); 4 preludes, 2 fugues, Toccata, Fughetta, in *Fugen und Praeludien von älteren vaterländischen Compositoren*, ed. Verein der Kunstfreunde für Kirchenmusik in Böhmen, i–ii (Prague, 1832); *c*70 attrib. Seger in *Museum für Orgel-Spieler*, ed. [C.F. Pitsch] (Prague, 1832–4); 4 preludes, 3 fugues, Fantasy, Toccata, in *Ausgewählte Orgelwerke altböhmischer Meister*, ii (Berlin, before 1901); 2 fugues, Prelude, Toccata, in *Orgelwerke altböhmischer Meister*, ii (Wiesbaden, 1949); 3 fugues, 2 preludes, in MAB, xii (1953, 3/1973); Prelude, Fugue, in DČHP, nos.123–4; 34 pieces in MAB, li (1961, 4/1982); 21 pieces in MAB, lvi (1962/*R*); others listed in MAB, li, lvi, and *MGG1*

At least 50 works in 18th- and 19th-century MSS and arrs., mainly *CZ-Pnm*, *D-Bsb*, *LEm*

MILAN POŠTOLKA

Segerstam, Leif (*b* Vaasa, 2 March 1944). Finnish conductor, composer and violinist. He studied the violin (Liisa Siukonen, diploma 1963) and orchestral conducting (Jussi Jalas, diploma 1963) at the Sibelius Academy in Helsinki, continuing at the Juilliard School of Music (with Persinger and Jean Morel). There he also studied composition, with Overton and Persichetti, and was employed as assistant (1965–6). He won first prize in the Maj Lind Piano Competition of 1962 and made his début as a violinist in 1963. He is one of Finland's most prominent conductors, and has held conducting contracts with the Finnish National Opera (1965–8), the Royal Opera in Stockholm (1968–72), the Deutsche Oper (1972–3), the ÖRF SO (1975–82), the Finnish RSO (1977–87), the Rhineland-Pfalz State PO (1983–9), the Danish RSO (1989–95) and the Helsinki PO (from 1995). He has also conducted elsewhere in Germany, and at La Scala, the Teatro Colón, Covent Garden and the New York Metropolitan. He was director of the Finnish National Opera in 1973–4. He has also appeared as a violinist in the Segerstam Quartet.

He began composing as a post-Expressionist in the 1960s (*Pandora* and *Seitsemän punaista hetkeä*, 1967). His Fifth String Quartet (the 'Lemming', 1970) marked a turning-point: in it he developed his own version of 1960s aleatory 'free pulsative' notation with no barlines. This proved to be a quick way of writing large blocks of sound (the temporal order of events being left to the performer) and permitted an exceptionally prolific output. Instead of constituting individual works, his music is more like a musical stream of consciousness (under the headings of *Thoughts*, *Episode* and *Orchestral Diary Sheet*). It also means that there are numerous scorings of the same piece. Although Segerstam operates with blocks of sound rather than melodic-rhythmic motifs, the pedal points and recurring dynamic upsurges create a late Romantic impression. His intention is to stretch the 'here and now' (one work is called *A NNNOOOOOWWW*) in an attempt to achieve the utopia of an 'organic musical kaleidoscope' in which notes are ultimately superfluous. Since 1993 he has been writing orchestral works which are to be performed without conductor.

MIKKO HEINIÖ

Segni, Julio [Julio da Modena; Biondin] (*b* Modena, 1498; *d* Rome, 23 July 1561). Italian composer and keyboard player.

1. LIFE. He studied singing with Bidon da Asti (Antonio Collebaudi) before 1512, and in 1513 was a member of the choir of Modena Cathedral, singing plainchant. He studied with the Modenese organist and composer Giacomo Fogliano between 1512 and 1514, at the request of Cardinal Ippolito I d'Este. On 13 March 1514 Fogliano suggested that the cardinal should employ Segni in Rome while his voice remained unbroken. Whether Segni was thus employed is not known, although he was certainly in Rome afterwards. However, Valdrighi's statement that Segni played the organ for Leo X during this period probably rests upon a misinterpretation of a statement by the astrologer Lucas Gaurico in his *Tractatus astrologicus* that Vincenzo da Modena (1469–1517), employed by Leo X, taught the organ to a certain Giulio, a relative of Leo's.

Cosimo Bartoli, in his *Ragionamenti accademici* (Venice, 1567), recounted how Segni's playing was able to silence a political discussion at the Vatican between Pope Clement VII, Giovanni Battista Sanga (Clement's secretary), Cardinal Ippolito I de' Medici and the Marchese del Vasto. This incident probably took place on 17 August 1530 when Segni was presumably either employed by the pope or Ippolito. By November 1530 Segni was in Venice as first organist at S Marco. Letters to Pietro Aretino of 12 February and 4 December 1531 reveal that Segni had good friends in literary circles (G.F. Valerio and Aretino) as well as in artistic ones (Titian and Sebastiano del Piombo). He remained at S Marco for a little over two years: by 29 March 1533 Baldassare da Imola had replaced him. The Venetian years and the following ones (probably spent in Rome) may have been a period devoted to performance and composition. Aretino in his *Il Marescalco* (Venice, 1533), Ortensio Landi in his *Sette libri de cathaloghi* (Venice, 1552) and Bartoli all implied that Segni preferred playing the harpsichord to the organ. In April 1541 the Venetian procurators tried to induce Segni to return to S Marco. He rejected their offer on the grounds first that he was already employed by the Cardinal of Santa Fiore, Guido Ascanio Sforza, and second, that the 80 ducats offered by the Venetians were too little to live on. How long Segni had been in Rome remains unknown, but he probably did not go there until after Sforza was created cardinal in 1534. From a letter by Antonfrancesco Doni dated 29 May 1544 it seems that Segni may have accompanied Sforza and Pope Paul III on their visit to Piacenza, and if so, he may also have gone to nearby Castell'Arquato. A 16th-century keyboard manuscript at Castell'Arquato contains one ricercare by Segni. About 1545 Andrea Calmo cited Segni's keyboard playing (among others') as a standard of excellence. Segni probably remained in Cardinal Sforza's service at Rome for the rest of his life. Sforza had a memorial tablet placed in S Biagio della Pagnotta (via Giulia), which was probably Segni's parish church, for it was not far from the Sforza palace. The tablet commemorates Segni as one of the pre-eminent musicians of his age and easily the best organist among them.

2. WORKS. Almost all of Segni's music appeared between 1540 and 1548. His 13 ricercares in *Musica nova* (RISM 1540[22]) are the earliest to use points of imitation consistently. Only nos.3, 9 and 11 of the collection use neither sequential nor sectional repetition. While an imitative technique generally prevails, brief scalar figures, trills, occasional non-imitative counterpoint and constant small melodic and rhythmic alterations show that the polyphony was intended for instruments. Whereas Luis Venegas de Henestrosa's three arrangements for keyboard in his *Libro de cifra nueva* (Alcalá, 1557) are merely clumsy truncations, the version in score of ricercare no.11 (probably by Antonio de Macedo) in a late 16th-century Portuguese manuscript amplifies the few decorative hints present in *Musica nova* into a true gloss for keyboard.

Segni's ricercares were intabulated for lutenists more often than has generally been recognized. Ness has identified examples by Francesco da Milano, Pierino degli Organi and Domenico Bianchini. Pseudo-parodies and

intabulations of ricercares based on now-lost ensemble or keyboard works by Segni also appear in G.M. da Crema's editions for lute (RISM 1546[25], 1546[26] and 1548[13]). To what extent these intabulations disguised the original polyphony is now difficult to determine, but the high incidence of restatement and the fairly consistent imitative writing indicate that the lost originals probably resembled his pieces in *Musica nova*. Da Crema's source may have been the *Recercari a 4* by 'Julio da Modena' cited in inventories of 1555 and 1562 of the Accademia Filarmonica of Verona, also mentioned by Doni (1550) and Caffi.

Owing to its thick, free-voiced, relatively unornamented writing and to the rare and isolated appearances of imitation, Segni's single surviving keyboard ricercare presents an impression of massiveness and solidity unique among Italian ricercares. Jeppesen rightly noted its 'proud and uplifting mien'.

Segolta. A sign marking a subsidiary stop within a half-verse in Hebrew EKPHONETIC NOTATION. *See also* JEWISH MUSIC, §III, 2(ii).

Segond, Pierre (*b* Geneva, 8 Feb 1913). Swiss organist. He studied the piano with Mottu and the organ with Montillet at the Geneva Conservatoire, then, with a bursary from the Association of Swiss Musicians, he went to the Paris Conservatoire, studying composition with Roger-Ducasse, the organ and improvisation with Dupré, and with Messiaen, winning a *premier prix* for organ and improvisation in 1939. In 1940 he was appointed teacher of organ, improvisation and history of the organ at the Geneva Conservatoire, and in 1942 organist of Geneva Cathedral, in succession to Otto Barblan. He had an outstanding reputation as a teacher, his best-known pupil being Lionel Rogg. In carrying on the work of Barblan and Montillet he became the central figure in the Geneva school of organists. He acquired the discipline and technical ability of Dupré without subscribing to his individual interpretations; and he considered André Marchal the musician who influenced him specifically and most profoundly.

JÜRG STENZL

Segovia, Andrés (*b* Linares, Jaén, 21 Feb 1893; *d* Madrid, 2 June 1987). Spanish guitarist. Brought up in Granada, he was self-taught, making his début at the Centro Artístico about 1909. His Madrid début was at the Ateneo in 1913, and after performing throughout Spain he first toured Uruguay and Argentina in 1919. In 1922 he played at the Concurso de Cante Jondo, Granada, in a concert organized by Falla. His Paris début in 1924 was followed by recitals in Switzerland, Germany and Austria. In 1926 Segovia's Guitar Archive Series (Schott) started publication of classical transcriptions and pieces by composers such as Moreno Torroba, Turina, Ponce, Castelnuovo-Tedesco and Tansman, who over the years were inspired by his artistry to write many works for him. In March 1926 he made his Russian début, followed by his British début later the same year. In 1927 he gave recitals in Denmark and began recording for HMV. His US début was in 1928 and his first tour of Japan in 1929. The same year Villa-Lobos dedicated his *Douze études* to Segovia. In 1935 Segovia gave the première of his transcription of Bach's Chaconne in Paris. In 1936 he left Spain and spent the next few years in Montevideo, giving the premières of Castelnuovo-Tedesco's Concerto in D (1939) and Ponce's *Concierto del sur* (1941), both commissioned by him, and playing many solo recitals throughout South America.

In the postwar era Segovia began a new phase of his career, involving extended annual tours of the USA and Europe. With the advent of LP records he made over 50 albums (1947–77). He continued to inspire composers to write for him and, among other works, gave the première of Villa-Lobos's Concerto for guitar and orchestra (1956) and Rodrigo's *Fantasía para un gentilhombre* (1958). In the 1950s he began to teach at the summer school in Siena and, after 1958, at Santiago de Compostela. In 1961 he made his first tour of Australia.

The last two decades of his career gave him no respite. He still began each year with a tour of the USA, followed by engagements in Europe. In 1967 the film *Segovia at Los Olivos* was made showing Segovia at home in Spain. In 1976 his autobiography was published and the film *Song of the Guitar* recorded his playing in the Alhambra, Granada. In 1977 his final album, *Reveries*, was released. In 1981 Segovia was awarded the title of Marquis of Salobreña by King Juan Carlos of Spain and the Segovia International Guitar Competition was held at Leeds Castle, Kent. The following year he toured Japan and gave masterclasses at the Metropolitan Museum of Art, New York. His 90th birthday in 1983 was celebrated by tours of the USA and Japan, and in 1985 he was awarded a gold medal by the Royal Philharmonic Society and a statue was erected at his birthplace, Linares. In 1986 he conducted masterclasses at the University of Southern California, and in April 1987 he gave his last recital, at

Andrés Segovia

Miami Beach, Florida. He received innumerable honours and awards, including a dozen honorary doctorates, four Orders of the Grand Cross from Spain and Italy, the Order of the Rising Sun, Japan, and over 20 Gold Medals.

Segovia's impact on the progress and status of the guitar as a recital instrument was immeasurable. He revitalized traditional playing techniques and expanded the repertory by editing many transcriptions and by his massive work in inspiring composers to write new music for the instrument. Central to his mission were the thousands of recitals that he gave between 1909 and 1987. His prolific recordings (1927–77) reached the widest possible audience and were received with great critical acclaim. His charisma and his teaching encouraged new generations of players to strive to fulfil their musical ambitions within the context of the guitar.

GRAHAM WADE

Segue (It.: 'follows'). A direction indicating either that the next section or movement must follow immediately or that a pattern established must be allowed to continue. It is also spelt *siegue*. At the end of an aria in his *Farnace* (1727) Vivaldi wrote 'Qui bisogna fermarsi un poco senza suonare, poi segue subito'; and in *Ottone in villa* (1713) he wrote 'Qui si ferma a piacimento, poi segue'. *Segue l'aria* appears quite often after recitatives in 18th-century opera. *See also* ATTACCA.

For bibliography *see* TEMPO AND EXPRESSION MARKS.

DAVID FALLOWS

Seguidilla [siguidilla, seguidillas] (Sp., diminutive of *seguida*: 'continuation', 'coda'). A Spanish dance and song (the dance is properly spelt in the plural, as *seguidillas*).

Literary antecedents of the *seguidilla* may be detected as far back as the 15th century or possibly earlier, but it seems not to have existed as a piece of music until the 1590s when, as a provocative street song and dance accompanied by loud strumming of the guitar, its popularity began to surpass even that of the similarly outrageous *zarabanda* (*see* SARABANDE, §1). Rough indications of this early music are given by J.C. Amat in his *Guitarra española* (1596). It was described by G. Correas, Cervantes and many others about 1600 as an exciting, salacious kind of plebeian couple-dance. Poets were soon cultivating it as a spicy coda (*coplas* plus *seguida*) to longer poems such as the ROMANCE (ballad).

More courtly versions were set by musicians from the 1620s onwards (examples in the Cancionero Musical de Sablonara, nos.8, 26, 67 etc.; *see* CANCIONERO). They are homorhythmic in two, three and four parts, in a syncopated triple time more characteristic of other 17th-century pieces than of the modern *seguidilla*, although the links are close enough to make it conceivable that the latter evolved from the early *seguidilla*. Passages in the opera *Celos aun del aire matan* (?1660) by Juan Hidalgo have been said to be based on *seguidilla* rhythms. By about 1700 the *seguidillas* used by Sebastián Durón in his zarzuelas are certainly closer to modern Castilian forms in their use of triple time, major tonality, off-beat initial notes and cadential melismas. *Seguidillas* were regularly sung and danced in the 18th-century TONADILLA as well as in the SAINETE and ZARZUELA of the 19th and 20th centuries.

There is a useful illustration of the mid-18th century *seguidilla* in Pablo Minguet's *El noble arte de danzar* (Madrid, 1755) and of early 19th-century types in Sor's *Seguidillas*. Rhythms inspired in the *seguidilla* found their way into later music by such composers as Iradier, Pedrell, Albéniz and Glinka. Falla included an artistically heightened example of a *seguidilla murciana* in his *Siete canciones populares españolas* (1914) for piano. The famous *seguidilla* in Bizet's *Carmen* (Act 1, no.10) has, with some reason, been criticized as untypical, yet the triple time, sprightly rhythms and vocal melismas are not

far removed from Spanish *seguidillas* of the 18th and 19th centuries.

The modern *seguidilla* is in moderately quick triple time, usually in a major key; the melody ordinarily begins on an off-beat and cadences with melismas comparable with those of other modern Spanish folksongs. It is set to strophes (*coplas*) of alternating long and short lines, the short lines normally rhyming. Over 20 different verse forms have been detected in Spain and Spanish America but quatrains of approximately 7575 syllables rhyming (sometimes in assonance only) abab or abcb have from the 16th century been regarded as cardinal. (*See* SPAIN, §II, 4.)

In performance, a brief introduction, often for guitar, is followed by a 'false' entry (*salida*) for the singer, taking a portion of the text. The main section, freely repeated and varied, consists of a further instrumental passage (*falseta* or *interludio*) followed by the vocal section proper (*copla*) (*see* SPAIN, §II, 6). The dance is executed by pairs, at times alternating, at times approaching and withdrawing in two lines. The dancers' arms and bodies move with restrained grace while the footwork responds animatedly to the rhythms of the guitar, castanets or tambourine (see illustration). One of the characteristics of the dance is a technique whereby the dancers 'freeze' (*bien parado*) at the end of each strophe while the instruments introduce the next phrase. There is some evidence (Echevarría Bravo, Capmany) that the Castilian *seguidilla*, especially the celebrated *seguidillas manchegas* (from La Mancha in south-east Castile), is the earliest and the most influential type, but among the many notable variants are the *murcianas* (from Murcia) and the quicker *sevillanas* (from Seville). The *seguidilla gitana* ('gypsy seguidilla'), *seguiriya* or *siguiriya*, like the related *playera*, is more plangent and musically more complex. The *siguiriya* is generally considered one of the purest forms of *cante hondo* (*see* FLAMENCO) and hence is properly not a dance. The singer (*cantaor*) extemporizes within strict conventions to the accompaniment of a guitarist who similarly improvises on a set pattern. Its rhythms have been the subject of scholarly disagreement, arising perhaps from changes in the style of performance. Pedrell (at the turn of the century) detected a 3/4 time, Torner (in the 1930s) a combination of 3/8 and 3/4, García Matos (in the 1950s) 2/4 and 3/8, and Molina and Mairena (1963) proposed that shown in ex.1. S. Estébanez Calderón, in his quasi-

documentary *Escenas andaluzas* (Madrid, 1847/*R*), named 'seguidillas' in a description of various Andalusian songs and dances which seemed to bear the stamp of flamenco performance. No earlier reference to the *siguiriya gitana* has come to light.

JACK SAGE/SUSANA FRIEDMANN

Seguin, Arthur (Edward Shelden) (*b* London, 7 April 1809; *d* New York, 13 Dec 1852). English bass of Irish descent. In England he was known as Arthur but in the USA usually as Edward. He attended the RAM in London, where he met his future wife, the soprano Anne Childe. He began his singing career at the age of 19; his first major success came three years later when he sang Polyphemus in Handel's *Acis and Galatea*. Seguin was a versatile vocalist. He sang at the Concert of Ancient Music in 1832, and for the next two years appeared at Covent Garden. In 1834 he sang Count Robinson in Cimarosa's *Il matrimonio segreto* at the King's Theatre. He last sang in London in August 1838 in Macfarren's *The Devil's*

Opera at the English Opera House. He made his New York début at the National Theatre on 15 October 1838 in William Rooke's *Amilie, or The Love Test*. He soon established his own English opera company, the Seguin Troupe, which normally consisted of between four and six singers and toured the eastern part of the USA and, on occasion, Canada. The company performed operas in English (original works and translations), and was especially successful in its productions of *Don Giovanni*, *The Magic Flute*, *The Barber of Seville* and Balfe's *The Bohemian Girl*, of which he gave the first American performance in 1844. The Seguins also participated in the première performance of the first grand opera written by a native American – *Leonora*, by William Fry, which was produced at the Chesnut Street Theatre in Philadelphia in June 1845.

Since the Seguins introduced musical drama of this kind to Americans, it was especially fortunate that their performance standards were high. They also helped choral societies to present oratorios and they gave concerts, sometimes in partnership with other English musicians, such as Henry Russell and Vincent Wallace. By 1847, when the conductor and composer Luigi Arditi came to New York from Havana with a Cuban opera company that performed in Italian, the taste for 'Englished' opera had waned, and the Seguins performed to diminishing audiences. Suffering from poor health, Seguin finally disbanded the troupe and, soon after joining the Wallack's Theatre stock company in New York in September 1852, he died of tuberculosis. American critics wrote that Seguin's voice was superior to that of any singer who had yet sung in the USA. They described it as big, rich and even in quality; his enunciation was clear, his intonation precise and his execution skilful. His acting was also thought to be superlative, particularly in his portrayal of Devilshoof in *The Bohemian Girl*.

Anne [Ann] Childe (*b* London, ?1809–14; *d* New York, Aug 1888), who married Seguin in about 1831, studied at the RAM and appeared in public with Seguin. She sang at the King's and Drury Lane theatres, and in 1837 sang Anna in an English version of *Don Giovanni*. She went to the USA with her husband and sang in opera and assisted in the running of the troupe until Seguin's death, after which she taught in New York. Seguin's brother William Henry Seguin (1814–50) was a bass; his sister Elizabeth Seguin (1815–70) was also a singer, and the mother of Euphrosyne Parepa, who married Carl Rosa. Edward S.C. Seguin (1837–79), the son of Arthur and Anne Seguin, was also a bass, and toured with the opera companies of Euphrosyne Parepa-Rosa and Emma Abbott.

NICHOLAS E. TAWA

Seguiriya. An Andalusian or gypsy corruption of SEGUIDILLA.

Sehested, Hilda (*b* Broholm, nr Gudme, Fyn, 27 April 1858; *d* Copenhagen, 15 April 1936). Danish composer. One of 14 children, she was born on her father's estate. She studied the piano with C.E.F. Hornemann and later with Louise Aglaé Massart, during a stay in Paris. The composer Orla Rosenhoff (the teacher of Carl Nielsen) also taught her. In 1901 she graduated from the Royal Danish Conservatory as an organist, but she concentrated on composing for the rest of her life. She was an active member of the committees of two concert societies, the Danish Concert Society and Chamber Music Society (1911). An anti-feminist, she had refused to take part in the musical events during the Kvindernes Udstilling (Women's Exhibition) in Copenhagen in 1895, but in 1916 she composed and conducted a cantata for the Danish Women's Society. In 1914 her opera, *Agnete og Havmanden*, was accepted at the Kongelige Teater in Copenhagen, though never performed. Her music responded to contemporary developments: her piano sonata of 1896 demonstrates notable harmonic refinement in a late Romantic style, whereas her suite for flute from 1927 has traits of Debussy's influence. Her profound knowledge of music theory made her a popular tutor in this field.

WORKS

Op: Agnete og Havmanden (S. Michaëlis), 1913

Orch: Suite, cornet, str, 1906; 2 Miniatures, 1914; Suite, 1915 [version of Suite, cornet, pf, 1905]; Nocturne, hn, vc, orch, 1919; Course des athlètes du nord, trbn, orch, 1925

Chbr: 4 Fantasistykker, vn, pf, 1904; Intermezzi, vn, vc, pf, 1904; Suite, cornet, pf, 1905; Fantasistykker, vc, pf, 1908; Intermezzo pastorale, cl, pf, 1910; Str Qt, G, 1911 [part lost, 2 movts survive]; Fynske Billeder, cl, vc, pf, 1920; Morceau pathétique, trbn, pf, 1923; Pièce de concert, trbn, pf, 1924; 4 Fantasistykker, fl, pf, 1927

Choral: 3 Sange, SATB, 1917; Cant., S, SSAA, pf, str, 1916; 3 Sange, male chorus, 1922; Fuglekor, T, SATB, pf, 1910

Songs: 8 Gedichte (H. von Gilm), 1v, pf, 1894; 6 Sange, 1v, pf, 1907; Foraarsvers og Sommersange, 1v, pf, 1908; 2 songs, 1v, cl, vc, pf, 1910; 3 Sange, 1v, pf, 1912; 4 Sange, 1v, pf, 1914; Dansk Lyrik, 1v, pf, 1915; Moderen synger, 1v, pf, 1920

Pf: Fantasistykker, 1892; Sonata, 1904; 3 Klaverstykker, 1907; Sommerminder, 1920

INGE BRULAND

Sehlbach, (Oswald) Erich (*b* Barmen, 18 Nov 1898; *d* Essen, 31 Oct 1985). German composer and teacher. He did not begin his studies at the Leipzig Conservatory until 1919; his teachers were Stefan Krehl (theory), Wolfgang Geist (singing), Max Ludwig (piano) and Karg-Elert (composition). From 1925 he worked as a freelance musician in Munich until he was appointed to the staff of the Essen Folkwangschule in 1928; apart from a period during World War II, he remained there as a lecturer in composition and counterpoint until 1964, when he became professor for two years. He was also director of opera classes there. Writing in a style somewhere between Schoeck and Hindemith but entirely of his own, he produced works in every genre but church music. In 1952 he was awarded the Arts Prize of the City of Wuppertal.

WORKS

(*selective list*)

INSTRUMENTAL

Orch: Prelude, op.18, 1935; Musik no.1, op.20, pf, orch, 1936; Musik no.2, op.23, pf, orch, 1940; Fl Concertino, op.33, 1940; Partita, op.44, pf, orch, 1943; Musik für Orch, op.57, 1948; Ob Concertino, op.58, 1950; Pf Conc., op.72, 1954; Sym. no.1, E♭, op.73, 1957; Prelude, op.74, str, 1956; Sinfonietta, op.83, str,

1956; Sym no.2, G, op.86, 1958; Tpt Concertino, op.90, 1957; 4 Chbr Concs., op.97, 1960; Serenata serena, op.100, str, 1962; Vn Conc., op.44, 1964; Chbr Sym., op.110, pf, cl, str, 1966; Hn Conc., op.114, 1969

Chbr: Musik für Str Qt, G, op.36, 1942; Str Qt, op.69, 1952; Str Trio, op.39, 1942; Str Sextet, op.50, 1946; 3 sonatas, vn, pf, op.63, 1950, op.94, 1958, op.108, 1967; Sonata, op.82, vc, pf, 1958; Str Qt, op.103, 1965; Str Qt, op.104, 1966; Kleine Kammermusik, op.109, va, pf, 1966; Kortum-Serenade, op.113, wind qnt, 1969

Pf: 7 Musiken, op.56, 1948, op.66, 1952, op.71, 1954, op.80, 1955, op.85, 1957, op.89, 1958, op.92, 1958

VOCAL

Operas: Baal, 1932, rev. as op.96, 1959; Die Stadt, op.17, 1935; Galilei, op.19, 1937; Signor Caraffa, op.21, 1938; Hadlaub, op.42, 1939

Choral: Lieder der Nacht, op.13, 1925; An die Künstler (J.W. von Goethe), op.24, 1940; 5 Chorlieder (R. Dehmel, R.M. Rilke), op.59, 1948; Der grosse Kreis (Goethe), op.60, 1950; Der ferne Klang (J. von Eichendorff), op.68, 1951–2; Symphonische Kantate (Manderlartz), op.65, 1952; Das Meer (Sehlbach), op.76, 1953; Heitere Kantate (Sehlbach), op.75, 1954; Zündet das Feuer an (Goethe), op.98, 1961; Die Macht der Musik (old Jap.), 1965; Kreuzmillionen (Sehlbach), 1967

KLAUS L. NEUMANN

Sehling [Seling, Seeling, Söling], **Josef Antonín** (*b* Toužim, nr Karlovy Vary, 7 Jan 1710; *d* Prague, 19 Sept 1756). Bohemian composer. After studying music in Prague and Vienna, he was appointed choirmaster of two Prague monastic churches, as well as court musician and composer of Count Morzin. He was also active as second violinist to the metropolitan Prague Cathedral from 11 January 1737. He did not succeed in gaining either the post of choirmaster (in March 1737) or that of a first violinist there (1739), but he assisted the choirmaster Jan František Novák during the latter's illness. In 1743 his music to the drama *Judith* was performed by the Prague Jesuits on the coronation of Maria Theresa as Queen of Bohemia.

In Sehling's music collection, which formed a large part of the metropolitan chapter music library (591 items, now in *CZ-Pak*), sacred works of retrospective (Venetian and Viennese) and modern (Neapolitan) style are equally represented. His own output stands between the late Baroque and pre-Classical styles. His apparently earlier compositions are close in style to the sacred music of Caldara, while in other works a Neapolitan continuo-homophony predominates. The instrumental parts, especially violins, gradually assume a more important role, while the vocal parts are subordinate and rather static. His Christmas motets, pastoral masses and pastorellas are among the most important specimens of the genre in Bohemia before F.X. Brixi.

Sehling's brother František (1715–74) was a tenor and instrumentalist; he sang at Prague Cathedral from 1743, and acted as deputy when Josef Antonín was absent.

WORKS

in CZ-Pak (see Podlaha), Pnm, Bm and smaller collections (see Kouba)

c20 masses and mass sections
c50 motets and offs
c15 solo arias
3 Lat. pastorellas
3 vespers
2 lits
Other works

Lost works: Filius prodigus, Easter orat, St Benedict church, Hradcany, 1739; Firma in Deum fiducia . . . in Judith . . . exhibita, school drama, Prague Jesuit college, 1743; Constantinus Magnus in signo crucis de Maxentio victor, school drama, Prague Jesuit college, 1750; Constantinus parenti suo vitae melioris author et parens, school drama, Prague Jesuit college, 1751

MILAN POŠTOLKA

Sehnal, Jiří (*b* Radslavice, nr Přerov, 15 Feb 1931). Czech musicologist. He studied musicology with Robert Smetana and Josef Schreiber, and aesthetics with Bohumil Markalous at Olomouc University (1950–55). He obtained the doctorate in 1967 at Brno University with a study of counterpoint in early Czech instrumental music and the CSc degree (1970) with a study of the orchestra of Karl Liechtenstein-Castelcorn. After working as a librarian in Olomouc (1955–64), he was appointed research fellow (1964) and then head (1978) at the music history division of the Moravian Museum, Brno, retiring in 1994. Since 1990 he has lectured at the universities of Olomouc and Brno, receiving the titles of lecturer (1992) and professor (1996) at Brno.

Although Sehnal's primary area of research has been in Moravian music of the 17th and 18th centuries, his ability to build up a broader picture from his many detailed studies has led to his recognition, both at home and abroad, as the leading Czech Baroque specialist of his generation. He wrote the 1620–1740 section of the standard Czech music history (1983), he has contributed to numerous international conferences and Festschriften and is a member of the Zentralinstitut für Mozart-Forschung, Salzburg and of the Joseph-Haydn-Institut, Cologne. His publications include hundreds of articles for the sixth and seventh editions of *The New Grove Dictionary of Music*. His book on music at Olomouc Cathedral (1988) is typical of his work. Based on thorough archival research, it provides detailed information on all the choirmasters, organists and other performers at the cathedral over two centuries and includes descriptions of the surviving instruments and (supported by a thematic catalogue) of the surviving music. The prince-bishops of Olomouc maintained the musical establishments of Kroměříž, and this has been another important focus of Sehnal's

work with his studies of the *Kappellen* of the bishops Liechtenstein-Castelcorn (1970), Maxmilian Hamilton (1971), Leopold Egk (1972), Wolfgang Schrattenbach (1974, 'Počátky opery'), and Anton Theodor Colloredo-Waldsee (1978). Other interests include the music of Adam Michna, and instruments. Sehnal has written on wind bands, trumpets, and with particular enthusiasm on the organ, initiating and coordinating efforts to preserve surviving organs in Moravia.

JOHN TYRRELL

Seiber, Mátyás (György) (*b* Budapest, 4 May 1905; *d* Kruger National Park, South Africa, 24 Sept 1960). British composer and teacher. Born into a musical family, he started to learn the cello at the age of ten, and from 1919 to 1924 studied at the Budapest Academy of Music with Adolf Shiffer (cello) and Kodály (composition). In 1925 Seiber entered a wind sextet (Serenade) for a Budapest competition: when it was not awarded the prize, Bartók resigned from the jury in protest. After completing his studies, Seiber accepted a teaching post in Frankfurt, then in 1927 joined a ship's orchestra as cellist, visiting both North and South America. In 1928 Seiber was back in Frankfurt on the staff of the Hoch Conservatory, where his class in the theory and practice of jazz – the first of its kind anywhere in the world – achieved a *succès de scandale*. During these years he conducted at the theatres of the city, and was cellist of the Lenzewski Quartet. Seiber left Frankfurt in autumn 1933, returning first to Budapest, and also visiting Russia, before he settled in England in 1935.

His early years in England were spent entirely as a freelance. He wrote a ten-part accordion tutor, was music adviser to a publishing firm and wrote film music, at first mainly for animated films. In 1936 he collaborated with Adorno on a jazz research project and, in 1938, Seiber lectured on jazz to the Music of Our Time Congress, demanding that it be taken seriously and subjected to intelligent analysis, chiefly through an appreciation of its rhythmic techniques. In 1942 he was invited by Tippett to teach at Morley College, an association which lasted some 15 years: the first performance of his *Ulysses* was given by the Morley College Choir. In 1943 he helped Francis Chagrin to found the Committee (later Society) for the Promotion of New Music, and continued to take an active part in its work, thus guiding a whole generation of young English composers. His pupils included Banks, Fricker, Anthony Gilbert, Lidholm, Milner, Schat and Hugh Wood.

Seiber was always in closer touch with continental musical life than most of his English contemporaries. He attended the International Bartók Festival in Budapest in 1948, and frequently went abroad for ISCM festivals, many of which included performances of his music (New York, 1941, Second String Quartet; Palermo, 1949, *Fantasia concertante*; Frankfurt am Main, 1951, *Ulysses*; Salzburg, 1952 and Baden-Baden, 1955, Third String Quartet). On a visit to Budapest just before the 1956 uprising, he met and befriended the young György Ligeti, whose *Atmosphères* (1961) is dedicated to Seiber's memory. In 1960 Seiber was invited to lecture at South African universities, and it was during this visit that he was killed in a car crash in the Kruger National Park. His papers were presented to the British Library by his widow in 1982.

Seiber's music reflects both the breadth of stylistic sympathy and the insistence on craftsmanship that marked his teaching. It ranges from ephemera like the successful pop song *By the Fountains of Rome* (1956) – which entered the top ten of the popular charts and won an Ivor Novello Award – through incidental music, to chamber, orchestral and choral works. The highlight of his work in the film studio was his score to the animated classic *Animal Farm* (1955). Folk music – not solely from his native Hungary, but also that of many areas from France to Arabia and India – was a recurring interest, expressed

Mátyás Seiber

in numerous arrangements. A quirky humour surfaces in the Morgenstern settings of the 1920s, reappears in his cartoon scores and the later settings of Edward Lear (1956 and 1957) and indeed is never very far away even in his most 'serious' music. His longstanding interest in jazz had a significant impact on his music: representative examples include the two *Jazzolettes*, the blues movement of the Second String Quartet and later the collaboration with John Dankworth on the 1959 *Improvisations*, which juxtaposes serial techniques and improvised solo passages.

The music of Kodály left its mark on his earliest pieces (e.g. the First String Quartet) and its standards of craft and vigour on everything he produced. The Second Quartet (1934–5), his first fully mature work, displays his absorption of the influences of Bartók and Schoenberg, also evident in the *Fantasia concertante* (1943–4) and the *Quartetto lirico* (1948–51). The cantata *Ulysses* is his best-known and most widely admired work, for in it his poetic imagination and his technical mastery worked most perfectly together. His response to Joyce's text, his sure feeling for choral writing, and a gift for glitteringly effective orchestration are here ideally combined in an eclectic yet homogeneous style which successfully marries large traditional forms like the passacaglia to other passages of almost Expressionist freedom.

WORKS
(*selective list*)

DRAMATIC

Eva spielt mit Puppen (op, 1), 1934; A palágyi pékek (satirical skit, G. Mikes), 1942; Balaton (satirical skit, Mikeš), 1943; Faust (radio score, J.W. von Goethe trans. L. MacNeice), Ct, boys' chorus, SATB, orch, 1949, arr. as Choral Suite from Faust, S, T, boys' chorus, SATB, orch, 1950; The Invitation (ballet), orch, 1960

Incid music for plays, films (*c*60, incl. Animal Farm, 1955) and radio dramas

HUGH WOOD/MERVYN COOKE

Seidel, Friedrich Ludwig (*b* Treuenbrietzen, 1 June 1765; *d* Berlin, 5 May 1831). German organist, conductor and composer. He was a pupil of Benda in Berlin, although Reichardt, who took him into his house there, must also have taught him a good deal. He lived in Berlin all his life. In 1792 he was organist at the Marienkirche, in 1801 assistant conductor at the National Theatre (at the instigation of B.A. Weber, who had heard his Singspiel *Claudine von Villa Bella*), in 1808 musical director of the royal chapel, and in 1822 court Kapellmeister. He was pensioned in 1830.

Besides *Claudine*, the score of which is now lost, Seidel's works include three ballets and a number of operas and theatrical pieces including *Der Dorfbarbier Zweiter Theil, oder Die Schmids-Wittwe* (one-act farce, a sequel to Schenk's opera, 1807) and *Lilla* (J.W. von Goethe, 1818); incidental music to several plays including Goethe's *Götz von Berlichingen* (1805), Schiller's *Turandot* (1806), and versions of *Macbeth* (1809) and *Coriolanus* (1811); a mass, a requiem and other church music; an oratorio, *Unsterblichkeit*; overtures for orchestra; a sextet for wind and piano; piano pieces and songs. Much of the vocal music was published, separately and in anthologies, *c*1795–1815; most of the surviving manuscripts are in *D-Bsb*.

ALFRED LOEWENBERG/BRUCE CARR

Seidel, Jan (*b* Nymburk, 25 Dec 1908; *d* Prague, 23 May 1998). Czech composer. He learnt the basic principles of music from his father and from the organist Antonín Hoffmann. After studying at the technical school and at the academy of arts in Prague, he taught at a technical secondary school in the city, but then took special studies in music at the Prague Conservatory under Alois Hába (1936–40), also studying privately with Foerster. Seidel wrote incidental music for Burian's theatre (1936–8), the New Theatre and for Prague radio; he was then artistic adviser to the Esta Gramophone Company (1938–40) and director of the Gramofonové Závody (1945–53). He held various posts in the ministry of education and in the Union of Czech Composers, and he was in charge of opera at the Prague National Theatre (1958–64). During the German occupation he produced around 4000 folksong arrangements and after the war he was successful

as a composer of mass songs and large-scale cantatas. At first he pursued a Hába-like athematic style, but from 1945 he strove for a new, socialist music by simplifying his writing. He was made a National Artist in 1976.

MILAN KUNA

Seidel, Samuel (*b* Glashütte, Saxony, *c*1610; *d* Glashütte, bur. 9 Nov 1665). German composer and organist. He came of an old Glashütte family and already at a young age he appears to have been active as an organist. In 1635 he was officially appointed as organist of the parish church in Glashütte, and from 1640 until his death he was Kantor there as well. His works, which were widely performed in Saxony, show the influence of central German composers of the period, in particular Andreas Hammerschmidt. He wrote motets for five and six voices and sacred concertos for few voices with continuo. The latter include appealing melodies, without ornamentation, and display incipient cantata-like structures. Seidel's *Corona gloriae* was dedicated to 12 priests of the Glashütte region, including the priest at his own church, Andreas Hartung. Nearly 100 works survive incomplete in manuscript.

WORKS
printed works published in Freiberg

Suspiria musicalia cordis ardentissima ex 7 psalmis poenitentialibus excerpta, 1, 2vv, 2 insts, bc (org) (1650)

Corona gloriae, Geistliches Ehren-Kräntzlein von 12 schönen wohlriechenden Röselein, nebenst angehengtem Glorwürdigsten Kleinodien aus heiliger göttlicher Schrifft hierzu erlesenen Krafft-Sprüchlein (13 Ger. works), 5, 6vv, bc (org) (1657)

KARL-ERNST BERGUNDER/PETER JANSON

Seidel, Wilhelm (*b* Freiburg, 5 Jan 1936). German musicologist. He studied at the Musikhochschule and University of Freiburg and at Heidelberg University, and took the doctorate at Heidelberg in 1966 with a dissertation on the lieder of Senfl. He completed his *Habilitation* also at Heidelberg in 1973 and was appointed professor there in 1980. He was editor of *Die Musikforschung* (1980–85). In 1982 he was appointed professor at Marburg University and subsequently in 1993 head of the music department of Leipzig University. His more recent research focusses on the historical, terminological and theoretical problems of rhythm as well as French 16th- and 17th-century music theory, musical terminology and music aesthetics. The breadth of his interests is reflected in his writings, which include a monograph on Beethoven's First Symphony and articles on music from the Renaissance to the 20th century.

FRIEDHELM KRUMMACHER

Seidelmann, Franz. *See* SEYDELMANN, FRANZ.

Seideman, Władysław (*b* Kalisz, 1849; *d* ?Berlin, after 1890). Polish synagogue cantor and later operatic baritone. He went to Warsaw in 1867 and studied under L. Sterling for two years; he then moved to Vienna, where he studied at the conservatory under Salvatore Marchesi. He made his début as Don Basilio in *Il barbiere di Siviglia* in 1874 in Vienna. He then sang in Italy (Mantua, Novara, Venice, Turin, Milan and Ancona) and for a season at Covent Garden. His next engagement was in South America, where he sang at Caracas; on returning to Europe he sang at Bucharest, then for three years at Dresden, with guest appearances in Vienna, Leipzig, Wiesbaden and Munich. Under contract to the impresario Maini, he concentrated on the Italian repertory and sang in Warsaw from 1882; there he scored successes not only in Italian works but in *Lohengrin*, *Tannhäuser*, *Robert le diable*, *Les Huguenots* and *Faust*. His voice combined power with rich sonority. In 1889 it was announced that he was to end his contract with the Warsaw Opera in the following year and take up a post as teacher of singing at the New York Conservatory; but he may have moved to Berlin and established a school of singing.

IRENA PONIATOWSKA

Seidl, Anton (*b* Pest, 7 May 1850; *d* New York, 28 March 1898). Austro-Hungarian conductor, naturalized American. He studied the piano and composition at Leipzig Conservatory and became an apprentice of Hans Richter in Pest. With Richter he attended the laying of the cornerstone of the Festspielhaus at Bayreuth in 1872, and heard Wagner conduct Beethoven's Ninth Symphony. Resolving 'at any cost to get near to Wagner', he subsequently spent six years living with the Wagner family at Wahnfried as Wagner's amanuensis. For the first performance of the complete *Ring* cycle in 1876 Seidl coached some of the principal singers and was responsible for many details of the staging; he was also *de facto* understudy to Richter, who conducted. In 1879 Wagner persuaded Angelo Neumann to make Seidl ('this young musician, in whom I have more confidence than any other') chief conductor of Neumann's Neues Theater, Leipzig. In 1881 Seidl and Neumann brought the *Ring* to Berlin with four complete cycles. Beginning in 1882, Neumann took a touring Wagner company, under Seidl, throughout Europe. Its 135 staged performances and 58 concerts, with a polished orchestra and ensemble, both introduced the *Ring* and insured its best possible reception. In 1883 Neumann and Seidl moved from Leipzig to the Bremen Opera. Seidl married the soprano Auguste Kraus in 1884.

After 1885 Seidl was based in New York. He told Americans that Wagner had wished that he become his New World emissary. As principal conductor at the Metropolitan Opera (1885–91) he directed the vast majority of performances during seasons when every opera was given in German, and most performances were of Wagner's works. After 1891 the Met was no longer a German house and Seidl appeared less frequently. He was also conductor of the New York Philharmonic in 1891–8, a period of steady growth and achievement.

At the Met, Seidl set performance standards previously unknown in the USA. His German ensemble included such singing actors as Marianne Brandt, Emil Fischer, Lilli Lehmann and Albert Niemann. He conducted the American premières of *Die Meistersinger* (1886), *Tristan und Isolde* (1886), *Siegfried* (1887), *Götterdämmerung* (1888) and *Das Rheingold* (1889). After 1891 he was instrumental in turning Lillian Nordica and Edouard and Jean De Reszke into leading Wagner singers; his Wagner casts also included Emma Eames, Victor Maurel, Nellie Melba and Pol Plançon. In 11 seasons at the Met he directed 471 performances, including 70 on tour.

Seidl displaced Theodore Thomas as New York's leading orchestral conductor. He commanded the services of dozens of fine freelance musicians who variously constituted the 'Metropolitan Orchestra', 'Seidl Orchestra' or 'Seidl Society Orchestra'. With the New York Philharmonic he gave the world première of Dvořák's 'New World' Symphony in Carnegie Hall on 16 December 1893. His specialities included Tchaikovsky's 'Pathétique' Symphony, in which he was said to display 'an emotional stress and imagination seldom equalled'. He increasingly championed American repertory, and considered MacDowell greater than Brahms.

In Brooklyn, which was showing signs of becoming an 'American Bayreuth', Seidl conducted winter concerts at the Brooklyn Academy of Music, including two abridged concert performances of *Parsifal* (1890, 1891). In summer he conducted the orchestra 14 times a week at Brighton Beach, on Coney Island. The repertory for these inexpensive seaside concerts overwhelmingly stressed Wagner and Liszt; it is possible that no European concert series so regularly promoted the 'Music of the Future'. Both in concert and opera, Seidl toured widely in the USA; his fame as the central figure of the American Wagner cult preceding him. He became an American citizen and

disliked being addressed as 'Herr'. He espoused democratized audiences and opera in English. His modesty and laconic speech did not preclude glamour or popularity; he had many female admirers and was better known by sight than any other New York musician. No comparable European musical luminary had previously come to the USA and stayed.

Seidl visited Covent Garden in 1897 with great success. In the same year he conducted *Parsifal* at Bayreuth, but distanced himself from Cosima Wagner and her coterie. He returned to New York pursued by offers from Europe. The threat of his departure prompted New Yorkers to begin a permanent Seidl Orchestra. His early death intervened.

Seidl's conducting style was modelled on Wagner's. He maintained eye contact with his singers and insisted that the words be heard. In the Eroica Symphony, his plasticity of pulse in the outer movements was considered an innovation in New York; like Wagner, he read both with maximum expressive variety. His Pastorale eschewed the polished breadth and serenity of Thomas's; he made the storm cataclysmic. In the finale of Beethoven's Seventh Symphony, he adhered to Wagner's advice (in *On Conducting*), that 'it is ... impossible to take [this movement] too quickly'. He sustained a pervasive play of rubato. A master calibrator of harmonic and structural stress, he preferred paragraphs to the words and sentences of other conductors. Even his Bach and Mozart interpretations were formidably and zealously Romantic. His central mission was to propagate the Wagner canon.

Seidl's writings, collected in *Anton Seidl: A Memorial by his Friends*, include an informative essay 'On Conducting'. He taught at New York's National Conservatory during the directorship of his friend Dvořák. A fledgling composer, he began work on an opera based on the Hiawatha legend, to a libretto by Francis Neilson.

Seidl's American protégés included Victor Herbert, who was often his principal cellist and assistant conductor, and Arthur Farwell, who wrote that Seidl's presence, 'famous alike for the depth of his silence and the height of his art, tinged the atmostphere and the consciousness of [New York City] with a peculiarly individual and glowing quality of feeling such as it has not known before or since. ... [Because] of his known love for New York, it was downright affection, rather than admiration or awe, that New York returned to him.' No conductor of opera exerted a greater influence in the United States.

JOSEPH HOROWITZ

Seifarth, Johann Gabriel. *See* SEYFFARTH, JOHANN GABRIEL.

Seifert. German family of organ builders. Ernst Hubertus Seifert (*b* Sülzdorf, Thuringia, 9 May 1855; *d* Cologne, 27 April 1928) studied in Dresden with Jahn and founded his own business in Cologne in 1885. In order to improve the speaking quality of the pipes he invented the membrane chest: he also used partly tubular pneumatic, partly electro-pneumatic action in his organs. Instruments by him include those at the Philharmonie, Cologne (1900); Kaiser Friedrich Halle, Mönchen-Gladbach (1903); St Quirinus, Neuss (1906); Basilika, Kevelaer (1907, damaged during World War II; restored, 1979).

In 1906 Seifert set up a branch of the business in Kevelaer and in 1915 he entrusted it to his son Romanus Seifert (*b* Mudersbach, Sieg, 22 Sept 1883; *d* Kevelaer, 15 Jan 1960) who took over its management completely after his father's death. Romanus Seifert used electro-pneumatic action in his instruments and changed from the membrane chest to the cone valve chest ('Kegellade'). Instruments by him are at St Ludger, Duisburg (1936–41); Zeughaus, Neuss (modified 1951, kept in the Stadthalle since 1970); St Aposteln, Cologne (1957); Cathedral, Minden (1957). His son Ernst Seifert (*b* Kevelaer, 8 Jan 1910) took over the firm, and two further small branches in Cologne-Mansfeld and Bergisch-Gladbach were taken over by another grandson of the founder, Helmut Seifert (*b* Cologne, 6 Nov 1916). Ernst Seifert abandoned the electro-pneumatically controlled cone valve chest in favour of the slider chest with tracker action and electric registration. His instruments are at St Matthias, Berlin-Schöneberg (1958); St Michael, Waldniel (1967); St Viktor, Dülmen (1972) and St Adelgundis, Emmerich (1973). (E. Seifert: 'Seifert, Romanus', *Rheinische Musiker*, ii, ed. K.G. Fellerer, Cologne, 1962)

HANS KLOTZ

Seifert, Johann Gottfried. *See* SEYFERT, JOHANN GOTTFRIED.

Seiffert, Max (*b* Beeskow an der Spree, 9 Feb 1868; *d* Schleswig, 13 April 1948). German musicologist. He lived in Berlin from 1881, studying classical philology and musicology under Spitta at the university. In 1891 he took the doctorate with a dissertation on J.P. Sweelinck and his German pupils. He then worked as a private teacher and became permanent secretary to the Prussian Commission for the publication of Denkmäler deutscher Tonkunst; he also wrote numerous scholarly essays for various periodicals as well as for the *Allgemeine deutsche Biographie*. Between 1894 and 1901 he edited the works of Sweelinck and in 1899 published his *Geschichte der Klaviermusik*, a completely revised and expanded version of C.F. Weitzmann's *Geschichte des Klavierspiels und der Klavier-Literatur*. In 1892 he launched the series Denkmäler deutscher Tonkunst with Scheidt's *Tabalatura nova* (1892), contributing editions of numerous further volumes until 1927. From 1903 to 1914 he worked as editor-in-chief of *Sammelbände der Internationalen Musikgesellschaft* and as editor of the IMG's collected editions. In 1914 he proposed the creation of a musicological research institute in Bückeburg, which was founded in 1917; he edited its journal, *Archiv für Musikwissenschaft*, with Johannes Wolf and Max Schneider, and took over as provisional director of the institute in 1921. With the help of the Nazi Education Minister, Sieffert moved the institute to Berlin, where it was named the Staatliches Institute für Deutsche Musikforschung, and took over its direction until 1942. The expanded institute oversaw all German Denkmäler editions, the collection of old musical instruments and the folksong archive. Since 1909 he had been active in Berlin as a lecturer at the Hochschule für Musik and at the Akademie für Kirchen- und Schulmusik. He was given a professorship in 1907, in 1912 he was made a senator at the Akademie der Künste, and in 1928

he was given the honorary doctorate of theology at the University of Kiel.

The breadth of Seiffert's outlook was founded on his comprehensive knowledge of Baroque music, and in particular the German and Dutch keyboard music of that period, a knowledge he had built up through a thorough investigation of sources, but his many publications of old music in practical editions (J.S. Bach, W.F. Bach, Buxtehude, Handel, Haydn, Hurlebusch, Keiser, J.P. Krieger, Mozart, Sweelinck, Telemann and Tollius), and their realizations of continuo parts, are also of exceptional merit. One of his special interests as a scholar was musical iconography, a fact commemorated in the title of the Festschrift published in his honour, *Musik und Bild*.

ANTON WÜRZ/PAMELA M. POTTER

Seiffert, Peter (*b* Düsseldorf, 4 Jan 1954). German tenor. He studied at the Robert-Schumann-Hochschule with Hans Kast, and made his début in a small role in Reimann's *Lear* at the Deutsche Oper am Rhein in 1978, followed by appearances there as Baron Kronthal (*Der Wildschütz*). In 1982 he was engaged by the Deutsche Oper, Berlin, where he has sung, among others, Ottavio, Titus, Tamino, Matteo (*Arabella*), Faust, Lohengrin and Huon. Since 1983 he has sung regularly at the Bayerische Staatsoper in Munich. In 1988 he made his Covent Garden début as Parsifal and in 1994 his Salzburg Festival début as Ottavio. In 1996 he was much admired as Walther in his first Bayreuth appearance. Among his many recordings his management of the difficult roles of Max and Huon stand out, both under Janowski, as does his Florestan for Harnoncourt, all evincing a firm, rounded, lyric-dramatic voice with a flexibility remarkable in a tenor of his vocal weight.

ALAN BLYTH

Seinemeyer, Meta (*b* Berlin, 5 Sept 1895; *d* Dresden, 19 Aug 1929). German soprano. She studied in Berlin, making her début there in 1918 at the Deutsches Opernhaus in *Orphée aux enfers*. She remained there until 1925, singing such roles as Elsa, Elisabeth, Agathe and Countess Almaviva. In 1923–4 she toured the USA with Hurok's German Opera Company, singing Elisabeth and Eva in New York. After a guest appearance as Marguerite at the Dresden Staatsoper, she was engaged there in 1925 by Fritz Busch, and remained there until her death; she created the Duchess of Parma in Busoni's *Doktor Faust* (1925), and sang Maddalena (*Andrea Chénier*), Manon Lescaut and Leonora (*La forza del destino*). She appeared at the Colón, Buenos Aires (1926), the Vienna Staatsoper (1927) and Covent Garden (1929), where she sang Sieglinde, Eva and Elsa a few months before her death from leukaemia. Her many recordings demonstrate her peculiarly intense and highly individual voice, most notably in arias from Verdi's middle-period operas and in duets with the tenor Tino Pattiera.

LEO RIEMENS/ALAN BLYTH

Seiranian, Sogomon (*b* Baku, 16 Sept 1907; *d* Yerevan, 6 May 1974). Armenian *t'aṙ* player. He taught himself to play the *t'aṙ* and worked with several folk ensembles. He began to perform in public in 1926, becoming a soloist with the Philharmonia of Baku and leading various professional and amateur ensembles. During the 1930s he performed as an accompanist and a soloist with an ensemble of folk instrumentalists led by the *t'aṙ* player and composer Sergey Sergeyev; he also worked with the singer Suraya Kadjar, and Seiranian's performances of the *mugams Bayati-shiraz* and *Zabul* were included in a recording of the Suraya Kadjar Ensemble released by the Melodiya recording company. Seiranian won the All-Union Competition for Folk Instrument Performers held in Moscow in 1939. He performed with the first State Azerbaijani Eastern Orchestra under the direction of Aranes Ioannesian and recorded the *mugam Bayati-Isfahan* for Melodiya. In 1944 he moved to Yerevan, where he became a soloist with the Armenian Philharmonia and the Ensemble of Folk Instruments of Radio Armenia. He also performed the *gusan* song *Sayat-Nova* with the singers Ofelia Hambarcumian, Arev Bagdasarian and Shoghik Mkrtchian. Seiranian was named People's Artist of Armenia in 1961 and received the Medal of Honour in 1956. In 1970 he toured Syria, Lebanon and Iran.

His repertory included *mugams*, Armenian folkdance music and pieces by Armenian and Azerbaijani composers; he was popular throughout the Caucasus and was noted for his virtuoso technique and exploitation of the timbral qualities of the *t'aṙ*.

ALINA PAHLEVANIAN

Seis. An accompanied vocal piece from Venezuela, Colombia and particularly Puerto Rico, consisting of several stanzas of varying numbers of six- or eight-syllable lines. Its binary structure includes brief instrumental interludes performed by guitar or *cuatro* (small four-string guitar) in strict tonic–dominant harmony with percussion accompaniment, followed by an often unaccompanied, unmeasured text delivery in typically Hispanic, constricted, high-pitched vocal style. The *seis bombeo* features the delivery of a *bomba*, a subtle insult or, at times, an amorous offering, directed by the singer at one of the dancers.

WILLIAM GRADANTE

Seises (Sp. 'sixes'). From the 16th century to the 19th, the choirboys who sang polyphony in the cathedrals of Seville, Toledo, Avila, Segovia, Mexico City, Lima and elsewhere in the Spanish-speaking world were called *seises* – six being their traditional number at Seville and Toledo cathedrals. The earliest papal bulls designating the income from a prebend for a master of the choirboys in Seville Cathedral were Eugene IV's *Ad exequendum* (24 September 1439) and Nicolas V's *Votis illis* (27 June 1454). Throughout the next three centuries Seville Cathedral (which set the pattern for the Spanish Indies) had both a master of the altar boys who sang only plainchant, and a master of the *seises*, generally the *maestro de capilla* or his deputy. The master of the *seises* boarded and taught them. When their voices changed, and upon receiving a certificate of good behaviour, they were entitled to a few years' free tuition and other benefits in the Colegio de S Miguel or in the Colegio de S Isidoro maintained by the Sevillian Chapter. Similar *colegios* were subsidized by other cathedrals. From the ranks of the *seises* in various Spanish cathedrals came many of the leading Spanish Renaissance and Baroque composers, among them Victoria and Guerrero.

At Seville the *seises* imitated David's dancing before the Ark during processions at Corpus Christi and the celebrations on the feast of the Immaculate Conception. The earliest notices of their dancing at Corpus Christi are dated 1508–9, years during which Pedro de Escobar was *maestro de capilla* and master of the *seises*. In 1557 they danced to the sound of rattles and jingles, in 1594 one of them played a *rabel* (rebec) while the others danced, and no later than 1667 they began shaking castanets while dancing. In 1693 the 'dance of Montezuma', mixed in with others, added fuel to the growing controversy on the appropriateness of Corpus Christi choirboy dances. The music composed by such 19th-century maestros as Francisco Andreví and Hilarión Eslava for dances of the elaborately costumed *seises* is entirely secular in nature, recalling boleros and fandangos.

Instead of being called *seises*, the choirboys were called *infantes* or *infanticos* in the cathedrals of Zaragoza and Huesca (Aragon). At Huesca they are known to have existed in 1259, when there were only two: this number was doubled in 1399 (see Durán Gudiol, p.32). There, as elsewhere during the Spanish Renaissance and Baroque, the choirboys wore exceedingly rich and colourful costumes (including hats).

Seixas, (José António) Carlos de (*b* Coimbra, 11 June 1704; *d* Lisbon, 25 Aug 1742). Portuguese composer and organist. He was the leading figure in Portuguese 18th-century music. He was the son of Francisco Vaz and Marcelina Nunes; it is not known why the surname Vaz was dropped in favour of Seixas. Several authentic manuscript copies of his music carry only the name José António Carlos. In 1718, at the age of 14, Seixas succeeded his father as organist of Coimbra Cathedral. Two years later he moved to Lisbon, where he obtained the coveted position of organist at the royal chapel, which he held for the rest of his life. In 1738 João V honoured him with a knighthood. The Lisbon earthquake of 1755 may perhaps be responsible for the fact that none of Seixas's works survive in autograph. The extant copies are few and undated, and can represent no more than a fraction of his total output: his official duties must have exacted many

more ecclesiastical compositions than the eight choral works listed below; and Barbosa Machado recorded that Seixas wrote 700 keyboard 'tocatas', but only 88 appear to have survived.

Seixas's importance as a composer rests mainly on his keyboard sonatas. Their style has often been discussed in terms of Domenico Scarlatti's influence because from 1720 onwards they were both employed at the royal chapel in Lisbon, a professional association which lasted for eight years until Scarlatti's departure to Spain. Nothing is known about the circumstances of this association but it seems clear that it was based on mutual respect: when they first met Scarlatti is reported (by Mazza) to have 'recognized the giant by the finger' and to have told Seixas '*you* are the one who should give *me* lessons'.

Seixas's sonatas are typical examples of the stylistic ambiguity of the transitional period between the Baroque and Classical styles. Some are reminiscent of the Baroque toccata (nos.8 and 9, first movements, following the numbering in PM), others are textbook examples of the *Empfindsamstil* (nos.41, third movement, and 49, fourth movement), some suggest the idiom of the Mannheim school (no.18, second movement), a great number have the simplicity and, at times, emptiness of *galant* entertainment pieces (nos.77, first movement, and 30), while only a minority reflect Scarlatti's style in form and technical display (no.27, first movement). The most obvious difference between Seixas and Scarlatti lies in their approach to the sonata cycle. Whereas Scarlatti soon abandoned the multi-movement form in favour of the single or paired binary sonata movement, Seixas continued to write sonatas in three, four and even five movements throughout his life. Seixas's single-movement sonatas mostly lack those features generally associated with Scarlatti, such as imitative openings (in no.70 only), and the technical display connected with the establishment of the complementary tonality. As regards the internal structure of the binary sonata movement, Seixas was independently engaged in far-reaching experiments involving motivic development after the double bar (no.47) and the creation of extended forms on the basis of a variety of motivic patterns (no.10 has 390 bars). He was an accomplished virtuoso on both the organ and the harpsichord, and although he used many idiomatic features of the prevailing Italian harpsichord style, some of his sonatas show an individually developed and highly demanding keyboard technique of their own (nos.50 and 57, first movement).

Seizième de soupir (Fr.). A hemidemisemiquaver REST.

Séjan [Séjean], **Nicolas** (*b* Paris, 19 March 1745; *d* Paris, 16 March 1819). French organist and composer. He studied the organ with his uncle Nicolas-Gilles Forqueray and harmony and improvisation with Louis Charles Bordier. At the age of 13 he spectacularly improvised a *Te Deum*, which was widely reported and elicited great enthusiasm from those present, including Daquin and Armand-Louis Couperin. Two year later he obtained a position as organist at St André-des-Arts. At the age of 19 he made the first of many appearances at the Concert Spirituel, playing an organ concerto and establishing lasting fame as an organ virtuoso; the following two years he played organ concertos of his own composition. In 1772 he was chosen to succeed Pierre-Claude Fouquet as one of the four organists of the Cathedral of Notre Dame; he also held positions at the Church of the Cordeliers (1773–6), St Séverin (from 1782, succeeding his uncle, Forqueray), St Sulpice (1783–91, succeeding Luce) and the royal chapel (1790–91, succeeding Pierre-Louis Couperin), and became the first professor of organ at the Ecole Royale de Chant (1789). The Revolution deprived Séjan of all his positions; he was able, however, to intervene effectively during the Terror to prevent the destruction of many Parisian organs and to have the salaries of musicians formerly attached to cathedrals and collegiate churches reinstated. During this time he provided music (mostly battle-pieces) for republican celebrations, held in churches and at the Opéra. He was the first professor of organ at the Conservatoire from its foundation in 1795 until 1802. In 1806 he was appointed organist at the Dôme des Invalides and again at St Sulpice. With the restoration of the monarchy in 1814 he returned to his position at the royal chapel, and received the order of the Légion d'honneur from Louis XVIII. He was also honoured by a nomination to succeed Monsigny at the Académie des Beaux-Arts.

Described in Lasceux's *Essai* (Paris, 1809) as one of the major figures of the 18th century in organ and piano improvisation, Séjan was one of the first composers in France to write specifically for the piano. Although he left relatively little music for that instrument he is often cited as one of the creators of the modern French piano school. The title-page of his first work, the *Six sonates pour le clavecin* (1772), indicated that 'some of these pieces may be played on the pianoforte'; despite infrequent dynamic markings, the dramatic nature of the works and their open texture favour performance on that instrument (an optional violin part is lost, but could not have added measurably to these excellent pieces). In the *Recueil de pièces pour le clavecin ou le piano-forte*, published in

1784 but possibly written several years earlier, Séjan divorced himself from the tradition of the *clavecinistes*. The first and third of the *Trois sonates* op.3 (1784) are fully-formed piano trios, with important obbligato parts for violin and cello.

Séjan's works show a fecundity of melodic ideas, resulting in a weak formal structure and frequently an inadequate thematic development. The melodic material also suffers from unimaginative accompaniment figures (such as unrelieved use of the 'Alberti bass'). In Favre's opinion, however, their dramatic character and opposition of contrasting tone-colours place Séjan among the precursors of Romantic pianism.

Séjan's son, Louis-Nicolas (1786–1849), was also an organist and composer, and in 1819 succeeded his father as organist at St Sulpice. A brother, Edmé-Philibert Séjan (1754–92), was organist at Sts Innocents and at St Jacques-de-la-Boucherie.

EILEEN MORRIS GUENTHER, HERBERT C. TURRENTINE

Šejna, Karel (*b* Zálezly, nr Strakonice, 1 Nov 1896; *d* Vojkov, 17 Dec 1982). Czech conductor. He studied the double bass at Prague Conservatory under F. Černý (1914–20) and composition privately with K.B. Jirák. He became first double bass of the Czech PO in 1921, and their occasional conductor from 1922. On Talich's advice he gained experience with amateurs, with the railwaymen's symphonic orchestra (1932–5), and as the choirmaster of the Vinohrady Hlahol (1929–36): he took both groups abroad. From 1935 he conducted subscription concerts of the Czech PO, in 1937 he became its second conductor, and in 1949 temporarily its artistic director as well. From 1950 until his retirement in 1965 he was, with Ančerl, its second conductor. He continued to appear as a guest.

Šejna had a healthy, direct musicality and an exceptionally keen ear. He learnt much from Talich and from Bruno Walter's concerts with the Czech PO. His repertory comprised mainly Smetana, Dvořák, Fibich, Tchaikovsky, Schubert and Mahler, and he often introduced Czech 20th-century music: Suk, Ostrčil, B. Vomáčka and Martinů. As a former player in the orchestra he had an excellent grasp of its demands and approach, and his calmness, discretion and reliability were important in its critical periods. He took part, with Ančerl, in its foreign tours, and made many recordings.

ALENA NĚMCOVÁ

Sekert, Josef. *See* SEGER, JOSEF.

Sekles, Bernhard (*b* Frankfurt, 20 March 1872; *d* Frankfurt, 8 Dec 1934). German composer, conductor and teacher. He attended the Hoch Conservatory, Frankfurt, where he studied with Iwan Knorr (composition), Engelbert Humperdinck (orchestration) and Lazzaro Uzielli (piano). He later served as Kapellmeister at the Heidelberg (1893–4) and Mainz (1895–6) operas. In 1896 he returned to the Hoch Conservatory to teach. Toch, Hindemith and Adorno were among his pupils. After becoming director of the conservatory in 1923, he broadened the range of subjects offered, set up adult and youth education programmes, and in the face of violent opposition from conservative circles, established the first European jazz class under the direction of Seiber.

As a composer, Sekles sought what he described as 'a stylized folkloric manner' somewhere between the expressive boundaries of 'sadness and happiness'. Writing in a late-Romantic style influenced by Brahms, he employed Slavic and Eastern texts and subjects in his early vocal music, and cultivated the art of the miniature in his instrumental works. His use of fugue and passacaglia contributed to the development of a neo-Baroque style in the 1920s. In April 1933 the National Socialists dismissed him from his post at the Hoch Conservatory and banned his music from performance in Germany.

WORKS

(selective list)

Stage: Der Zwerg und die Infantin (ballet), op.22, 1913; Scheherazade (op, 3, G. von Bassewitz), op.26, 1917; Die Hochzeit des Faun (comic op, R. Morr), 1921; Die zehn Küsse (comic op, C.L. Andersen and K.E. Kavoschek), 1926
Orch: Aus den Gärten der Semiramis, sym. poem, op.19; Kleine Suite dem Andenken E.T.A. Hoffmanns, op.21; Die Temperamente, op.25; Passacaglia and Fugue, op.27, orch, org; Gesichte, op.29, small orch; Der Dybuk, prelude, op.35; Sym. no.1, op.37; Sommergedicht
Chbr and solo inst: Trio, op.9, cl, vc, pf; Serenade, op.14, 11 insts; Divertimento, op.20, str qt; Passacaglia and Fugue, op.23, str qt; Sonata, op.28, vc, pf; Str Qt, op.31; Sonata, op.44, vn, pf; pf works
Vocal: Lieder (W. Rudow), op.6, female chorus; 6 volkstümliche Gesänge, op.12, S, male chorus, pf; Variationen über Prinz Eugen, op.32, male chorus, wind, str; Vater Noah, op.36, male chorus; Ps cxxxvii, S, chorus, orch

GISELHER SCHUBERT

Seklucjan, Jan (*b* Siekluka, Radom district, or Siekluki, Wielkopolska or Małopolska, *c*1510; *d* first half of 1578). Polish writer, editor and publisher. In 1536 he went to Leipzig University where he obtained the degree of Bachelor of Arts. From 1538 he was active in Poznań spreading Luther's teaching, for which he was proscribed; he took refuge with Duke Albert of Hohenzollern, also a Lutheran, in Królewiec. In 1544 he was appointed Polish preacher there and worked as a publisher of Polish books (including the first Polish translation of the New Testament, by S. Murzynowski). In 1547 he published the earliest Polish hymnbook, *Pieśni duchowne a nabożne* ('Spiritual and godly songs'), containing 25 songs with melodies and ten with words only; the second edition, published in 1550, was enlarged by three texts and three melodies. The sources of the melodies are mostly German and Czech hymnbooks, chiefly Jan Roh's *Pisně chvąl božskych* (Prague, 1541); Seklucjan sometimes printed the tunes unchanged, but he usually adapted them to the Polish words and often altered them considerably. In 1559 he published a second hymnbook in Królewiec, *Pieśni chrześcijańskie, dawniejsze i nowe* ('Christian songs, old and new'), in which he included all the songs from the first collection, adding 43 new ones with melodies and 23 without (7 melodies ed. in MAP, ii/3, 1994). Many of the new melodies were probably taken from Jan Zaremba's hymnbook (1558), of which only small fragments survive. About half of the new tunes were borrowed from earlier Czech and German songs of the Reformation and from Catholic songs in Latin; the others probably originated in Poland. In some cases Seklucjan gave the initials of the composers Wacław z Szamotuł and Cyprian Bazylik.

PIOTR POŹNIAK

Sekunde (Ger.). *See* SECOND.

Selby, William (i). *See* SHELBYE, WILLIAM.

Selby, William (ii) (*b* Dec 1738, bap. London, 1 Jan 1739; *d* Boston, early Dec 1798). English organist and composer. He was organist of All Hallows Bread Street (1756–73), joint organist of St Sepulchre's, Holborn (1760–73), and organist to the Magdalen Hospital (1766–9). He contributed nine effective psalm and hymn settings to *A Second Collection of Psalms and Hymns Use'd at the Magdalen Chapel* (London, *c*1770), and may have compiled the collection. He also published five songs and an organ voluntary while in London; his hunting song *The Chace of the Hare* ('Do you hear, brother sportsman, the sound of the horn?') was reprinted many times. He was admitted to the Society of Musicians in 1762 and made a freeman of the Company of Musicians in 1766. He played the organ for the annual meeting of London Charity Children in 1767, and probably in other years.

In October 1773 he left London to take up a post as organist of Trinity Church, Newport, Rhode Island, where he arrived in December. He was organist of Trinity Church, Boston, from 1776 to 1780, and of the Stone Chapel (formerly King's Chapel) from 1782 until his death. He directed a series of highly praised concerts between 1782 and 1793, first at the chapel and then in other venues. Handel, Thomas Arne, and other English composers were the staple fare, but he also presented works by Piccinni, Dittersdorf and Grétry. Many programmes included one of his own organ concertos or other compositions.

At Boston Selby published a Jubilate, three anthems, and a Unitarian doxology; some were reprinted in several American collections. Their style is that of English cathedral music shorn of its organ accompaniment, with some evident borrowings from Handel. He also published four more songs and a duet in a pastoral, *galant* style, and patriotic choral odes *For the New Year*, *On the Anniversary of Independence*, and *To Columbia's Favourite Son*, the last of which he performed in the presence of President Washington at the Stone Chapel in 1786. In 1782, and again in 1790–91, he sought subscribers for a periodical publication of his own vocal and instrumental music, but without success. Only one number of the second set appeared, surviving as an untitled publication (at *US-Bhs*, see McKay, 623–4). It includes another organ voluntary and a 'Lesson', or sonata, for keyboard.

He has often been confused with his kinsman, John Selby (*d* 1804/5), who was organist of St Mary Woolnoth, 1764–71 (resigned 3 January 1772), arrived in Boston in September 1771 to become organist of King's Chapel, and appeared several times as a keyboard player at Concert Hall, Boston, 1771–5. A loyalist, he left for Halifax, Nova Scotia, in 1776, and became organist of St Paul's Anglican church there.

NICHOLAS TEMPERLEY

Selçuk, Münir Nurettin (*b* Istanbul, 1899; *d* Istanbul, 27 April 1981). Turkish vocalist. He reformed Turkish vocal performance by adopting the performance practices, educational principles and aesthetic values of Western art music. Responding to a contemporary concern for revolutionary cultural change in the newly-founded Turkish Republic, established in 1923, he adapted his art to suit the westernizing sensibilities of Republican taste while maintaining a link with tradition by continuing an

ancient line of oral transmission (*silsile*) from the Ottoman past. He was initially trained in the historic manner of vocal instruction (*meşk*), but subsequently shunned the melismatic character, nasal timbre and chest register of traditional practice. In doing so, he revolutionized Turkish vocal performance by appropriating the technical tools of Western practice and by presenting his new style in a concert setting (after 1930). In this matter he was principally aided by the recording industry, most notably by HMV, whose artistic sponsorship, marketing infrastructure and technical expertise allowed him to disseminate his musical innovations to an expanding bourgeois audience. In his professional career, which extended over 60 years, Selçuk acted as a choral director, a recording artist, a vocal instructor and, most significantly, a concert performer. He is also recognized for his work as a composer, film actor and radio artist.

Self-acting piano. *See* BARREL PIANO.

Selfridge-Field, Eleanor (*b* New Orleans, 29 June 1940). American musicologist. She took undergraduate training in music and history with Dika Newlin at Drew University, New Jersey (BA 1962). After taking the MSc in journalism at Columbia University (1963), she studied at Oxford with Westrup and Sternfeld, earning the doctorate in 1969 with a dissertation on 17th-century Venetian instrumental ensemble music. She began her teaching career at Drew University (1962–5) and later joined the faculty of the University of Pittsburgh (1968–9). She was a consultant in musicology at San Francisco State University (1978–84) and since then has been a research associate at the Center for Computer Assisted Research in the Humanities at Menlo Park, California. She joined the Center for Research in Music and Acoustics at Stanford University in 1995; she became a consulting professor there later in the same year.

Selfridge-Field's work has centred on two distinct areas: musical and cultural history, and computer applications in music history and theory. Her historical writings have concentrated on the instrumental and vocal music of the Venetian Baroque and the cultural setting of this music. Her interest in the computer as a tool for musicological research and musical analysis has resulted in numerous articles, papers and demonstrations, and she has co-edited, with Walter B. Hewlett, a series of directories of computer-aided research in musicology.

PAULA MORGAN

Selich [Selichius], **Daniel** (*b* Wittenberg, bap. 4 Feb 1581; *d* Wolfenbüttel, 1626). German composer. He matriculated at the University of Wittenberg in 1601 and by 1616 was director of music at the castle of Wesenstein, near Dresden. Soon afterwards he became Kapellmeister at the court at Iburg of Duke Philipp Sigismund, Bishop of Verden and Osnabrück, on whose recommendation he

succeeded Michael Praetorius as Kapellmeister at the Wolfenbüttel court of Duke Friedrich Ulrich in 1621. Although the court there was modest, the standard of its music was high, and judging from the contents of Selich's *Opus novum*, which was written for the chapel, its musicians included a number of instrumentalists and singers of high calibre.

The *Opus novum* contains 24 sacred concertos, which are settings of Latin and German texts of a consistently cheerful kind for forces ranging from two voices and continuo to double choir with additional instruments. Some of the instrumental parts are independent, others double the voices; specific instruments are always indicated. The preface includes instructions as to the disposition of choirs and instruments and implies that the procedure to be followed is largely that advocated by Schütz in his *Psalmen Davids* (1619), though the layout of the concertos and the way in which Selich uses his forces correspond more to Schütz's first set of *Symphoniae sacrae* (1629) than to the *Psalmen*. Some of the large-scale settings are almost like miniature cantatas, with choral refrains, sections in fewer parts intended for solo voices, and instrumental interludes which are sometimes scored for families of instruments. The use of italianate ornamentation shows the probable influence of Schütz, as does the madrigalian word-painting. The constant variety in the forces used, the sense of form, and the expressive setting of the words compensate to some extent for the less imaginative thematic material, which is sometimes rather foursquare. The setting of Psalm lxxxv for two mixed choirs contains some powerful sonorities and stark contrasts of high and low blocks of sound.

A. LINDSEY KIRWAN

Seling, Josef Antonín. *See* SEHLING, JOSEF ANTONÍN.

Sellars, James (Edward) (*b* Fort Smith, AR, 8 Oct 1943). American composer. He studied at the Manhattan School of Music (BMus 1966), where his teachers included Vittorio Giannini, Nicolas Flagello and David Diamond, Southern Methodist University (MM 1970) and North Texas State University, Denton (PhD 1976). From 1966 to 1969 he was harpsichordist with the New York Camerata Ensemble. He has received commissions from the American Society for Commissioning New Music, New Music America and the Danish RSO among others, and has won prizes for his First Piano Sonata and *Three Stein Choruses*. In 1982 he became associate professor at the Hartt School of Music; he served as music critic for the *Hartford Courant* from 1976 to 1981.

Sellars has produced and conducted many major performances of contemporary American chamber music and has published many articles on contemporary music. His compositional style has evolved from the neo-Romanticism of his teachers, through extended serialism and dada, to an eclectic post-Romanticism incorporating several popular elements. His dramatic works, such as *Chanson dada*, *For Love of the Double Bass*, *Haplomatics* and *Beulah in Chicago*, show an exceptional understanding of musical theatre. *Afterwards*, for orchestra, is an audicious re-writing of the first movement of Beethoven's Fifth Symphony. Sellars has employed electro-acoustic techniques in a number of works, and has collaborated with artists in other disciplines, such as David Hockney and Peter Sellars. His fluent blend of diverse stylistic influences produces music that is both profound and highly entertaining.

WORKS

Dramatic: The Family (TV op, 1, W. Giorda), 1960; Tulsa, OK, 1963, withdrawn; Rousseau (ballet), wind, 1972; Chanson dada (monodrama, 3 pts, T. YVAR MIKHASHOFF/ROBERT CARL

Sellars, Peter (*b* Pittsburgh, 27 Sept 1957). American theatre and opera director. He studied at Harvard University and formed his own group, the Explosives B Cabaret, which put on several plays. In 1980 he staged Gogol's *The Inspector-General* for the American Repertory Theater, Cambridge, Massachusetts, in a modernist, anti-realist style. For the same theatre he directed in 1981–2 a production of Handel's *Orlando* in which the central character was an astronaut stationed at Cape Canaveral, and for the Chicago Lyric Opera a version of *The Mikado* located in present-day Japan. Sellars became the director of the Boston Shakespeare Company in 1983, and embarked on an adventurous repertory that included the American première of Peter Maxwell Davies's *The Lighthouse*. In 1984 he was appointed director of the

American National Theater Company at the Kennedy Center, Washington DC.

A series of Mozart productions has included a widely acclaimed *Così fan tutte* (1986, Purchase, New York; based on the 1984 production at Castle Hill, Boston), set in a neon-lit diner, with an invented relationship between Despina and Don Alfonso. His *Don Giovanni* (1987, Purchase), set among drug dealers, was felt to have weakened the tensions and balance of the plot to some extent; *Le nozze di Figaro* (1988, Purchase), however, was entertainingly set in a new apartment block in New York. His production for Glyndebourne in 1990 of *Die Zauberflöte*, interestingly updated to the West Coast of the 1950s, provoked adverse criticism for its cutting of all the spoken dialogue (some restored in the 1991 revival), with detrimental effects on the coherence of the work. Sellars's first production in the UK was an oblique one of the equally enigmatic *The Electrification of the Soviet Union* (Glyndebourne Touring Opera, 1987), a collaboration between Sellars, Craig Raine (text) and Nigel Osborne (music). Other notable productions have included a richly comic *Giulio Cesare* (1985, Purchase), Messiaen's *Saint François d'Assise* (1992, Salzburg), a moving *Theodora* at Glyndebourne (1996), with a contemporary US setting, *Le Grand Macabre* (1997, Salzburg, 1998, Théâtre du Châtelet, Paris) and the première of John Adams's *Nixon in China* (1987, Houston). In this, as in his production of Adams's *The Death of Klinghoffer* (1991, Brussels, La Monnaie), he has worked closely with composer, librettist and choreographer. In 1998 he directed the première of Tan Dun's *Peony Pavilion* in Vienna.

Sellars's iconoclastically untraditional approach, with its strong visual element, is influenced both by the European avant garde and, in its emphasis on gesture and symbol, by oriental stagecraft. He shows an unusual sensitivity to the theatrical workings of music in opera and musical comedy, but his inventiveness has sometimes led to productions in which the overlay of symbols and performance styles has seemed diffuse and complicated.

STEVEN LEDBETTER/R

Selle, Thomas (*b* Zörbig, nr Bitterfeld, 23 March 1599; *d* Hamburg, 2 July 1663). German composer. His birthdate is given on a portrait of him engraved in Hamburg in 1653 (see illustration). He must have come from a poor family, but under a regulation agreed at Delitzsch in 1598 it was possible for him to be educated and maintained there for a short time. He then went to Leipzig, possibly to the Thomasschule, certainly to the university, where he matriculated in the summer term of 1622. He was undoubtedly stimulated musically by his stay in Leipzig; in the manuscript *Kurtze doch gründliche Anleitung zur Singekunst* (*c*1642) he referred to the Thomaskantor Sethus Calvisius in terms that suggest he had studied with him. He lived in north-west Germany from 1624 at the latest, first as Kantor at Heide, from 1625 as rector at nearby Wesselburen, from May 1634 as Kantor at Itzehoe and from 12 August 1641 as Kantor at the Johanneum,

Thomas Selle: engraving by Dirk Diricks, 1653

Hamburg. As civic director of church music in Hamburg he worked untiringly and successfully to ensure that up-to-date music was regularly and well performed.

Selle was a prolific composer of vocal music in a wide range of forms and styles current at the time, though it is fair to say that on the whole its quantity is more impressive than its quality. Virtually all of it appears to date from his years in north-west Germany. The influence of Schein can be seen in both his sacred and his secular works; since Schein was Calvisius's successor as Thomaskantor this was a further debt that Selle owed to his formative years in Leipzig. As a member of the Hamburg school of songwriters he seems not to have been at home in the lighter forms, with their stereotyped motifs, weak imitative writing and episodic homophonic sections. However, the 'Pastorellen' of 1624 are good examples of a fashionable, indigenous style; certainly the music is superior to the poems, which, as is clear from the preface to *Concertatio castalidum*, Selle had written himself. With a sure instinct for what was musically both desirable and practicable, he followed in his church music the ideas of Michael Praetorius about contrasts and variety of sonority, the possibilities of performance of the same music by different forces, and the need for varied, clearcut forms articulated by instrumental sinfonias, interludes and ritornellos. These features distinguish above all his sacred concertos and also his Passion music; his *St John Passion*, one of the most notable Passions of the 17th century, is the first Passion to include instrumental interludes. From Scheidt's chorale concertos he adopted the idea of anticipating and preparing through solo writing the complete, fully scored statement of the chorale theme. His eclecticism and willingness to compromise also encompassed remnants of an older style; these can still be seen late in his career in his settings of Johann Rist, where chorale-like melodies appear without contradiction as vehicles for a modern type of word-setting.

Between 1646 and 1653 Selle made a complete manuscript compilation of his sacred music (including the

works already published) in 16 partbooks and three volumes of tablature, which he revised in 1663 (all in *D-Hs*). It comprises 281 works, 90 to Latin texts (one in tablature only) and 187 to German texts, as well as three Passions and a Resurrection *historia* which were later separated from the collection and bound separately. He seems to have intended to publish the Latin works at his own expense at Rostock in 1646. A 36-voice canon (*D-Bsb*) and a treatise, *Instrumentum instrumentorum* (*D-Hs*), formerly attributed to Selle are now known not to be by him.

WORKS

printed works published in Hamburg unless otherwise stated

Edition: Opera omnia (MS, 1646–53, *D-Hs*)

SACRED

Hagio-deca-melydrion, 1–4vv, bc (1627)
Monomachia harmonico-latina ... et ritornellis, congressus prior, 2, 5, 6vv, bc (1630)
Monophonia harmonico-latina, 1–3, 6vv, bc (1633)
Concertuum binis vocibus ... decas, 2vv, bc (1634)
Concertuum trivocalium germanico-sacrorum pentas, 3vv, bc (1635)

WERNER BRAUN/JÜRGEN NEUBACHER

Sellick, Phyllis (Doreen) (*b* Newbury Park, Essex, 16 June 1911). English pianist. She studied at the RAM, 1925–7, then privately with Isidore Philipp in Paris, 1927–31, and made her début at Harrogate in 1933 playing Grieg's Concerto. She specialized in 20th-century French and English solo repertory and also, after her marriage to Cyril Smith in 1937, in works for four (and three) hands. Sellick gave the first performance of Tippett's Fantasia on a Theme of Handel (1942) and Malcolm Arnold's Concerto for Phyllis and Cyril (1969), both dedicated to her, and she was also the dedicatee of works by Vaughan Williams, Bliss and Gordon Jacob. She recorded, among other works, Tippett's First Sonata, Walton's Sinfonia concertante (with the composer conducting) and piano duos with her husband. An account of her career as a duo-pianist with Cyril Smith appears in his autobiography, *Duet for Three Hands* (London, 1958), to which she contributed a chapter. She taught at the RCM from 1964 to 1992, and was awarded the OBE in 1971.

FRANK DAWES

Sellitto [Sellitti, Selitti], **Giuseppe** (*b* Naples, 22 March 1700; *d* Naples, 23 Aug 1777). Italian composer. He spent most of his life in Naples but he is known to have visited Venice, where he wrote two operas, in 1733, and Rome, where he had a hand in the composition of three operas, in 1742 and 1746. The exact number of works by Sellitto has yet to be determined. In two petitions dated November and December 1771 written to the King of Naples, Sellitto claimed that he had written 46 operas in all, 32 for Naples and 14 for Rome, Venice, Bologna and Florence, as well as oratorios and other secular and sacred compositions. He may have been in Florence in 1765 and he perhaps passed through Bologna on his way to and from Venice between 1732 and 1733. In 1760 he was appointed organist of S Giacomo degli Spagnuoli, Naples, a post he held until his death. In his later years he also taught singing.

Sellitto's brother Giacomo (*b* Naples, 28 July 1701; *d* Naples, 20 Nov 1763) was a singing teacher and composer and was *maestro di cappella* of the Collegio dei Nobili, Naples. He composed 72 fugues for harpsichord (*I-Nc**), a *Stabat mater* for four voices, violin, violetta and basso continuo (*Nc*), an opera, *La Gineviefa* (L. Brunassi) dating from 1745, a *tragedia per musica*, *S Perpetua martire* (Brunassi; *Fc*, *US-Wc*), and possibly *Parce mihi domine* for soprano and strings (in *I-Mc*).

WORKS

OPERAS

Amor d'un' ombra e gelosia d'un' aura (ob, C. de Palma, after C.S. Capece), Naples, Nuovo, spr. 1725

Oronte, ovvero Il custode di se stesso (ob, B. Saddumene), Naples, Fiorentini, 1730, *I-Rn*
Nitocri (os, A. Zeno), Venice, S Giovanni Grisostomo, carn. 1733, *D-Bsb, Dl*
Ginevra (os, A. Salvi, after L. Ariosto), Venice, S Samuele, Ascension 1733
Siface (os, P. Metastasio), Naples, S Bartolomeo, 4 Dec 1734, collab. others; perf. with La Franchezza delle donne (int, T. Mariani), *I-Nc*

MICHAEL F. ROBINSON (with LUISELLA MOLINA)

Sellner, Johann. *See* SELNER, JOHANN.

Selma y Salaverde, Bartolomé de (*b* Cuenca, *c*1595; *fl* 1613–38). Spanish Augustinian friar, composer and bassoonist. His father was the royal chapel instrumentalist Bartolomé de Selma (*d* Madrid, 28 Aug 1616) and his mother, Angela Salaverde. On 21 October 1613 he professed at S Felipe el Real, the Madrid house of the Augustinian order. He was engaged as a virtuoso bassoonist by the Archduke Leopold, 1628–30, during the latter's residence at Innsbruck. Selma y Salaverde's one surviving collection, *Canzoni fantasie et correnti da suonar* (Venice 1638/*R*), for one to four parts and basso continuo, is dedicated to the son of King Sigismund III of Poland and Sweden, Carl Ferdinand, who was Bishop of Breslau from 1625 until his death but who was resident almost exclusively in Warsaw and the surrounding area. In the dedication Selma y Salaverde states that he was 'born and educated in Spain', and refers to two *maestri di cappella*, G.G. Porro and Giovanni Valentini (i), both of whom were presumably personal acquaintances. His solo writing for bassoon (the first ever published) descends to B♭′ and the difficulty of the passage-work suggests that he was a master of his instrument; Claudio Panta's preface to the collection praises his control of breathing and tonguing. The dances for two, three and four voices are always enticing while occasional chromatic turns lend vivid colour. Elsewhere, 'modernity' manifests itself in frequent, sudden, specified contrasts of tempo and dynamic. The *Canzon a 4 sopra battaglia* begins with the type of fanfares and lively military signals common in Spanish and Portuguese *batallas* from Correa de Arauxo to Cabanilles. Modern editions of many of the pieces in the collection exist.

ROBERT STEVENSON

Selmer. French, American and British firms of musical instrument manufacturers. The American firm also imports and distributes wind, string and percussion instruments.

1. France. 2. USA. 3. Britain.

1. FRANCE. The firm was founded in France by Henri Selmer (*b* Mézières, 20 Oct 1858; *d* Paris, 29 July 1941). Selmer, who was born into a family of military musicians, studied clarinet at the Paris Conservatoire, obtaining a *deuxième prix* in 1882. Such was his preoccupation with reeds that in 1885 he set up a business in Paris to make and adjust them. In 1896 he won a silver medal at the Montpellier Exposition and before the end of the century he hired an experienced clarinet maker, who made the firm's first set of clarinets. He exhibited reeds at the Paris Exposition of 1900, winning a bronze medal. In 1901 Selmer advertised clarinets, flutes, oboes, bassoons and saxophones under their own trademark; however, the quantities produced were small. A catalogue published in 1910 announded that Selmer had acquired the rights to the trademark of the flute maker Florentin Barbier. In 1911 the firm moved to a small factory at Gaillon, 97 km west of Paris, where the workforce grew to about 34. The retail shop in Paris was retained. After World War I the factory was moved to Mantes-la-Ville, nearer to Paris, to allow for further expansion; research and development concentrated on the saxophone and in 1922 the firm launched its 'Model 22'.

In 1928, when the workforce was about 180 strong, Selmer registered his firm as Henri Selmer & Cie. The firm took over Adolphe Sax & Cie. in 1929 and Schoenaers-Millereau (woodwind and brass instruments) in 1930. It diversified its activities during the 1930s to include music publishing, guitar making and the manufacture of brass instruments, while research on the saxophone was intensified. During this period the successful 'balanced action' saxophone and 'Armstrong' model

trumpet were launched. World War II caused severe cutbacks in production and when Selmer died at the age of 82 he left his son Maurice Selmer (*b* Paris, 22 Dec 1891; *d* Paris, 7 Oct 1961) at the head of a reduced firm.

After the war, Henri Selmer & Cie. ventured briefly into record production (1948–53), but soon allowed this part of the business as well as the music publishing operation and the guitar making workshop to decline in order to concentrate on the saxophone and other research and development; this research led to a series of new models. The new 'MarkVI' saxophone, introduced in 1954, was to restore the firm to its previous position as a leading manufacturer of the instrument.

In 1954 Henri Selmer & Cie. ventured into the world of electronic musical instruments with the *Clavioline*, which was intended to imitate a range of wind and string instruments. In 1967 the firm launched the 'varitone' cellular microphone and control box, an electronic system, intended primarily for saxophones, which modified the sound of the instrument. In the mid-1980s the firm began to distribute the *Variospec*, a variable control device that can be built into saxophones, clarinets and flutes and which modifies the instrument's acoustic impedance, manufactured under licence to the French acoustician Ernest Ferron. At the end of the 20th century the company offered a full range of high-quality woodwind and brass instruments, sold through distributors in Europe, North and South America, the Middle East and East Asia.

2. USA. The American firm, now called the Selmer Co., was founded by Henri's brother Alexandre Selmer (*b* Caluire-et-Cuire, nr Lyon, 7 Oct 1864; *d* Chatou, nr Paris, 19 Feb 1953), a clarinettist who went to the USA in 1898 to join the Boston SO (1898–1901), later playing in the Cincinnati SO (1902–6) and the New York PO (1909–11). Alexandre's set of Selmer clarinets attracted attention, and by 1903 he was acting as agent for his brother's instruments. In 1904 he showed a variety of wind instruments and reeds at the Louisiania Purchase Exposition and in 1906 he opened an import and retail business in New York City. He returned to Paris in about 1911, leaving the distributorship in the hands of George M. Bundy (1886–1951).

After World War I the firm was incorporated as H. & A. Selmer, Inc., with Bundy as president. By 1919 the retail store offered French-made Selmer woodwinds and American-made Holton band instruments, Leedy drums and Mersel band instruments. In 1927 the headquarters of the firm moved to Elkhart, Indiana, and a new Selmer firm was incorporated; the store in New York was retained. Around this time H. & A. Selmer began to distribute second-quality instruments under the 'Barbier' and 'Bundy' trademarks; some 'Bundy' clarinets were made by Henri Selmer & Cie. while the firm of Thibouville Frères made instruments of both marks. The American firm added 'Raymond' clarinets and 'Marcil' flutes to its catalogue in the early 1930s.

When the French firm found itself unable to export instruments during World War II, the American firm began to make its own clarinets and flutes, producing its first 'Bundy' clarinets in 1944. Following the war it developed a line of low-priced student instruments for the rapidly expanding school-band market. These instruments, which bore the 'Bundy' and 'Signet' trademarks, were made by streamlined machine production techniques; from 1948 plastics were substituted for wood to reduce production costs. The Bundy Band Instrument Corporation was created in 1958 to handle the large-scale production of these instruments. Selmer then undertook a series of mergers: with Harry Pedlar & Sons, Inc. (1958), the Vincent Bach Corporation (1961), the Buescher Band Company (1963), Lesher (oboes and bassoons, 1967), Glaesel String Instruments (1978), Ludwig Industries (percussion, 1981), and William Lewis & Sons violins (1995). At the end of the 20th century it had factories in Illinois, Indiana, Ohio and North Carolina. It has continued to import French-made Selmer instruments for its top-quality range and had developed a line of educational materials. The firm was itself owned by Magnavox (1968–74), the North American Philips Corp. (1974–88) and Integrated Resources (1989–93). The American Selmer firm merged with Steinway & Sons in 1995, but each company maintained its separate identity. A collection of clippings and catalogues is held at the Shrine to Music Museum, University of South Dakota, Vermillion.

3. Britain. As early as 1901 Henri Selmer was exporting instruments to England, where the Spanish clarinettist Francisco Gomez (1886–1938) acted as his agent. Before 1910 Gomez had opened commercial premises in London. The business grew, and by 1923 the London firm of Lafleur & Son had taken over the British distribution of Selmer's instruments. In 1929 Selmer allowed the saxophonist Ben Davis to register an English company, Henri Selmer & Co. Ltd.; the new firm imported less expensive instruments and produced a range of accessories.

In 1934 Henri Selmer & Co. Ltd. launched the 'L.D. Compacta' amplifier, and within two years Truvoice, Ltd. had established offices at the same address, from where they organized distribution of their 'Operadio' amplification system. In 1938 Henri Selmer & Co Ltd. applied for a patent for the *pianotron*, an electrified piano, and introduced the Selmer electric guitar; the manufacturer of these instruments is unknown. From the late 1930s the firm distributed a variety of instruments, including saxophones, brass instruments, accordions, guitars and generators, imported from several different countries. It also manufactured a range of amplifiers and distributed Meazzi wind instrument microphones and sound systems. The firm was dissolved in 1985 and Vincent Bach International Ltd. took over the distribution of French-made Selmer products in the United Kingdom.

WILLIAM McBRIDE (1, 3), CAROLYN BRYANT (2)

Selmer, Johan Peter (*b* Christiania [now Oslo], 20 Jan 1844; *d* Venice, 21 July 1910). Norwegian composer. He attended law school for a year, but a serious lung ailment prevented him from completing his studies, and during the next few years he made extensive voyages to different parts of the world to convalesce. In 1869 he went to study music in Paris, working under Ambroise Thomas and Alexis Chauvet and hearing Berlioz's compositions for the first time. In 1870 he conducted a concert of Scandinavian music there. He remained in Paris during the Prussian siege and Commune and was appointed by the Commune to look after the interests of music and musicians. With Raoul Pugno, Delphine Ugalde and Eugène Garnier he set to work on the reopening of the Opéra, due in May 1871, when *L'année terrible* was announced but not performed. At the fall of the Commune, Selmer fled the country. In autumn 1871 he went

to Leipzig to continue his studies under E.F. Richter and Oskar Paul. He also profited from his friendship with Johan Svendsen. After a couple of years his lung ailment worsened, and he went to Italy. Half a year later he returned to Leipzig, but his years of regular study were over.

Selmer's first independent concert in Christiania took place in the autumn of 1871 with further concerts in 1874, 1876 and 1879; all met with considerable success. In 1879 the Norwegian parliament granted him an annual state salary as a composer, like Grieg and Svendsen some years before. He made an important contribution to music in Christiania as a conductor of the orchestra in the Music Society (a forerunner of the Oslo Philharmonic Society) from 1883 to 1886. Later he held no permanent position, and because of his illness spent long periods in southern Europe.

Selmer's main works are for large orchestra, sometimes with added vocal parts. He also wrote about 110 songs, some duets, piano pieces and several choruses. His harmony and form are typical of the late Romantic composers and his works show the influence of his models, Berlioz, Liszt and Wagner, and, less directly, Grieg, Svendsen and Sinding. An individual Norwegian element is, however, evident and Selmer was regarded in his day as the leader of the radical phalanx within Norwegian music. His orchestration is vital and has a great range of colour. A lyrical talent characterizes those songs and choruses that have remained popular in Norway.

Selmer held advanced social and philosophical opinions, largely through his travels abroad (especially in France); while he often turned to Hugo, Shelley and Lenau for his texts, the influence of Ibsen and Bjørnson was also strong. His interest in social problems led to his founding the Christiania Orchestral Musicians' Pensions Fund in 1884, of which he was the first president.

WORKS
(selective list)

CHORAL AND ORCHESTRAL

op.
4 L'année terrible, scène funèbre, orch, 1871 (Christiania, *c*1886)
5 Nordens Aand [The Spirit of the North] (C. Ploug), chorus, orch, 1872, pf and choral parts (Christiania, *c*1888)
8 Alastor (after P.B. Shelley), orch, *c*1874
7 Tyrkerne gaar mod Athen [The Turks go towards Athens] (after V. Hugo), chorus, orch, 1876 (Copenhagen, *c*1893, rev. version)
23 Hilsen til Nidaros [Greeting to Nidaros] (J. Paulsen), chorus, orch, 1883 (Christiania, *c*1885)
27 Selvmorderen og pilgrimene [The Suicide and the Pilgrims] (after C. Nordier), chorus, orch, 1888 (Leipzig, *c*1902)
32 Karneval i Flandern, orch, 1890 (Leipzig, *c*1893)
50 Prometheus, orch, 1898 (Leipzig, *c*1899)

UNACCOMPANIED CHORAL

26 works for male vv, incl.: Seraillets have [The Garden of the Seraglio], op.37/3 (Christiania, *c*1893); Norge, Norge, op.38/1 (Christiania, *c*1899); Ulabrand, op.48/1, Vort land [Our Country], op.48/3 (Christiania, *c*1895)
For female vv: opp.12, 25, 59, 60, 61

SONGS

La captive, op.6 (V. Hugo), A, orch, 1872 (Christiania, *c*1886)
*c*110 songs, v and pf, incl. Tollekniven, op.24/10
8 tostemmige Barnesange til Skolebrug, duets, op.44 (1895); Lyse Toner, duets, opp.46–7 (1895)

PIANO

Six petits morceaux caractéristiques, pf, op.3 (*c*1877)
Bjorneborgmarschen, arrs. of Nor. trad. music

FINN BENESTAD

Selnecker [Selneccer], **Nikolaus** (*b* Hersbruck, nr Nuremberg, 5/6 Dec 1528; *d* Leipzig, 12 May 1592). German theologian. He attended the Gymnasium in Nuremberg, and as early as 1540 became organist in the castle chapel. As a student in Wittenberg from 1549 he lived in the house of Philipp Melanchthon. In 1558 he became second preacher in the Dresden court, but through his involvement in religious quarrels between Lutherans and Philippists (the supporters of Melanchthon), was dismissed in 1564. He obtained an appointment as a professor at Jena in 1565, but was again dismissed after only two years. A move to Leipzig followed, where he taught at the university, became a minister at the Thomaskirche, and was later city superintendent. Except for a period of two years between 1572 and 1574 when he was granted leave of absence to supervise the reform of the church in Brunswick and Oldenburg, he remained active in Leipzig until 1586. In that year he again lost his appointments and accepted the post of superintendent in Hildesheim. He died almost immediately after returning once more to Leipzig.

Selnecker is known for a large corpus of theological writings (175) and a work for liturgical use, *Christliche Psalmen, Lieder und Kirchengesänge* (Leipzig, 1587), which places him among the foremost hymn writers of the late 16th century. Two hymns in particular have remained in use to the present day: *Lass mich dein sein und bleiben* and *Ach bleib bei uns, Herr Jesu Christ* (the first verse is not by him). It is probable that he also composed some of the melodies himself, or at least created new ones out of older melodic material; undoubtedly the tune to Ludwig Helmbold's *Nun lasst uns Gott, dem Herren* is his, although the metre, derived from the style of the humanist ode, is identical to that of its source. In his collection he remarked that Le Maistre, Scandello and others contributed tunes to go with his verses. The work is also significant in that a Protestant responsorial Passion is found for the first time with *exordium* and *conclusio*. Individual pieces were included in later anthologies of sacred works (1568^{11}, 1597^{7}, 1597^{8}, 1609^{10}).

WALTER BLANKENBURG

Selner [Sellner, Sölnerus], **Johann** [Johannes] (*b* Nabburg, Upper Palatinate, *c*1525; *d* Leubnitz, nr Dresden, Nov 1583). German composer and clergyman. He was not born at Neuburg, in the Palatinate (as stated in *MGG1*): he matriculated at Wittenberg University in 1550, and he is listed in the university register as a native of Nabburg.

He had already – probably in 1549 – settled at Wittenberg, with its strong associations with Luther, and become a Kantor. He stayed there, gaining wide respect for his diverse scholarly interests, until in 1553 Philipp Melanchthon recommended him as successor to the first Protestant Kantor of the Kreuzkirche and its school at Dresden. He remained there until 1560; during his tenure the school was rebuilt in the form in which it survived until 1812. In 1560 Selner was ordained and became pastor at Leubnitz. In 1577 he was a signatory to the 'Concordienformel', the official formulation of the Lutheran creed. None of his compositions has survived. Five manuscript volumes of Latin motets, written by him in 1557, were found in 1716, but they are not extant and were probably burnt in 1760 along with the rest of the music library of the choir of the Kreuzkirche.

WALTER BLANKENBURG

Ṣelṣelim (Heb.). Ancient Jewish instrument, possibly a metal rattle. *See* BIBLICAL INSTRUMENTS, §3(vi).

Selva, Antonio (*b* Padua, 1824; *d* Padua, Sept 1889). Italian bass. He was a struggling 19-year-old member of the chorus at La Fenice, Venice (with some experience of singing leading parts in a minor theatre) when Verdi in an emergency chose him for the important comprimario part of Don Ruy Gomez de Silva in *Ernani* (1844). This was the type of the granitic Verdi bass; he went on to sing other such parts, for instance Zaccaria in *Nabucco*, in leading Italian theatres and at the Théâtre Italien, Paris. He created Count Walter – another comprimario part – in *Luisa Miller* (1849, Naples). He sang frequently in Madrid between 1864 and 1874.

JOHN ROSSELLI

Selva, Blanche (*b* Brive, Corrèze, 29 Jan 1884; *d* Saint-Amand-Tallende, 3 Dec 1942). French pianist. In 1895 she was awarded a *première médaille* at the Paris Conservatoire, where she was a pupil of Sophie Chéné. She then studied composition with d'Indy at the Schola Cantorum and taught piano there from 1901 to 1922. She later held similar positions at the Strasbourg and Prague conservatories and in Barcelona, where she founded her own academy. In 1904 she performed the complete keyboard works of Bach in 17 recitals in Paris. She specialized in contemporary music and played the first performances of d'Indy's Sonata, Fauré's 13th Nocturne, Roussel's Suite op.14, and Albéniz's *Iberia* (books 1, 2 and 3). She wrote an important book on technique and edited piano pieces by Clementi, Froberger, Rust and Séverac. Her recordings reveal restraint and purity in Bach's B♭ Partita and exceptional virtuosity and tonal control in Franck's *Prélude, choral et fugue* and his Violin Sonata, with Joan Massía.

Sēmantron [sēmandron, sēmantēr, sēmantērion, sēmanthron, simandron]. Greek term, equivalent to *klepalo* (or variants) in Slav languages, for a wooden sounding-board or metal sounding-plate (the latter sometimes triangular in shape), suspended and struck rapidly with a hammer it is classified as an idiophone. It served universally as a call to prayer until it was supplanted (from the 7th century) in the West by the church bell. It is still used instead of, or in addition to, a bell in some Orthodox and other eastern Christian churches, especially monasteries (e.g. those on Mount Athos; cf *Easter on Mount Athos*, a recording by Abbot Alexios and the Community of the Xenophontos Monastery, Archiv 2533 413, 1979). In medieval castles in the west a similar device was struck by strangers requiring admittance.

GEOFFREY CHEW/THOMAS J. MATHIESEN

Sembach [Semfke], **Johannes** (*b* Berlin, 9 March 1881; *d* Bremerhaven, 20 June 1944). German tenor. He studied in Vienna and later with Jean de Reszke in Paris. In 1900 he made his début at the Vienna Staatsoper, and from 1905 to 1913 was principal dramatic tenor at Dresden, where he created Aegisthus in *Elektra* (1909). In 1910 he was admired at Covent Garden as an excellent Loge and Siegmund, adding Parsifal, Lohengrin and Walther in 1914. His *mezza voce* was the subject of special praise and the lyric beauty of his voice was again noticed when he sang the title role of Méhul's *Joseph* in its London première. At the Metropolitan he enjoyed a notable success, first as Parsifal (1914), then as Tamino, Florestan and Adolar (Weber's *Euryanthe*). He showed further versatility in the following seasons, turning from Siegfried to Pylades (*Iphigénie en Tauride*) and in 1920 learning the Wagnerian repertory in English as required in the immediate postwar years. Sembach returned to New York at the Mecca Temple (later the City Center) in 1931 and also made successful appearances in South America. On stage he presented a more credible hero than most Wagnerian tenors and on records his voice is heard as a strong, incisive instrument, often attractively used.

J.B. STEANE

Sembrich, Marcella [Kochańska, Prakseda Marcelina] (*b* Wiśniewczyk, Galicia, 15 Feb 1858; *d* New York, 11 Jan 1935). Polish soprano, later naturalized American. The daughter of a village musician, she had her first instruction in violin and piano with her father and as a child helped support the family by playing both instruments. She was 11 when a well-to-do villager made it possible for her to attend the conservatory at Lemberg (now L'viv), where her principal teacher was Wilhelm Stengel, whom she later married. Stengel took her to Vienna to sing and play for Julius Epstein, who advised her to cultivate her voice; Liszt later endorsed this suggestion. She studied with Viktor von Rokitansky and the younger G.B. Lamperti, and made her début in Athens on 3 June 1877 as Elvira in Bellini's *I puritani*, adopting her mother's maiden

name. After further study in the German repertory, with Richard Lewy in Vienna, she appeared in Dresden in 1878 as Lucia di Lammermoor, the same role she later sang for her débuts at Covent Garden (12 June 1880) and the Metropolitan Opera (24 October 1883, the second night of the first season).

Sembrich's success in New York was immediate. After an active season she showed her versatility at a benefit concert at the Metropolitan by performing two movements of a violin concerto by Charles-Auguste de Bériot, a Chopin mazurka for piano, and part of the role of Rossini's Rosina. The season had been artistically brilliant but a financial disaster, and Sembrich spent the next years in Europe. Rejoining the Metropolitan company in 1898, she reigned as a favourite until 1909, when she was honoured with a sumptuous farewell gala in which all the principal artists performed in tribute to her. Having already established herself as a lieder singer, making extended tours, she continued to give recitals until 1917, the year of her husband's death. She was by then active as a teacher, heading the voice departments of both the Curtis Institute and the Institute of Musical Art.

Sembrich was one of the greatest sopranos in history. Like Patti (who became a staunch friend), she combined a dazzling technique with the purest lyricism. Her scale was perfectly matched over a range from c′ to f‴. In addition to Lucia, her most popular roles were Violetta, Gilda and Rosina; she was also a leading interpreter of Mozart and was admired for her Zerlina, Susanna and the Queen of Night. Her repertory also included two Wagner roles, Elsa (*Lohengrin*) and Eva (*Die Meistersinger*), and Puccini's Mimì. She was the 'musicians' singer' of her time, and she enjoyed playing chamber music with such friends as the members of the Flonzaley Quartet, or two-piano music, often with Paderewski. Her recordings, made late in her career, hardly do her justice, though they give some impression of the limpid quality of her voice and the brilliance of her coloratura. She confessed that she was never at ease before the acoustic recording horn.

Marcella Sembrich as Mrs Ford in Nicolai's 'Die lustigen Weiber von Windsor'

Personally, Sembrich was all but unique among singers in that she was utterly free of jealousy and beloved by all of her associates. After an engagement with the Metropolitan in San Francisco during the great earthquake of 1906, she delayed her departure for Europe to give a concert in Carnegie Hall, and raised some $10,000 for the benefit of the orchestra and chorus. Her influence as a teacher was far-reaching: her pupils included Dusolina Giannini, Hulda Lashanska, Queena Mario, Winifred Cecil and Anna Hamlin, and established artists such as Alma Gluck and Maria Jeritza came to her to perfect their art. In the summer months she used to take a class of students to work with her, at first near Lake Placid, and from 1922 at Bolton Landing on Lake George. Her studio there is now open in the summer as a museum of opera.

PHILIP L. MILLER

Semegen, Daria (*b* Bamberg, 27 June 1946). American composer of German origin. She emigrated to the USA in 1951 and took American citizenship in 1957. She studied composition with Phillip Bezanson; at the Eastman School (BM 1968) with Burrill Phillips and Samuel Adler; with Lutosławski and Kotoński as a Fulbright scholar (1969); and with Bülent Arel and Alexander Goehr at Yale University (MM 1971). She also studied with Vladimir Ussachevsky at Columbia University (DMA 1973) and was his assistant at the Columbia-Princeton Electronic Music Center, where she taught from 1971 to 1975. In 1974 she joined the music faculty of SUNY, Stony Brook, and later became director of its electronic music studio, which she had helped to design.

Semegen's music focusses on the aural perception of colour and shapes. Her compositions are purely instrumental in nature even when she uses the voice. She does not write 12-note music but often uses note rows like traditional scales. Both her musical works and her writings (the latter published in *Music Journal* and elsewhere) reflect her belief that electronic music has evolved naturally from traditional instrumental styles. She favours such 'primitive' electronic composing techniques as physically cutting and splicing tape; exposition of themes and contrapuntal development provide a Classical structure for her music, whatever the genre. Her droll sense of humour is evident in both her writings and her music (e.g. *Jeux des quatres*). She has also written the lyrics for a set of songs with music by Alice Shields.

Semegen has won many honours and awards. In 1987 she was the first woman to be awarded the McKim

Commission from the Library of Congress (*Music for Violin and Piano*).

Semibreve (Fr. *ronde*; Ger. *Ganze-Note*; Lat. *semibrevis*; It. *semibreve*; Sp. *redonda*, *semibreve*). In Western notation the note that is half the value of a breve, hence its name, and twice that of a minim. In American usage it is called a whole note. It is first found in late 13th-century music. Before about 1600 its value was a half or a third of a breve, and it was usually shown as in ex.1*a*. It was

Ex.1

(a) ◆ or ◇ (b) (c) o (d)

the shortest note expressible in ligature. The semibreve was adopted as the referential unit of much Renaissance and Baroque music theory, and several writers attempted to define its length precisely. A copy of the *pars organica* of Thomas Tomkins's *Musica Deo sacra* (1668, in *GB-Ob*) contains a remark to the effect that the length of a semibreve was equal to two heartbeats, or to the swing of a pendulum two feet long. The pendulum gives a rate of about 40 beats per minute, which agrees with a statement by Quantz, writing in 1752, that the rate of the heartbeat was 80 to the minute. The various forms of the semibreve and its rest are shown in ex.1*a–d*.

Seminiati [Seminiato], **Santino** (*fl* 1619–20). Italian composer and organist. The title-pages of his two printed works describe him as organist of the cathedral at Ceneda (now Vittorio Veneto). In the dedication of his *Salmi in concerto facili et commodi da cantarsi*, for six voices and organ, op.3 (Venice, 1620), he claimed to have written 'in a style out of favour in modern times, namely simple to sing, neither long nor tedious and with varied forms'. These works are of the concertato type, with frequent changes of voice groups and sequential use of melodic fragments; dynamics are also indicated. His other printed work is *Compietta a ottava voci con il suo basso continuo* (Venice, 1619). A lost collection of three-part canzonettas was attributed to him in the Giunta catalogue (see *MischiatiI*), but no further details are known.

□

Semiology. *See* SEMIOTICS.

Semi-opera [dramatic opera; English opera; ambigue]. A play with four or more separate episodes or masques which include singing, dancing, instrumental music and spectacular scenic effects such as transformations and flying. The form, which flourished in England between 1673 and 1710, is further characterized by a clear demarcation between the main characters, who only speak, and minor characters – spirits, fairies, shepherds, gods and the like – who only sing or dance. Most semi-operas are tragicomedies adapted from earlier plays. The finest examples are those with music by Henry Purcell: *Dioclesian*, *King Arthur* and *The Fairy-Queen*.

Although its roots lie in the Jacobean masque and early Restoration play with music, semi-opera was invented by the actor-manager THOMAS BETTERTON, who was determined to produce an English equivalent of Lully's *comédies-ballets* and early *tragédies lyriques*, and his collaborators, the playwright Thomas Shadwell and the composer Matthew Locke. They recognized that all-sung opera of the Italian type would not suit 'rational' English taste, which was deeply rooted in the spoken play tradition, and their solution was to increase the already plentiful amount of music and dance in the early Restoration adaptations of Shakespeare and to exploit the scenic potential of the new Dorset Garden Theatre in London, which had been equipped as an opera house. Their first great success was a scenically enhanced version of *The Tempest* (1674), with music by Locke, James Hart, Pietro Reggio, Pelham Humfrey and John Banister. Though the resulting work is far removed from the original play of the same name, the music grows naturally from the plot and contributes to it, an integration generally characteristic of the early semi-operas even though music and speech are clearly separated. In the next major musical work, *Psyche* (1675, by Shadwell and Locke), Locke claimed to have created 'an English opera' distinct from French and Italian models (although it was based on the

tragédie-ballet of the same name). In the character of Venus, who both speaks and sings, semi-opera was brought close to the continental mainstream.

After the lavish though musically inferior *Circe* (1677, text by Charles Davenant), there were no more new semi-opera productions for many years, a consequence partly of financial difficulties in the theatres but also of the death in that year of Locke. In 1684 Dryden wrote what he described as a play in 'blank Verse, adorn'd with Scenes, Machines, Songs and Dances' (the classic definition of a semi-opera), but this work, which he later called *King Arthur*, was not produced at the time. Semi-opera was resurrected in 1690 by Betterton, who adapted Philip Massinger and John Fletcher's tragicomedy *The Prophetess* (or *Dioclesian*) for Purcell. This was a notable success and helped establish a pattern of production which lasted for many years. Because semi-opera involved all the theatre's resources it was very expensive, with only one new work possible each year. *The Tempest*, *Psyche* and all Purcell's semi-operas were revived from time to time, often updated with new music.

Purcell's semi-operas differed in conception from earlier works of their kind, in that the music is mostly concentrated into self-contained masques which do not advance the plot. Little attempt was made to integrate music and spoken drama, except at a metaphorical level, and Purcell preferred to write for professional singers rather than the actor-singers who could not do justice to his more difficult music, which tended to distance even further the spoken parts from the musical ones. After Purcell's death in 1695, the Theatre Royal continued to mount new semi-operas. The most notable, *The Island Princess* (1699, music by Richard Leveridge, Daniel Purcell and Jeremiah Clarke), enjoyed more performances than any English opera until *The Beggar's Opera* (1728).

The semi-opera died out not because there was no composer of Purcell's genius available to sustain this curious hybrid of music drama, but, rather, because of theatre politics. With the introduction of Italian opera in 1705–6, the London stage, which had survived several years of vicious competition between the two houses Drury Lane and Lincoln's Inn Fields (later the Queen's Theatre in the Haymarket), reeled under the strain of the high salaries demanded by foreign singers. After several crises the Lord Chamberlain ordered a separation of genres between the two theatres: Drury Lane was permitted to put on plays, but without music, while the Haymarket could produce any kind of opera. This effectively sank semi-opera, which required both actors and singers, and although performances were revived a few years later when the genre restriction was eased, no new works were written.

In Spain, several of the complex three-act mythological court plays by Pedro Calderón de la Barca were performed as semi-operas, with music by Juan Hidalgo. In these *comedias* with integrated operatic scenes, the gods sing their dialogues as recitative and address the mortals with persuasive airs or *tonadas* (mostly in strophic form, some with refrains). The mortal characters sing only common songs, largely drawn from a pre-existing repertory of well-known or popular songs. The prototypes for the genre in Spain seem to have been Calderon's *La fiera, el rayo, y la piedra* (1652; music lost) and *Fortunas de Andrómeda y Perseo* (1653; music in *US-CA*). These plays were produced at court with elaborate italianate staging by Baccio del Bianco. Later semi-operas by Calderón and Hidalgo include *Fieras afemina amor* (1670 or 1672), and *La estatua de Prometeo* (*c*1670–75). In Spain, where only three operas were produced in the 17th century, hybrid genres such as the semi-opera and the zarzuela dominated the repertory at court in the latter half of the century. No other dramatists cultivated the semi-opera (the lighter, pastoral zarzuelas without sung dialogue were easier to produce), but the Calderón-Hidalgo works were revived at court up to the end of the century.

CURTIS PRICE (with LOUISE K. STEIN)

Semiotics [semiology] (from Gk. *Sēmeion*: 'Sign'). The science of signs.

1. Models in general semiotics. 2. Musical semiotics.

1. MODELS IN GENERAL SEMIOTICS. Two thinkers may be credited with developing this study in the 20th century. Ferdinand de Saussure (1857–1913), who used the term 'semiology', instigated a systematic approach to the study of language, based on the observation of binary contrasts as constitutive of the 'meaning' of units at any level of generality. The signifying unit, or 'signifier', does not bear any intrinsic relationship to the object or idea that forms its 'signified' content. This content is purely arbitrary and is determined by the relationship of the term to others, in binary pairs. 'Bit' and 'Bat', for example, are distinguished by the binary contrast of their vowels. Saussure's manner of analysing language as a relatively stable system of such contrasts, existing synchronically, contrasts with the 'diachronic' or historically-based approach to word meaning found in traditional philology. His further distinction between 'langue' and 'parole' is based on the assumption that a synchronic system (*langue*) is internalized by speakers and reflected in their individual utterances (*parole*).

The term 'semiotics' is more commonly used in traditions influenced by Charles S. Peirce (1839–1914), who developed his thought on signs (independently of Saussure) as part of a broader project in the study of logic and epistemology. Signs are not limited, in Peirce's thought, to elements of a language, but may include anything that 'stands to somebody for something'. He characterizes signs as having a three-part structure: sign (representamen), object and interpretant. The sign is an item observed as having a capacity to represent. Its 'object' is the idea conveyed by the sign, which may or may not be an idea of a concrete thing. The 'interpretant' (in its simplest form) is that by virtue of which the sign and object are linked. An interpretant may be a conventional code, arbitrarily formed, to give a kind of meaning consistent with that observed by Saussure. An organized system is not, however, necessary to Peirce's notion of sign. To account for non-conventional signification, he allows that the interpretant may also be grounded on apparent 'likeness' or a causal relationship between the sign and its object. The triad of terms most commonly taken up from Peirce's semiotics reflects these possibilities.

The 'icon' signifies by likeness, the 'index' by causal connection and the 'symbol' by stipulated convention. Broader factors relevant to the understanding of a sign may include not only 'interpretants' of how its relationship to an object is grounded but also a network of further signs. 'Cat' is a 'symbol', with a purely stipulative relationship to its object, a kind of animal. If 'mammal' is invoked in defining it, another symbol has become an interpretant, and may activate an ongoing chain of interpretants. This is the process taken up by Umberto Eco, Floyd Merrell (1997), Jean-Jacques Nattiez and others as constituting 'infinite semiosis'.

Although Saussure and Peirce have been highly influential it would be mistaken to assume that their contributions have led to an orthodox 'methodology' for the study of signs. Rather than denoting a unified discipline, the term 'semiotics' covers a diverse collection of projects relating in some way to 'semiosis'. This last term refers to the activity of signs and may be found in contexts ranging from bio-semiosis (representation in biological systems) to cultural or social semiosis. The patterns of inquiry set by Saussure and Peirce would suggest that systematicity in the study of signs is a primary concern, pointing to a new 'discipline', with definable boundaries and some degree of consensus about its basic terms. Thomas Sebeok promoted the development of such a discipline in his introductory books, drawing on Peirce's divisions of signs. Eco (1976), also, went some way towards marking the boundaries of semiotic study, although he questions the usefulness of such basic terms as Peirce's 'icon'. When semiotics is brought into dialogue with deconstructive and postmodern thought, the very notion of a unified 'methodology' comes under stronger question. Postmodern habits of questioning unified systems of meaning work against the completion of a project such as that envisaged by Peirce, where an architechtonic system organized in 'trichotomies' (such as the icon, index, symbol) is ordered to embrace every possible mode of signification. Discourse engaged with deconstructing binary oppositions also opposes Saussure's structuralist bent. Evident in the narratology of Algirdas Greimas is a problematizing of binary oppositions, with the formation of a new pattern of contrasts featuring not two but four terms. Other semioticians (Eco) explore codes without particular concern for oppositional relationships. Deconstructive and postmodern trends do not extinguish projects of semiotic study but call for a constant revision of what that study entails, and renegotiation of its boundary with other disciplines.

2. Musical semiotics. Studies in musical semiotics reflect the diversity of 'semiotics' generally. They may be divided into two broad types: the structuralist and the semantic or referential. Leonard Meyer (1956) suggested that the latter might be divided into an 'internalist' and 'externalist' form, a distinction that still holds to some degree. Jean-Jacques Nattiez is a dominant figure in structuralist studies, which were given their first impetus by Nicholas Ruwet's segmentational analysis of a *Geisslerlied* (1972). This method of analysis reflects the goals of scientific objectivity set up by Saussure's study of language. Drawing also on the French theorist, Jean Molino, Nattiez postulates a tripartition of musical activity into three domains: the poietic, concerned with modes of creation; the 'neutral', or that which is immanent in the score, and the aesthetic, or domain of a listener's response. Nattiez's form of semiotic analysis belongs properly to the second of these; not concerned with mental acts of either composer or listener, it seeks to elucidate the structures of the score through processes of segmentation and comparison. Recurrent events are identified as belonging to a paradigm, to be tabulated on a vertical axis, while contiguous events appear horizontally, to form the axis of the syntagm. Internal relationships only are of concern. Each segmentational unit is a 'sign', held in relation to other 'signs', without regard to such things as effective connotation or cultural reference.

An internalist semantic approach begins with structures in the score, but seeks to relate them not only to other structures but to ideas with extra-musical reference. These forms of content were labelled by Wilson Coker as 'extrageneric', in contrast to the internal, or 'cogeneric', content derived from purely structural analysis (Coker, 1972). The indirect influence of Peirce is evident in Coker's account of musical 'gesture', which he treats as an aural 'icon' of non-musical gesturing. Coker became conversant with a behaviourist adaptation of Peirce's theory of sign through the work of Charles Morris, which was also influential in Meyer's account (1956) of meaning as expectancy. A more directly Peircean account of musical content, in which gesture receives some emphasis, is given by David Lidov (1987), who seeks to explicate the affective content of musical gesture as an icon of expressive movements with distinctive psycho-physiological motivation. The trichotomy of icon, index and symbol explicated by Lidov is also central to Vladimir Karbusicky's theory (1986) of musical semantics. Karbusicky differs, however, in placing greater weight on music's capacity to create a variety of directional indices (1987). He is concerned, furthermore, with the broad range of interpretants that may be brought by a listener to the hearing of a work.

Peirce's thought plays a subsidiary role in the work of other musical semioticians. Robert Hatten's account (1994) of semantic content in Beethoven relies more on a theory of 'markedness' developed by the linguist Michael Shapiro (1976). Shapiro identifies paired semantic oppositions as typically having a single 'marked' term, one that is more distinctive or limited in its application. Hatten applies this idea to oppositions of stylistic categories or 'topoi' within a composition (Ratner, 1980). Gesture plays an important role in his theory, as it does in those of Coker and Lidov, but Hatten places greater emphasis on its contextualization in a stylistic framework where paired oppositions of gestural types may be observed. A development of the Peircean view of iconicity is implied. In place of an 'iconicity' based on a perception of likeness between musical and non-musical movements, Hatten proposes a theory of correlation between the pairs of terms used to identify marked oppositions in music and their application in non-musical contexts. The need expressed by Eco for a definition of 'icon' that does not rely on a vague notion of similarity finds one solution in this way.

Oppositionality also plays a central part in Eero Tarasti's account (1994) of 'actoriality', a term used to convey the idea of anthropomorphic content (such as 'wilfulness') in tonal processes. Algirdas Greimas's narratological theories are the main impetus for Tarasti's semiotic theory, and also inform Márta Grabócz's analysis of narrative ordering in Liszt. In these semiotic

approaches, musical themes or motifs are conceived as functioning symbolically as 'actors' or 'actants' capable of assuming distinctive 'attitudes' and following a narrative course similar to that found in literature. Greimas's theory of narrative ordering is based on two axes. A term (*A*) and its negation (*not A*) are placed on one diagonal axis; a complementary or contrasting term (*B*) and its negation (*not B*) on an opposite diagonal axis, forming a cross. A paradigmatic narrative is taken to follow the course *A–not A–B–not B*. 'Excessivity' (*A*) might, for example, be contrasted with 'insufficiency' (*B*) in such a scheme, forming a narrative in which the negation of insufficiency (*not B*) is the final resolution – a state of sufficiency (Tarasti, 1994, p.53). This sequence of events finds application to musical contexts in which the opposition and complementarity of different 'actorial' units may readily be identified.

Other approaches to referential analysis are both flexible and syncretic. A number of authors show a concern for stylistically established 'codes' of meaning, styles and topics, such as those identified by Ratner (1980). Eco's notion of 'code' (1976), developed from Peirce's 'interpretant', allows for an on going process of interpretation, based on the application to music of typologies of varying degrees of generality. Codes of meaning are not approached necessarily in binary pairs, but may be organized in many ways. Their variety is explored by Roland Barthes in *S/Z* (1970). When Gino Stefani describes musical codes, under Eco's influence, he identifies a number of discrete types (Stefani and Marconi, 1987). Robert Samuels (1995) argues instead for a flexible approach, in which the coding strategies used by listeners have no pre-defined limit or technique of analysis. Kofi Agawu (1991) is similarly concerned with developing a multi-dimensioned view of the sign, and particularly with showing the mutual interdependence of stylistic topics and internal structural relationships in the Western classical idiom.

Accounts of musical signification with an 'external' or 'cultural' emphasis have been put forward by authors who do not identify themselves as 'semioticians'. The factor distinguishing an approach as 'semiotic' might be taken as a concern with systematicity, starting any investigation with a close structural or stylistic analysis. This is, however, a generalization that is not intractable. A musical interpretation may be less concerned with identifying systematic bases for the attribution of meanings to units than it is with creating a richly described account of how the place of music in its cultural context creates codes of meaning or association. These need not be systematically formed and appraised so long as they are repeated sufficiently often to be recognizable by a given community. The account is 'semiotic' in its broadest sense if it is concerned with the relationship between musical units and other signifying units in a culture. Potential links between a semiotic approach to musical meaning and a wide range of postmodern thought have been explored by Raymond Monelle. The study of musical signification crosses boundaries between the domains of structuralist and cultural study, or the disciplines of 'theory', 'history' and 'ethnomusicology'. It is not a 'discipline' with a closed set of methodologies, authorities and topics, but a wide-ranging set of interpretative projects in which aspects of musical content are appraised both 'internally' and in relation to other cultural domains.

NAOMI CUMMING

Semiquaver (Fr. *double croche*; Ger. *Sechzehntel-Note*; It. *semicroma*; Lat. *semifusa*; Sp. *semicorchea*). In Western notation the note that is half the value of a quaver, hence its name, and twice that of a demisemiquaver. In American usage it is called a 16th-note. It is the equivalent of the old *semifusa*, first found in 15th-century music. The *semifusa* took the form of either a minim with three flags or a coloured minim (red in black notation, black in the more recent void notation) with two flags. Some sources use the alternative term 'semicroma', while in Spanish writings a *semifusa* is a hemidemisemiquaver (64th-note). The semiquaver is still in regular use, although in common with other notes it now has a round note head. Its various forms and the semiquaver rest are shown in ex.1*a–e*.

Semitone [half step] (Fr. *demiton*, *semiton*; Ger. *Halbton*; It. *semitono*; Lat. *semitonium*, *hemitonium*). The smallest INTERVAL of the modern Western tone system; in EQUAL TEMPERAMENT, the $\frac{1}{12}$ part of an octave, or 100 cents. The notational system allows three types of semitone to be distinguished: the diatonic, which is the same as a minor 2nd (e.g. *e–f*, *c♯–d*); the chromatic, which is the difference between a major 2nd and a minor 2nd (hence an augmented unison, e.g. *f–f♯*, *d♭–d*); and the enharmonic, which is a doubly diminished 3rd (e.g. *g♭♭–e*, *b♯–d♭*, *b𝄪–d′*).

In Pythagorean intonation there are two kinds of semitone, each a different size. The diatonic semitone, often called the LIMMA, is the difference between three octaves and five perfect 5ths (reckoned from C, the interval *b′–c″*, as shown in ex.1*a*), a ratio of 256 : 243, or

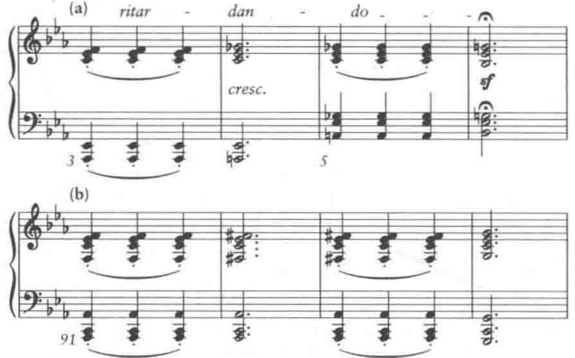
Ex.1 Derivation of semitones in Pythagorean tuning
(a) diatonic (b) chromatic

90·2 cents. The Pythagorean chromatic semitone, called the APOTOMĒ, is the difference between seven pure 5ths and four octaves (reckoned from C, the interval *c‴–c♯‴*, as shown in ex.1*b*), a ratio of 2187 : 2048, or 113·7 cents. The sum of an apotomē and a limma, then, is equal to a Pythagorean whole tone (ratio 9 : 8), and their difference amounts to a Pythagorean COMMA, about a quarter of an equal-tempered semitone.

In JUST INTONATION, where the pure major 3rd (ratio 5 : 4) amounts to 386·3 cents (almost $\frac{1}{7}$ of a semitone smaller than in equal temperament), the relative size of the diatonic and the chromatic semitone is reversed. The diatonic semitone, the difference between an octave and a perfect 5th plus a major 3rd (ex.2*a*), gives a ratio of

Ex.2 Derivation of semitones in just intonation
(a) diatonic (b) smaller chromatic (c) larger chromatic

16:15, or 111·7 cents. There are two sizes of chromatic semitone that are commonly derived, the smaller (and more frequently used) being the excess of a 4th plus two major 3rds over an octave (ex.2*b*), a ratio of 25 : 24, or 70·7 cents, the larger being the excess of three 5ths plus a major 3rd over two octaves (ex.2*c*), a ratio of 135 : 128, or 92·2 cents. In regular mean-tone temperaments as well, the diatonic semitone is larger than the chromatic semitone.



In tonal music, the notation of a pitch that does not belong to the scale of the prevailing key depends largely on considerations of part-writing, often on the resolution by step to or from that pitch. Since such a resolution normally requires adjacent letters in the musical alphabet (e.g. F to E, G to A), the resolution a semitone up, say, from F is G♭, not F♯, and the resolution a semitone down from G is F♯, not G♭. Sometimes a series of semitone

resolutions cannot be notated without some compromise of this principle. Compare, for instance, the notation of *f♯′* versus *g♭′* in ex.3*a* and *b*; a more extreme illustration of this is given in ex.4.

In the 20th century the semitone took on a special significance as the generating unit of the chromatic scale: in most modern theories of 12-note music, intervals are reckoned by the semitone: unison = 0, semitone = 1, whole tone = 2, and so on.

The history of diatonic semitones in performing practice is of special interest. If Pythagorean intonation was favoured as much in medieval practice as in theory, then the semitones of late medieval plainchant and early polyphony were about 10% smaller than those now familiar in equal temperament. In the early 14th century Marchetto da Padova gave explicit preference to high leading notes. But many 15th-century keyboard instruments provided rather large diatonic semitones, at first between any Dorian final and its leading note (*see* PYTHAGOREAN INTONATION) and then, with the adoption of MEAN-TONE temperaments, elsewhere as well. The large diatonic semitones of mean-tone temperament became so familiar during the Renaissance and early Baroque periods that Mersenne described them in 1637 as one of the greatest sources of beauty and variety in music, and Doni in 1639 asserted that singers at Rome disliked being accompanied by an instrument tuned in equal temperament because of its small semitones. In the 18th century a certain theoretical prestige was enjoyed by $\frac{1}{6}$-comma mean-tone temperament and by the corresponding theoretical division of the octave into 55 equal parts, five of which constituted a diatonic semitone and four a chromatic one. References to this division of the whole tone by Sauveur, P.F. Tosi, Nassare, Sorge (who attributed it to Telemann), Romieu, Quantz, Leopold Mozart and others suggest that equal-tempered diatonic semitones were still regarded as smaller than ideal. Neidhardt said so explicitly in 1732. Yet in the 1670s Christiaan Huygens had expressed preference melodically for a high leading note in the key of E minor (in terms of mean-tone temperament, E–E♭–E) while acknowledging that the lower form (D♯), when available on a keyboard instrument, was more resonant with B in the bass. In an 18th-century 'good' unequal temperament, or *tempérament ordinaire*, the semitones varied in size; those among the diatonic notes (E–F, B–C) were larger than those in the 'remote' keys (C–D♭, F–G♭ or E♯–F♯, A♯–B). Rousseau, for example, said in his *Dissertation sur la musique moderne* (1743) that in 'l'accord ordinaire du clavecin'

Ex.3 Beethoven: Sonata in E♭ op.31 no.3, first movt

Ex.4 Schumann: *Traumeswirren*, op.12 no.7

the key of C minor was more tender than D minor partly because the semitone A♭–G was smaller than B♭–A; he also remarked that singers would duplicate such shadings only when so obliged by their accompanying instruments. Conflicting 19th-century accounts of intonation among singers and violinists (summarized in Ellis's translation of Helmholtz) leave some doubt whether the preference for small diatonic semitones expressed by such modern artists as Casals and Menuhin was characteristic of musicians throughout the 19th century.

Equal-tempered semitones on the piano may, as E.J. Dent is reported to have demonstrated to the Royal Musical Association (1944) and as Siegmund Levarie and Ernst Levy showed in *Tone: a Study in Musical Acoustics* (Kent, OH, 1968), seem to the ear to vary in size according to their context. Hence for example the *a♭′* in ex.5 may

Ex.5 Effect of context on physically equal semitones

readily seem lower than the *g♯′*, and thus by implication the semitone A♭–A larger than G♯–A.

WILLIAM DRABKIN, MARK LINDLEY

Semkow, Jerzy [Georg] (*b* Radomsko, 12 Oct 1928). Polish conductor. He studied with Artur Malawski at the State Higher School of Music (now the Academy of Music) in Kraków (1948–51), then with Boris Khaikin at the Leningrad Conservatory (1951–3), becoming assistant to Mravinsky with the Leningrad PO until 1956. He had further studies with Kleiber in Prague and with Walter, and was conductor at the Bol′shoy Theatre (1956–8). After working with Serafin in Italy, Semkow returned to Poland as artistic director and principal conductor of the Warsaw National Opera (1959–62). In 1966 he was appointed principal conductor of the Danish Royal Opera, Copenhagen, and was subsequently a frequent guest conductor in other European cities. He made his British début in concerts with the LPO in 1968 and first appeared at Covent Garden in 1970, conducting *Don Giovanni*. After making his US début in 1968 with the Boston SO, he conducted the Cleveland Orchestra from 1970 to 1971, and from 1975 to 1979 conducted the St Louis SO; there followed a period as conductor of the RAI SO in Rome (1970–82) and another as musical director of the Rochester PO in New York State. Semkow has also appeared with other leading orchestras in the USA and Canada. Semkow has been admired for his interpretations

of late Romantic works, and his recordings include contemporary Danish music. He has given premières of works by Robert Simpson and Pierre Wissmer.

MIECZYSŁAWA HANUSZEWSKA

Sempé, Skip (Joseph) (*b* San Diego, 8 March 1958). American harpsichordist. After taking the BMus at Oberlin College Conservatory in 1980, he continued his harpsichord studies with Gustav Leonhardt in Amsterdam. In 1986 he founded the Capriccio Stravagante ensemble, of which he is the director. His favoured repertory as a soloist includes the music of English virginalists, the 17th- and 18th-century French *clavecinistes*, and J.S. Bach. As ensemble director he has concentrated on music of Monteverdi and his contemporaries, consort works for strings and continuo and 17th-century operas. With Capriccio Stravagante, Sempé has recorded works by Monteverdi, Buxtehude, Lully and Purcell, striving, as he says, 'to transfer the spontaneity of a live performance to the recorded medium'. Both as soloist and ensemble director he has performed at major musical centres and festivals in Europe and the USA.

HOWARD SCHOTT

Semplice (It.: 'simple', 'ordinary'). A direction found particularly in Baroque music denoting that the passage so marked is to be performed without any ornament or deviation. The Arietta in Beethoven's C minor Piano Sonata op.111 is marked *adagio molto semplice cantabile*. Variants of the term, suggesting less formality, are *semplicemente* and *con semplicità*.

In Italian, *intervallo semplice* is an interval smaller than an octave.

See also TEMPO AND EXPRESSION MARKS.

J.A. FULLER MAITLAND/ DAVID FALLOWS

Sempre (It.: 'always'). A word whose purpose is often to remind the performer of directions which might otherwise be forgotten, as in the scherzo of Beethoven's Third Symphony, where the direction *sempre pp e staccato* is repeated again and again throughout the movement.

J.A. FULLER MAITLAND/R

Senaillé [Senallié, Senaillié, Senallier, Senaillier], **Jean Baptiste** (*b* Paris, *c*1688; *d* Paris, 18 Oct 1730). French violinist and composer. His father, Jean Senaillé, a violinist in the 24 Violons du Roi, is presumed to have been Jean Baptiste's first teacher. According to an article in the *Mercure* published eight years after his death, Senaillé studied with the violinist G.A. Piani. Fétis claimed that he also studied with Baptiste, but this appears to be pure conjecture. Senaillé published his first two books of violin sonatas in 1710 and 1712. He must already have been making something of an impact as a violinist in Paris since one of Dornel's *Sonates à violon seul* (1711) is entitled 'La Senaillé'. In January 1713 he was assigned his father's place in the 24 Violons and (apart from an absence of about four years) was associated with the ensemble until his death. Senaillé seems to have spent the years between the publication of his third and fourth books (1716–21) in Italy, though exactly what he did there remains unclear. There is no firm evidence for his having studied in Modena with T.A. Vitali, and the stories of his rapturous reception at the Modenese court, first reported by Titon du Tillet in 1743, can probably be discounted since they embody errors of fact about the ducal family. He was back in Paris by January 1720, when he is listed as one of the violinists who played in the *Ballet de Cardenio*, directed by J.-F. Rebel. In 1722 he took out a privilege for a collection of '*Sonates françoises* avec la basse continue et autres pièces de symphonies à deux et à trois parties'; however, the only new publication after this date was his fifth book of Sonatas of 1727. From 1728 he appeared regularly at the Concert Spirituel and, as the various reports in the *Mercure* make clear, he was acknowledged as one of the leading violinists in Paris. His reputation spread, J.-C. Nemeitz in his *Séjour de Paris* (Leiden, 1727) describing him as 'an excellent violin player, [who] has composed some beautiful sonatas for violin and basso continuo'.

On his death Senaillé's place in the 24 Violons was taken by François Francoeur. The *Mercure* of June 1738 paid tribute to him:

> He had spent some time in Italy and had acquired enough of the Italian taste to blend it skilfully with the very attractive French melody. The progress that the violin has since made in France is due to him, for he incorporated quite technically difficult things into his music. Because his *Airs de symphonie* were so attractive and had a certain brilliance, everybody was charmed by them and wanted to learn how to play them – especially at a time when scarcely anyone had begun to familiarise themselves with any music that was at all out of the way.

This writer thought Senaillé 'one of our finest violinists', though not quite Baptiste's equal in 'either vigour or beauty of execution'. As a composer, however, he was considered more skilled than either Baptiste or Mascitti. In 1743 Titon du Tillet summed up Senaillé's achievement as follows:

> Senaillé excelled also in the precision and grace with which he played the violin . . . He made an agreeable blend of the natural, noble and gracious melody of French music with the learned and brilliant harmony of Italian music, which [combination] pleased persons of good taste.

These early commentators were right in pointing to Senaillé's position as a composer of the 'goûts réunis'. Although virtually all of his sonatas conform to the Corellian four-movement slow–fast–slow–fast template, most of the individual movements are based on French dance forms. The later sonatas seem more italianate; no.8 from book 3 opens with a Largo in which the violin plays brilliant slurred flourishes above a sustained pedal. The bass lines in the later books are often active in the same way as those in Corelli's op.5 (nos.4 and 5 and 'La Folia' particularly). Two sonatas have an obbligato bass part that is distinct from the basso continuo line, i.e. Sonata no.1, in book 2, where the use of alto clef indicates that it is intended for bass viol, and Sonata no.3, in Book 4, where it is marked 'violoncello'. From a violinistic point of view the sonatas are only moderately difficult, though they do represent a significant step forward in the technical demands of French violin music. Books 1 and 2, which make frequent use of *batteries* for example, are in many ways more virtuoso than the later volumes. Only rarely does the music venture into the upper reaches of the fingerboard, though in the brilliant Allegro assai that concludes the last sonata in book 3 there is an extended passage in 7th position.

WORKS

all published in Paris

Premier livre de [10] sonates, vn, bc (1710)
Deuxième livre de [10] sonates, vn, bc (1712)
[10] Sonates . . . livre 3, vn, bc (1716)
Quatrième livre de [10] sonates, vn, bc (1721)
[10] Sonates, vn, bc (1727)

Some of the above pieces and others pubd in arrs. and in 18th-century anthologies

PETER WALLS

Senart. French firm of publishers. Active in Paris, it was founded by Maurice Senart (*b* Paris, 29 Jan 1878; *d* Paris, 23 May 1962) in 1908 in partnership with B. Roudanez. Senart directed the company alone from 1912 to 1920, when, in association with Albert Neuburger, it was reorganized as the Société Anonyme des Editions Maurice Senart.

Senart rapidly created a large catalogue (5000 works by 1925), including a number of important collections. The first was a series of popularly priced classics, edited by Vincent d'Indy and chiefly selected from the repertory of the Schola Cantorum. The firm later published Les Maîtres Contemporains de l'Orgue (8 vols., 1912, ed. J. Joubert); Musique de Chambre (extensive periodic collection of vocal and instrumental music with emphasis on modern works, ed. J. Peyrot and J. Rebuffat); Edition Nationale de Musique Classique (begun in 1930, including Cortot's editions of music by Chopin, Liszt and Schumann); Les Maîtres Français du Violon au XVIIIe Siècle (ed. J. Debroux); Chants de France et d'Italie, Les Monuments de la Musique Française au Temps de la Renaissance and Les Maîtres Musiciens de la Renaissance Française (all ed. H. Expert). The Senart catalogue includes compositions by Cras, Casella, Delannoy, Harsányi, Inghelbrecht, Jaques-Dalcroze, Koechlin, Malipiero, Migot, Milhaud and Rivier, and most of Honegger's early works. Editions Salabert bought the entire catalogue in May 1941. (*DEMF*, ii)

ROBERT S. NICHOLS

Senator, Ronald (*b* London, 17 April 1926). English composer. He studied at Oxford University with Wellesz (1944–7) and with Arnold Cooke (1957–60) at London University, where he became a senior lecturer (1960–81). From 1981 to 1984, Senator was Professor of Composition at the GSM, with several visiting professorships at universities in Australia, North America and Canada. Senator's style shows the influence of both his teachers, the twin strands of Schoenberg and Hindemith, in its atonal harmony, angular lyricism, and often astringent, stark sonorities, with an eloquent simplicity to underpin the Impressionistic textures and formal designs. His outstanding achievement is the *Holocaust Requiem*, a powerful oratorio based on children's poems from Terezín (Theriesenstadt) for cantor, children's choir, choir and orchestra, first performed at Canterbury Cathedral in 1986 under the joint auspices of the Bnai Brith Charity, the United Nations and the West German Government. Nominated for the Pulitzer Prize following its New York première in 1990 under Lukas Foss, it subsequently formed the centrepiece at the 1995 Terezín Fiftieth anniversary commemoration in the presence of the president of the Czech Parliament, with worldwide media coverage. A founder member of the Montserrat Composers' Association of Sacred Music, Senator is also founding director of the National Association of Music Theatre (UK). He has composed six operas and musicals on texts by notable contemporary writers. Many of his chamber and vocal works were written for colleagues, the distinguished singers Sybil Michelow, Jane Manning and Willard White, the viola player Rivka Golani, the clarinettist Stanley Drucker and the pianist Miriam Brickman, to whom he is married.

WORKS
(*selective list*)

Dramatic: Joseph and Pharoah (children's op, 2, A. Welsh) (1968); He has come back (liturgical drama, M. Dawney), BBC TV 1, 1971; The Wolf (ecological op, 2, P. Porter), 1980; Insect Play (chbr op, 2, U. Vaughan Williams after K. Čapek) 1986; Echoes (Vaughan Williams), 1986; Trotsky (musical, A. Burgess), 1997

Choral: Basket of Eggs (nursery rhymes), children's choir, perc, 1965; Streets of London (E. Farjeon), children's choir, perc, 1966; Communal Mass, choir, congregation, org, 1967; Sunday Soon is Past (W.H. Auden), 1969; Sun's in the East (Chin. classical texts, trans. E. Pound), S, str, 1975; Ave regina coeli (motet), 1982; Holocaust Requiem (poems and diaries of child prisoners of Terezín, liturgical texts), nar, S, B, children's choir, adult choir, orch, 1986; A Cartload of Shoes (orat, B. Brecht, P. Levi, M. Angelou and others), nar, S, pf, str, perc, 1996

Inst: Pf Sonata no.2, 1975; Mobiles, pf, perf. 1983 [1st set]; Spring Changes, cl, pf 1983; Polish Suite, va, 1990 [also versions for vn and vc]; Lament for Senesh, pf, str, perc, 1993

Solo vocal: 5 Shakespeare Sonnets, spkr, pf, perf. 1982; A Poet to his Beloved (W.B. Yeats), S, pf, perf. 1984; Greenwood and Paradise (Vaughan Williams after French medieval texts), S, Mez, pf, 1985; Cabaret (W.H. Auden), B, pf, 1989

Principal publishers: Boosey & Hawkes, Annie Bank (Amsterdam), EMI, St Martins, Lengnick, Alberts (Australia)

Requiem Letters (London and New York, 1996)

The Gala of Music (Oxford, forthcoming)

MALCOLM MILLER

Sender, Ramón (*b* Madrid, 29 Oct 1934). American composer of Spanish birth. After studying in New York with George Copeland (piano) and Elliott Carter (1948–51), he attended the Conservatorio di S Cecilia, Rome, and Columbia University, where his teachers included Henry Cowell. He also studied with Robert Erickson at the San Francisco Conservatory (1959–62) and with Darius Milhaud at Mills College. With Morton Subotnick, he founded and directed the San Francisco Tape Music Center (1961–6), a composer's collective whose members included Buchla and Oliveros. With Ken Kesey and Stewart Brand he co-produced the 1966 Trips Festival (San Francisco), an event that inspired developments in popular and experimental works for the following decade. His interest in spirituality, music and experimental communities led him to explore group-composed functional chants and songs and to co-found the Morning Star Ranch (Occidental, California), an experimental community where he taught yoga, meditation and music (1966–80). His writings include the novel *Zero Weather* (Bodega Bay, California, 1980), the first hypertext-based interactive novel, *The Guide to EverWhere* (Apple CD-ROM Learning Disk, 1988), and numerous essays, treatises and manifestos on topics from experimental tuning systems to theories of clown types.

Many of Sender's works are for mixed media and defy traditional categorization. The *Tropical Fish Opera* (1962) situates four performers around a fish tank on which musical staves have been drawn; performers improvise based on the melodic lines created by the movements of the fish. In *Desert Ambulance* (1964), one of his best-known works, two channels of a three-track tape carry stereo sound to the audience, while the third

channel, heard only by the performer, conveys pitches, timing cues and spoken instructions.

WORKS
(*selective list*)

Tape and vv/insts: 4 Sanskrit Hymns, 4 S, 4 vc, db, hp, pf, cel, 3 perc, tape, 1961; Thrones, amp pf, tape, lights, star chart, *c*1963; Desert Ambulance, amp accdn, 3-track tape, slide projections, 1964; In the Garden, cl, va, tape, slide projections, 1965; Great-Grandpa Lemuel's Death-Rattle Reincarnation Blues, Dixieland band, accdn, tape, 1981

Tape: Kore, 1961; Traversals, 1961; Kronos, 1962; World Food Series I–XII, 1962–5; Interstices, 1963; Enoughing, 1968; Usheas, 1968; Xmas Me, 1968

Other works: Sound Fields, sextet, 1962; Tropical Fish Opera, 4 insts, 1962; Time Fields, any 6 insts, 1963; Balances, 4 amp str, 1964; Septet, insts, film, 1965; Loopy Gamelans on 'A' and 'B', 4 pfmrs, 1976; Loopy Gamelan, Oh 'C' Can you Say, children's chorus, 1976; A Tewa Prayer, mixed chorus, 1978; I Have a Dream, mixed chorus, 1978; The Siren Aura-Cleansing Stations, installation, 1996

STEVAN KEY

Sendrey [Szendrei], **Alfred** [Aladar] (*b* Budapest, 29 Feb 1884; *d* Los Angeles, 3 March 1976). Hungarian-American opera conductor, composer and musicologist. He studied at the university and at the academy in Budapest (1901–5), his teachers including Driesch (philosophy) and Koessler (composition). Thereafter he worked as an opera conductor in Cologne (1905–7), Mülhausen (1907–9), Brno (1908–11), Philadelphia and Chicago (1911–12), Hamburg (1912–13), New York (Century Company, 1913–14), Berlin-Charlottenburg (1914–16), Vienna (Volksoper, 1916–18) and Leipzig (1918–24). He remained in Leipzig as conductor of the Leipzig SO (1924–32) and as a student of musicology at the university (1930–32), where he took the doctorate. In 1932 he was music director of central German radio, Berlin, and taught at the Klindworth-Scharwenka Conservatory. He began to collect materials for a history of Jewish music, but this work had to be continued in Paris, where he was a radio programme director (1933–40). Then he moved to New York and taught at the 92nd Street YMHA (1941–4). In 1945 he went to Los Angeles; there he taught at Westlake College (1945–52) and was music director of the Fairfax Synagogue (1952–6) and Sinai Temple (1956–64). He was professor of Jewish music at the University of Judaism (1962–72), from which he received an honorary doctorate in 1967. His works include an opera (1929), a symphony (1923), and choral and chamber music.

ISRAEL J. KATZ

Sénéchal, Michel (*b* Tavery, 11 Feb 1927). French tenor. He studied in Paris, making his début in 1950 at La Monnaie (Brussels), where he sang for three seasons. Established at the Paris Opéra and Opéra-Comique, as well as other French theatres, he sang lyric roles such as Ferrando, Don Ottavio, Tamino, Almaviva, Count Ory, Paolino (*Il matrimonio segreto*), Hylas (*Les Troyens*), Georges Brown (*La dame blanche*) and also many character roles. In 1956 he sang Rameau's Platée at Aix-en-Provence, scoring a triumph in the travesty role of an elderly nymph, which he repeated at Amsterdam, Brussels and the Opéra-Comique (1977). Other roles in this category included Erice (*Ormindo*), Monsieur Triquet, Scaramuccio (*Ariadne auf Naxos*), Trabuco (*La forza del destino*), Valzacchi, Rodriguez (*Don Quichotte*) and Teapot/Arithmetic (*L'enfant et les sortilèges*). He sang Gonzalve (*L'heure espagnole*) at Glyndebourne (1966); the Brahmin (Roussel's *Padmâvatî*) at Florence (1971); Don Basilio and Le Dancaïre (*Carmen*) at Salzburg (1972–88), and Don Jerome in the French première of Prokofiev's *Betrothal in a Monastery* at Strasbourg (1973). Having made his Metropolitan début in 1982 as the four *Contes d'Hoffmann* tenor comics, he returned as Don Basilio and Guillot (*Manon*). In 1985 he created Fabien in Landowski's *Montségur* at Toulouse and Pope Leo X in Boehmer's *Docktor Faustus* at the Opéra. Sénéchal's high, smooth, agile voice and unrivalled ability as a character actor commended him to record companies, for whom he recorded many of his comprimario roles with rare style and unstinting enthusiasm. He made a particularly notable contribution to the Offenbach discography.

ELIZABETH FORBES /ALAN BLYTH

Senefelder, Alois (*b* Prague, Nov 1771; *d* Munich, 26 Feb 1834). Bavarian actor and playwright and the inventor of lithography. He was the son of Franz Peter Senefelder, an actor who joined the court theatre of the Elector of Bavaria in 1778. Educated first at the Munich Gymnasium and the Electoral Lyceum, he then followed his father's wishes and studied law at Ingoldstadt University; however, after his father's death he left the university and took up acting.

Even as a student he had written successful plays, and as he wrote more he sought a cheap method of printing them because letterpress and engraving were very expensive. He first experimented with etched Solnhofen stone (apparently in ignorance of the fact that this process had been in limited use since 1550) and in association with Franz Gleissner (a composer and player in the electoral band) printed some music in 1796 and early 1797 which was issued by the Munich music publisher Falter. Later Senefelder discontinued etching and perfected his 'chemical printing'. He wrote on the stone with greasy ink and coated the surface with a mixture of water, acid and gum arabic. He inked the surface and the ink was absorbed by the writing. The resulting impression could be taken directly from the surface of the stone. The first music so printed was a selection from *Die Zauberflöte* made by Franz Danzi.

Thenceforward, almost until his death, Senefelder continued to experiment and improve the process (*see* PRINTING AND PUBLISHING OF MUSIC, §I, 5), which had vast commercial possibilities. He received a 15-year privilege in 1799 and, in partnership with the influential music publisher J.A. André of Offenbach, began to develop lithography throughout Europe. Late in 1800 Senefelder went to London where he received letters patent on 20 June 1801; he established his Chemische Druckerey in Vienna on 27 July 1803 (*see* HASLINGER).

From its early days, lithography was used for the reproduction of works of art as well as for music. The famous *Specimens of Polyautography* (London, 1803) is an example of the delicacy of this new medium and the inspiration it could give to artists. But it was in the cheap, clear printing of music that there lay the most far-reaching benefits of lithography and its revolutionary development later in the 19th century. Senefelder himself described his work in *Vollständiges Lehrbuch der Steindruckerey* (Munich, 1818), which was translated into English by A. Schlichtegroll as *A Complete Course of Lithography* (London, 1819/*R*) and later as *The Invention of Lithography*, translated by J.W. Muller (London, 1911).

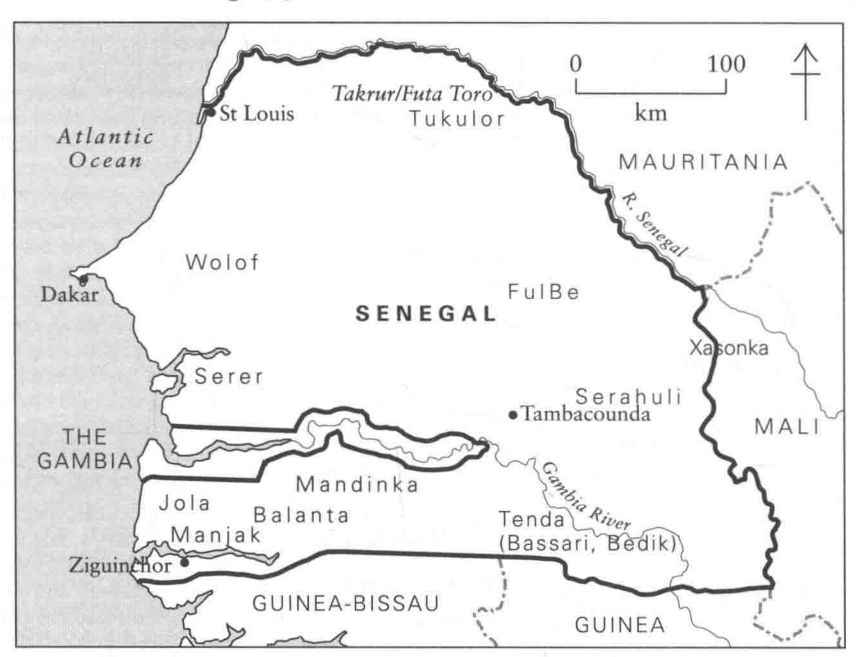
ALEC HYATT KING

Senegal (Fr. République du Sénégal). Country in West Africa. It has an area of 196,190 km² and a population of 9·49 million (2000 estimate), approximately 92% of whom are Muslim. The Senegal river defines the northern boundary with Mauritania and eastern border with Mali. The Gambia river defines the country of the same name, which cuts through the middle of Senegal (fig.1). The region south of The Gambia, called Casamance, is lush compared to the dry north. Senegal has undergone strong Islamic influence via its northern region in the Sahel, and early, prolonged European contact via its western border along the Atlantic coastline. The hereditary professional musician, oral historian and praise-singer (GRIOT) is prominent in the socially differentiated societies of the Wolof, Haalpulaaren (Tukulor, Toucouleur, FulBe or Fulani) and Mandinka. Senegal is well known for its drumming and dance traditions, especially the Wolof *sabar* ensemble, its Mandinka *kora* players and its wealth of urban popular music groups.

Information on ethnic groups in Senegal who are predominant in neighbouring countries is given in the articles on The GAMBIA and GUINEA (Mandinka, FulBe), GUINEA-BISSAU (Balanta, Jola, Manjak or Mandyak), MALI (Maninka, Bamana or Bamara) and MAURITANIA (Moors or Maures).

See also FULBE MUSIC.



1. ETHNIC GROUPS, HISTORICAL BACKGROUND AND DOCUMENTATION. When the Portuguese first reached West Africa, at the mouth of the Senegal river in the mid-15th century, they found a conglomeration of well-established states in the north-west (Jolof or Djolof, Walo, Bawol and Kajor or Cayor) associated with Wolof speakers, and Serer states (Sin or Sine and Saluum or Saloum) just north of the Gambia river that had been in existence for perhaps a few centuries. The Mandinka Kabu empire, centred in Guinea-Bissau with extensions north into southern Senegal and The Gambia, was at that time a tributary of the Mali empire. Smaller stateless peoples such as the Jola, Manjak and Balanta may have been pushed westwards to their present location in the Casamance due to Mandinka migrations from Mali.

In the mid-19th century the French began military campaigns inland, resulting in the formation of the colony of French West Africa in 1895, which included Senegal. As the sub-Saharan African country closest to Europe by sea, Senegal shows more French influence that most of West Africa, aided in part by close political ties with France.

Portuguese travel accounts dating from the mid-15th century, along with French and British accounts beginning in the early 17th century, provide sporadic descriptions of musical activity in Senegal. Plucked lutes, drumming and dancing, and the very public roles of *griots* as praise-singers and members of royal retinues were noted. *Griots* were often described as beggars, perhaps indicating a collapse of the traditional patronage system in the Senegambia region. Occasionally, reports show sympathy and marked insight into the roles of *griots* as verbal and musical artisans, in line with other artisan groups such as blacksmiths and leatherworkers. Photographs of musicians from the late 19th century may be found in the Bibliothèque Nationale, Paris (Fierro, 1986). The earliest sound recordings probably date from anthropologist Laura Boulton's expedition in the early 1930s.

2. GOVERNMENT INSTITUTIONS. Before independence, an important centre for the integration and dissemination of French culture, including popular music and theatre, was the Ecole Normale William Ponty, the first institution of higher education in French West Africa, drawing students from throughout West Africa. After World War I, Ecole Ponty, originally established to indoctrinate the sons of local rulers into French culture, trained interpreters, teachers and civil servants. After several relocations, it became the Ecole Normale Supérieure in Dakar. The most musically influential alumnus was the Guinean Fodeba Keita, founder of Les Ballets Africains. The hundreds of thousands of returning African soldiers who had fought in Europe during World War I and World War II were another important source for the importation of European culture and musical instruments.

Since independence in 1960, the Senegalese government has actively promoted performance and research in the local arts through several institutions. The Archives Culturelles, established in 1967, is charged with collecting photographs, slides, sound recordings of music and oral traditions, and films of local culture. The Ensemble Lyrique Traditionnel, specializing in traditional instrumental and vocal music, Ensemble National de Ballet la Linguere, the international touring dance group, and the Ensemble National de Ballet la Sira Badral, the domestic dance group, are all attached to the Daniel Sorano

1. *Map of Senegal*

National Theatre, which was inaugurated in 1965. The Conservatoire de Dakar, established in 1948 as a centre for training in European music, has attracted musicians from neighbouring countries, especially Guineans who would become leaders in the modernization of their local musics in the late 1950s. Renamed the Ecole des Arts just after independence, it opened a division of traditional music offering training in *kora*, *bala*, *riti*, *xalam* and various drums. In 1978 its name changed again to Conservatoire National de Musique, de Danse, et d'Art Dramatique. A noted research institute for studies of sub-Saharan Africa called the Institut Fondamental d'Afrique Noire (IFAN) was founded in 1938 and is part of the University of Dakar (now called University Cheikh Anta Diop). Dakar was host to the first World Festival of Negro Arts in 1966.

3. MAIN MUSICAL FORMS AND FEATURES. Certain musical traits are shared by neighbouring peoples, cutting across barriers of language and ethnicity, while others are markers of identity, unique to local communities. Major broad musical features distributed in varying ways include: hereditary professional musicians; fields of related musical instruments such as plucked lutes (in the north), calabash spike harps (in the south) and drums; Muslim-influenced vocal and instrumental styles; and drumming associated with fibre-mask figures (in the south).

Certain kinds of music-making, singing and speech are the exclusive domain of hereditary professionals called *griots* by the colonial French and Europeans, but known locally as *gewel* (Wolof), *gawlo* (Pulaar, pl. *awlube*) and *jali* (Mandinka, pl. *jalolu*). They are part of a larger artisan class known collectively as *nyeenyo* (Wolof and Pulaar) or *nyamaalo* (Mandinka), which can include blacksmiths, leatherworkers and weavers. Among the Mandinka there are also *finolu* (sing. *fina*: public speaker, genealogist, praiser), who do not sing. The artisan class is patronized by the other main class in these societies: non-artisanal freeborn leaders, warriors and farmers, known in local languages as *geer* (Wolof), *dimo* (Pulaar, pl. *rimbe*) and *foro* (Mandinka). *Griots* have adapted to new patronage systems by joining government-sponsored ensembles, appearing on radio and television and recording cassettes and CDs for local and international markets. Music-making in the smaller societies that predominate in the south is less professionalized.

Due to extended contact, close relationships may be found among the drumming traditions of the Wolof, Serer, Mandinka and Jola, with similar instruments and rhythms shared by several of these groups (for a chart of the distribution of musical instruments among ethnic groups see Table 1). Drumming in Senegal is dominated by the Wolof *sabar* ensemble, which has spread beyond its borders. The ensemble is open-ended, consisting of varying sizes and numbers of two different kinds of single-headed drums, all of which are played with one long thin stick and one bare hand. The *nder* (also called *sabar*) and *mbung-mbung* are open at the bottom and are higher pitched than the *lambe*, *chol* and *gorong*, which are heavier and are all closed at the bottom. In contrast to other parts of West Africa, the *sabar* ensemble has no accompanying bells or shakers. In the 1980s Doudou Ndiaye Rose launched an innovative *sabar*-based ensemble of several dozen players, including female in-laws, with great international success, conducting his ensemble through extensive memorized compositions.

The Mandinka drum ensemble known as *seruba*, named after a musical event in which they play, consists of three drums: the accompanying *kutirindingo* and *kutiriba*, and the lead *sabaro*. The method of attaching the head, similar to that on the Wolof *sabar* drums, and the name *sabaro* indicates a possible Wolof influence. FulBe from the Firdu region near eastern Gambia play a three-drum set identical to that of the Mandinka.

The *tama*, a small double-headed hourglass drum (fig.2), is played by the Wolof, and it is a prominent fixture in popular music groups. Mandinka *jalolu*, especially those with recent ties to Mali, also play the *tama*, as well as the *junjung*, a relative of the Malian *dundun*, which is also played in ensembles by Serer. The

2. *Wolof tama (hourglass drum)*

FulBe *horde*, a half-calabash, is usually played by an acrobat who strikes it with rings on the fingers holding the opening against his chest. Serer women use their bare hands to play large spherical calabashes with small holes at the top, and sing along. An upside-down calabash placed in a basin of water is also played by women. The Jola dance to the *bugarabu*, a set of three or four large drums played by a single person with bare hands usually wearing jingles on his wrists, often accompanied by women clapping long wooden blocks. One soloist playing several drums, such as the *bugarabu*, is rare in the Senegambia region. The *jembe*, more prominent in Mali and Guinea, is played by Bamana migrants in Tambacounda and in isolated communities elsewhere in the country. Through the Qadiriyya Sufi order, ensembles of large Arabic *tabala* drums are used during religious celebrations mixing Arab and Wolof traditions.

Two different frame xylophones are used in Senegal: the large Balanta *kadj*, local to the Casamance, played by two musicians on a single instrument, and the *bala* of Mandinka *jalolu*, an import from Guinea. Balanta xylophone music, with its use of parallel 3rds and frequent starts and stops, has exerted some influence on neighbouring Mandinka *kora* music and local guitar styles. Bassari (Basari) and Bedik (Budik) youth involved in initiation ceremonies play xylophones consisting of a few slats placed across the outstretched thighs, a hollowed tree trunk or a hole dug in the ground.

Two varieties of plucked lutes are played throughout Senegal: wooden trough-resonator lutes with fan-shaped bridges, such as the Wolof *xalam*, FulBe *hoddu* and Mandinka *kontingo*, all played by *griots*; and lutes with small calabash resonators and a cylinder-shaped bridge, such as the one-string FulBe *molo*. Wolof *gewels* play two sizes of *xalam*: *nder* (smaller, higher pitched, lead instrument) and *bopp* (larger, lower pitched, accompanying instrument). The *riti*, a one-string fiddle (fig.3), may be of Serer origin, or the Wolof name for the FulBe *gnagnur* (*nyanyur*) or *moolar*. The Koniagi (Konyagi) are the only Tenda group to play a fiddle (*anyanyir*), perhaps a borrowing from their FulBe neighbours. Calabash harps include the Mandinka *kora* played by *jalolu*, the Jola hunter's harp called *esimbin*, *furakaf* or *simbingo*, the Moorish *ardin* and the *bolon*, played by FulBe and others. The guitar is widespread and has absorbed local influences wherever it is played.

FulBe play the *serdu* (three-holed side-blown flute) over a wide geographic spread, and wind instruments such as flutes, whistles and trumpets are common among the Tenda.

3. *Riti (one-string fiddle)*

The Senegalese Sahelian style of praise-singing closely associated with Wolof and Haalpulaaren *griots* in the north, as well as the Mandinka *jalolu*, who would have brought the tradition with them from Mali and Guinea, bears a marked concordance with Muslim vocal styles; it is monophonic, highly ornamented, melismatic, heptatonic and improvised. The style is typified by vocal soloists accompanied by one or two plucked lutes, such as the *xalam*, *hoddu* or *kontingo*, played by *griots*. This vocal and instrumental style is part of a larger widespread tradition through Mali and Guinea associated with the royalty of past empires. Although vocal intonation may be similar to that used in the European major scale, Wolof singing is marked by occasional tones lying between the flat and natural seventh degree, and the natural and sharp fourth degree. The strength of the various Sufi orders and their requisite literacy in Arabic helps to explain the influence of Muslim vocal aesthetics, but the nature of the transmission needs further documentation. The possibility that many *muezzins* may be drawn from the ranks of Wolof and Haalpulaaren *griots* deserves more attention. Heterophonic choral singing differing markedly from *griot* praise-singing can be heard among the Tenda.

The instrumental music of *griots* appears to have some degree of theoretical conformity despite language differences. For example, lutes are typically played in pairs with one assuming an accompaniment role and the other a leading role called *ardin*. Wolof *xalam* performances feature two kinds of playing: *fodet*, a basic melody played over and again, often with variations, and *tukull*, improvisatory interludes. This corresponds with the Mandinka *kora* terms *kumbengo* and *birimintingo*. The Wolof *fodet* and Mandinka *kumbengo* refer to both a tune (or accompaniment pattern) and a tuning. String music typically consists of melodies, a fixed number of beats long (often 8, 12 or 16), that are continuously repeated, often with subtle variations.

In the Wolof and Mandinka drum ensembles accompanying drums play short patterns, while one lead instrument interacts with dancers. Dancing usually takes place within a circle, with dancers emerging one or two at a time to confront the lead drummer for short periods, after which they run back to join the circle. Jola and Mandinka dance styles, with torsos bent forward and outstretched arms waving, differ significantly from Wolof styles, which feature straight backs, eyes focussed forwards or upwards, and great angular flexibility in the knees. Early detailed descriptions of singing, instrument playing and dancing can be found in M.J. de la Courbe (1685) and other French and British travel writings.

Praise-singing can typically be heard at public occasions, such as marriage celebrations and television or radio broadcasts. Major historical figures, such as El Hajj Umar Tall, the legendary Wolof ancestor Njanjan Ndiaye and 19th-century leaders Lat Dior, Alfa Yaya and Fode Kaba, have praise-songs dedicated to them that are usually accompanied by a variety of plucked lutes. Communal singing may occur in a religious Muslim context or among young people during rites of passage.

Typical occasions for drumming include circumcision and excision ceremonies, marriage celebrations and during agricultural labour. Professional wrestling matches are widespread in the Senegambia region and are also an important occasion for drumming. Wrestlers from different ethnic groups are often pitted against each other accompanied by their own drummers. In the Casamance and The Gambia figures wearing fibre-masks who dance to drumming associated with male circumcision ceremonies are widespread and mark the northern limit of West Atlantic mask traditions.

4. MODERN DEVELOPMENTS. The growth of popular music in Senegal has followed similar patterns to that of neighbouring Guinea and Mali: sparse recording up to the time of independence; a strong Cuban influence in the 1960s; the gradual assertion of local musical traditions in the 1970s, and an emergence into the world arena in the mid-1980s with several artists holding major European and American recording contracts. A six-CD series (*Senegal Flash*) surveys some of the popular landscape of the 1970s and early 1990s. Numerous Senegalese bands were active in the 1970s and 80s, and many launched the solo careers of a large number of male vocalists. Some of the major bands include: Orchestre Baobab (formed in the early 1970s), which featured vocalist Thione Seck; Super Diamono, which featured vocalist Omar Pene; Toure Kunda, made up of brothers of Serahuli (Soninke) origin from the Casamance; and Xalam, who emigrated to France shortly after they were formed in the early 1970s. The most internationally renowned singers include YOUSSOU N'DOUR, BAABA MAAL, Ismael Lo and most recently Kine Lam (a female *gewel*). Articles about these and other Senegalese groups appear regularly in the British monthly *Folk Roots*.

Popular female singers typically come from the ranks of *griots*, such as Wolof *gewels*, and are steeped in the traditional social relationships that encourage praise-songs to their freeborn patrons (*geer*, *dimo* or *foro*). Male singers, who often do not come from *griot* families, have embraced the *griot* tradition but have reshaped it to the modern Senegalese context, wherein the widespread Sufi *marabout-taalibe* (religious master-disciple) relationship provides an alternate model. Songs dedicated to Sufi leaders, especially the Mourid founder Shaykh Amadu Bamba Mbacke, are a favourite vehicle.

ERIC CHARRY

Senese. *See* ANSANUS S.

Senesino [Bernardi, Francesco] (*b* Siena; *d* ?Siena, by 27 Jan 1759). Italian alto castrato. His nickname was derived from his birthplace. He sang operatic roles in many Italian theatres: in Venice (1707–8, 1713–14), Vicenza (1708, 1714), Bologna (1709, 1712), Genoa (1709–12), Rome (1711), Reggio nell'Emilia (1712–13, 1715, 1717), Ferrara (1712), Brescia (1714), Florence (1715), Naples (1715–17) and Livorno (1717). He was engaged for Dresden from 1 September 1717 at the huge salary of 7000 thaler and the use of a carriage, and sang in Lotti's *Giove in Argo* (1717), *Ascanio* (1718) and *Teofane* (September 1719). He was dismissed early in 1720 for insubordination at the rehearsals of Heinichen's *Flavio Crispo*, when he refused to sing one of his arias and tore up Berselli's part. Handel, who had been instructed to engage him for London, heard him in *Teofane* and opened negotiations; Senesino sent Riva a power of attorney to accept the Royal Academy's offer of a contract for 3000 guineas and he joined the company for its second season in September 1720. He made his début at the King's Theatre on 19 November in Bononcini's *Astarto* and remained a member of the company until June 1728, singing in all 32 operas produced during this period. They included 13 by Handel, eight by Bononcini and seven by Ariosti. Senesino's success was spectacular from the start; Mrs Pendarves described him in *Astarto* as 'beyond Nicolini both in person and voice', and he was constantly eulogized in newspapers and private letters in such terms as 'beyond all criticism' (of his performance in Handel's *Giulio Cesare*). However, his arrogant temper clashed with that of the imperious Handel as early as 1720, when according to Rolli the composer earned his resentment by calling him 'a damned fool'.

After the break-up of the Academy in 1728 Senesino is said to have invested his London profits in a fine house in Siena with an inscription over the door that 'the folly of the English had laid the foundation of it'. He sang in Paris in 1728, Venice in 1729 and Turin in 1730. He apparently gave Handel a cold reception when they met in Italy, but in August 1730 he was re-engaged by Handel and Heidegger for the second Academy, this time at a salary of 1400 guineas, and arrived in October as a replacement for Bernacchi. According to Lord Harcourt, continental judges thought Bernacchi the finer singer and were puzzled by Senesino's English reputation. In the next three years he sang in four new Handel operas and many revivals, and in the first two London seasons of oratorio (1732–3), playing Ahasuerus in *Esther* (in English), Acis, and Barak in *Deborah*. His popularity was almost as great as before, but his increasing antipathy to Handel came into the open in June 1733, when a movement to set up a rival company was inspired by Senesino, Rolli and their partisans among the aristocracy. This became the so-called Opera of the Nobility, which occupied Lincoln's Inn Fields in the following season and the King's Theatre from autumn 1734, with Porpora as chief composer and Senesino, Farinelli, Bertolli, Montagnana and later Cuzzoni as the leading singers. In three seasons (1733–6) Senesino sang in five operas by Porpora and in operas by Bononcini, Hasse, Handel (*Ottone*), Sandoni, Veracini and Campi; his last new part was Apollo in Porpora's serenata *La festa d'Imeneo* in May 1736. He was so moved by Farinelli's singing in Hasse's *Artaserse* that he forgot the character he was playing and embraced him on the stage; but 'several masters, and persons of judgment and probity' assured Burney that Senesino made a profounder impression in London than Farinelli or any of his successors. When he left, a song called *The Lady's Lamentation for the Loss of Senesino* haunted the theatre bills for several years.

Senesino sang in Rimini and Turin in 1737, in several operas in Florence in 1737–9 and privately in a duet with the future Empress Maria Theresa. In the summer of 1739 he refused an invitation to Madrid on grounds of age, but was engaged for the winter season in Naples at a salary of 800 doubloons (3693 ducats). Although de Brosses was enchanted by his singing and acting, the public condemned his style as old-fashioned. His last known performances were in Porpora's *Il trionfo di Camilla* at the S Carlo in 1740. A final glimpse of him is caught in March of that year, when Horace Walpole met him

returning to Siena in a chaise: 'We thought it a fat old woman; but it spoke in a shrill little pipe, and proved itself to be Senesini'. His porcine features appear in many caricatures by A.M. Zanetti and Ricci in the Cini collection (see illustration) and at Windsor Castle, and in mezzotints by A. van Halcken (1735, after Hudson) and Krikall (after Goupy). An engraved caricature by J. Vanderbank shows Senesino in a scene probably from Ariosti's *Coriolano* (for illustration *see* BERENSTADT, GAETANO). Evidence of his death comes from the diary of the Florentine Nicolo Susier, who on 27 January 1759 noted that the death of 'Antonio [sic] Bernardi detto il Senesino' had been reported from Siena (see R.L. and N.W. Weaver).

Senesino's quality as an artist may be estimated from the series of superb parts Handel composed for him. Of his 20 roles in Handel's operas, 17 were original: Muzio Saevola, Floridante, Ottone, Guido in *Flavio*, Julius Caesar, Andronico in *Tamerlano*, Bertarido in *Rodelinda*, Luceius in *Scipione* and the title roles in *Alessandro*, *Admeto*, *Riccardo Primo*, *Siroe*, *Tolomeo*, *Poro*, *Ezio*, *Sosarme* and *Orlando*. He also sang Radamisto, Arsace in *Partenope* and Rinaldo, with earlier music supplemented or transposed. His compass in Handel was narrow (*g* to *e″* at its widest, but the *g* appears very rarely, and many of his parts, especially in later years, do not go above *d″*), yet he was equally renowned for brilliant and taxing coloratura in heroic arias and expressive *mezza voce* in slow pieces. Quantz's statement that he had 'a low *mezzo-soprano* voice, which seldom went higher than *f″*' probably refers to his earliest years. Although the impresario Zambeccari wrote slightingly in 1715 of his acting and delivery of recitative, in both respects he was regarded as outstanding in London. Hawkins said that 'in the pronunciation of recitative [he] had not his fellow in Europe', and Burney quoted the opinion of many who heard him that he was unsurpassed in the accompanied recitatives of *Giulio Cesare* and *Admeto*. According to the same writer his best style was 'pathetic, or majestic', but his 'articulate and voluminous voice' could bring off the most difficult divisions. Perhaps the best all-round judgment is that of Quantz:

> He had a powerful, clear, equal and sweet contralto voice, with a perfect intonation and an excellent shake. His manner of singing was masterly and his elocution unrivalled. Though he never loaded Adagios with too many ornaments, yet he delivered the original and essential notes with the utmost refinement. He sang Allegros with great fire, and marked rapid divisions, from the chest, in an articulate and pleasing manner. His countenance was well adapted to the stage, and his action was natural and noble. To these qualities he joined a majestic figure.

His private character by all accounts was very different, marred by touchiness, insolence and an excess of professional vanity. His intrigues were largely responsible for the split with Handel in 1733. Early in 1724 he insulted Anastasia Robinson at a public rehearsal, 'for which Lord Peterborough publicly and violently caned him behind the scenes'.

Senet. SENNET.

Senff, Bartolf Wilhelm (*b* Friedrichshall, nr Coburg, 2 Sept 1815; *d* Badenweiler, 25 June 1900). German music publisher. He served his apprenticeship with the music publisher K.F. Kistner in Leipzig, and in 1843 founded the periodical *Signale für die musikalische Welt*, which he edited up to his death. He left Kistner in 1847 to set up an independent publishing house that issued works by Schumann, Liszt, Brahms, Schubert, Bruch, Rubinstein, Bülow, Marschner, Raff, Hiller, Reinecke, Reitz and others; his catalogue of 1898 also includes 46 operas (with piano reductions by Kleinmichel). In his capacity as editor of *Signale* he was often reproached with being lukewarm towards Wagner. After his death the publishing firm was managed by his niece, and in 1907 it was sold with the *Signale* to Simrock.

THEODOR WOHNHAAS

Senfl [Sennfl, Sennfli, Senfelius, Senphlius], **Ludwig** (*b* ?Basle, *c*1486; *d* Munich, between 2 Dec 1542 and 10 Aug 1543). Swiss composer active in Germany. He was the most significant representative of Netherlandish–

German motet and lied composition in German-speaking regions during the Reformation.

1. LIFE. Senfl may have lived in Zürich from 1488, for his father was probably a certain Bernhart Sänfli from Freiburg who became a citizen of Zürich in that year. On Senfl's own testimony he became a choirboy in Emperor Maximilian I's Hofkapelle in 1496; he probably joined it in Augsburg shortly before it was disbanded and reorganized in Vienna. In 1497 Isaac was made court composer there and on 20 July 1498 Georg Slatkonia, the former canon and Kantor, was appointed Singmeister. In 1500 Isaac and the Kapelle accompanied the emperor to Augsburg for the meeting of the Reichstag; Senfl was probably there, unless his voice had changed, in which case he would have been training for the priesthood. In 1516 choirboys whose voices had broken received a grant for three years' study in Vienna, and Senfl probably studied there between 1500 and 1504 under a similar arrangement. He stayed briefly in Zürich in 1504 but apart from that he was always with the Kapelle. He must have become at least a priest of the lower orders, as the petition for the living at Basle Cathedral that the emperor obtained for him in 1508 described him as 'clericus'. In spite of this clerical position, his membership of the Kapelle shows that he was a full-time musician, probably also studying composition with Isaac. From 1507 Senfl stayed with the Hofkapelle in Konstanz during the Reichstag, remaining there with Isaac until 1508 or 1509. In April 1508 Isaac was commissioned by the chapter of Konstanz Cathedral to compose a cycle of Offices for the Konstanz use; he delivered part of the commission a year later, but it was not until November 1509 that the rest was sent to the chapter. Senfl collaborated as his copyist, and claimed to have copied some 16 choirbooks under Isaac's direction. A large portion of the manuscript was later printed by Formschneider as the *Choralis constantinus* (Nuremberg, 1550–55).

Senfl may have gone to Florence after 1508, for in May 1510 the emperor gave him a living at S Michaelis de Englario in the diocese of Verona. In the relevant documents, he is not accorded any specific function with the Kapelle, the only references being to 'cantores', and his name is absent from a list of imperial singers of 1512, suggesting either that his role in the Kapelle was more that of a composer, or that he was still with Isaac in Italy. Isaac and Senfl appear to have started work on the Konstanz commission in Italy, for the original choirbooks (*D-Mbs* Mus.ms.35–8) are copied partly on paper used in Italy around 1510. Music by Senfl was included as early as the first layers of this large collection. Mainly, however, he helped Isaac to prepare the fair copies of the finished compositions.

By 1513 Senfl was probably back in the service of the Kapelle, then in Vienna, and he took over Isaac's position there: in the extensive inscription to *En opus musicum festorum dierum* he called himself 'Isaac's pupil, who on his teacher's death was appointed to succeed him by order of His Imperial Majesty'. During this time Senfl was actively involved with discussions in Viennese humanist circles on questions of poetic metre and musical rhythm. According to Tritonius, Vadian and Minervius, Senfl was expected to realize their aim of giving appropriate metric shape to the poetic verse of classical odes. The influence of this circle of Viennese scholars extended beyond Austria and Bavaria, and made Senfl known to musicians and scholars throughout the whole of German-speaking Europe. As early as 1512 his first lieder had appeared both in manuscript and in the first German musical anthology (RISM 1512[1]).

In a letter to Vadian written in the spring of 1518, Hofhaimer mentioned a hunting accident in which Senfl lost a toe. Senfl apparently suffered from this injury for almost a year, although he was back in Augsburg for the opening of Maximilian's last Reichstag in 1518. This was a particularly splendid series of events and provided Senfl with an important opportunity to demonstrate his talent as a composer. Towards the end of the Reichstag, Luther came to Augsburg for his famous examination before Cardinal Cajetan. As the guest of the imperial counsellor and Augsburg patrician Konrad Peutinger, Luther would have met Senfl and probably heard rehearsals of his compositions.

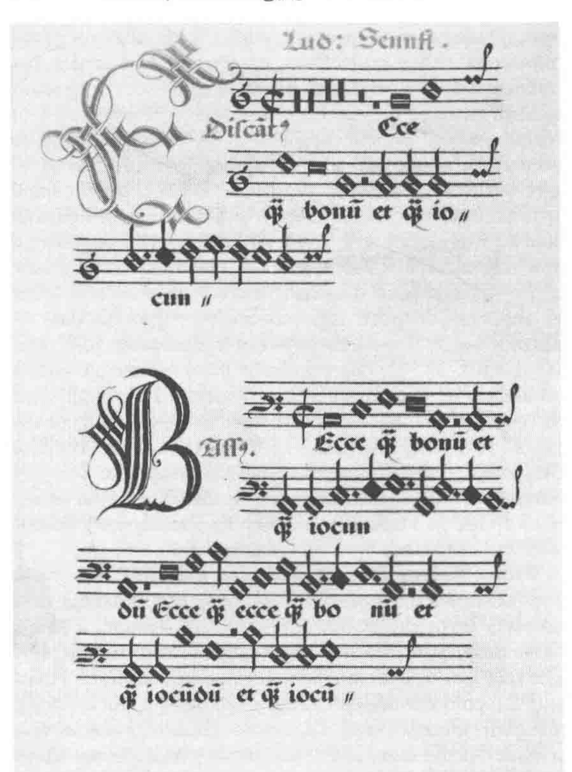
The emperor died early in 1519 and Costanzo Festa's motet *Quis dabit oculis nostris* was performed at the funeral. The text was slightly altered for the occasion, and, perhaps as a result, it was ascribed to Senfl when printed in 1538. In 1520 the major part of Maximilian's household was disbanded by order of Charles V; the musicians received a small sum of money and were dismissed. Some of them, including Senfl, hoped to be appointed by the new emperor, and went to Augsburg to meet him. For four years Senfl attempted unsuccessfully to be accepted by him as a musician and composer. Charles, however, preferred his Spanish musicians, and Senfl's hopes turned towards King Ferdinand. He refused other offers, and instead repeatedly approached the two rulers, not least on account of the written promise he had received from Maximilian of a yearly payment of 150 gulden, but which had been reduced to 50 gulden on the emperor's death. Senfl's right to the 50 gulden was confirmed, but he fought in vain for almost 20 years to receive the yearly payment.

During his stay in Augsburg between 1519 and 1520 Senfl prepared the first German printed anthology of motets, which was brought out in 1520 by the local publishers Grimm & Wirsung (1520[4]). The motets by Isaac, Josquin and Senfl in this collection can be considered a representative selection from the imperial Kapelle's repertory.

The years 1521–3 were the most difficult of Senfl's life. At the peak of his career as composer at the emperor's court, he was obliged to fight for years to secure recognition of his rights and a position equivalent to a royal or imperial appointment. There is no clear information about where he was at this time; he himself said that he travelled extensively. (It has been assumed by various sources that he accepted a temporary post at Passau, but this is unlikely.) He was certainly at the Diet of Worms in the spring of 1521. Furthermore, texts of some of Senfl's lieder settings suggest that he presented these songs of praise and homage personally at royal weddings: in May 1521 in Linz at the wedding of Archduke Ferdinand and Queen Anna of Hungary; in the same year at the wedding of Ludwig II and Maria of Austria; and in October 1522 in Munich at the wedding of Duke Wilhelm IV of Bavaria and Maria Jacobäa von Baden. By early 1523 Senfl was in Munich, where he had obtained a post in Duke Wilhelm of Bavaria's Hofkapelle; he spent the rest of his life there. In a letter to the duke in 1523 Senfl called himself 'Komponist', and thus was not

Kapellmeister as has sometimes been assumed. Under Duke Wilhelm, who valued him highly, he organized the Hofkapelle in Munich on imperial lines and succeeded in obtaining several singers from the former imperial Kapelle, among them Lukas Wagenrieder, a chaplain and alto who also served as scribe to the Kapelle. Before long the Bavarian Kapelle was highly respected and Luther praised it as having the best musicians in Germany.

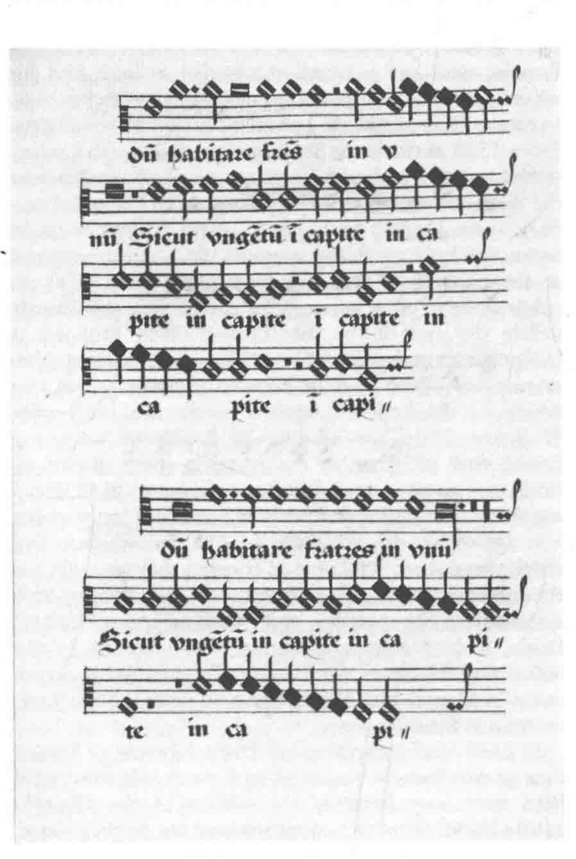
Senfl's activity increased in Munich, and the Hofkapelle manuscripts *D-Mbs* Mus.ms.5, 10, 12 and 25 contain his first Munich compositions. Besides his own compositions, Senfl introduced into the Munich repertory works by his contemporaries, particularly those of Isaac, some of which he retained in their original form from the imperial Kapelle. Senfl resumed the composition of polyphonic settings of the Proper of the Mass for the festivals of the church year. He provided his own music for the incomplete settings, and combined the whole into a new arrangement in four volumes for liturgical use by the Kapelle. The extensive title and the dedication to Duke Wilhelm suggest that his collection, *En opus musicum festorum dierum*, finished in 1531, was intended for publication. Senfl apparently abandoned this intention in favour of a plan of the Nuremberg publisher Formschneider (who had succeeded Ott as the owner of Isaac's commission for Konstanz Cathedral) and decided to publish both lots of settings together. Senfl himself revised and prepared the edition of the latter for publication in Munich, but it did not appear until 1550–55, many years after his death.



Senfl was aware of the theological controversies of the time: although he did not support Luther's reformation openly, he seems to have sympathized with it. From 1526 to 1540 he corresponded regularly with Duke Albrecht of Prussia, who had adopted the Lutheran faith and for whom Senfl had composed numerous lieder and motets. In return Duke Albrecht honoured him with royal gifts. From 1530 at the latest Senfl corresponded with Luther, whose position he had become aware of when attending the diets in Augsburg (1518), Worms (1521) and Augsburg again (1530). Senfl's *Ecce quam bonum et quam iucundum habitare fratres in unum* (fig.1) was performed at the opening of the Augsburg Diet of 1530 as an exhortation to unity between the church factions. Shortly before the end of the diet Luther asked Senfl for a composition and received from him two motets, *Non moriar sed vivam* and *In pace in idipsum* (?lost), for which he thanked him with a small chest of books. Wolfgang Seidel, an admirer of Senfl's music and a Benedictine preacher at the Munich court, wrote an exuberant poem in praise of the composer in 1542. It is a sapphic ode of 118 verses praising Senfl's art but warning him against working secretly for the Reformation and employing his art in its service. It seems that Senfl did not encounter any difficulties because of his Reformation sympathies, although his pupil and successor, Ludwig Daser, had to submit to several examinations by the inquisition. However, Senfl eventually gave up his clerical status in Munich; in 1529 he had a house at the court and married in the same year.

In 1538 Senfl complained to Duke Albrecht of Prussia that he was heavily burdened with work. He must have been very busy finishing the edition of the *Choralis constantinus*, for Ott had announced its publication in 1537. In addition, a *Magnificat* cycle was published in 1537, and in 1539 *Harmonia poetica*, in collaboration with Hofhaimer, appeared, while Senfl also prepared numerous other collections of motets and lieder for publication. In 1540 Duke Albrecht's last surviving letter to Senfl thanked him with a gift of several 'Paternoster' of white amber, which, according to Geering, suggests premature aging and illness: amber was considered to give protection against apoplexy. From then on Senfl appears not to have composed for the Munich or Prussian courts, for in January 1543 Duke Albrecht established new contacts in Nuremberg in order to obtain new compositions. Senfl may have already died by this time; in any case, Munich registers indicate that his date of death must lie some time between 2 December 1542 and 10 August 1543. There exist a portrait sketch and a medallion of Senfl by Hans Schwarz (1519; fig.2) and three different medallions by Friedrich Hagenau from the years 1526, 1529 and about 1530 with the motto 'Psallam Deo meo quamdiu fuero'. Other attempts to identify portraits of Senfl, including one in the illustration of the Hofkapelle in Hans Burgkmaier I's *Triumphzug Maximilians* (1515), are far from satisfactory.

Within his own lifetime Senfl won the undivided praise and acknowledgment of musicians, theoreticians and scholars throughout German-speaking Europe, and his name never completely disappeared from music history. The treatises of Glarean, Sebald Heyden, Hermann Faber and Zacconi contained examples of Senfl's work during his own lifetime, and Glarean's *Dodecachordon* was considered the standard authority of music theory up to J.S. Bach's time. The practice of singing Senfl's ode settings in the Lateinschulen for the purpose of instruction in antique verse metre continued in the reformed Gymnasiums until well into the 17th century. In the late 18th century Forkel, Gerber and Winterfeld rediscovered Senfl's work and enthusiastically praised his lieder compositions. Only Kroyer emphasized Senfl's sacred compositions and motets, which are equal, if not superior, to his lieder in their historical significance.



2. WORKS. Senfl's music forms both the climax to the old German music of the end of the Middle Ages and a highpoint of the new styles at the beginning of the Reformation. In 1537 Sebald Heyden called him 'in musica totius Germaniae nunc princeps'; this reputation rested firmly on his lieder and polyphonic motets, which were marked equally by characteristics of ecclesiastical, court and bourgeois musical culture, unlike the music of most of his contemporaries.

In keeping with tradition, Senfl's masses and motets were almost all in Latin; the few motets with German texts also possess lied-like qualities. His motet-style compositions are modelled firmly on the great Netherlanders, Isaac and Josquin, whose work he studied intensively, and show a reliance on their compositional techniques, even using their cantus firmi. Senfl developed a wide range of techniques, above all in his polyphonic settings of the Proper, using as structural bases archaic patterns (isorhythm or simultaneously sung dual texts) as well as ostinatos, canon and imitative treatment of a pre-existing cantus firmus. These devices are handled in a typically German manner (even more apparent in pieces of non-liturgical origin with no structural limitation): his textures are rich in sonority, with clear songlike lines often moving in parallel 3rds or 6ths. At the same time the works are compact, without florid or extended treatment, thus clarifying the meaning of the text; in this

1. Opening of Senfl's motet 'Ecce quam bonum', for four voices, in two openings from one of the Hofkapelle MSS (D-Mbs Mus.ms.10, ff.109v–111r)

2. *Ludwig Senfl: drawing by Hans Schwarz, 1519 (Kupferstichkabinett, Berlin)*

he shows his debt to Josquin, seen most clearly in two of the Munich choirbooks, in which some of Senfl's most impressive motets are preceded by their Josquin models.

Senfl wrote few secular works in languages other than German. Almost all his lieder are secular, though a few sacred ones whose content is basically in sympathy with the Reformation were apparently composed for Duke Albrecht of Prussia. In general the texts and musical settings of the lieder reflect the diverse character of this form, ranging from the courtly love-song through the folksong and Gesellschaftslied to the comic or satirical song. In addition to his song about his own musical development, *Lust hab ich ghabt zur Musica*, with the acrostic 'Ludwig Sennfl', a number of lied texts are certainly by him. His technique had its origins in the German Tenorlied of the early part of the century, although the four-part pieces show evidence of the range of contrapuntal devices used by Netherlandish and French composers. Thus there are on the one hand simple lied-like pieces, some of which treat the tenor voice as a cantus firmus around which the other parts weave, and on the other more complex structures: quodlibets, canons and cycles of settings of the same tenor. However, Senfl was always concerned to present the text clearly, which prevented any fully contrapuntal treatment of material. Distinct from these in techniques, and of special interest, are Senfl's four-part settings of Latin odes in classical metre, in which he totally subordinated the musical setting to speech rhythms. As a result, these homophonic, simple compositions reveal clear traces of the lieder with the tune in the descant which were later taken up and developed in German Protestant hymn settings.

MARTIN BENTE/CLYTUS GOTTWALD

Senger, (Franz Ludwig) Hugo von (*b* Nördlingen, Bavaria, 13 Sept 1835; *d* Geneva, 18 Jan 1892). German conductor and musical organizer. His birthdate has been given in some secondary sources as 1832. He was brought up in a Jesuit school and studied in Munich and Leipzig, where he earned a doctoral degree in law. Deciding to pursue a career in music, he studied with Moritz Hauptmann and Ignaz Moscheles at the Leipzig Conservatory and became acquainted with Mendelssohn, Schumann, Berlioz and Wagner. His career in Switzerland began in the early 1860s, when he became the conductor of the theatre in St Gallen; in 1865 he moved to Zürich, where he was assistant conductor of the theatre, and then to Lausanne. From 1869 until his death Senger lived in Geneva and worked to reorganize the city's musical life. He was the first director of a concert society founded in 1869, and in 1880 he formed the Société de l'Orchestre, which he conducted; he also directed several choirs and choral societies and taught harmony and composition at the Geneva Conservatoire. Senger composed little, but his solo songs and male choruses are a valuable addition to the repertory; his best-known music was written for the Geneva wine festivals (*Fête de la jeunesse*, 1886, *Fêtes des vignerons*, 1889). Other works include a cantata in honour of General Guillaume-Henri Dufour (1787–1875), a military suite, ballet music and some chamber music; a committee active in Geneva from 1895 to 1962 brought out a collected edition of his works.

LUISE MARRETTA-SCHÄR

Senhal (Provençal: 'cover name'). A disguised dedication. This poetic device is associated primarily with troubadour lyric but appears also in the poems of Italian Trecento polyphonic song. The dedicatee is named at the beginning of the final stanza, ritornello or *envoi* but in hidden form: in Provençal poetry the disguise usually consisted of giving the dedicatee a code-name, often a male name for a female; in Trecento poetry the true name of the lady to whom a poem was addressed was not traditionally such a close secret so the name was often simply divided between two words. □

Senleches, Jaquemin de [Senlechos, Jacob; Selesses, Jacopinus] (*fl* 1382–3). French composer. In 1382 he was in the service of Eleonor of Castile, according to the text of his ballade *Fuions de ci*, written after the queen's death in September that year. He then entered the service of Pedro de Luna, cardinal of Aragon (later Pope Benedict XIII), as a harpist, accordiing to a treasury document dated 21 August 1383 from the royal household in Navarra. He is not to be identified with Jacomi Capeta (1357–?1409) or Johani de Sent Luch (*fl* 1374–1418), shawm players in the service of the King of Aragon.

Senleches' works include some of the most notationally intricate examples of Ars subtilior (represented mainly in *F-CH* 564 and *I-MOe* α.M.5.24). The most interesting and difficult work is *La harpe de melodie*, which has an irregular canon in the upper voices, sophistically described in a poem; in *US-Cn* 54.1 the same piece is written in the shape of a harp, using a unique notation that does not employ the spaces between the nine lines. The bitextual ballade ends with a refrain written canonically. An earlier, simpler style is found only in the virelai *En ce gracieux tamps*, which has an untexted triplum instead of a contratenor. *Tel me voit* is a tribute to Guido (de Lange), who was presumably his teacher.

URSULA GÜNTHER/MARICARMEN GÓMEZ

Senlecque, Jacques de. *See* SANLECQUE, JACQUES DE.

Senn, Walter (*b* Innsbruck, 11 Jan 1904; *d* Igls, nr Innsbruck, 17 July 1981). Austrian musicologist. He received his first musical education from his father, a *regens chori* at Innsbruck. After studying the piano, organ and theory at the Innsbruck Musikverein school, he went to Vienna where he studied musicology with Adler and Lach at the university, and the piano with Friedrich Wührer and theory with Joseph Marx at the academy. He took the doctorate at Vienna University in 1927 with a dissertation on Beethoven sonata movements, and completed his practical training with state examinations in the piano, singing and the organ (1930–32); he also taught music at secondary schools in Innsbruck (1928–38) and was an assistant lecturer in theory and singing at the university. In 1933 he became a member of the Gesellschaft zur Herausgabe der Denkmäler der Tonkunst in Österreich. After carrying out research on the history of music and drama in the northern Tyrol, he worked during the war in various archives in the southern Tyrol under the sponsorship of the SS-Ahnenerbe. He completed his *Habilitation* at the University of Vienna in 1947 with a study of Jacob Stainer, and he was appointed reader in musicology at the University of Innsbruck in 1961. He was director of the music collection of the Ferdinandeum (the Tyrol provincial museum) and of the Tyrol Folksong Archives, and was a member of the Zentralinstitut für Mozart-Forschung. His work concerned Mozart, the history of music in the Tyrol, and the history of string instruments, particularly violin making in the Tyrol.

RUDOLF KLEIN/PAMELA M. POTTER

Sennet [senet, sonnet, sennit, sennate, sinet, synnet, cynet]. English term used during the 16th century and early 17th to indicate a monophonic trumpet signal. Sennet is synonymous with a number of contemporaneous terms found in continental Europe: 'sersseneda' in Denmark, 'Serosonet' in Germany, and 'sarasinetta' in Italy. These were probably derived from an Italian compound noun which combined 'ser[en]o' with 'sonata', meaning a piece of instrumental music associated with the greatest nobility. Markham (1639) included the 'Senet for State' among a number of signals 'that have reference to the greatest Officers'; stage directions of late Elizabethan and Jacobean plays (documented from 1584 to 1619 and even later) associated the sounding of the sennet with the ceremonial entrance or exit of actors taking the roles of great lords; and Shakespeare reserved the signal for kings, heirs to the throne, emperors and great leaders.

Cesare Bendinelli included two sennets in his *Tutta l'arte della trombetta* (1614) (ex.1), one of which is also found among Magnus Thomsen's six sennets (*DK-Kk* Gl.kgl.Saml.1875a). They were written in the trumpet's triadic register. The form varied according to the occasion for which the sennet was composed; Bendinelli stated that

Ex.1 Bendinelli: Sarasinetta no.2, from *Tutta l'arte della trombetta* (1614), f.8

sennets could be 'long or short, and adopted for all situations'. Some of the surviving sennets include two sections, others four; a third type is very long and borrows the compositional form of the trumpet ensemble sonata, but not the latter's homorhythmic performance manner. The final section of a sennet normally begins with a short extemporized melismatic passage, as shown in bars 8–10 of ex.1: Thomsen indicated this in musical shorthand on the single pitch c″ (ex.2).

EDWARD H. TARR, PETER DOWNEY

Sennewald. Polish firm of music publishers. Gustaw Adolf Sennewald (*b* Bielsko, 26 Jan 1804; *d* Warsaw, 16 July 1860) worked in the firm of ANTONI BRZEZINA during the 1820s; in 1828 he became a joint owner, taking over after Brzezina's death in 1831. He was a publisher, bookseller and owner of a lithographic works. The firm was continued by his son Karol Gustaw Sennewald (*b* Warsaw, 9 April 1833; *d* Warsaw, 11 March 1896) who was also a founder of the Warsaw Music Society. His son Władysław Gustaw Sennewald (*b* Warsaw, 9 Sept 1860; *d* Warsaw, 19 April 1929) took over the firm after his father's death; he sold it in 1901. It continued until 1905 under the name Gustaw Sennewald – Księgarnia i Skład Nut Muzycznych.

The firm published mainly vocal and piano music, including melodies from contemporary European operas, songs and romances for voice and piano by such 19th-century Polish composers as Józef Stefani, Troszel, Zarzycki and Żeleński, and mazurkas, waltzes and polkas for the piano by Kajetan Kraszewski, Kania, Gustaw Roguski, Troszel and Lewandowski. The firm also published Moniuszko's operas *Flis* and *Verbum nobile* and his operetta *Jawnuta*, some pieces for the violin, string orchestra and military band, a few school books, and editions of early Polish music including ten psalms by Gomółka and two masses by Gorczycki.

Sensenschmidt, Johann (*b* Eger; *d* Bamberg, before 13 June 1491). German printer. In 1469 he was in Nuremberg, working partly with Knefl and Andreas Frisner. In 1480 he moved to Bamberg at the request of Abbot Ulrich III of Michaelsberg Abbey and set up a printing press there to print the *Missale benedictinum* (1481). As an itinerant printer (the first of Freising, Regensburg and Dillingen), he accepted commissions to print the liturgical books of various south German dioceses and monasteries. In 1487 he began to use a strong, well-cut gothic chant type to print at least eight missals with music. After his death, his son Lorenz inherited the press and, with the music printer Johann Pfeyl, issued three more liturgical books with music in 1491 and 1492. Pfeyl took over the press in 1495 and continued printing music with his own types.

Sensibile (It.; Fr. *sensible*). *See* LEADING NOTE.

Sentence. A term adopted from linguistic syntax and used for a complete musical idea, for instance a self-contained theme; a sentence is generally defined as the sum of two or four phrases arranged in a complementary manner and ending with a perfect cadence. It therefore has much the same meaning as 'period', though it lacks the flexibility of the latter term, being restricted to dance-like and other symmetrically built musical statements. It is sometimes useful to treat 'sentence' as an intermediary term between 'phrase' and 'period'.

Senza (It.: 'without'). A word used in all kinds of performance directions, always with its literal Italian meaning.

Sephardi music. *See* JEWISH MUSIC, §III, 4.

Sepolcro (It.: 'sepulchre'). A 17th-century genre of sacred dramatic music in Italian related to the oratorio and performed on Maundy Thursday and Good Friday at the Habsburg court chapels in Vienna. Other terms used for the genre were 'azione sacra' and RAPPRESENTAZIONE SACRA. The libretto of a *sepolcro* is invariably based on the Passion or an Old Testament story interpreted as prefiguring the Passion. The earliest examples date from the 1660s, the latest from about 1705. A *sepolcro* tends to be shorter than an oratorio and in one structural part rather than the two common for the Italian oratorio. Bearing a close relationship to opera, the *sepolcro* was characteristically performed with scenery, costumes and action. References to the scenery and action are commonly found in both the printed librettos and music manuscripts of the numerous *sepolcri* set by Antonio Draghi to librettos by Nicolò Minato. These sources invariably begin with a comment on the replica of the Most Holy Sepulchre of Christ, the main element of the scenery, before which the personages in the drama play their parts. In addition to the Sepulchre, a large painted backdrop often depicted a scene appropriate to the drama. In the Draghi-Minato *Il sagrificio non impedito* (1692), for instance, the Sepulchre was in the foreground, while the painted scene represented the summit of a mountain on which Abraham's sacrifice of Isaac was in progress. Among the leading composers of *sepolcri* are, besides

Draghi, Antonio Bertali, P.A. Ziani, Antonio Cesti, G.B. Pederzuoli, and the Emperor Leopold I. After 1705 the *sepolcro* was abandoned in Vienna, but representations of the Holy Sepulchre provided scenic backgrounds for oratorios by Fux, Caldara and others. These works, which were not acted as the earlier *sepolcri* had been, were identified on the title-pages of their librettos as oratorios 'at the Most Holy Sepulchre' (*al santissimo sepolcro*).

HOWARD E. SMITHER

Seprődi, János (*b* Kibéd [now Chibed, Romania], 15 Aug 1874; *d* Cluj [now Cluj-Napoca, Romania], 6 March 1923). Hungarian musicologist and folklorist. He took a teacher's diploma in Hungarian and Latin at the University of Kolozsvár (now Cluj-Napoca, 1899); as a musician he was entirely self-taught. From 1898 to his death he taught at the Kolozsvár Calvinist College. He was a member of the Transylvanian Museum Society (1903) and secretary of its philosophical section (1909), and a member of the Kolozsvár Music Society (1907). He published several studies of particular problems in Hungarian music history and on important aspects of Hungarian folk music; he collected more than 300 vocal and instrumental folktunes (1901–11). As a teacher he was influential in preparing the reform of vocal training in schools. He worked for the revival of the Calvinist hymnbook, and throughout his life took an active part in the musical life of Kolozsvár; he was a critic, and organized and performed in series of concerts illustrating the history of music.

MÁRTA SZEKERES-FARKAS/FERENC LÁSZLÓ

Septave. A rare term, occasionally used by organ builders to denote the seven diatonic notes of an octave counted upwards from but excluding the tonic. It probably arose at the end of the 19th century as a practical term (perhaps devised by musically illiterate craftsmen) to denote the seven keys on the keyboard itself; it may well derive from English usage, but has no theoretical sanction, nor is it found in even the most practical books on the organ.

PETER WILLIAMS

Septet (Fr. *septuor*; Ger. *Septett*; It. *septetto*). By analogy with the sextet, octet and nonet, the term 'septet', first used at the end of the 18th century, denotes a composition in the nature of chamber music for seven solo instruments. Initially, however, the word probably also served the more precise aesthetic definition of a work in relation to the various types of divertimento. For instance, Ignace Pleyel published a septet (B251) as early as 1787 for an ensemble (2 horns, 2 violins, viola, cello, double bass) that is clearly indebted to the serenade tradition. Peter Winter's Septet op.10 (*c*1803), which has stylistic connections with the Mannheim school, belongs to the same tradition. Even Beethoven's Septet op.20 (1799, published 1802) still has a superficial connection with the serenade in its six movements and light inflection; but the technique of its composition and the independent treatment of all the instruments raise it far above that genre. 'I cannot write anything that is not obbligato, for I came into the world to obbligato accompaniment', Beethoven wrote to his publisher in Leipzig. The great popularity of the piece made its original combination of instruments (clarinet, horn, bassoon, violin, viola, cello and double bass) a standard ensemble that inspired other composers to write their own septets, including Conradin Kreutzer (op.62, 1822), Berwald (?1828), Archduke Rudolph (1830) and Adolphe Blanc (op.40, *c*1864), and, with slight variations, Franz Lachner (1824), Bruch (1849) and Joseph Miroslav Weber (*Aus meinem Leben*, 1896). Schubert added another violin to the ensemble in 1824 to create the octet, thereby influencing many other composers in his own turn.

In the 19th century in particular further combinations of instruments (sometimes including the piano) enjoyed great popularity, probably because of their attractive tonal colouring. Among the principal compositions of the period in this genre were Hummel's two septets (op.74,

1816, and op.114, 1829, known as the *Septett militaire*). Other works were written by Ferdinand Ries (op.25, 1812), Glinka (1823), Kalkbrenner (op.15, 1814, and op.132, 1835), Alexander Fesca (opp.26 and 28, 1839–40), Georges Onslow (op.79, 1852) and Spohr (op.147, 1853). One of the most popular septets of its time, though almost forgotten today, was that of Ignaz Moscheles (op.88, 1832–3), which has a brilliant piano part running through it. It was composed as a commission for the London Philharmonic Society. The septets by Saint-Saëns (op.65, 1881) and Stravinsky (1952–3) are notable for their neo-Baroque approach. Septets for string instruments were written by Heinrich Molbe (op.43, 1898) and Milhaud (op.408, 1964); in this instance Milhaud was experimenting with aleatory techniques. Outside the usual tradition of the wind band, works for seven wind instruments have been written by Koechlin (op.165, 1937) and Hindemith (1948).

It is difficult to be sure whether the term 'septet' should be extended, purely on the grounds of the number of instruments in the ensemble, to those 20th-century works which are not obviously chamber music and whose titles themselves point in other directions, for instance Ravel's Introduction and Allegro (1905), Rudi Stephan's Music for Seven String Instruments (1911), Janáček's Concertino (1925), Schoenberg's Suite op.29 (1925–6), Isang Yun's Music for Seven Instruments (1959), Aribert Reimann's *Reflexionen* (1966) and Dieter Schnebel's *In motu proprio* canon for seven instruments of the same kind (1975).

In opera, ensembles with seven solo singers have also sometimes been described as septets, and occur chiefly in finales.

Septième (Fr.). *See under* ORGAN STOP.

Septimal system. A system of JUST INTONATION which extends to intervals with frequency ratios involving the number seven, principally 7:4, 7:5, 7:6, 9:7 and their inversions; these are known as 'septimal intervals'. The ratio 7:4 corresponds to the interval between the fourth and seventh harmonic partials (i.e. between the third and sixth overtones) of a note, and is somewhat smaller than an equal-tempered minor 7th or augmented 6th; in terms of just intonation, it is 27 cents smaller than a minor 7th (9:5), or 7 cents smaller than an augmented 6th (225:128). In his *Tentamen novae theoriae musicae* (St Petersburg, 1739), Leonhard Euler put forward the view that the ratio 7:4 gave rise to a natural 'harmonic' form of minor 7th; adherents of this view, who included Fétis, Helmholtz and Harry Partch, therefore referred to the interval as the 'harmonic 7th'. On the other hand, a series of writers beginning with Nicola Vicentino (see Barbour) have viewed the same interval not as a minor 7th but as an augmented 6th (see also Regener).

In his *Harmonie universelle* (Paris, 1636–7/*R*), Mersenne attributed consonant qualities to septimal intervals. Kirnberger, in *Die Kunst des reinen Satzes* (1771–9), invented a notational symbol for flattening a note by the difference between a minor 7th and the interval with frequency ratio 7:4. Euler, and later Helmholtz, saw in the configuration of the fourth, fifth, sixth and seventh harmonic partials an ideal realization of the chord of the dominant 7th. At the same time, however, many theorists – including Zarlino, Rameau and Schenker – have rejected the use of septimal intervals in music.

Some 20th-century composers, although satisfied to work within the system of equal temperament, nevertheless used pitch structures intended to evoke higher harmonics such as the seventh; examples are Skryabin's 'mystic chord', Messiaen's 'chord of resonance' and Bartók's 'acoustic scale'. Others, including Partch, Stockhausen and La Monte Young, have employed septimal intervals in their works, seeing in them a means of escaping the constraints of equal temperament and thereby expanding the tonal system.

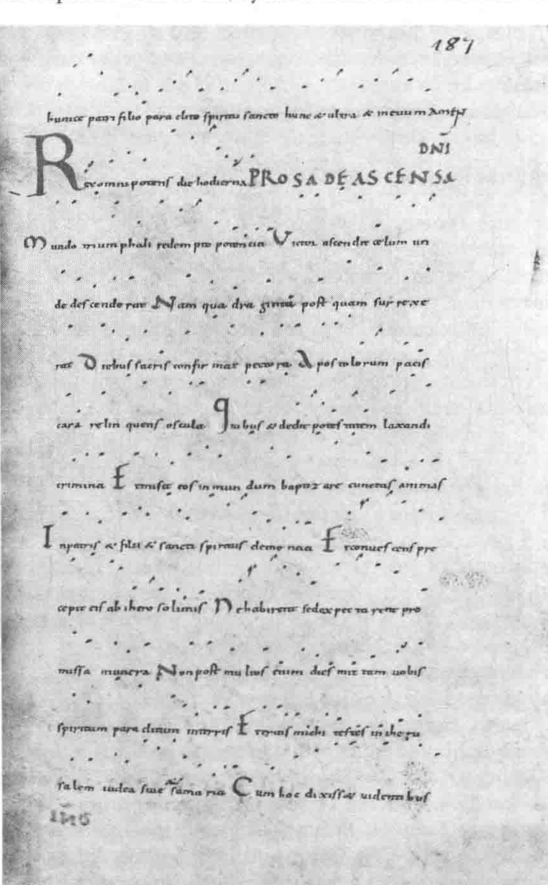
Sequela. Term coined by Anselm Hughes to denote the wordless melody associated with the alleluia of the Mass in the Franco-Roman liturgy. *See* SEQUENTIA.

Sequence (i) (Lat. *sequentia*). A category of medieval Latin chant (also called PROSA or 'prose') which flourished from about 850 to 1150. Throughout that period both its musical and literary importance were great; and from about 850 to 1000, when the large repertories were firmly established, the sequence represented one of the most important kinds of music produced in the West – important because of its intrinsic musical values as well as its historical significance for the development of style in general.

1. GENERAL. Since the sequence itself underwent profound structural modifications in its development, it is not possible to give a simple definition of its form that holds for the entire period; with that reservation, the sequence can be described as a piece of sacred chant of ample dimensions, in length as well as melodic range, set syllabically with a Latin text. The text consisted mostly of a series of couplets each having two isosyllabic lines sung to the same melody; each couplet was different from the preceding couplet in melody and usually in length. In earlier sequences the text was not governed by regular accent patterns or by end-rhyme, hence was indeed 'prose'. After 1000 the texts scanned and rhymed to an increasing degree, finally becoming verse.

The texts were often associated with a particular season, feast or saint's day, hence were 'proper' in the liturgical sense. Certainly by the end of the 10th century

1. Melismatic notation for the sequences 'Rex omnipotens' and 'Nunc exultet' (incomplete) (F-Pn lat.1118, f.137v)



– and probably by the end of the 9th – they came to be sung at Mass, immediately after the alleluia, as a medieval addition to the Proper of the Mass. In this and in other ways the sequence is related to the alleluia, but the relationship is neither clear nor simple, and has been the subject of controversy (see §5). Also controversial is the problem of the genesis of the sequence (see §7). Much of the difficulty attending these questions may have been due to the inaccessibility of the materials, especially the music. It is still not possible, for example, to gain ready access to all the melodies used by NOTKER of St Gallen (*c*840–912), the most famous writer of early proses, even though his texts have been edited several times. In any case, discussion of the controversial aspects is not intelligible without a prior acquaintance with specific music examples representative of the early repertory, hence will be postponed until after some examples have been discussed.

The most important questions facing further research into the sequence concern (i) establishment of critical versions of texts and melodies, (ii) stylistic analysis of all phases of its history, (iii) delineation and chronological ordering – in so far as that is possible – of the development of the repertory as a whole.

2. SOURCES. The history of the sequence is intimately bound up with the state of the sources in which it is preserved; an understanding of the sources and the problems they present is prerequisite to an appreciation of the sequence in general as well as of any given sequence encountered in modern publication.

Sequences appear singly or in small groups in manuscript sources from about 900 onwards: such sources are *D-Mbs* lat.14843, ff.94–104, from Toul; *F-AUT* 28 S, f.64; *Pn* lat.17436 (the gradual-antiphoner of Compiègne), ff.24, 29–30; *I-VEcap* XC (85); *F-Pn* lat.1154, ff.142–143*v*; *CHRm* 47, ff.60*v*–62; *Pn* lat.1240 (St Martial de Limoges, 923–36), ff.17–18*v*, 43–63*v*; and *GB-Lbl* Add.19768 (Mainz), ff.4–22*v*. Large systematic collections appear in increasing quantity and size between about 950 and 1000, standard repertory sources becoming common after about 1000. Representative manuscripts for the West Frankish repertory are those from the Aquitanian group – *F-Pn* lat.1084, 1118, 1120, 887, 1121, 1119, 1138–1338; for the East Frankish repertory – *CH-SGs* 484, 380, 381, 382; and the two Winchester manuscripts – *GB-Ob* 775, *Ccc* 473). After 1000 the number of manuscripts increased rapidly.

In this group of sources sequences are customarily notated in two different forms. In one form the melody is notated as a melisma (fig.1) without the text (exceptions to this are discussed in §5(i) and §9); in the other form the text is given, usually with the melody entered over the text, a neume for each syllable (fig.2); but the musical notation is occasionally lacking altogether. As a general principle, the melismatic notation of a given melody corresponds well to the syllabic notation. A number of

2. Syllabic notation for the sequence 'Rex omnipotens' (incomplete) (F-Pn lat.1118, f.187r)

manuscripts place all their melodies in melismatic form together in a section called a sequentiarium, and the same melodies notated syllabically over their texts in a section called a prosarium. It needs to be stressed that sequentiaria and prosaria are alternative forms of notating one and the same repertory of music.

The musical notation of the Aquitanian manuscripts (the largest group among sources between about 950 and 1050) is sufficiently diastematic for melodies to be recovered, with certain limitations, directly from them; but melodies cannot be read directly out of other sources until much later – in the case of the St Gallen manuscripts, and others of the Swiss-Rhenish tradition, not before the 12th century. And given the continuing development of sequence style between 900 and 1200, the readings from a source in staff notation of the 12th or 13th century cannot be relied on to preserve in all details a melody as it was in the 9th century.

3. EARLY REPERTORY. The indispensable benchmark for dealing with the early repertory is the work of Notker: his collection of texts, entitled *Liber hymnorum*, is presumed to have been completed by 884. The *Liber hymnorum* is first found in the St Gallen manuscripts from after about 950, but the text tradition, both for words and neumes, is very firm. The value of Notker's testimony is manifold. First and foremost, the melodies used by Notker can be placed definitely in the 9th century; almost all the other melodies in the large and confusing repertories preserved in the sources from about 1000 lack such a witness – some may date from the 9th century, but most probably do not, and there is no completely objective way to determine which are which. A reliable assessment of the characteristics of the early sequence can only be gained on the basis of the melodies used by Notker.

Secondly, even though the St Gallen melodic tradition cannot be completely deciphered until several centuries after Notker, his texts provide an invaluable tool for verifying the 9th-century plan of individual sequences. This is due to the fact that as a general rule in the early repertory any given text fits only one melody (while on the other hand a given melody may have several alternative texts). If the plan of a melody as expressed in the number and length of its phrases has been altered between the 9th century and the time it is first preserved in a readable version – usually not much before about 1000 – its 9th-century shape can perhaps be restored with the help of Notker's 9th-century text. The value of this witness is particularly important for the West Frankish repertory: in the relatively stable St Gallen manuscript tradition, sequences show but little change between about 880 and 1000; but West Frankish sequences often did change in shape. Since the early West Frankish repertory shared its most important melodies with Notker's *Liber hymnorum*, the value of Notker's testimony for the early repertory as a whole is decisive.

Compared with these aspects of Notker's *Liber hymnorum*, the historical value of its preface, often used as the only source of information about the early sequence, is much less. Designed to introduce and explain the sequence as a new kind of work, the content of Notker's preface can be ascribed as much to rhetoric as to factual account. Its information may or may not be true, and in some cases may possess only verisimilitude; certain details remain obscure; nonetheless it is an essential document.

To Liutward, who for his great sanctity has been raised in honour to be a high priest, a most worthy successor to that incomparable man, Eusebius, Bishop of Vercelli; abbot of the monastery of the most holy Columbanus, and defender of the cell of his disciple, the most gentle Gallus; and also the arch-chaplain of the most glorious emperor Charles, from Notker, the least of the monks of St Gall.

When I was still young, and very long melodies – repeatedly entrusted to memory – escaped from my poor little head, I began to reason with myself how I could bind them fast.

In the meantime it happened that a certain priest from Jumièges (recently laid waste by the Normans) came to us, bringing with him his antiphoner, in which some verses had been set to sequences; but they were in a very corrupt state. Upon closer inspection I was as bitterly disappointed in them as I had been delighted at first glance.

Nevertheless, in imitation of them I began to write *Laudes Deo concinat orbis universus, qui gratis est redemptus*, and further on *Coluber adae deceptor*. When I took these lines to my teacher Iso, he, commending my industry while taking pity on my lack of experience, praised what was pleasing, and what was not he set about to improve, saying, 'The individual motions of the melody should receive separate syllables'. Hearing that, I immediately corrected those which fell under 'ia'; those under 'le' or 'lu', however, I left as too difficult; but later, with practice, I managed it easily – for example in 'Dominus in Sina' and 'Mater'. Instructed in this manner, I soon composed my second piece, *Psallat ecclesia mater illibata*.

When I showed these little verses to my teacher Marcellus, he, filled with joy, had them copied as a group on a roll; and he gave out different pieces to different boys to be sung. And when he told me that I should collect them in a book and offer them as a gift to some eminent person, I shrank back in shame, thinking I would never be able to do that.

Recently, however, I was asked by my brother Othar to write something in your praise, and I considered myself – with good reason – unequal to the task; but finally I worked up my courage (still with great pain and difficulty) that I might presume to dedicate this worthless little book to your highness. If I were to learn that anything in it had pleased you – as good as you are – to the extent that you might be of assistance to my brother with our Lord the Emperor, I would hasten to send you the metrical life of St Gall which I am working hard to complete (although I had already promised it to my brother Salomon) for you to examine, to keep, and to comment upon.

The early repertory as defined by Notker's output is set out in Table 1, with texts from the West Frankish repertory which use the same melody set side by side with them. The melodies fall into three groups. Those in group A lack a confirmed relationship to a melody of a Mass alleluia (as discussed in §5(iv)), although Husmann has proposed such relationships in some cases. The melodies in group B are related to specific alleluias, as indicated; but the relationships are not always free of ambiguities. Melodies in group C are shorter and lack a regular couplet structure; these melodies qualify as *sequentiae*, as discussed in §5, having in each case a clear relationship to a specific alleluia.

Besides the sequences listed in Table 1, only one other, *Stans a longe*, can claim a 9th-century witness (see §5); but a few others, including *Nostra tuba*, *Eia recolamus* and *Gloriosa dies adest*, are probably to be included in the early repertory from about 850 to 875.

4. STYLE IN EARLY EXAMPLES. A layout typical of the early sequence can be seen inex.1, *Haec est sancta solempnitas*, a West-Frankish saint's day piece used for Stephen, John the Evangelist and – in the earliest source – Aper, venerated at Toul (west of Metz). The text consists mainly of pairs of lines (2*a*, *b*, 3*a*, *b* etc.), each pair being sung to a different phrase of melody; but lines 1, 6 and 7 are 'singles', having only one line of text. Singles are found regularly in the early sequence as first and last lines, and occasionally elsewhere as well.

After the long opening single (1), the phrase lengths grow gradually from the very short phrase 2 to the much

TABLE 1

This table contains (i) in the right-hand column a complete list of Notker's texts, (ii) in the left-hand column the west Frankish texts using the same melodies that Notker used. Where, in either column, more than one text is given, that listed first is tentatively proposed as the earliest. Texts in parentheses with quotation marks are melody titles as they appear in the east Frankish (Swiss-Rhenish) sources. Texts in parentheses without quotation marks refer to related alleluias.

West Frankish Texts	*Notker's texts (with melody titles)*
Group A: lacking a confirmed relationship to an alleluia	
1. Laudes Deo omnis sexus	1. Laudes Deo concinat ('Organa')
2. Haec est sancta solempnitas	2. (i) Haec est sancta solemnitas solemnitatum (ii) Quid tu virgo ('Virgo plorans')
3. Haec dies quam excelsus	3. (i) Grates salvatori ('Duo tres') (ii) Tubam bellicosam
4. (i) Nunc exultet (ii) Semper regnans (iii) Arce superna	4. Laudes salvatori ('Frigdola')
5. (i) Ecce vicit (ii) Epiphaniam (iii) Gaude eia	5. (i) Hanc concordi ('Concordia') (ii) Petre summe
6. (i) Christi hodierna (ii) Pange Deo (iii) Rex nostras Christe	6. Congaudent angelorum ('Mater')
7. Rex omnipotens	7. Sancti Spiritus assit nobis gratia ('Occidentana')
8. (i) Clara gaudia (ii) Dic nobis	8. (i) Johannes Jesu ('Romana') (ii) Laurenti David
9. Fortis atque amara	9. Judicem nos ('deus judex justus')
	10. Agni paschalis ('Graeca')
	11. Carmen suo dilecto ('Pascha')
	12. Summi triumphum ('Captiva')
	13. Scalam ad caelos ('Puella turbata')
	14. Concentu parili ('Symphonia')
	15. Natus ante saecula ('Dies sanctificatus')
	16. Benedicto gratias ('Planctus sterilis')
Group B: related to an alleluia	
17. (i) Haec est vera redemptio (ii) Beata tu virgo (Alleluia Pascha nostrum)	17. Gaude Maria virgo ('Cignea')

Ex.1 *Haec est sancta solempnitas*; *F-Pn* lat.1084, 1118

longer phrase 5. Phrase lengths in the early sequence are typically disposed in some such easily perceptible plan, frequently leading to the longest phrase as a climax; even if a clear plan is not apparent, the use of phrases of markedly different lengths is an important feature of early sequences, one which distinguishes their prose texts from verse.

The melodic phrases differ among themselves in inner form and content as well as length, and thereby assume with each other clearly delineated relationships, which constitute the musical shape peculiar to each individual piece. In *Haec est sancta solempnitas* phrase 2 stands in sharp contrast to 1 by being short, concise, clearly etched; its rhythmic dimensions are easily perceptible, compared to the more abstruse contours of 1 (the melodic repetition within phrase 1, 'solempnitas ... beati ...' is not exact enough to make a 'double', and such inexact repetition is frequent in singles; it can be found also in phrase 6). Phrase 2 lies in a higher register, centred on C and ending on G, without a firm cadence; in its tonal locus (i.e. organization around a final) it brings a bright contrast to phrase 1, which is located on F. Phrase 3 lies lower, occupying the space around and below G, and ending on G with the short cadence pattern F–G–G that appears very frequently in the early repertory. The use of cadence and the disposition of melodic line in phrases 2 and 3 binds them together in the manner of antecedent and consequent to form a larger phrase group.

Phrase 4 has a different melodic character – more declamatory at the start – emphasizing the high C again, with a firm close on G through a longer cadence pattern, C–B–C–A–G–F–G–G, also frequent in the early repertory. Phrase 5, besides being the longest, is the highest of the phrases, descending in a long arc from the high E down to F, then entering the cadence pattern. The descent uses a melodic 'sequence', E–D–C–D–C–A, C–D–B–C–B–G – an occasional but not frequent device.

Phrase 6, like 3, lies lower, falling almost entirely into the area between G and D below. Its profile is less obvious than that of 4, circling as it does through the same few pitches rather than sweeping over many in a clear direction. Phrase 7 begins like 4, recalling it to suggest a structural frame; the melodic motion is not at all sweeping, but instead involute and encumbered with ornamental neumes. Its function (as in many early sequences) is to provide a peroration with ritardando to close the work. Closing phrases hardly ever use the cadence formulae, but regularly confirm the final established in the course of the work, in this case G, found at the end of every phrase except 1. Tonal locus is almost always extremely clear in early sequences, even in those cases involving a change of locus between beginning and ending. Often one or two interior phrases will end on a different pitch, usually a 5th above the final; such phrase endings are given clear structural differentiation so as to function as 'open' endings in contrast to the 'closed' endings of the final.

Dealing with the text as analogue to the music is more difficult but just as important: early sequences cannot adequately be appreciated on the basis of their melodies alone; the syntax, sonority and rhetoric of the text play decisive roles in shaping the piece.

As a general rule, each couplet – sometimes each line – is syntactically complete; but run-on is used frequently and with artistic purpose. The larger periods of the syntax tend to be aligned with larger phrase groups of the melody. In *Haec est sancta* the opening period extends through to line 3*b*, 'premia' marking the most important close up to that point. Lesser articulations occur at the

end of 1 and 3*a*; the very short line 2*a* runs on into 2*b*, and the main clause begun in 2*a* ('Ipse namque') finds its verb and object at the end of 3*a* ('secutus est vestigia'). In this way the melodic grouping of these shorter phrases is supported by the syntactic grouping.

That much (1–3) sets out the topic and reason for the celebration of the feast; phrase 4 begins an exhortation ('Let us now, therefore ... '). Phrase 5, the lyrical high point of the melodic curve, brings in its text a luminous image of Christ in glory surrounded by saints. Lines 6 and 7, as post-climax, contain a petition ('Therefore we beg ...') and – as the object of petition – an echo of the glory pictured in 5, but set to a melody that recalls 4. At higher levels of organization such avoidance of the most obvious symmetries is frequent and in keeping with the prose nature of the art form.

Being prose, the texts do not scan; yet they are highly rhythmic, governed by the disposition of accents and sonorities in artful flow. Line 5*a* is perhaps the most striking example:

´ × ` ×´ × ´× ×´ × × ´ × ´ ×× × ´ ×× ´× ´××
Ubi videamus regem eternum reddentem premia sequentibus sua monita

Primary and secondary accents (represented as acute and grave symbols respectively) and unstressed (×) syllables, fall into an irregular but nonetheless smoothly attractive succession; sonorities of '-e-' and '-m-' or '-n-' provide a continuum of assonance without being rhyme. Both factors continue to operate in line 5*b*, where the alignment of accent and sonority with melodic profile is even more intricate and artful. Text and music together create the long, unified line that carries the luminous image.

Such integration of text with music is different, of course, in every piece, although the same factors of syntax, sonority and rhetoric can be found everywhere at work. This particular text uses assonance in yet another way, shared by a number of other early texts (but by no means all). Each line ends in '-a-' or '-ia', and sometimes this end-assonance is heard in the interior of a line as well. The end-assonance – a striking feature – tends to throw emphasis at the ends of the lines (analogous to the cadence patterns) and to some degree works against the more subtle sonorities created by other textual means. Notker completely avoided end-assonance of this consistent type, relying instead on the less obvious techniques indigenous to his preferred models of classical Latin prose.

Notker's *Liber hymnorum* contains two texts for the melody of *Haec est sancta* – an early one, *Haec est sancta solemnitas solemnitatum*, and a later one, *Quid tu virgo*. The early one indicates its provenance by using the incipit of the West Frankish model *Haec est sancta solempnitas*, then goes on to follow its rhetorical layout: phrases 1–3 form the opening period, 4 is exhortatory (Notker's 'ergo gratias agamus' corresponds to the West Frankish 'Iam nunc ergo ipsius petamus'); there is a full stop at the end of 5, with 6 and 7 forming the closing period. Such correspondence in plan (with little or none in content) is characteristic of the relationship of Notker's texts to their West Frankish counterparts. Notker's later text uses the same grouping or phrases, and exactly the same syllable count. This, too, is characteristic (while between his versions and the West Frankish version there are frequent small differences in syllable count), showing that once Notker decided how a melody should be laid out, he kept it that way.

The early text, *Haec est sancta solemnitas solemnitatum*, is an Easter piece with a reference to the Harrowing of Hell (lines 2*a*–*b*; 3*a*–*b*). It is cast in a Latin style more formal and elegant than that found in most West Frankish texts, which are by turns less formal and more exaggerated, coloured by a long tradition derived from so-called 'Asian prose' passed on to the Carolingians by the learned Irish monks. Notker's choice of words is more fastidious, his use of word order – especially in early texts such as *Haec est sancta solemnitas solemnitatum* – more involute and artful (see especially lines 6–7). Notker's texts tend to read better, but are less singable, than the West Frankish ones, whose diction seems designed to support and enhance the fluent, surging melodic progressions of the early sequence.

Notker's later texts, while no less artful, sometimes show their maturity in a more direct, natural style of Latin, as well as a greater individuality of matter. *Quid tu virgo*, which contrasts the story of Rachel with a Christian viewpoint, illustrates Notker's frequent concern for a moral as well as a striking poetic image. The rhetorical layout of *Quid tu virgo*, a dialogue between the Christian interlocutor and the weeping Rachel, throws into strong relief the original grouping of phrases, 1–3, 4–5, 6–7.

Ex.2 shows a much larger West Frankish sequence, *Rex omnipotens*, set by Notker as *Sancti spiritus assit nobis gratia*. *Rex omnipotens* begins with a topic sentence identifying the text with the feast of the Ascension (1–2), briefly recounts the events after the Resurrection (3–5), then describes the Ascension itself in words very close to those of *Acts* i, which is the Epistle for the day (6–10). The text concludes with invocations and petitions (11–13). It is one of several such narrative texts in the early repertory, which are not without the qualities of an epic. The adaptation of a scriptural text to sequence form affords opportunities for textual analysis.

While the melody of *Rex omnipotens* shows some signs of a sectional structure (1–4, 5–8, 9–12) such as is occasionally encountered in early sequences, considerable attention has been given to making the melody continuous through a long, arching shape. Phrases 1–7 establish G and C above as a central area, or explore the region below G as a relief; these phrases tend to be shorter and less active. Phrase 8 brings an upward surge, carried out in phrases 9 and 10 by a shift to the upper register with open endings of D a 5th above the final; phrase 11 returns to the G final, preceding it by the F–A–C realm used frequently in G melodies as a foil to the final. Phrase 12, by far the longest, lies high and is divided into subphrases with an internal cadence on the high D. Such phrases appear frequently in the early repertory, always carefully placed in the overall plan – here as a penultimate climax.

Notker's *Sancti spiritus assit nobit gratia*, almost his only text to become popular in the later West Frankish repertory, more nearly approaches the directness and fluency of the West Frankish texts. Notker's prose consists of an acclamatory series of attributes and petitions addressed to the Holy Spirit.

A sequence known as 'Justus ut palma major' and related to the alleluia with that incipit is provided with a number of early texts including two by Notker. (There is another early sequence called 'Justus ut palma minor': for alleluia relationships in general, see §5.) Ex.3 shows the melody with the text *Haec dies est sancta*, for Christ's

Ex.2 *Rex omnipotens*; *F-Pn* lat.1084, 1118

Nativity. Perhaps the most striking feature is the ending on G, a 4th above the D final clearly implied at the start. Analysis would be concerned more fruitfully, however, with the system of motifs that operates throughout the piece to bring continuity in spite of the change of locus. (Some versions of this melody substitute a D ending, which shows not that the G ending is incorrect, but only that it was problematic for some medieval musicians as well as for us.) The use of motifs is intimately connected with the departures from regular parallelism in the latter half of the piece. Such departures are more frequent in the earliest sequences than in later ones, and were often eliminated in later versions or retextings of earlier ones.

The short, lyrical phrases and irregular constructions found in 'Justus ut palma major' show up in other early sequences, especially in those related to alleluias (*Haec est vera*, *Veniet rex*, *Pangat laudes* in Table 1) but also in melodies used by Notker (*Agni paschalis*, *Carmen suo dilecto*) that are not related to an alleluia and not known in the West Frankish repertory. In general the early repertory presents a wide variety of styles and structures, permitting no easy generalities and requiring case-by-case consideration.

5. Sequence and alleluia. The relationship of the early sequence to the alleluia of the Proper of the Mass has been one of the main problems of research. Complete, definite answers to all the questions raised cannot yet be provided. In general, the categorical – and hypothetical – assertion that the sequence is derived from the alleluia needs to be abandoned, and instead attention should be directed towards what can be established as fact. An approach to the problem, which is manifold, can be made through the following factual aspects.

(i) All sequences are related to 'alleluia' by the fact that the word 'alleluia' appears under phrase 1 of all melodies

Ex.3 *Haec dies est sancta* ('Justus ut palma major'); *F-Pn* lat.1084, 1118

when they are notated in melismatic form in the sequentiaria. This purely nominal relationship, which has nothing to do either with the prose that goes with the sequence or with any musical relationship that may exist between phrase 1 and an actual alleluia from the Proper of the Mass (as described under (iv)), is a simple fact of the sources; it has never been adequately explained.

(ii) The category of the sequence is related to the alleluia of the Mass in that at some point in its development – just when it has never been precisely determined – the sequence came to be sung at Mass immediately after the alleluia (after the second alleluia on days when two were sung). This, again, is a general relationship – in this case a purely liturgical one; a specific melodic relationship is not necessarily involved.

(iii) Some proses (none of the early repertory as shown in Table 1, except possibly Notker's *Concentu parili* and *Natus ante secula*) begin with a regular double, to which is to be prefixed in performance a 'phrase 1' with the text 'alleluia'. This prefix is regularly provided in the sequentiaria and is occasionally supplied in the prosaria as well (sometimes as a marginal addition). This type of relationship is to be regarded as merely textual: the melodic phrase 1 sung to the text 'alleluia' may or may not be in fact related musically to a specific alleluia of the Mass. Early pieces such as those in group A of Table 1 were sometimes supplied with a new text that began in phrase 2, the first phrase to be sung to the text 'alleluia'.

(iv) In certain melodies (as in group B of Table 1), phrase 1 shows a demonstrable melodic relationship to a specific alleluia of the Mass. In many cases this relationship is indicated by the melody's name, as provided in one or another of the sources; but sometimes not, and such references are not free from ambiguity. In general the melodic relationship is clear only for phrase 1; relationships between subsequent phrases and the alleluia, though asserted by Husmann and others, are not so clear.

(v) Many melodies, especially earlier ones, strongly suggest by their melodic style that they are related to an alleluia; nevertheless, the specific alleluia that corresponds to phrase 1 cannot be found in the Gregorian repertory. In some cases elaborate arguments have been devised to substantiate a specific relationship, or to account for the discrepancies or lack of corresponding alleluias. On the other hand, there is an increasing tendency to accept the fact that not all sequences may be necessarily related to an alleluia. Not yet investigated is the question of why – when certain sequences are in fact not related to alleluias – they should nonetheless suggest a resemblance.

There is a strong tendency in sequences apparently dating from the 10th century for increased usage of alleluia quotations in phrase 1 as compared to usage in the early repertory. In the same period the style of incipit described under (iii) became popular, almost standard. Still from the same period comes the practice of organizing the sequence repertory into quasi-liturgical cycles, with consistent use of melody titles referring to feasts and Proper alleluias. All these developments point to a liturgical relationship with the alleluia closer than it had been before the 10th century.

The strongest argument for a generic relationship between alleluia and sequence is the well-documented existence in the early 9th century (Amalarius of Metz, *Liber officialis*) of a kind of melisma called *sequentia*, sung as a replacement for the jubilus at the repetition of alleluia after the verse (but it is not known which specific *sequentiae* existed in the early 9th century – perhaps some of the melodies listed in group C of Table 1, but very likely not any of those in group A or group B). Whatever its nature, Amalarius's *sequentia* clearly provided the eventual name, and also the eventual liturgical locus, for the kind of piece Notker wrote texts for after 850. But it must be remembered that Notker called his pieces 'hymns'. And against the witness of the *sequentia* stands the fact that one early important melody, *Stans a longe*, which is cited by HUCBALD OF ST AMAND in his *De harmonica institutione* and provided with numerous texts (though not by Notker), is demonstrably not derived from an alleluia of the Mass but rather draws its incipit from an antiphon at Lauds (tenth Sunday after Pentecost). It does unacceptable violence to the early repertory to require all or even most of these sequences to be *sequentiae* in origin.

As an alternative to the theory of direct derivation from the alleluia to the *sequentia*, it can be suggested that the early repertory was the product of lively artistic imagination operating on a diverse stock of materials, textual as well as melodic – only one of which was the *sequentia*.

6. The aparallel sequentiae. Certain texts in Notker's *Liber hymnorum* (those in group C of Table 1), together with their West Frankish counterparts, do indeed go with melodies that can be understood as *sequentiae* in the strict sense just described. These works are distinct in almost every essential, structural aspect from the kind of piece represented by *Haec est sancta*, *Rex omnipotens* and 'Justus ut palma major'. They are much shorter; they lack, as a general rule, the clear couplet structure that prevails in the larger works; they make little or no use of the cadence patterns that mark off the long phrases of the larger works; their texts lack the strong syntactical and rhetorical correspondence to melodic plans. Judged by the standards of, say, *Rex omnipotens*, these smaller *sequentiae* are amorphous and uninteresting; but the point is, they are not to be so judged, for as works of art they are in a different category, one which neither explains nor is explained by the larger kind, but simply co-exists with it in early collections such as Notker's *Liber hymnorum* and some of the earliest West Frankish manuscript sources. Also in contrast to the larger works is the fact that the smaller *sequentiae* always show a clear, verifiable relationship to a specific alleluia of the Mass, and are apparently designed – in text as well as music – to be sung after the verse at the reprise of the alleluia.

Qui regis sceptra (ex.4) is a popular text for a *sequentia* to the *Alleluia, Excita Domine* for the third Sunday in Advent. Notker set it as *Angelorum ordo*, to go after the verse *Laudate Dominum* for the same alleluia when sung at the feast of St Michael and All Angels. The kind of melodic repetition found in this melody corresponds in structure and function to that found within singles of the larger kind of sequence, not to the regular couplet structure of doubles. Failure to make this distinction has resulted in needless confusion.

Ex.4 *Qui regis sceptra*; *F-Pn* lat.1118

7. Origins. Attempts to resolve the question of the sequence's origins have occasioned fantasies of historical reconstruction, whose common premise is that either Notker or some immediate predecessor troped archaic melismas, thereby creating a new musical form. This is neither credible nor useful: the attribution of such an act to Notker would indicate a presumptive reading of his preface, and the identification of this act with the origin of the sequence is self-contradictory. It cannot be proved that the account in Notker's preface is anything other than story-telling, whose purpose was to enable the author to introduce his 'hymns' to the Swiss-Rhenish monasteries. Further, if these melodies were indeed archaic in format and style, they could not be taken to represent any musical initiative on the part of the 9th-century Franks; and, in addition, no artistic value could be attributed to the words since they would have been merely underlaid. It has long been acknowledged that word underlay is not troping, so the sequence would not be a trope of the alleluia or of anything else, and none of what may be true of troping is relevant to the sequence. It is evident that not all melismas are archaic, for melisma is found in the work of Leoninus, Ockeghem and Handel – to name but a few. The idea that melismas *per se* are archaic is part of a mythic complex that was developed to explain medieval music in general and Gregorian chant in particular, there being no ready historical explanation and no possibility (for lack of sources) of finding one.

If it were necessary to imagine a model for the first sequences (i.e. musical compositions such as Notker claimed he saw in the antiphoner brought by the fugitive monk), then the melismas mentioned by Amalarius as sung after the verse of the alleluia at Mass would serve, since these could well be expanded and provided with words. Such 'aparallel' compositions do exist, including ones with words by Notker, but they are very inadequate models for the kind of compositions that make up the bulk of the sequence repertory from Notker onwards. For the latter, a model of much greater size and ambition would be required, one with a phrase structure at once more clearly articulated and more expansive, and with systematic use of couplets in words as well as melody. This last feature can be derived separately from the traditions of Latin art-prose, specifically the bicola. There is no obstacle to deriving the sequence from a combination of these models – unlikely as such a combination may seem – as long as the possibility of a large measure of creative originality on the part of the 9th-century Frankish cantors is accepted. But the only documented fact is that by 880 a repertory existed of a kind of musical

composition that was not there before, a kind for which no firm evidence in the preceding centuries is to be found.

Once this repertory is present in the documents, its development can be traced, and the development shows many of the features familiar from the history of other, more recent forms of music. As Notker explained, and as subsequent documents show, sequence melodies were often adapted to new sets of words. The adaptation might involve only slight change, or more substantial change. Phrases from one or several melodies might be combined with new material to make new melodies. Generic features of plan or idiom might be gradually modified, and entirely new but still compatible features introduced.

8. FORM AND PERFORMANCE. Not much is known about the ways in which sequences were performed in the 9th and 10th centuries. Much of what has been suggested depends upon the way the melodies are notated in 10th- and 11th-century manuscripts, where they appear in two forms – over the text in a syllabic relationship, and without the text as melismas. Some manuscripts (the minority) put both kinds of notation in the same fascicle, alternating more or less phrase by phrase. Husmann has argued that this manner of notation reflects the manner of performance and that in principle each phrase is sung in both syllabic and melismatic fashion in succession. This virtually doubles the length of the performed work. Such performance is attested later in the Middle Ages.

Another solution, offered by Smits van Waesberghe, envisages the sequence sung in melismatic and syllabic form simultaneously, the chorus singing the melisma while the cantor sings the text. This hypothesis has much to recommend it. There is, however, still the possibility that the principal reason for the double notation is the adiastematic nature of notation in the 9th and 10th centuries, and has nothing to do with performance.

Anyone who sets great store by Notker's preface would be bound to clarify the roles of cantor and chorus in terms of their relative skills and the problem of memorizing, touched upon by Notker in a fashion that implies that the words helped him remember the melodies.

On quite different grounds – stylistic rather than notational – it has been assumed (especially by Von den Steinen) that sequences were regularly performed antiphonally between the boys of the monastic choir school and the men of the choir. This solution, supported by occasional references in the texts of certain sequences, is of course a perennial possibility in many kinds of medieval music. Whether it is to be applied categorically to the sequence is doubtful; in any case provision would have to be made in individual cases involving singles and other irregularities.

Given the inconclusive nature of the evidence, and for other reasons as well, it seems advisable to consider the primary form of the work of art to be the singing of the melody with text, straight through, as found in the prosaria. This form, at least, gives a reliable base for stylistic judgments, which can then be modified to take into account other possible modes of performance.

Still another mode of performance concerns the use of some form of polyphony. Such forms extend from singing in parallel motion (for instance, according to the instructions in the *Musica enchiriadis*, *c*900), through the incipient oblique organum actually laid out for *Rex caeli* (not a sequence, but a *versus*, another 9th-century form) in the *Musica enchiriadis*, and also the sequences provided with organal voices in the Winchester Troper, right through to the polyphony in contrary motion provided by the St Martial repertory for the opening phrases only of certain celebrated sequences (including *Rex omnipotens*). Here again, some evidence can be extracted from the texts of certain 10th-century sequences (Waite, 1961); but little that is definite can be concluded. Singing in parallel motion, however, could be assumed for the sequences as for any other kind of chant in the 10th or 11th century (see §11).

9. PARTIAL TEXTING. Still another peculiar feature of the manuscript sources has given rise to frequent speculation – the so-called 'partial texting'. Certain sequences are provided in the sequentiaria (which in general have no text) with text set more or less syllabically under certain phrases. (This same text also appears in the version in the prosaria, as part of the complete prose.) The sequences in question have been listed (there are nine of them) and studied; one of the most striking aspects is that the 'partial texts' appear in phrases 5, 8 or 9 and in longer sequences 11 or 13 (Stäblein, 1961).

Another striking feature is that the 'partial texts' tend to be verse-like in structure, as for example those from phrase 9 of *Celebranda*:

> Nobis det ut omnia/quae sunt patris et sua/premia aeterna
> Salus et victoria/illi sit et gratia/omnia per secla

Two distinct hypotheses have been advanced to account for these 'partial texts'. One, represented among studies by Stäblein, takes these texts to be a first stage in the composition of a sequence – a layer of archaic material around which the sequence was built. The opposing hypothesis, represented by Husmann, understands the partial texts to be later interpolations – 'tropes' – into existing proses. Thus both hypotheses make use of long-standing morphological assumptions – that of accretion on the one hand, of troping on the other.

More important, neither hypothesis takes sufficient account of the structural procedures common in the early repertory as a whole. The location of these acclamatory verses in the overall plan of a sequence performs a very specific function – that of accenting and highlighting the shape brought about by the melodic and rhythmic disposition of phrases. In this respect, the acclamatory verses are not isolated phenomena, but quite analogous to other features, such as phrase-endings on non-final pitches, or the longer phrases that contain short lyrical subphrases marked off with internal cadences.

In other words, the acclamatory verses need to be explained as composer's choices within the individual sequences in which they occur, not as part of a single morphological principle that holds for all instances. In general, the sequences involved seem all to be later than, say, 875 (none of the melodies used by Notker involves these verses). It can be tentatively suggested that *Celebranda* (Christmas), *Celsa polorum* (St Stephen) and *Fulgens praeclara* (Easter) were the first and most famous instances; these in each case supplanted earlier sequences to become the principal ones for their feasts. And in these cases it would seem that the acclamatory verses were conceived as an integral element in the original design of the work. On the other hand, it seems as though Husmann was correct in taking the verses in *Exultet elegantis* to be

a subsequent addition; this sequence exists in alternative versions with and without the verses.

10. The later rhymed sequence. Of all the many developments that took place within the sequence repertory after 1000, the most obvious were the regularization of accent and the influx of rhyme. Both elements increased in use gradually from the 10th century onwards, to become widespread and dominant in the 12th century. *Mane prima sabbati* (ex.5), a well-known Easter piece from the late 11th century or the 12th, shows the consistent application of scansion and rhyme that makes the later prose seem more like verse.

In general, stressed syllables (including those accents identified as 'secondary' by modern observers, as in 'rèsurgéntis') alternate with unstressed syllables throughout, providing a regular rhythm at the lowest level. Each phrase ends, however, 'proparoxytone', that is, with two unstressed syllables ('glória'). Furthermore, each phrase falls into subphrases of seven or eight syllables; each subphrase (with important exceptions in phrase 7) begins with a primary or secondary stress; each seven-syllabled subphrase ends proparoxytone, while each eight-syllabled subphrase (again, with exceptions in phrase 7) ends 'paroxytone', that is, with one unstressed syllable. The subphrases in each line are usually linked by internal rhyme, the lines of each couplet by end rhyme.

> 2*a* Víctor régis scéleris/rédiit ab inferis/cum súmma victória
> 2*b* Cújus rèsurréctio/ómni pléna gáudio/cònsolátur ómnia

Occasional irregularities of accent within the line, as at 'cum summa', are normal, merely enhancing rather than disturbing the overall scheme. The general regularity created by scansion and rhyme gives the impression that this and many such pieces consist in principle of a series of seven-syllable verses, alternating occasionally with eight-syllable ones. For this reason, apparently, all proses, including the early ones, are printed in short lines in the Analecta Hymnica; but in the case of the early ones – those before about 1100 – the subdivision is in most cases entirely arbitrary, without basis either in the sources or in the style. And in the later ones – such as *Mane prima sabbati* – the seven- or eight-syllable 'verses' are only the smallest units: much more important are the groupings at the higher levels – important not just for the shape of the individual piece but also for showing the continuity of the later sequence with the earlier kind.

The grouping in *Mane prima sabbati* shows the same progression and expansion towards a climax, the same

sense of departure and return, found in sequences from the early repertory – as long as attention is focussed on the nine long phrases and their interrelationships. Phrases 1 to 3 each have three seven-syllable subphrases, with principal cadences on D (the final) and internal cadences on either side – C, G or A. Phrase 4 has four seven-syllable subphrases and establishes a locus on A a 5th above the final. Phrases 5 and 6 introduce eight-syllabled subphrases in the pattern 8 8 7; in line *5a* the eights are broken each into 4 4 by rhyme and motivic structure, but this subdivision is only occasional. Phrases 5 and 6 cadence on D, which together with the accelerando 'diminution' in the 4 4 gives a curious combination of a fresh start and a return. Phrase 7 is all eight-syllable subphrases, the last two beginning with unstressed syllables so that the phrase endings can be proparoxytone. Phrase 8, while not the longest (8 8 8 7), is melodically the most far-flung, making the same overall point as phrase 12 of *Rex omnipotens*.

In plan as well as melody, then, *Mane prima sabbati* and other later sequences reproduce the principles of the early repertory. Just as rhyme and scansion regularize the plan at the lower levels, so does the use of melodic motifs of three or four notes tend to control the inflection of the melody, helping to set off closed from open endings, for example, in phrase 6. Indeed, a wealth of detailed relationships can be worked out within the larger plan of *Mane prima sabbati*, revealing the developing symmetries, modal and hierarchical structures associated with 12th- and 13th-century polyphony and also with architecture. Yet during this period the sequence is an older, conservative form, which is merely reflecting trends pursued more vigorously elsewhere.

Of the five sequences remaining in standard 20th-century chant books, none is from the early repertory. VICTIMAE PASCHALI LAUDES (attributed to WIPO), a modest 11th-century German sequence that also became popular in the West, most closely resembles the early style. LAUDA SION (attributed to St Thomas Aquinas) is a 13th-century text to a French melody that became popular about 1100 to the text *Laudes crucis*; very large, and brilliant, it represents the whole spectrum of things possible in G melodies, cast in the new rhyme and scansion. VENI SANCTE SPIRITUS (attributed to Innocent III), an 11th- or 12th-century piece on a D final, uses the rhyme and scansion in a very regular way, as does also STABAT MATER DOLOROSA (attributed to Jacopone da Todi). The DIES IRAE (attributed to Thomas da Celano) is so regular at its highest levels that it is probably to be considered a *versus*. The attributions may be merely *honoris causa*; the last two have not been accepted for some time. Such attributions to famous personages were also made earlier in the history of the sequence. Perhaps their greatest value is the indication that to create a famous sequence was considered a sufficiently noble act to add to the glory of a king or pope. More reliable attributions occur throughout the history of the sequence, beginning with Notker, and including Waldram (St Gallen, *c*900), Ekkehard I 'Decanus' (*d* 973), Hermannus Contractus (*d* 1054), Gottschalk of Aachen (*d* 1098) and Hildegard of Bingen (*d* 1179). The best-known author of sequence texts – after Notker – is ADAM OF ST VICTOR (*d* ?1177).

11. THE POLYPHONIC SEQUENCE.

(i) The Middle Ages. Not only liturgical settings but also non-liturgical settings such as votive antiphons, motets and cantatas come within the general field of the polyphonic sequence, as do settings of other texts intended as substitutes for the liturgical sequence.

Almost from its inception the sequence was considered suitable for polyphonic elaboration. Textless *sequentiae* appear to have arisen shortly after 800, and by 848 the use of fully texted sequences was sufficiently widespread to merit a censure by the Council of Meaux. By about 900 a sequence-like *versus*, *Rex caeli Domine*, was used in *Musica enchiriadis* and *Scolica enchiriadis* as an example of organum at the fourth below moving from and to unison cadences. Furthermore, a number of the earliest sequences contain within their texts references to polyphonic performance. Typical of these is the opening of *Prome casta contio* in the earliest of the Aquitanian tropers (*F-Pn* lat.1240, *c*930): 'Prome, casta contio, carmina, organa subenctens hypodorica'. The earliest extended source of European polyphony, one of the two Winchester tropers (*GB-Ccc* 473, *c*1000), transmits in ff.153*v*–154*v* seven organa to seven textless or partially texted *sequentiae* for Christmas Day ([*Musa*]), St Stephen (*Beatus vir*), St John (*Iustus ut palma*) the octave of Christmas (*Multifariae*), Epiphany (*Chorus sive Bavverisca*), Purification (*Adorabo*) and Easter (*Fulgens praeclara*). An eighth, *Cythara*, for Ascension, has only the word 'Alleluia' and no neumes. The cycle was obviously intended to be completed since ff.155*v*–161*v* were originally left blank and only later filled with plainchant sequences. Two further organa to textless *sequentiae*, the plainchant melodies of which are unknown, *Planctus sterilis* and *Simon oboediens*, were added on f.198*r*. The transcription of this repertory is fraught with uncertainties, but Holschneider (1968, pp.156–7) provides a convincing reconstruction of *Beatus vir*. The setting is in general note-against-note, following largely the rules of the *Musica enchiriadis* for organum at the fourth below but with considerably more freedom of movement between the parts.

The next important source for polyphonic sequences is the cluster of Aquitanian *versaria* containing polyphony (*F-Pn* lat.1139, 3549, 3719 and *GB-Lbl* Add.36881). These sources transmit 12 polyphonic sequences, although in several cases only the first few verses are set. The organal part is now above the plainchant and the counterpoint is largely governed by contrary motion. The settings range from note-against-note with modest cadential flourishes (*Veri soli radius*) to moderately florid settings (*Rex omnipotens* and *Laude iocunda*). The texts used include not only those with a long Aquitanian tradition, such as *Prome casta contio* and *Alle– Caeleste necnon et perenne –luia*, but also newer proses and pieces from the East Frankish region, such as *Victimae paschali laudes* and *Sancti spiritus adsit nobis gratia*.

Similar in style to the Aquitanian settings are those in the roughly contemporary collection in the 11th fascicle of W_1 (*D-W* 677, facs. in Baxter, 1931, and Staehelin, 1995), which contains exclusively music composed in the British Isles for the votive Mass of the Blessed Virgin. It includes 15 two-voice sequences on ff.200*v*–209*v* (old foliation). The style is largely note-against-note with occasional ornamentation in a manner comparable to that of the Aquitanian settings, but unlike the Aquitanian polyphonic sequences those in W_1 set the entire piece, with the text of the second of each pair of versicles given in the margins. Sequences in this style are found in nine

manuscripts of the 13th and 14th centuries and are listed by Ludwig (1910); several others are also listed by von Fischer and Lütolf (1972). The majority of these pieces are in a style similar to that of the sequences in W_1 or in an even simpler style referred to as 'primitive polyphony' or *cantus planus binatim*. They include not only sequences but tropes to the Office responsories, often labeled 'prosa', analogous in structure to the sequence and sometimes used as such.

The performing practice history of the sequence is ambiguous. It apparently began as a solo chant but became a choral one in a large number of establishments, and thus did not develop beyond a simple two-voice discant style during the 13th and 14th centuries, when the more complex forms of polyphony were the province of soloists. Nonetheless, phrases from sequences began to appear as motet tenors in the late 13th century in *F-MOf* H.196 and *D-BAs* lit.115, and later in the *Roman de Fauvel* and up to the early 15th century. The absence of elaborate polyphonic settings of the sequence might have prompted the rise in some centres of polyphonic *cantus loco sequentia*, substitutes which were often polyphonic antiphon settings. One such collection may be the series of 15 Marian antiphons copied between the Gloria and the Credo settings in the Old Hall Manuscript (*GB-Lbl* Add.57950).

(ii) The Renaissance. The early 15th century saw a modest revival of the sequence as a polyphonic form. There are seven securely ascribed settings by Du Fay and three more that are most likely his. All are chant paraphrase *alternatim* settings that begin almost invariably with the plainchant. Among the three anonymous sequences that may be by Du Fay one is probably an addition to his own *Veni Sancte Spiritus* (CMM, i/5, 18) to make it conform to the use of the papal chapel. A distinction should be made between sequence settings and compositions using sequence-like texts which were also found as rhymed prayers in orationals and which composers set sometimes as sequences and sometimes as free cantilena motets, as in Du Fay's *Gaude virgo mater Christi* (CMM, i/5, 1) and *Ave virgo que de celis* (CMM, i/1, 8) (see Planchart, 1988). Most of the remaining early 15th-century polyphonic sequences are anonymous, but they follow with remarkable consistency the stylistic traits seen in those of Du Fay.

Mid-15th-century settings are less common. There are three settings in *I-TRmp* 88 and five each in *I-TRmp* 89 and 90; some are four-part settings and some show an abandonment of chant paraphrase procedure. English settings of *prosae* probably date from the middle decades of the century too. The term 'prosa' was reserved in England for tropes of the Office responsory analogous in structure and position to the sequence that was often sung at Vespers. Examples include the five settings of *Sospitati dedit aegros* for St Nicholas in the Pepys Manuscript (*GB-Cmc* 1236), one of them by Walter Frye.

Late 15th- and early 16th-century English sequence settings are a special case in that many were intended not as part of the Mass but as votive antiphons. This is true of 26 of the surviving complete or fragmentary sequence settings in the Eton Choirbook (*GB-WRec* 178), and of settings by Sheppard and Taverner. A number of these texts, particularly the 'Gaude' poems, had been set since the early 15th century not as sequences but as Marian motets (as in the pieces by Du Fay mentioned above). Settings of sequence texts for use in the Mass are found in the Lady Masses of Ludford and in the *alternatim* setting by Taverner copied by John Baldwin. The composition of sequences increased once more on the Continent in the later 15th century. Busnoys, Obrecht, Josquin and Isaac contributed to the genre and to its stylistic expansion. Busnoys's *Victimae paschali laudes*, a cantus firmus setting with plainchant mainly in the alto but occasionally in other parts as well, seems to reflect the influence of Du Fay's *Ave regina celorum* and Ockeghem's *Alma redemptoris mater* in its use of plainchant to generate the motivic material. Obrecht's *Salve crux arbor vitae* is a complex cantus firmus and chant paraphrase work, in which four voices paraphrase some of the plainchant of that sequence while the fifth voice has the seventh stanza of *Laudes crucis attollamus* as a cantus firmus with its own text, which eventually supplants the *Salve crux* text. The reason for this is probably liturgical, since the seventh stanza of *Laudes crucis* was assigned as the sequence for the feasts of the Exaltation of the Cross in churches in Bruges. Isaac's settings are all part of his *Choralis Constantinus* and are *alternatim* settings in a variety of textures, typically ranging from two to six voices in any one setting. Isaac uses the plainchant melody as a source of motifs for the polyphony, and in at least one versicle he also sets the plainchant as a cantus firmus moving in long, even note values. In this he is following a specifically German tradition of polyphonic sequences exemplified most clearly by the nine anonymous sequences in *I-TRcap* (Trent 93), which reflect the tradition of the Austrian Hofkapelle at Wiener Neustadt (Peck Leverett, 1990). These sequences, like the later *Victimae paschali laudes* of Verdelot or the *alternatim* setting by Brumel, were most likely intended to be used in place of the sequence, if not during the Mass then during Vespers, where a sequence sometimes replaced the hymn.

With Josquin's settings the sequence moves firmly into the realm of the new motet repertory that was to dominate the first half of the 16th century. Five of his six sequences are complete; *Ave mundi spes, Maria*, possibly spurious, is missing the Superius part (it is reconstructed in Godt, 1976), and the six-voice *Veni Sancte Spiritus* and *Victimae paschali laudes* are almost certainly spurious. Josquin's authentic sequences use the plainchant as a cantus firmus, treating the second setting of each melodic segment as a variation of the first ('variation-chain' technique), and on occasion the motivic substance of the chant permeates the entire texture of a section. Typical of these procedures are the six-voice settings *Praeter rerum series* and the very late *Benedicta es celorum regina*. In the four-voice *Victimae paschali laudes* additional cantus firmi appear, the superius of Ockeghem's *D'un aultre amer* in the first part and that of Hayne's *De tous biens plaine* in the second. The *Stabat mater* uses as a cantus firmus the tenor of Binchois's *Comme femme desconfortée*. Mouton's four sequence settings use also variation-chain procedures.

The tradition of Josquin and Mouton is continued in the ten sequences of Willaert (probably the most prolific sequence composer of his generation), notably the early *Veni Sancte Spiritus* and *Verbum bonum et suave*, which are among his best works. Virtually all Willaert's sequences are variation-chain pieces based on the plainchant and are thus true polyphonic sequences rather than motets setting a sequence text. Other composers either

avoided the sequence or, like Gombert, Morales, Sermisy and Clemens non Papa, left only one or two settings.

With the virtual elimination of the sequence from the Roman Mass by the Council of Trent (1543–63), sequence composition became rare. Palestrina wrote multiple settings of *Lauda Sion*, *Veni Sancte Spiritus* and *Victimae paschali laudes* as well as of the *Stabat mater*, which was not always considered a sequence. Lassus also set *Lauda Sion*, *Veni Sancte Spiritus* and the *Stabat mater*, and isolated settings of one or other of the four sequences admitted by the Council of Trent and of the *Stabat mater* appear in the works of Monteverdi (*Lauda Sion*, 1582), Felice and G.F. Anerio, Victoria and other Roman composers. At the end of the 16th century a tradition arose of setting sequences for an eight-voice double choir, so that, in the case of Palestrina, the eight-voice settings of the *Stabat mater* might have been intended as true sequences, and the other settings as free motets. In his *Gradualia* Byrd included a retrospective setting of *Victimae paschali laudes*, whose structure recalls the votive antiphon tradition, and a compact setting of *Veni Sancte Spiritus*, in which the long text is declaimed almost homophonically throughout.

(iii) After 1600. The sequence texts spared by the Council of Trent have continued to attract composers until the present day. The sombre *Dies irae* received hundreds of settings, both as part of the Requiem Mass, for example by Michael Haydn, Mozart, Cherubini, Berlioz and Verdi, and as a self-contained work, as in settings by Caldara, Legrenzi, Charpentier, J.C. Bach and Reger, as well as the instrumental paraphrase in Liszt's *Totentanz*. Even more popular has been the *Stabat mater*, with settings by Alessandro and Domenico Scarlatti, Pergolesi, Caldara, Vivaldi, Soler and Boccherini in the 17th and 18th centuries, Joseph and Michael Haydn in the late 18th (an early setting by Mozart is lost), Schubert, Rossini, Cornelius, Dvořák and Verdi in the 19th, and Poulenc, Dohnányi, Virgil Thompson, Penderecki and Pärt in the 20th. Fewer settings of the remaining three sequences exist by composers active after 1600: there are settings of *Victimae paschali laudes* by Giovanni Colonna (1687), continuing the tradition of setting the sequences for an eight-part double choir, and by Jommelli; of *Lauda Sion* by Grandi, Colonna, Buxtehude, Michael Haydn and Mendelssohn; and of *Veni Sancte Spiritus* by Colonna, Michael Haydn, Mozart, Kozeluh, Bruckner and Peter Maxwell Davies. Most of these are essentially self-contained cantatas written in the style prevalent at the time, but those of Colonna and Michael Haydn were intended as liturgical works.

See also DIES IRAE; LAUDA SION; STABAT MATER DOLOROSA; VENI SANCTE SPIRITUS; and VICTIMAE PASCHALI LAUDES.

BIBLIOGRAPHY

The starting-point for all modern research on the sequence is the edition of the texts in various volumes of Analecta Hymnica Medii Aevi edited by Dreves, Blume and Bannister (vols.vii and liii contain most of the early repertory). Nonetheless, Analecta Hymnica must be counted as a preliminary edition, its greatest value being in the conspectus of the manuscripts then known for each text. H.M. Bannister, before his death in 1919, was working on an edition of the melodies; his posthumous papers (in *GB-Ob*) remain an important resource for scholars. Because of a general lack of comprehensive studies, Moberg's work on Swedish sequences (albeit on a peripheral aspect) is valuable because it is careful and thorough. For a long time, the most significant work on the early sequence was that of the literary historian Wolfram von den Steinen, especially his *Notker der Dichter und seine geistige Welt* (1948). A number of valuable studies appeared from the 1950s onwards, notably by Crocker (1957, 1977), De Goede (1965), Brunner (1985) and Fassler (1993). A further basic tool is Husmann's *Tropen- und Sequenzenhandschriften* (1964), which, however, embodies the arguments concerning the genesis of the sequence that have rendered Husmann's several articles provocative without being conclusive.

RICHARD L. CROCKER (1–10), JOHN CALDWELL/ALEJANDRO E. PLANCHART (11)

Sequence (ii). A melodic or polyphonic idea consisting of a short figure or motif stated successively at different pitch levels, so that it moves up or down a scale by equidistant intervals. It may be true to the diatonicism of the passage or may involve a literal transposition (*see also* ROSALIA). Sequences can be used in the construction of a melody or theme itself, as in ex.1, but they usually function in the spinning out of musical material by developing a motif related to a previously stated melody, as in ex.2 (*see also*

Ex.1 Beethoven: Sonata in A♭ op.26, last movt

Ex.2 Chopin: Mazurka in F♯ minor op.6 no.1

FORTSPINNUNG). It is not uncommon for successive statements of a motif to be inexact repetitions of the original form and yet maintain the character of a sequence. In ex.2, for instance, the left-hand chord at the end of bar 5 would have to be d♮′–e♯′ in order for the repetitions in bars 6–7 to make a true sequence. The melody of a passage may be based on a sequential idea while the accompaniment is not, or vice versa.

WILLIAM DRABKIN

Sequencer (Fr. *séquenceur*; Ger. *Sequencer*; It. *sequencer*). An electronic device that creates automated repeatable sequences of sound. The sequencer was pioneered in the analogue synthesizers designed by Donald Buchla in the mid-1960s, and continues to be incorporated into larger, especially modular synthesizers and also produced as a self-contained unit. Its automated functioning lends itself to digital and computerized control. In earlier models a series of knobs permitted the user to determine the value of up to three parameters (such as frequency, duration, filtering and modulation) for each step in the sequence, which typically comprised eight or more steps; such a repeated pattern is known as a loop, by analogy with a handmade loop of magnetic tape. The output of each step consists of a voltage whose level is determined by the position of the relevant knob(s), while the overall speed at which the sequencer cycles through the steps can be fixed or manually varied. Such a sequence of output voltages may vary a selected parameter of another device, such as a synthesizer module, by means of VOLTAGE CONTROL.

Subsequently the capacity and capabilities of larger sequencers have been greatly expanded, running to many thousands of steps; since the mid-1980s they have often been replaced by equivalent software programmes for increasingly powerful microcomputers, controlling synthesizers and other devices via MIDI. Because with MIDI every parameter setting is codified numerically, a sequencer is capable of storing recordings of sequences of MIDI events (the information about the sounds, not the sounds themselves, in all parameters), and there is thus little differentiation now between a sequence as described above and a digital recording of a passage of music. The software provides a virtual multitrack recorder and mixing desk, and often also enables the music to be viewed and printed out as notation in both musical and graphic ('player piano') formats. At the other extreme the availability of sequencers has given rise to forms of rock music (RAP, etc.) that are based on the invasive monotonous rhythmic ostinatos of drum machines (see ELECTRONIC PERCUSSION) and simplistic looped electronic bass lines.

HUGH DAVIES

Sequentia. A wordless melody associated with the alleluia of the Mass in the Franco-Roman liturgy. In his *Liber officialis* (*c*830) Amalar of Metz identified as *sequentia* a melisma replacing a repetition of the alleluia after the verse. Such *sequentiae* are first documented as additions to the Compiègne antiphoner *F-Pn* lat.17436, a manuscript dated to the end of the 9th century. Hence *sequentiae*, without texts, are attested before (texted) sequences (i.e. *prosae*), and it was formerly assumed that the latter developed from the former; Anselm Hughes in his *Anglo-French Sequelae* (London, 1934) proposed that the term 'sequela', not previously used in a musical sense, be taken to denote 'the melody ... in this primitive [wordless] condition', so as to avoid ambiguity with the word 'sequence'. But the ambiguity is not intolerable, and the view that the *sequentia* represents a primitive condition of the sequence is in any case debatable. The relationship of these terms continues to be argued, but the tendency in recent scholarship has been to use 'sequentia' as Amalar used it – an expanded melisma to replace the usual repetition of the jubilus after the alleluia verse, and 'sequence' for the genre – melodies with or without words.

See PLAINCHANT, 6(iv); PROSA; and SEQUENCE (i), §6.

RICHARD L. CROCKER

Sequentiary (from Lat. *liber sequentiarum*). A collection of sequences; hence also a book or part of a book containing such a collection. *See* SEQUENCE (i).

Serafin [Serafino], **Santo.** *See* SERAPHIN, SANCTUS.

Serafin, Tullio (*b* Rottanova di Cavarzere, Venice, 1 Sept 1878; *d* Rome, 2 Feb 1968). Italian conductor. He studied the violin and composition at the Milan Conservatory and made his conducting début at Ferrara in 1898. After experience in various Italian cities, and his Covent Garden début in 1907, he became principal conductor at La Scala (1909–14), returning in 1917–18. There he conducted the first Italian productions of *Der Rosenkavalier* and *Feuersnot*, *Oberon*, operas by Dukas, Humperdinck and Rimsky-Korsakov, and the premières of Montemezzi's *L'amore dei tre re* (1913) and *La nave* (1918). At the Metropolitan Opera (1924–34) he conducted the first American productions of *Simon Boccanegra*, *Turandot* and operas by Falla, Giordano and Musorgsky, and gave the premières of Deems Taylor's *The King's Henchman* (1927) and *Peter Ibbetson* (1931), Louis Gruenberg's *The Emperor Jones* (1933) and Howard Hanson's *Merry Mount* (1934). At New York he did much to develop the careers of several singers, especially Rosa Ponselle, who appeared with him at Covent Garden in 1931 in the first production there of *La forza del destino*, and in *Fedra*, by her teacher, Romano Romani.

Returning to Europe in 1934, Serafin was appointed artistic director of the Rome Teatro Reale. He remained there until 1943, conducting new operas by Alfano, Pizzetti and others, the *Ring* in Italian and the Italian première of *Wozzeck* with Gobbi in the title role. He conducted at the Florence Maggio Musicale, and returned to La Scala for the first postwar season, which included the first Italian production of *Peter Grimes*. During the 1950s, when he had a spell at the Chicago Lyric Opera (1956–8), he became closely associated with the career of Maria Callas, both in the opera house and on many noteworthy recordings. In 1959 he coached and conducted Joan Sutherland in her first appearance in *Lucia di Lammermoor* at Covent Garden. Three generations of singers owed much to his skill and encouragement, and it has been said that without him the postwar revival of interest in Italian Ottocento opera and the bel canto style would have been impossible. In Gobbi's opinion he was 'an infallible judge of voice and character and an invaluable guide to young singers'. He remained active as a conductor into his 80s, being appointed artistic adviser to the Rome Opera in 1962 and conducting Rossini's *Otello* there that year. Serafin was modest and retiring in personality, quietly incisive in rehearsal and ruthless only in eradicating carelessness; he often achieved an unparalleled balance of musical line and emotional

Tullio Serafin

expression in performance, to which many of his recordings testify.

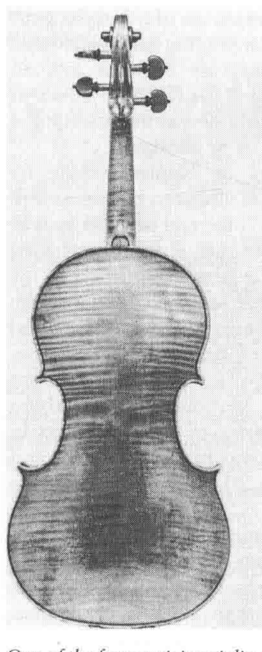
J.B. STEANE, NOËL GOODWIN

Serafino de' Ciminelli dall'Aquila [Serafino Aquilano] (*b* Aquila, 6 Jan 1466; *d* Rome, 10 Aug 1500). Italian poet and musician. In 1478 he became a page in the Count of Potenza's court and studied music with Guillaume Garnier. In 1481 he returned to Aquila, where he apparently studied Petrarch and sang Petrarchan verse to the lute. He entered the service of Cardinal Ascanio Sforza in Rome in August 1484, and began to be known for his improvisations; at some point he met Josquin, to whom he addressed a sonnet in praise of creative genius. According to Calmeta (writing in about 1505), Serafino met Andrea Coscia in Milan in 1489; Coscia had a particular style of singing the *strambotto* which Serafino acquired, impressing many Romans, including Paolo Cortese and his circle. There is evidence of this style, with its well-marked syllabic melodies flowing into melismatic cadences, in *strambotti* printed by Petrucci and in manuscript sources (particularly *F-Pn* Rés.Vm[7] 676 and *I-Mt* Cod.55); most of the music in the manuscripts is anonymous but some of it may be by Serafino.

By late 1491 Serafino was in Naples, where he frequented artistic academies and added to his reputation as a virtuoso 'improvvisatore'. At the end of 1494 he was at the Mantuan court, where his *Rappresentazione allegorica della Voluttà, Virtù e Famma* and two of his *acti scenici* were performed. He visited Milan for the installation of Lodovico Sforza as duke in 1495 and remained there in the service of Beatrice d'Este Sforza until her death in January 1497. After a period of wandering which took him to Mantua, Venice, Urbino and Genoa, he entered the service of Cesare Borgia in Rome late in 1499. His death was much lamented, and his poetry went through some 20 posthumous editions before 1516.



As a poet Serafino was pre-eminent among his contemporaries in adapting Petrarchisms to the verse of the *stile cortegiano*, a style that was defended vigorously by his partisans against the new Tuscan purism of Bembo. Serafino's poetry influenced not only his Italian contemporaries but also French lyric poets such as Mellin de Saint-Gelais and Marot. It is harder to gauge the influence of Serafino's musical style because it belongs to an unwritten tradition, but he was probably a figure of the first importance.

JAMES HAAR

Seraphin [Serafin, Serafino], **Sanctus** [Santo] (*b* Udine, 1 Nov 1699; *d* after 1758). Italian violin maker. He is thought to have gone to Venice about 1720; his earliest known label is dated 1725. By 1730 he had developed an

One of the few surviving violins by Giorgio Seraphin, c1750 (private collection)

individual style as he drew inspiration from the work of the Amati family and applied some of their ideals to his own distinctively Venetian designs. In the following years he made his finest instruments, using wood of superb physical appearance. If his success can be gauged from his tax returns he was for a time Venice's leading maker. The tone quality of his violins and cellos from this period leaves nothing to be desired, if sometimes they lack the sheer power of Montagnana's instruments. Towards 1740 Seraphin's work gradually changed in character; certain of the details were exaggerated and the result compares poorly with the splendour of the earlier years. In 1744 he made an undertaking to his guild to make no more violins, and although his retirement was probably more or less complete, he was still well able to sign his name in 1758.

Seraphin was one of the most important makers of the Venetian school; his workmanship was elegant, and he usually took infinite care with the appearance of his instruments.

His nephew Giorgio Seraphin (*b* Venice, *c*1726; *d* Venice, 25 Jan 1775) was also a fine craftsman. He worked independently as early as 1742, presumably having been taught by his uncle. He married a daughter of Domenico Montagnana and continued his father-in-law's business, though with little energy, perhaps because of weak health. He seems never to have signed his work after 1750 and it usually passes under other names.

CHARLES BEARE

Seraphine. A small free-reed keyboard instrument. It was made by John Green of London in about 1830. The name was later used in the USA and England to refer to any small REED ORGAN. It was also the brand name of a model of automatic reed organ (*see* ORGANETTE).

Seraphon. *See under* ORGAN STOP.

Serassi. Italian family of organ builders. Giuseppe ('il vecchio') (*b* Como, 1694; *d* Crema, 1 Aug 1760) settled in Bergamo about 1720 and built the organs at San Pellegrino, Lodi and the sanctuary of the Madonna di Caravaggio. His son and successor, Andrea Luigi (*b* Bergamo, 19 May 1725; *d* Bergamo, 1799), built the organs in the cathedrals at Crema, Parma, Fossano and Vigevano.

The most important member of the family, Andrea Luigi's son Giuseppe ('il giovane') (*b* Bergamo, 16 Nov 1750; *d* Bergamo, 19 Feb 1817), built some 350 organs including S Alessandro in Colonna, Bergamo (1781–2), S Liborio, Colorno, near Parma (1791), SS Annunziata, Como (1800), the collegiate church at Tende (1807), and S Eustorgio (1812) and S Tomaso (1813), Milan. He published *Descrizione ed osservazioni pel nuovo organo nella chiesa posto del SS. Crocifisso dell'Annunziata di Como* (Como, 1808); *Catalogo degli organi fabbricati da' Serassi di Bergamo* (Bergamo, 1815) and *Sugli organi, lettere a G.S. Mayr, P. Bonfichi e C. Bigatti* (Bergamo, 1816/*R*). The first work contains a description of the Como organ with its two manuals (*grande* and *eco*), ten wind-chests (both slider- and spring-chests), and many divided stops, with instructions on using the stops for solo and duet effects and for imitating a wind band, the clarinet, oboe, thunder, harp, guitar, mandolin, dulcimer, lute, harpsichord and bagpipe.

After his death, Giuseppe's sons and grandsons continued the family firm under the name Fratelli Serassi until 12 November 1895, when Vittorio Serassi gave Giacomo Locatelli the right to add 'successori dei Fratelli Serassi' to the name of his firm. During this period important work included a rebuild of the Antegnati organ at the Duomo Vecchio, Brescia (1824); and new organs at Piacenza Cathedral (1816), S Maria Maggiore, Trent (1826–30; with a large Swell), S Maria di Campagna, Piacenza (1838), Milan Cathedral (1842; large one-manual with no reed stops), Bastia (1844), the Madonna delle Grazie, Brescia (1845), Nizza Cathedral (1847), Mantua Cathedral (1851) and S Lorenzo, Florence (1865).

The organs of the Serassi family retained many features of the classical Italian organ: often only one manual, spring-chests (slider-chests are only used in the case of a second or third manual), with a strong basis of chorus stops, many being divided into treble and bass; the higher ranks grouped in pairs; and solo half-stops added, such as reeds, 8′ flutes and narrow-scaled string stops, the latter mainly in the bass at various pitches for accompanimental purposes.

GUY OLDHAM/UMBERTO PINESCHI

Serauky, Walter (*b* Halle, 20 April 1903; *d* Halle, 20 Aug 1959). German musicologist. He studied musicology at Halle and Leipzig under Schering (1922–8) and in 1929 he took the doctorate with a study of the aesthetics of imitation in music between 1700 and 1850. As Max Schneider's assistant he completed his *Habilitation* at Halle in 1932 with a study of Halle; he became professor there in 1940. After the war he undertook the task of rebuilding the destroyed Handel house at Halle. In 1949 he became director of the musicology institute of the University of Leipzig (from 1956 with Besseler as co-director). He was responsible for rehousing what is left of the institute's great instrumental collection.

Serauky preferred research to teaching and was an industrious scholar: his principal work, the five-volume *Musikgeschichte der Stadt Halle*, is the most exhaustive study ever written on a German town's musical history; the book's largest and most important sections are devoted to Scheidt, Türk, Reichardt, Loewe and Franz. His three-volume Handel monograph, planned as the continuation of Chrysander's unfinished work, often suffers from a surfeit of detail and was never completed. Although Serauky's writings reveal a positivist approach, he was also interested in music sociology.

LOTHAR HOFFMANN-ERBRECHT

Serbia. *See under* YUGOSLAVIA.

Séré, Octave. Pseudonym of POUEIGH, JEAN.

Serebrier, José (*b* Montevideo, 3 Dec 1938). Uruguayan composer and conductor. He began violin studies with Juan Fabbri and then entered the Montevideo Municipal School of Music, where his teachers included Pritsch (violin) and Ascone (harmony). Privately he studied with Sarah Bourdillón (piano) and Santórsola (counterpoint, fugue and composition), and he followed Estrada's courses in counterpoint and composition at the Montevideo Conservatory. In 1956 he moved to the USA and entered the Curtis Institute of Music, where for three years he studied composition with Vittorio Giannini (1956–8). For four successive seasons he attended Copland's classes at Tanglewood; he had private conducting lessons from Monteux in Maine, and from Dorati as apprentice conductor with the Minneapolis SO (1958–60). Appointments followed as conductor of the Utica SO (1960–62), associate conductor of the American SO in New York (1962–7), composer-in-residence with the Cleveland Orchestra (1968–70) and music director of the Cleveland PO (1968–71). He became principal guest conductor of the Adelaide SO in 1982 and founder and director of the International Festival of the Americas in 1984. He has received grants and prizes from the Guggenheim Foundation, the Koussevitzky Foundation, the Pan American Union and other organizations; among his awards are Columbia University's Alice Ditson Award for services to contemporary music, and the Best Orchestral Recording Award (1990). He also founded the Miami Music Festival (1984).

Serebrier began to make a name as a composer in 1956, when the overture *La leyenda de Fausto* won a national competition, and in the next year his music was introduced to the USA by Stokowski, with a performance of the First Symphony. His subsequent interest in mixed-media work is well demonstrated by *Colores mágicos*, whose première was conducted by Serebrier at the Fifth Inter-American Music Festival (Washington, DC, 1971). The work requires a 'synchrorama', a device designed by Stanley Elliott to convert sounds into visual patterns, these being displayed on a screen during performance. Each of the composition's ten variations is based on a ten-note series.

SUSANA SALGADO

Serei, Zsolt (*b* Takácsi, western Hungary, 3 April 1954). Hungarian composer and conductor. After studying the trombone and composition at the secondary music school in Győr, he attended the Budapest Academy of Music (1973–83), where his teachers included Szervánszky,

Petrovics (composition) and Kórodi (conducting). Since the time of his studies he has been a member of the New Music Studio. He joined the staff of the composition faculty at the Academy in 1986, and in 1989 he founded the contemporary music group 'Componensemble' of which he is artistic director.

The most important influences on his early career were Cage, Feldman, Christian Wolff and Boulez. During his student years he became deeply interested in minimalism as well as in serial technique. The music of Kurtág plays an important role in his structural thinking, though this is not apparent in the external characteristics of his works. Used purely for its technical properties, dodecaphonism for Serei represents a starting point; by the end of a compositional process it can be turned into a denial of itself, as, for example, in *Társalgás négyszögben* ('Conversation in Square') for piano and chamber ensemble. Though his artistic stance generally is characterized by openness and constant experimentation, in orchestration he remains faithful to the use of traditional forces. A number of his works involve open forms, improvisation and elements of chance. The works *Rege* and *Calyx* were performed at the SCM festivals in Brussels and Budapest in 1982 and 1986 respectively.

LÁSZLÓ GOMBOS

Serenade (Fr. *sérénade*; Ger. *Serenade*, *Ständchen*; It. *serenada*, *serenata*). A musical form, contemporary with and related to other mid-18th-century orchestral genres including the symphony and the orchestral partita. The term originally signified a musical greeting, usually performed out of doors in the evening, to a beloved or a person of rank. J.G. Walther (*Musicalisches Lexicon*, 1732) described it as 'ein Abend-Ständgen, eine Abend-Music; will dergleichen meist bey still- und angenehmer Nacht pflegt gemacht zu werden' ('an evening Ständchen, an evening piece; because such works are usually performed on quiet and pleasant nights'). The word, derived from the Latin *serenus*, was used in its Italian form, SERENATA, in the late 16th century as a title for vocal works (for example Orazio Vecchi's *Selva di varia ricreatione*, 1590), and in the 17th it was used for celebratory works for voices and instruments; by the end of the century it was applied by such composers as Heinrich Biber (Serenade 'Nightwatchman's Call', 1673) and J.J. Walther (*Hortulus chelicus*, 1688) to purely instrumental pieces, a usage accepted in the 18th century. It then came to stand, if loosely, for a work of a particular character, formal structure and instrumentation, of which Mozart's serenades are the chief examples. Such works were composed mainly in Italy, Austria, Germany and Bohemia; it was the practice to perform them at about 9 p.m. (the NOTTURNO, a similar kind of work, was usually given about 11 p.m.). Relics of the original meaning of the term are found in the pizzicato accompaniment of the movement entitled 'Serenade' in the String Quartet op.3 no.5 attributed to Haydn (but probably by Roman Hoffstetter); any movement with an accompaniment on plucked strings (suggesting the lute, guitar or mandolin) carried serenade connotations. Mozart used serenade arias in *Die Entführung aus dem Serail* (Pedrillo's romance) and *Don Giovanni* ('Deh vieni alla finestra'), and a stylistic link is clear between the garden scene of *Così fan tutte* ('Secondate, aurette amiche') and his wind serenades; other composers to have used similar devices include Rossini (*Il barbiere di Siviglia*), Donizetti (*Don Pasquale*) and Eugen d'Albert (*Tiefland*).

A common serenade ensemble in the early Classical period consisted of wind instruments, double bass (a cellist would of course have had to be seated) and two violas. Settings for strings without wind appeared later. The serenade became a popular form among such early Classical composers as Asplmayr, Boccherini (G501, 1776), Dittersdorf, Michael Haydn, Pichl, Punto and Johann Baptist Toeschi.

In western Austria, Salzburg and parts of Bavaria, however, the orchestral serenade dominated; in Salzburg, at least, it was cultivated from the 1730s or 40s. Its multi-movement structure, never strictly prescribed and including any number of movements up to ten, was championed by Leopold Mozart, who composed more than 30 such works by 1757, all of them now lost. His sole surviving serenade, probably composed in 1762, is a forerunner of Mozart's serenades of the later 1760s. Generally speaking, serenades include an opening sonata-allegro movement, two slow movements alternating with two or three minuets (with the occasional insertion of a movement in faster tempo) and a closing Presto or Allegro molto. Leopold and Wolfgang Mozart, as well as Michael Haydn, commonly included two concerto-like movements (one fast, one slow; Leopold Mozart's Trumpet Concerto, which derives from his D major Serenade, is typical) in addition to a prominent solo part in a trio to one of the minuets; Mozart, more than Michael Haydn, often wrote such miniature concertos in keys remote from the main key of the work. Some of his serenades, described in the family letters as 'Finalmusiken', were given as part of the ceremonies marking the end of the academic year at the Salzburg Benedictine University (K203/189*b*, 204/213*a*, 320); others were composed to celebrate special occasions (K250/248*b*, 'Haffner', written for the wedding of Elisabeth Haffner and F.X.A. Späth). The close connection between the serenade and other orchestral genres is shown by Mozart's redaction of K204 as a four-movement symphony; by the same token, he gave the soloistic movements from the 'Posthorn' Serenade K320 as a

sinfonia concertante at his Burgtheater concert (Vienna, 23 March 1783).

As an orchestral genre, the mid-century serenade had little to do with the contemporaneous DIVERTIMENTO, which usually represented one-to-a-part ensemble music ('chamber' music in the modern sense). Nevertheless, some serenades were probably given soloistically (Mozart's practice cannot be assumed to hold for the works of all his contemporaries). Mozart's Viennese serenades of the 1780s were generally scored for wind (K361/370*a*, 375, 388/384*a*); *Eine kleine Nachtmusik* K525 is ambiguous and may have been intended to be orchestral. At the end of the 18th century the soloistic serenade became an important influence on chamber music, particularly the string trio, where through Mozart's works and those of Joseph Dorsch, Johann Georg Holzbogen and Friedrich Joseph Kirmair it led to the development of the 'grand trio'; it also influenced chamber music for larger ensembles of strings and wind (like the septet and octet – for example the works by Beethoven, Hummel, Conradin Kreutzer and Schubert). Beethoven's only works entitled 'serenade' (for string trio op.8; for flute, violin and viola op.25) are to be regarded as chamber music. The serenade for mixed chamber ensemble was revived by Reger in his opp.77*a* and 141*a*.

In the 19th century the orchestral serenade began to predominate; the genre includes such works as Brahms's opp.11 and 16, Volkmann's opp.62, 63 and 69, Dvořák's opp.22 and 44, Tchaikovsky's op.48, Suk's op.6, Elgar's op.20, Sibelius's op.69 for violin and orchestra (1912–13) and (for wind instruments) Strauss's op.7. The orchestral serenade of the 19th century resembles the symphony or suite in construction, and 20th-century composers have freely explored and changed the serenade's original formal layout and instrumentation. Smaller-scale serenades include Wolf's *Italienische Serenade*, originally for string quartet, Dohnányi's string trio op.10 (1905) and Stravinsky's for piano (1925).

The German term *Ständchen* was used in the 19th century for serenade-like songs and pieces for male-voice chorus.

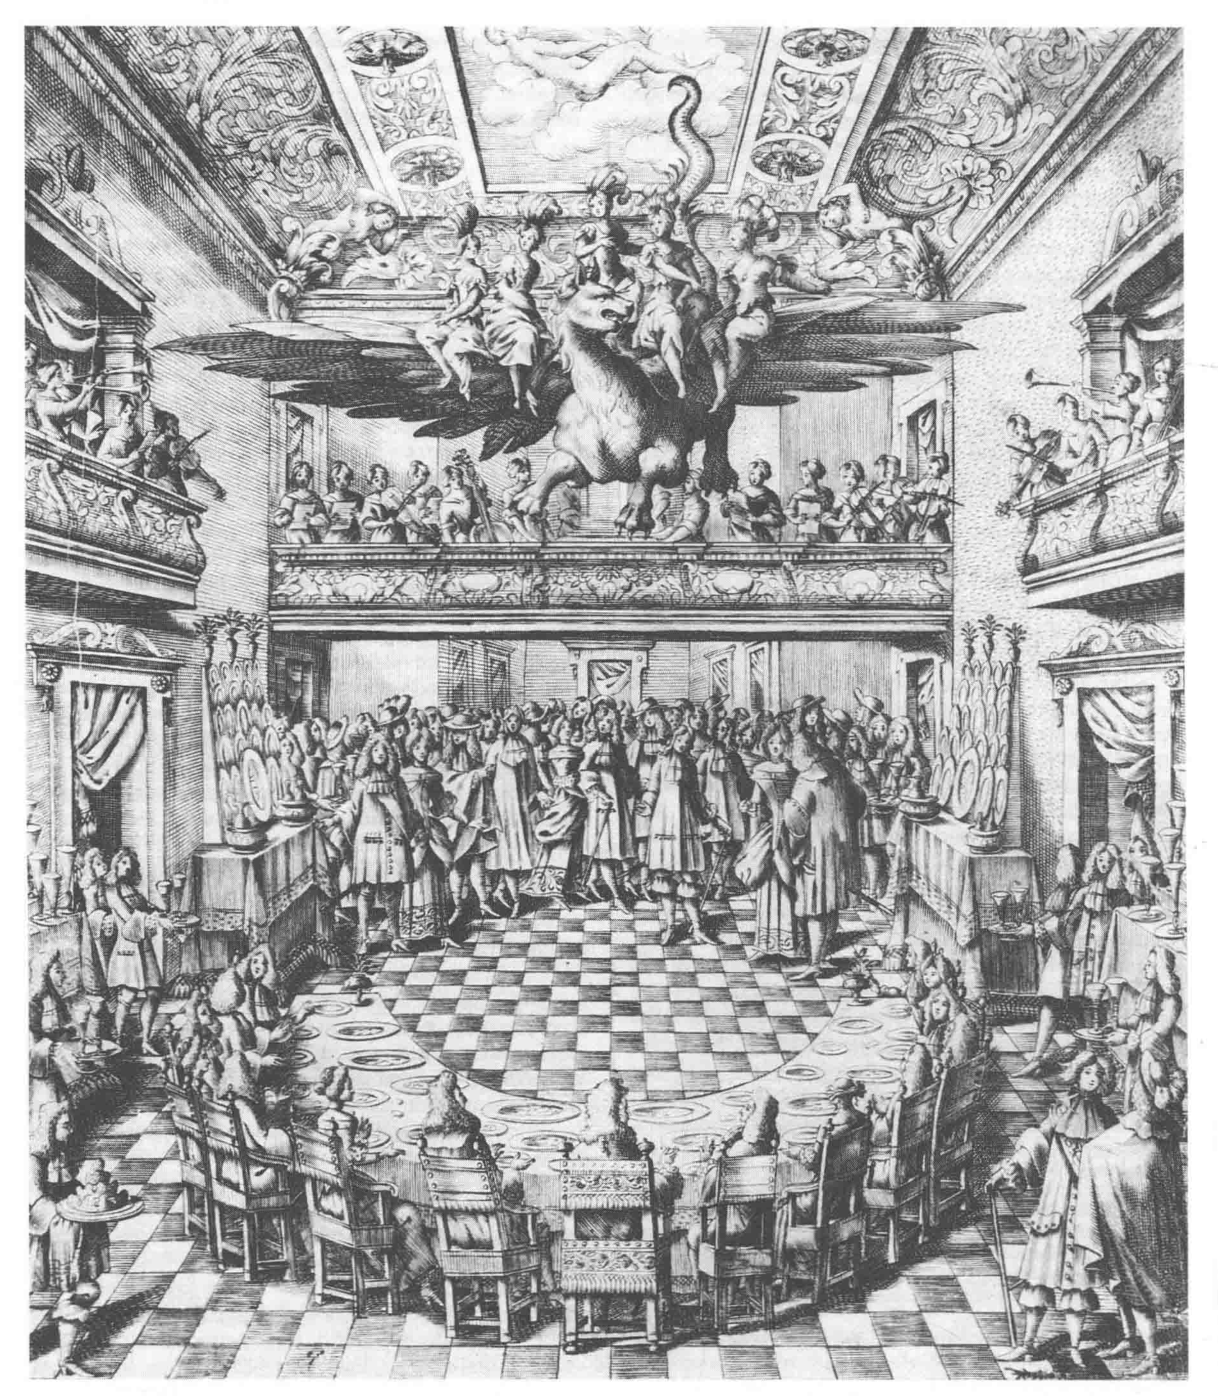
HUBERT UNVERRICHT/CLIFF EISEN



Serenata (It., from *sereno*: 'clear night sky'). A dramatic cantata, normally celebratory or eulogistic, for two or more singers with orchestra. The name alludes to the fact that performance often took place by artificial light outdoors at night. 'Serenata' has become associated incorrectly with 'sera' (evening); this etymology has long influenced the interpretation of the word, which has been used also to denote a lover's serenade or an instrumental composition (e.g. Mozart's *Serenata notturna* K239).

The first serenatas appear to have been written in Italy and in Vienna, shortly after the emergence of the solo cantata. Two early examples are Antonio Bertali's *Gli amori d'Apollo con Clizia* (1661, Vienna) and Antonio (or possibly Remigio) Cesti's *Io son la primavera* (1662, Florence). In the 17th and 18th centuries the serenata was viewed as a dramatic genre in the Aristotelian sense (the singers representing characters who communicate directly, without external narration) rather than in the senses of being acted on stage or having an identifiable plot. Its apparently contradictory nature has led to its being seen variously as a species of overblown cantata and a miniature opera. In reality, the serenata is a distinct genre, although its literary texts go by a multiplicity of descriptions that suggest greater diversity than actually exists.

'Serenata' is best understood as a catch-all term like 'opera' or 'oratorio'. It is often applied to their work by both poet and composer and is the term most frequently encountered in contemporary references. 'Cantata' was used in the same sense from early times and in the late 18th century was generally preferred: after the decline of the chamber cantata the risk of confusion had receded, while the rise of the instrumental serenade made the continued use of 'serenata' potentially misleading. Poets often substituted terms that conveyed the special essence of their work; an 'applauso per musica', for example, is explicitly a congratulatory piece, an 'epitalamio musicale' a work written for a wedding; a 'festa teatrale' is a celebratory piece for performance in an actual or improvised theatre, an 'azione teatrale' a work for theatrical performance containing some form of action. Certain poets used a particular description – 'composizione per musica', 'festa di camera', 'poemetto musicale', 'intreccio scenico-musicale' – as a kind of trademark.

The serenata shares important features with the chamber cantata, oratorio and opera. Like the cantata, it was usually a courtly entertainment given privately before an invited audience; however, learned societies and colleges also promoted serenatas, and in Venice the custom arose of performing a serenata instead of a full-length opera in public theatres on the last night of Carnival in order to leave more time for banqueting and visiting the gaming-house. Since serenatas were often given in open spaces, they could attract an outer circle of uninvited listeners and so become *de facto* public events. Serenatas usually formed an integral part of a larger celebration, or *festa*. During some large-scale celebrations whole cycles of serenatas came into being, such as the five performed at Piazzola sul Brenta on 7 and 8 August 1685 (fig.1). The singers normally read from their parts, remaining more or less stationary. Thus relieved of the burden of memorizing they could tackle more complex music, and the poet could introduce greater literary artifice, than would be feasible in an opera. The singers were, however, frequently costumed in operatic style and profiled against scenic backgrounds for enhanced visual impact and sense of occasion; in 17th-century serenatas, elaborate stage machinery was also often used.

Dramaturgically, the serenata most closely resembles the Baroque oratorio. Many serenatas contain allegorical characters personifying such concepts as duty and honour, and their texts usually have a strong moralizing strain. The composition is often divided into two approximately equal parts. It is in its musical style and resources that a

1. Domenico Freschi's dramatic cantata 'Il ritratto della gloria donata all'eternità', performed in the Sala della Musica of the Villa Contarini, Piazzola sul Brenta, 7 August 1685 (the instrumentalists are girls from the conservatory established by Marco Contarini in Piazzola): engraving from Francesco Maria Piccioli's 'L'orologio del piacere' (1685)

serenata comes closest to true opera. The rise of the genre coincided with that of the modern orchestra, and its accompaniment was orchestral almost from the beginning. Wealthy patrons sometimes recruited mammoth orchestras in a spirit of frank ostentation: in 1729, for instance, 130 players were needed for the celebration of the dauphin's birth in *La contesa de' numi* (text by Metastasio, music by Vinci). Although serenatas sometimes include choruses, movements described as 'coro' are often ensembles for the full cast of principals.

Serenatas varied greatly in length. Cassani's *Il nome glorioso in terra, santificato in cielo* (1724, set by Albinoni) is close to the average, with five closed numbers in its first part, six in its second (equivalent to slightly more than one act of a three-act *dramma per musica*). Extreme brevity is represented by Metastasio's *La rispettosa*

tenerezza (1750, set by Reutter; one closed number), extreme length by *Il nascimento de l'Aurora* (*c*1710, set by Albinoni; 25 closed numbers, with no division into two parts). Roles in serenatas, unlike those in operas, are usually given equal importance, even when they number as many as six or seven. Arias are often grouped in 'rounds' (containing one aria for each singer), in many cases paralleling a structural division of the text.

Since serenatas were performed in varied settings, and rarely in purpose-built theatres, there was no standardized manner of production. Architects, carpenters and scene painters deployed enormous ingenuity in creating 'theatres for a day', a favourite motif being the opposition between land and water. Heinichen's *Diana sull'Elba* (1719) had the performers on a boat moored in the Elbe and the Saxon court watching from the bank (*see* DRESDEN, fig.8); conversely, *Le gare delle lodi di Sua Eccellenza conte di Melgara* (1686, composer unknown) placed the audience on a boat and left the performers on land.

Because of the pressure of time under which they often had to work, and the need for liaison with the commissioning patron, the poets and musicians commissioned to write serenatas were nearly always local. Although most are also known from their operatic activity, some minor figures and *dilettanti* who received no operatic commissions contributed to the genre. The only author who operated at an international level was Metastasio, many of whose texts achieved classic status and, like his opera librettos, were set repeatedly.

The occasions that called for serenatas can be divided into those that could be prepared for well in advance (e.g. namedays, weddings, annual ceremonies and official visits) and those which were less predictable and were celebrated as soon as possible after the event (births, military victories, peace treaties). Most serenatas contain a clear allusion to the event being celebrated. Re-use or adaptation of a text was rare, perhaps because this was thought disrespectful to both original and new recipients of homage; however, the borrowing of short portions of text or music from earlier works was not precluded, though done less blatantly than in opera. Again, the great exception is Metastasio, whose most important texts contain a minimum of topical references, seemingly in order to render them re-usable; *L'isola disabitata*, for example, was set by 11 composers in the 30 years following its première in Bonno's setting (1753, Aranjuez).

Most serenatas lack a plot in the ordinary sense, although a few (e.g. Handel's *Aci, Galatea e Polifemo*) include a little dramatic action. The characters, when not allegorical figures, can be deities, semi-deities or denizens of Arcadia; only rarely do historical figures appear, as in Metastasio's *Il sogno di Scipione* (1743). The absence of plot meant that the poet had to work towards the climax (often the revelation of the person or event celebrated) at a leisurely pace. Two favourite structural models were employed. In the 'debate' or 'contest', frequently indicated by the words *gara* or *contesa* (or their opposites, *unione* and *concordia*) in the title, the characters express different points of view which finally become reconciled; in the 'quest' the object of celebration is discovered in stages. Topical references (some, where expedient, oblique in the extreme) are customarily veiled in Arcadian language: an Austrian emperor may be alluded to by the adjective 'augusto', while Venice often appears as 'L'Adria' (the Adriatic). Flights of fancy that would have been considered risky deviations in opera find an occasional place in the serenata: a fifth of *Il nascimento de l'Aurora* is taken up by a dramatically irrelevant word-game that gives rise to astonishingly lively banter.

The serenata quickly spread beyond the Alps to centres of Italian culture in northern Europe. In Lutheran states vernacular versions appeared. The works by J.S. Bach known today as 'secular cantatas' could accurately be described as German serenatas (indeed, BWV66*a* and 173*a* are titled 'serenata'). In England the court ode normally took the form of a serenata by the start of the 18th century; typical examples are the birthday odes for the sovereign composed by Kusser in Dublin between 1709 and 1727 and Boyce's birthday and New Year odes (1751–79). Only France – strangely, in view of its successful naturalization of opera and the cantata – resisted the serenata. The genre petered out in the early 19th century, its social and aesthetic basis having been lost through the *embourgeoisement* of aristocratic culture and the universal reaction against Classicism and Arcadianism. The choral cantata is partly its linear descendant, partly its replacement.

The significance of the serenata in its time is not yet fully appreciated. From a modern point of view it sits uncomfortably between stage and concert hall and has suffered as a result. However, the growth of music theatre as distinct from traditional opera has encouraged the development of an aesthetic more tolerant of forms of presentation intermediate between full staging and concert performance, opening the door to imaginative and stylistically fitting revival of the best works in the serenata tradition.

MICHAEL TALBOT

Sereni, Mario (*b* Perugia, 25 March 1928). Italian baritone. He studied at the Accademia Musicale Chigiana in Siena and the Accademia di S Cecilia in Rome and privately with Basiola. His début was in 1953 at the Florence Maggio Musicale in Lualdi's *Il diavolo nel campanile*, and he went on to sing in Buenos Aires, Chicago, Mexico City, Milan, Naples, Palermo, Rome, Verona and Vienna. After his Metropolitan Opera début in 1957, as Gérard in *Andrea Chénier*, he became a mainstay of the company, singing over 380 performances of 26 roles. His robust but flexible voice allowed him to span the baritone repertory from the lyric to the dramatic. It can be heard most advantageously in recordings as Germont in Callas's Lisbon *La traviata* and as Sharpless in Victoria de Los Angeles's second set of *Madama Butterfly*.

CORI ELLISON/ALAN BLYTH

Seres, William (*fl* 1546–77). English music printer. In 1553 he acquired a monopoly for printing psalms, through the influence of Sir William Cecil; in the same year he printed two volumes that included music, Francis Seagar's *Certayne Psalmes select out of the Psalter of David, and drawen into Englyshe Metre, with Notes to every Psalme* and Christopher Tye's *The Actes of the Apostles*. Seres continued to work as a printer, but no other example of printed music survives from his press. He is generally supposed to have been in partnership with John Day, who acquired the sole right to print the English Metrical Psalter with music in 1559. Seres had several addresses in London during his career; in 1553 he was working 'at the sygne of the Hedge-Hogg'.

MIRIAM MILLER

Sergeyev, Konstantin Mikhailovich (*b* St Petersburg, 20 Feb/5 March 1910; *d* St Petersburg, 1 April 1992). Russian dancer and choreographer. *See* BALLET, §3(iii).

Sergeyeva, Tat'yana Pavlovna (*b* Kalinin, 28 Nov 1951). Russian composer, pianist and organist. At the Moscow Conservatory she studied piano with L. Roshchina, organ and harpsichord with Natal'ya Gureyeva (1970–75) and composition, at undergraduate and postgraduate levels, with Aleksandr Nikolayev (1977–81). Her career as a pianist and organist began in 1974 and she also worked at the conservatory from 1975 to 1988. She was twice laureate of the All-Union Young Composers' competitions, in 1977 and 1979, and was a winner of the 1987 prize of the Composers' Union of Russia. She is an Honoured Representative of the Arts of Russia (1995), a Laureate of the Shostakovich Prize (1996), and she is active both in Russia and abroad as a composer, pianist and harpsichordist (USA, 1991 and 1996; Germany, 1995 and 1996).

Sergeyeva's music dwells in a world of antiquity and classicism, and the texts of her vocal works are drawn from 18th-century Russian poetry or older stylized forms. Yet, despite the frequent use of classical forms and genres, her work is very much a part of a living tradition rather than of a lost age of perfection. She employs both direct and disguised quotations, mostly of well-known 'popular classics', and her own themes are concise; close attention to detail results in a noticeable clarity of texture. Lightness and joy – rare qualities in modern music – are hallmarks of her work.

OL'GA MANUL'KINA

Serialism. A method of composition in which a fixed permutation, or series, of elements is referential (i.e. the handling of those elements in the composition is governed, to some extent and in some manner, by the series). Most commonly the elements arranged in the series are the 12 notes of the equal-tempered scale. This was so in the technique introduced by Schoenberg in the early 1920s and employed by him in most of his subsequent compositions. Serialism was quickly taken up by his pupils, including Berg and Webern, and then by their pupils, but not at first by many outside this circle, the most important exceptions being Dallapiccola and Krenek. The method spread more widely and rapidly in the decade after World War II, when Babbitt, Boulez, Nono and Stockhausen produced their first acknowledged works. These composers and their colleagues sometimes extended serialism to elements other than pitch, notably duration, dynamics and timbre. At the same time serial techniques began to be used by already established composers; here the outstanding example was Stravinsky. The diverse range of composers so far mentioned should indicate that serialism cannot be described as constituting by itself a system of composition, still less a style. Nor is serialism of some sort incompatible with tonality, as is demonstrated in works by Berg and Stravinsky, for example, though it has most usually been employed as a means of erecting pitch structures in atonal music.

1. The 12-note series. 2. 12-note serialism. 3. Serialism with other pitch-class collections. 4. Rhythmic serialism. 5. 'Total serialism'. 6. Some considerations.

1. THE 12-NOTE SERIES. In 12-note serialism (sometimes referred to as 'dodecaphony', a term which is ambiguous in that it can refer to non-serial atonal music) the series is an ordering of the 12 notes of the equal-tempered chromatic scale (i.e. the 12 pitch classes) so that each appears once. Such a series can exist at 12 transpositional levels, all of which Schoenberg considered to be forms of the same series, and he also included the inversion, the

retrograde and the retrograde inversion at each transpositional level in the complex, so that the series may be used in any of 48 forms. Thus the constant reference is a series of 11 interval classes in any of four shapes – prime, retrograde, inversion and retrograde inversion – at any of 12 transpositional levels. This is the understanding of the series that most later composers have accepted.

There is no standard convention for naming serial forms. That used here is as follows: 'P' indicates prime and 'I' inversion; the subscript numeral is the pitch-class number of the initial pitch class, i.e. the number of interval classes of a semitone by which the initial pitch class is raised above C (e.g. '$_{10}$' indicates a series beginning with B♭); and 'R' indicates the retrograde of the cited series.

2. 12-NOTE SERIALISM. The basic convention in serial composition is that the pitch successions in any portion of the music should be the whole or part of one or more statements of a series. This leaves undefined the registers at which the pitch classes are presented (and questions of change in register from one serial statement to another), what part of the series is projected linearly and what part vertically, how many statements of the series are made concurrently, to what extent each polyphonic voice presents its own sequence of serial statements, how many different series are used (and, if more than one, how they are related, if at all), and how, if at all, concurrent or consecutive serial statements are linked, in nature (e.g. by having I_6 follow P_0) and/or compositional usage (e.g. by shared notes). The examples that follow suggest some of the practices in these areas established by different composers. It is important to note that these practices are not restricted to the composers in whose work they are demonstrated, and that the composers concerned are/were not restricted to the particular practices described. Further observations will be found under TWELVE-NOTE COMPOSITION.

(i) Schoenberg. The Variations for Orchestra op.31 (1928) afford a compendium of Schoenberg's early serial technique. The *Hauptstimme* of the theme (bars 34–57) presents four linear statements of the series in the forms P_{10}–I_7R–$P_{10}R$–I_7; such a use of one or more serial statements as a melodic theme is found in many others of Schoenberg's serial works. Ex.1 shows the first two forms

in this instance. Note that the two are identical in hexachordal content. It is clear, therefore, that the first hexachord of I_7 has no pitch class in common with the first hexachord of P_{10}; or, to put it another way, these two hexachords together form a 12-note aggregate (or the 'chromatic total'), that is, they are complementary. Where this situation obtains, the series is said to exhibit the property of combinatoriality, specifically of inversional hexachordal combinatoriality (*see* SET). Many of Schoenberg's series are of this (specific) type, and he exploited the property when associating serial forms. Thus the four forms of the theme's *Hauptstimme* are chosen and arranged so that, with one exception, complementary hexachords are adjacent. If *x* and *y*, in that order, represent the hexachordal contents of P_{10}, then this line presents *x–y–x–y–y–x–y–x*.

The property of combinatoriality also conditions the association of simultaneous serial forms in the theme of op.31. Thus P_{10} is accompanied by I_7, I_7R by $P_{10}R$, $P_{10}R$ by I_7R and I_7 by P_{10}: each form is accompanied by its inversional hexachordal combinatorial partner. As often in Schoenberg, these relationships are to some extent hidden. Only at the statement of $P_{10}R$ accompanied by I_7R is hexachordal partitioning made explicit: the hexachords of $P_{10}R$ are presented as separate phrases and those of I_7R as three-note chords – successive in the case of the first hexachord, overlapping in the case of the second – so that *y* (line) is accompanied by *x* (chords) and then *x* (line) by *y* (chords), that is, complementary hexachords are aligned. In the remaining three serial statements of the *Hauptstimme*, the phrases are other than hexachordal and so are the accompanying chords (there is almost, but not quite, an identity between the numbers of pitches in the phrases and the numbers of pitches in the chords).

One final point before leaving these 24 bars. In the last six of them there is a *Nebenstimme* stating P_1. Reference to ex.1 will show that the series contains two intervals of the tritone class (in the case of P_{10} these are B♭–E and C♯–G) and that the four pitch classes involved in these intervals together form a diminished 7th chord. Since this chord divides the octave into equal parts of a minor 3rd, any two serial forms (of which either or both may be P or I) separated from each other by one or more interval classes of a minor 3rd will contain the same four pitch classes at the tritone intervals (i.e. at positions 1, 2, 8 and 9; or, in retrograde forms, 4, 5, 11 and 12), though, of course, the pitch classes will be reordered; in other words, the unordered set of pitch classes in these positions is invariant under the conditions stated. Thus, to return to the particular case at the close of the theme, P_1 is related to the four forms announced in the *Hauptstimme* by this invariant relation. Furthermore, a special association links P_1 with the *Hauptstimme* form with which it is concurrent, namely I_7: this pair is one of those that holds the ordering at two (the maximum) of the positions under discussion (here 8 and 9) invariant.

Association through an invariant unordered set at the tritone intervals occurs elsewhere in the composition – for example at the beginning (bars 58–62) of the first variation, where a statement of P_{10} is accompanied by P_1, P_{10}, I_1 and I_{10}. Moreover, these four forms in the accompaniment are presented in homophonic pairs, P_1/P_{10} and I_1/I_{10}, so that they produce a preponderance of vertical intervals of the minor-3rd class (minor 3rds and minor 10ths) or of a major 6th (which is related to the minor-3rd class by octave displacement), so drawing attention to the interval class that governs not only the invariant relation described here but also the combinatorial relation (combinatorially related forms, such as P_{10} and I_7, are separated by the interval class of a minor 3rd).

In the examples given so far, each 'voice' (which may be linear or chordal) is assigned one or more complete serial forms. This is by no means always the case in Schoenberg. At the opening of the third variation of op.31, for instance, the *Hauptstimme* is an ostinato of six-note tritone figures derived from the series as shown

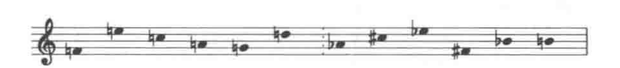
in ex.2; the other pitch classes of the series are filled in severally by other instruments. In addition, the forms

Ex.2

used to generate these tritone figures are in tritone relations with each other: I_7–P_1–I_1–P_7 (bars 106–9) and $P_{10}R$–$I_{10}R$–P_4R–I_4R (bars 111–14). During the bars in question two horns are presenting the melody or theme (with rhythmic modification) so that P_{10} is associated with the first group and I_7R with the second. The relationships of symmetry, invariance and combinatoriality that exist within and between these groups, each of five forms, can readily be discerned.

It is impossible to illustrate here all the means used by Schoenberg in associating serial forms in op.31, still less in his work as a whole; but the principles of combinatoriality and invariance are almost always of fundamental importance. In some later compositions, notably the Violin Concerto op.36, the Fourth String Quartet op.37 and the Piano Concerto op.42, he elaborated relations between serial statements and associations among them, on the analogy of the long-term techniques of tonal composition, to assure the coherence of extended forms. His handling of serialism was almost always based on tonal models in matters of form (sonata and variations in particular) and texture (theme and accompaniment), even if it would be difficult to find a precedent – outside his own tonal works – for the richly polyphonic character of his writing. The String Trio op.45 and the Phantasy op.47, however, exhibit forms that are not so readily referable to conventional patterns.

Schoenberg's later works also show a relaxation of serial convention. Not only did he return to tonal methods for whole compositions, but within non-tonal pieces he admitted tonal features that he had previously avoided, such as vertical octaves and even diatonic triads: the *Ode to Napoleon* op.41 ends in E♭. This work is a somewhat extreme example, in that it cannot be considered strictly serial at all, since reorderings of pitch classes within hexachords are permitted; in other words, its basic set is not a series but a hexachordal trope. Such reorderings also occur in, for example, the String Trio, but to a lesser extent.



(ii) Berg. If Schoenberg's serial practice became, in some respects, increasingly liberal, Berg's was never anything but free. In no work – indeed, in no movement – did he keep to a single series. The first movement of the Lyric Suite for string quartet (1926), for instance, is based not on a series but on the succession of 5ths beginning on F (ex.3). This is first presented (bar 1) as three four-note

Ex.3

chords but, as in Schoenberg, partitioning into hexachords is more important. Reordering within the hexachords produces the series shown in ex.4, which is presented in

Ex.4

the *Hauptstimme* of bars 2–4. It is an 'all-interval series', that is, a series which, in any one form, contains an interval of each class except the unison. Examination of the series will show that it also has the property of inversional hexachordal combinatoriality, though this is not exploited in the composition, nor in Berg's music generally. Cyclic permutation of ex.4 produces another series (ex.5: the last four pitch classes of ex.4 here become

Ex.5

the first four), which is heard in the *Hauptstimme* of bars 7–9. A third series, first presented in bar 33, is generated by reordering the hexachords of ex.3 so that interval-class size is minimal (ex.6).

Ex.6

It is clear that Berg's licences with Schoenbergian convention produce series of quite diverse types within one movement, and in larger works, notably the opera *Lulu*, reordering is more extensively applied. In addition, Berg often used pitch material unrelated to the set, frequently resorting to tonal practice (most notably in the Violin Concerto), and he made independent use of fragments of serial statements. However, if he employed more freely than did Schoenberg non-standard serial transformations (cyclic permutation etc.), he limited his choice from the conventional 48 forms. In particular, retrograde forms are rare in his music outside sections that are retrograded as a whole (as, for example, in *Der Wein*). Furthermore, the thematic character of the series is emphasized by a limitation of octave displacement from one serial statement to another (the series shown in ex.6, for example, is always stated with its intervals conjunct), and series of different type are projected in a manner that keeps other aspects constant (for instance, the first appearances of exx.4 and 5 are both in the first violin and in very similar rhythms).

(iii) Webern. By contrast with Schoenberg and Berg, Webern always used a single series for each composition (counting the numbers of opp.17 and 18 as separate compositions), he drew only on the standard 48 forms, he rarely repeated notes or groups of notes within serial statements after opp.17–20, and he almost never presented the series as a melodic theme in a constant timbre. Another distinctive feature of Webern's serialism is the use of highly symmetrical series. That of the String Quartet op.28 (1938), shown in ex.7, is typical. The

Ex.7

second hexachord is the retrograde inversion of the first transposed by an interval class of a major 6th, so that $P_n = I_{n+9}R$; thus there are only 24 different forms of the series. Moreover, the three tetrachords of the series are in the relation p_0–p_4r–p_8 (i.e. the second tetrachord is the retrograde of the first transposed by an interval class of a major 3rd, and the third is the first transposed by an interval class of a minor 6th); thus transposition of a

Ex.8

serial form by one or more interval classes of a major 3rd will generate a serial form containing the same tetrachords in different positions, and two of the three will be retrograded.

This property of different serial forms having the same content of tetrachords is used at the opening of the first movement, the first three serial statements being of P_7, P_3 and P_{11} (obviously, any or all of these names might be replaced by IR ones, given the symmetrical property described). Each adjacent pair is linked by terminal tetrachords held in common, as shown in ex.8. Linking serial forms through common terminals is a frequent practice in Webern from op.21 onwards, but the shared notes are most usually one or two in number; this technique may limit, of course, the range of serial statements that can be chosen to follow a given form. Before leaving ex.8 it should be noted that the three serial forms in that example shown are in the relation of prime tetrachordal combinatoriality; that is, a 12-note aggregate is formed by all of the first or second or third tetrachords. However, Webern did not normally make explicit use of the combinatorial relations in which his symmetrical series are rich. The vertical association of serial forms in the first movement of op.28 (which is, from bar 16 on, composed in two-part canon) is rather of the type P_n with P_{n+3}, which can, given the symmetrical relation, be written I_nR with P_n; and consecutive association in this movement is governed, as hinted above, by the property of terminal invariance, P_n having four notes in common with P_{n+8} following or two notes in common with $P_{n+10}R$ following.

The opening quadruple canon of the second movement (bars 1–18) shows tetrachordal invariance at its most pervasive – the passage makes use of only six serial forms, P_0, P_4, P_8 and their retrogrades, and therefore of only three tetrachords of different content – and suggests how much Webern's serialism was conditioned by symmetry and coincidence.

(iv) Babbitt. The composer who has been most consistent in theoretically codifying and compositionally proceeding from the work of the first-generation serial composers is Babbitt. Two notions central to his serialism – the secondary set and the derived set – were developed from the practices, respectively, of Schoenberg and Webern; and he made considerable and extended use of combinatoriality. Something of these features can be illustrated in a short passage (bars 266–75) of the Second String Quartet (1954). This passage opens with a statement of the principal series in the form P_8 (ex.9) by all four

Ex.9

instruments, after which the first violin and the viola present I_5 (ex.10). These two forms are in the relation of

Ex.10

inversional hexachordal combinatoriality. The presence of that property makes it possible for a new 12-note series to be formed of complementary hexachords from different serial forms; such a series is termed by Babbitt a 'secondary set'. (In ex.1, from Schoenberg, a secondary set is formed by the second hexachord of P_{10} followed by the first hexachord of I_7R.) While the statement of I_5 is in progress, a secondary set (ex.11) is presented by the second violin

Ex.11

and the cello. Examination will show that ex.11 is constituted from the second hexachord of $I_{11}R$ and then the first of P_2.

It is evident that these two forms, $I_{11}R$ and P_2, are identical with each other in hexachordal content and that both are hexachordally combinatorial with P_8. Where, as here, a P form has I, IR and P combinatorial partners (any serial form will, of course, be hexachordally combinatorial with its own retrograde), the series is said to be 'all-combinatorial'. The use of hexachordal combinatoriality to govern the succession and superposition of serial forms at the beginning of the passage under discussion is shown by ex.12, where (a) indicates a hexachord of content

Ex.12

		I_5(b)	I_5(a)	P_8(b)	I_5R(a)
P_8(a)	P_8(b)	$I_{11}R$(a)	P_2(b)	P_2R(a)	P_2R(b)

identical with that of the first hexachord of P_8 and (b) one of complementary content. The presence of secondary sets is obvious from the example.

One item has been left out of account in ex.12: in bars 271–2 the cello presents a 12-note series (ex.13) which is

Ex.13

neither a form of the principal series nor a secondary set. Note that its constituent trichords are in the relation p_{10}–i_9r–i_3–p_4r (these names are analogous to those used in considering the symmetrical structure of the series of Webern's op.28). The first trichord is found in one form of the principal series, P_3R, where it occurs in positions 2–4 (ex.14). A series formed by taking an element (of

Ex.14

P_3R

two, three, four or six pitch classes) from a serial form and building from it, by serial transformations, a new 12-note succession is termed a 'derived set', and so ex.13 is a derived set in relation to the principal series. Note, too, that it has the hexachordal contents (a)(b).

Derived sets and combinatoriality can be further exemplified in the portion that immediately follows that shown in ex.12 (see ex.15). The series presented by the

Ex.15

vn 1	F♯	A♭	A	G	F	E	B♭	B	C♯	E♭	D	C
vn 2	E♭	C	C♯	D	F	E	B♭	B	A♭	G	F♯	A
va	F	E	D	F♯	C♯	E♭	A	B♭	G	C	A♭	B
vc	B♭	G	B	A	C	A♭	D	F♯	E♭	F	C♯	E

first violin is a derived set based on the trichord at positions 10–12 of I_3 of the principal series, that presented by the second violin is a derived set based on the trichord at positions 4–6 of P_{11} of the principal series, and that presented by the cello is a derived set based on the trichord at positions 1–3 of I_{10} of the principal series. The viola presents a principal-serial form, $I_{11}R$. Solid boxes indicate some of the combinatorial relations, both trichordal and hexachordal, operating here; the dotted box indicates the central tetrachord held invariant between the two violins. Note that the middle interval class in these four series is in each case the tritone.

The ways in which Babbitt has used properties of the series to project large forms can only be suggested here, taking again as example the Second String Quartet. The principal series, of which forms are shown in exx.9, 10 and 14, is an all-interval one, the intervals being, in semitone classes, 3–8–5–9–1–6–2–7–4–10–11. At the opening a derived set based on the first interval class, that of the minor 3rd, is presented (ex.16), followed by a

Ex.16

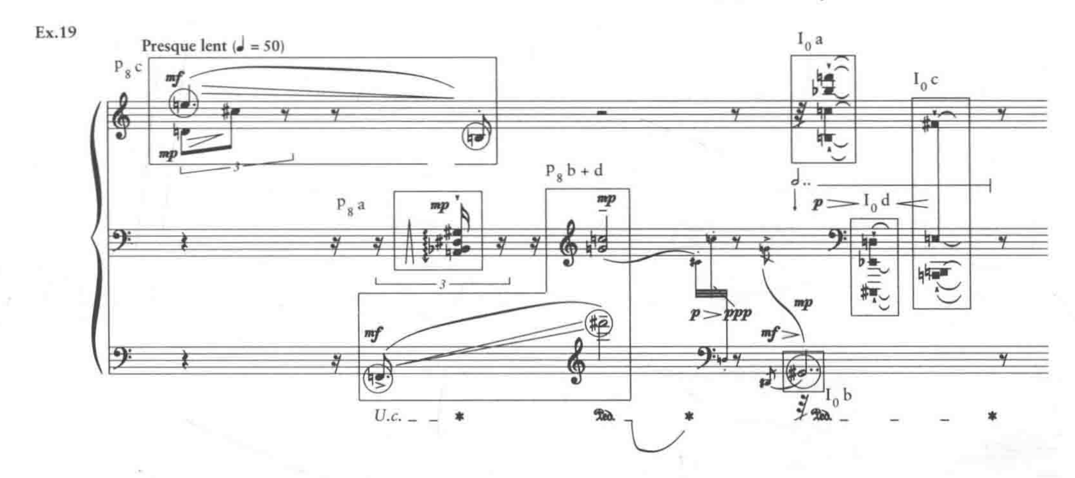
derived set based on the second interval class, that of the minor 6th. This is succeeded by a derived set based on the trichord formed by these two interval classes (ex.17), a

Ex.17

set which is used to build bars 7–18. Then the third interval class is introduced, again in a derived set, and then a derived set based on the trichord formed by the second and third interval classes. The composition proceeds in this manner until the first six interval classes have been introduced, when the first hexachord of the principal series is presented by the second violin solo *ff* (bar 114). In the second half of the quartet the second hexachord of the principal series is established in like manner, the whole principal series appearing for the first time in bars 266–8 (i.e. at the beginning of the passage considered above). This is, of course, no more than a simplified outline of the pitch connections that exist in the work.

(v) Boulez. In few of Boulez's compositions is it an easy matter to demonstrate throughout how the series is referential, and he has developed procedures, such as 'chord multiplication', which increase the hazardousness of such demonstration. However, the section 'Texte' from the 'formant' *Trope* of the Third Piano Sonata (1957) is of relatively straightforward serial facture, while at the same time it suggests the freedom of his practice. 'Texte' is based on a 'cantus firmus' formed by four overlapping statements of the series (ex.18); the similarity with Webern's method of linking statements in op.28 is obvious. This chain of statements returns to the opening tetrachord: the idea of cyclic structure is essential to *Trope* (whose sections may be cyclically permuted) and to each part of it. The dotted lines in ex.18 divide each serial statement into sets of four types, of which three are related in that *a* is equivalent in content to *b* + *d* transposed by an interval class of a minor 3rd for any given serial statement. Thus the 'cantus firmus' contains 13 of these sub-serial sets, each of which forms the basis for a defined section of 'Texte'.

In decorating the 'cantus firmus' set in each section, choice is made from other statements of the series, so that each section is built up of the pitch classes of one serial statement, often with note repetitions. Ex.19, from the opening of 'Texte', shows the appearances of the first two sets of the 'cantus firmus' (circled notes), and the serial forms with which they are associated. Note that these forms are defined not by order but by the compositional projection of their constituent sets (of the types *a*, *b*, *c* and *d*). The combination of freedom of choice and order in these 'superstructure' serial forms with strict order in the 'cantus firmus' is typically Boulezian.



3. Serialism with other pitch-class collections. Composition with series containing a number of pitch classes greater or lesser than 12 was practised by Schoenberg in some movements of the Five Piano Pieces op.23 and the Serenade op.24 (both 1920–23), works which also contain some of the earliest examples of 12-note serial composition. Op.23 no.2, for example, uses a series of nine different pitch classes, though pitch material unrelated to this also occurs; and op.24 no.3 is based on a 14-note series in which three pitch classes are each duplicated. In the former example transpositions of the series are present, but I and IR forms appear only in the last six bars and R forms not at all; on the other hand, op.24 no.3 makes use of P, R, I and IR forms, but at only one transpositional level.

Stravinsky employed series of fewer than 12 pitch classes in several works after and including the Cantata (1951–2) before fully adopting 12-note serialism in *Threni* (1957–8). The strictest of these in serial usage is *In memoriam Dylan Thomas* (1954), whose series consists of five different pitch classes. Post-Schoenberg examples of composition with series of more than 12 pitch classes include Berio's *Nones* for orchestra (1954). This is based

Ex.18

Ex.19

on a 13-note series (ex.20) consisting of two overlapping heptachords, of which the second is the retrograde inversion of the first.

Ex.20

Few composers have attempted to extend serialism to pitch systems other than the equal-tempered semitonal, but Boulez has described a method for deriving quarter-tone series from semitone series, and his cantata *Le visage nuptial* (1946, revised 1950–51) makes use of quarter-tone serialism in parts and to some extent.

4. Rhythmic serialism. The use of ordered patterns of durations appears in Berg (Lyric Suite, third movement) and Webern (notably in the Variations op.30 for orchestra, 1940). Berg's rhythmic series is made up of 12 durations, each of one, two or three units; Webern employed two four-item series (ex.21). Both used the

Ex.21

series in exact retrogrades, varied them by filling in parts of durations with rests, and 'transposed' them by multiplying all values by the same integer. There are, of course, precedents for these procedures, and only the Berg example – by reason of its length and its use of rhythmic order independent of pitch succession – seems to represent an attempt to find an analogue for pitch-class serialism in the rhythmic domain.

Boulez, who had been working towards the serialism of durations in several works of the late 1940s, employed a systematic method in *Structures Ia* for two pianos (1952). His notion of a 'chromatic' duration series – one consisting of 12 values, each a different whole number of demisemiquavers from one to 12 – came from Messiaen's *Mode de valeurs et d'intensités* for piano (1949), where the use of the duration set (and sets governing other aspects) is not serial. In the Boulez example, however, the set is employed as a series. The order numbers of the pitch classes in the serial form P_3 (i.e. the numbers from 0 to 11 assigned to them in the order in which they appear in that serial form) are retained by those pitch classes in the 47 other serial forms. This produces 48 orderings of the numbers 0–11 which can be used to generate 48 orderings of the integral durations from one to 12 demisemiquavers by adding one to each order number and expressing the result in demisemiquavers. The duration-serial forms are used independently of the corresponding pitch-class-serial forms (otherwise the same pitch class would always be associated with the same duration).

Such interpretations of rhythmic serialism are problematic. There is no equivalence class to correspond with the pitch class (in this example the durations used are absolute, but there are similar cases in which composers have proposed that durations in the ratio 1:2 be regarded as members of an equivalence class – a seemingly arbitrary proposition prompted by analogy with frequency), there is no analogue for inversion and transposition (the fact that, for instance, the pairs semiquaver/dotted quaver and crotchet/dotted crotchet have the same 'duration interval' is of dubious perceptibility) and the listener may easily miss the distinction between, for example, 11 and 12 demisemiquavers.

Babbitt has used rhythmic orderings which are formally analogous with pitch-class serialism. The first of the Three Compositions for Piano (1947) employs a four-element duration series: 5–1–4–2. This may be 'inverted' by complementation of the durations to six (complementation of pitch-class numbers to 12 is equivalent to inversion in pitch-class serialism), thus producing 1–5–2–4; the generation of R and IR forms is straightforward. In later works Babbitt's rhythmic serialism is subtler. The analogue of pitch is now not duration but time point, defined as the duration which separates the attack from the beginning of the bar. For instance, it is possible to write a series analogous to ex.9 by interpreting pitch-class numbers as time-point numbers (ex.22). Duration is now

Ex.22

8 11 7 0 9 10 4 6 1 5 3 2

equivalent to interval (and, as in the rhythmic serialism of Boulez and Berg, it may be filled in part by silence), but only consistently so if the bar contains an integral multiple of 12 units. Time-point series may be 'inverted' by complementation of their time-point numbers to 12; they may be 'transposed' by addition of a constant value to each time-point number; they may be retrograded; they may be associated by 'combinatoriality'; and they may generate secondary and derived sets. The perceptibility of time-point serialism must remain questionable, however; in particular, it depends on the perception of metre, which

Ex.23

may well be doubtful when several serial forms such as ex.22 are presented simultaneously.

5. 'Total serialism'. If rhythmic serialism raises difficulties of perceptibility (and performability), these are still more acute when serial procedures are applied to other sound aspects (dynamics, tempo, timbre/attack/instrumentation etc.). In the early 1950s several European composers, notably Boulez, Stockhausen and Nono, adhered more or less firmly to such extensions of serialism; the term 'total serialism' was coined for these endeavours. Boulez's *Structures I* contains not only the rhythmic serialism described above but also quasi-serial composition using sets of 12 dynamic markings and 12 indications of attack. The sort of heterogeneity that issued from such practices is illustrated in ex.23, from the opening of Stockhausen's *Kontra-Punkte* (1952), though music constructed so consistently in isolated 'points' is rare in this composition and, indeed, in Stockhausen's work as a whole. Note that the first five bars announce a 12-note set, but the pitch-class serialism of the work is far from orthodox.

Few compositions apart from Boulez's *Structures I* attempt to follow 'total serialism' with any degree of thoroughness, but the notion did give rise to ideas that remained important in the work of those composers most closely associated with it, notably Boulez himself, Stockhausen, Nono and Pousseur. Principal among these ideas were the avoidance of repetition at all levels and in all domains, and the pre-compositional creation of 'scales' determining features that had not been so determined previously, even if the choice made from those 'scales' was not always in accordance with any serial procedure. Stockhausen's *Gruppen* for three orchestras (1955–7) makes serial use of a 'chromatic scale' of 12 tempos, with an 'octave' between, say, crotchet = 60 and crotchet = 120, and the other values in a geometric progression analogous to that of the equal-tempered semitone scale. Again, the differentiation of degrees between vocal sound as sound and vocal sound as semantic meaning in Boulez's *Le marteau sans maître* for voice and instruments (1953–5) and Stockhausen's *Gesang der Jünglinge* for tape (1955–6) may be traced to the experience of 'total serialism'.

Another aspect of 'total serialism' was the search for forms that would be in some way consonant with the method. Boulez's *Trope*, mentioned above, shows this approach. Barraqué spoke of an immense, unfinished work, such as his *La mort de Virgile*, as being the consequence of serial procedures, perhaps specifically of his own concept of 'proliferating series'. And the permutational nature of serial composition was one cause of the introduction of aleatory forms allowing the performer(s) to permute passages of composed music.

6. SOME CONSIDERATIONS. A few of the problems of perceptibility associated with the serialism of rhythmic elements and other non-pitch aspects have been alluded to, but the question of whether or not pitch-class serialism is perceptible has not yet been mooted. Meyer has raised doubts in this area on several grounds: early learning conditions the listener to the perception of tonal but not serial music; serial music is often composed with a very small degree of redundancy (that is, listeners can miss only a very little of the information presented if they are to perceive serial procedures); different serial works, even by the same composer, may employ quite different serial procedures, so that learning to perceive those in one work may not help the listener in others; and finally, perception of serial procedures is not assisted by simple relationships, such as octaves, perfect 5ths and 1:2 duration ratios, which are, most commonly, specifically avoided.

Lévi-Strauss has asserted that serial music cannot operate as a communicable language because it lacks a primary 'level of articulation' (which is provided in tonal music, for example, by the hierarchical relationships between pitch classes in the diatonic scale) necessary to establish and define the listener's expectations. Ruwet has questioned the work of postwar European serial composers on these and other grounds, also from the standpoint of structural linguistics. It should be noted that these writers, with the possible exception of Lévi-Strauss, have not therefore condemned serial music, but have rather pointed out the difficulties that stand in the way of perceiving serial relations.

In replying, serial composers have usually taken one of the three following positions: that serial procedures are not to be perceived by the listener (Schoenberg's injunctions against analysis need not be taken as implying concurrence with that view); that serial procedures are not perceived consciously, but the music gives an effect of coherence which the listener cannot explain; or that serial procedures can be perceived, given the listener's cooperation in learning. This last attitude is implicit in the compositional methods and explicit in the written statements of Babbitt. The other positions raise a number of new questions. What is unconscious perception? If serial procedures cannot be perceived, do they give rise to relations which can be, and if so, what are those relations? Or is serial music perceived as incoherent, and if so, does that limit its capacity to communicate the composer's thought?

It need not surprise us that serialism arose at a time when such questions of intentionality and communication began to become acute, and composers' uses of serialism should be considered as contributions to a debate rather than as decisive answers to these questions. Because its rules can be applied mechanically (Boulez's *Structures Ia* almost composed itself), serialism explores the boundaries between the automatic and the thought, the inevitable and the willed, the predetermined and the determined; it asks us to consider how much our way through music – whether as composers, performers, analysts or listeners – is guided by rules newly evidenced in the piece at hand, how much by instinct and tradition. The fact that the first works of Babbitt and Boulez were contemporary with the early practical development of computers is also suggestive.

After the great wave of the 1950s, serialism became perhaps less forward in the minds of most composers, and discussions of method faded from the manifestos. However, serial principles of ordering and manipulation went on being practised by composers as diverse as Henze and Ferneyhough, and serialism's algorithmic character indicates a kinship with techniques that came into prominence later and might appear quite contrary, such as minimalism, and even with the imitation of historical styles and forms. However, serialism is also distinctive as the technique of choice for composers who feel or have felt themselves engaged in music as an evolving language, with a coherent history traceable back to Beethoven, Haydn or the Renaissance.

PAUL GRIFFITHS

Series [row, tone row, note row]. An ordered succession of elements to be used as basic material in a composition. The term is most frequently applied to an ordering of the 12 pitch classes, but it may also be used of a succession of fewer or more than 12 pitch classes, or of successions of pitches, durations, dynamics, time points, timbres and so on. *See* SERIALISM and TWELVE-NOTE COMPOSITION. *See also* SET.

Sérieyx, Auguste (Jean Maria Charles) (*b* Amiens, 14 June 1865; *d* Montreux, 19 Feb 1949). French composer and musicologist. In 1893–4, while at law school, he started

harmony lessons with Adrien Barthe. Following instruction in counterpoint with Gédalge, he became involved in the founding of the Schola Cantorum, where he became a pupil of d'Indy. Subsequently he assisted d'Indy with the first course in composition (1900–14) and taught counterpoint (1912–14). Sérieyx developed a close friendship with d'Indy, and later collaborated with the older man on the first two parts of his *Cours de composition musicale*, based on d'Indy's lecture notes. Sérieyx's own pedagogical writings offer additional information about contemporary theory instruction at the Schola. Sérieyx also contributed articles to *Le courrier musical* and *La tribune de Saint Gervais*. D'Indy held him in high regard as a critic, in which capacity he also wrote for Maurras's right-wing *L'action française*.

ELAINE BRODY/ANDREW THOMSON

Serinette (Fr.). A type of bird organ. *See* BIRD INSTRUMENTS.

Serini, Giovanni Battista (*b* ?Cremona, ?1715; *d* after 8 Jan 1765). Italian composer and violinist. Nothing is known of his early life. He was probably related to other musicians active in northern Italy with the same name. The most significant of these, Giuseppe Serini (*b* Cremona, *c*1645), is known by the oratorio *Il genio deluso* (1680 or 1690) and the serenata *Il concerto degli Dei e delle Muse*, composed for the wedding in 1685 of the Elector of Bavaria (libretto and score in *A-Wn*). It is likely that there were two Pietro Paolo Serinis: the first, from Cremona, was famous as a singer, 1670–80; and the second tried unsuccessfully to obtain a post as violinist at S Marco, Venice, in December 1714. Caterina Serini, a soloist and choir member at the Incurabili from about 1760 to 1779, may have been Giovanni Battista's daughter. Giovanni Battista Serini provided music for Robert D'Arcy, 4th Earl of Holdernesse (Yorkshire) and British Ambassador to the Republic of Venice between 1744 and 1746. It is possible that Serini was recommended by his teacher Baldassare Galuppi, since Galuppi and D'Arcy must have known each other through their connection with the King's Theatre in the Haymarket, London.

According to censual records, which mention a wife, child as well as an invalid mother, Serini was still living in Venice in 1750. Later that year, however, he moved to Bückeburg to become composer to Count Wilhelm of Schaumburg-Lippe. Wilhelm, who was also acquainted with D'Arcy, made a trip to Italy in 1750, the year he assumed the throne, and undoubtedly employed Serini then. Under Wilhelm, the Bückeburg court, modelled on that at Berlin, became one of the most cultured in Germany and Serini's six years there were productive: the library contained more than 24 sinfonias, many chamber pieces, intermezzos, cantatas, motets, sacred works and operas, but they disappeared during World War II. Serini also taught the singer Lucia Elisabeth Münchhausen, who married J.C.F. Bach in 1755. In that year Serini presented a 212-page, leather-bound manuscript (*GB-Y*) of sinfonias, cembalo concertos, flute sonatas and arias to the Earl of Holdernesse, who had accompanied George II on his summer journey to Hannover. With the Seven Years War imminent, its overly flattering dedication, dated 15 June, could be a scarcely disguised plea for employment. When Serini did leave Bückeburg, a year later, he went to Prague with Angelo Colonna (*fl* 1736–56), his compatriot and colleague.

Serini is finally heard of in 1765, when he wrote to Wilhelm from Bonn. His letter accompanied several scores and informed the count of his position as instructor to the daughter of Mgr Cressener (British diplomatic representative from 1755 to 1781), yet another of D'Arcy's acquaintances.

Serini's music is essentially *galant*. Melodies are often attractive, but, despite some individual ideas, stock formulae are common and occasionally unimaginative. The major mode is far more common than the minor. The sinfonias, in three movements, are short and lighthearted, with markedly tonic-dominant based themes. Upper strings are frequently busy, with repeated notes, scale and arpeggio figures. The cembalo concertos, particularly in their first movements, are more interesting and substantial in all respects, and make considerable technical demands upon the soloist, as do the flute sonatas. The arias are melodramatic (as befits their texts) and contain some telling harmonic, orchestral and dynamic effects. Counterpoint is not a stylistic feature, but its use in both trio sonatas in G and in the double-fugue finale of the cembalo sonata in E shows some proficiency. Georg Schünemann, who studied the Bückeburg library music, reached the conclusion that Serini was 'a competent musician, equally well-versed in all areas of work, who wrote pleasingly and attractively according to the taste of the time, but who was also, for example in his cantatas, individual and impressive'.

WORKS

SACRED VOCAL

C. PETER LYNCH

Serkin, Peter (*b* New York, 24 July 1947). American pianist, son of RUDOLF SERKIN; his brother John is a horn player. He studied first with his father, who then sent him to Lee Luvisi at the Curtis Institute of Music; studies there with Horszowski also made a profound impact. His other teachers included Ernst Oster, Karl Ulrich Schnabel and the flautist Marcel Moyse, whom he cites as a vital musical influence. At 12 he was playing regularly in public; Mozart concertos at the Marlboro Festival, chamber music with Alexander Schneider in New York, and Mozart's Double Concerto with his father and Szell in Cleveland were some of the early engagements that brought him attention and admiration. Soon he began to work independently. He played a risky repertory (the Goldberg and Diabelli Variations, Schoenberg and Webern, much Messiaen), and was for a while reluctant to commit himself to a formal calender-bound career.

After spending much time in Mexico and India, he began to play more frequently and with evident pleasure in the early 1970s. His musical interests range wide; he enjoys rock and jazz, has been involved in improvisation, is fascinated by the music analysis methods of Schenker and has increasingly become involved with contemporary music. He has continued to play chamber music as well as solo and orchestral works and has performed with the Guarneri Quartet and the Boston Symphony Chamber Players, among others.

Serkin was a founding member of Tashi with Richard Stoltzman (clarinet), Ida Kavafian (violin) and Fred Sherry (cello) In 1983 Serkin became the first pianist to win the prize for outstanding artistic achievement awarded by the Accademia Musicale Chigiana in Siena; it was also in that year that he joined the faculty of the Mannes College. He later took up teaching posts at the Juilliard School and Curtis Institute of Music, as well as teaching regularly at the Tanglewood Music Center.

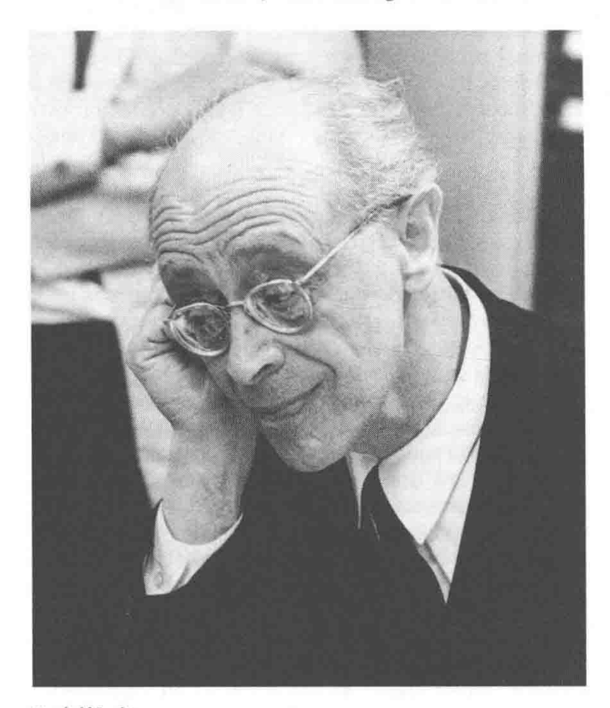
Serkin has commissioned and recorded numerous new works. He gave the première of Peter Lieberson's Piano Concerto no.1 with the Boston SO in 1985 and later took part in the première and recording of that composer's *King Gesar* for chamber group and narrator. Takemitsu's *Riverrun* and *Les Yeux clos II* were written for him and *Between Tides* was written for his trio with violinist Pamela Frank and cellist Yo-Yo Ma. In 1993 Serkin and the Guarneri Quartet gave the première of Hans Werner Henze's Piano Quintet, which they also recorded. Between 1996 and 1998 Serkin made recordings that included music by Lieberson, Knussen, Henze, Berio, Goehr, Takemitsu, Kirchner, Webern, Wolpe, Messiaen and Wuorinen; at this time his recordings of traditional repertory were restricted to Bach and Beethoven. In 1998 he gave the première of Peter Lieberson's Piano Concerto no.2. Serkin is a brilliant, resourceful instrumentalist, a sensitive, original interpreter and a performer of uncommon vitality.

MICHAEL STEINBERG/R

Serkin, Rudolf (*b* Eger, 28 March 1903; *d* Guilford, VT, 8 May 1991). American pianist of Austrian birth. His father, a Russian Jew, had eight children and moved his family from Bohemia to Vienna in order that his gifted son could receive from the pedagogue Richard Robert 'a very strict and limited upbringing as far as the piano is concerned' (Serkin's own words). In 1920, at the age of 17, he was considered too old to take further lessons by Busoni, who advised him to follow his own path. In his teens he also made the acquaintance of Schoenberg and his circle, whose ideas were 'like a kind of leprosy to the Viennese establishment'. Serkin thought Schoenberg the greatest musical mind he ever encountered, and for a while he was an enthusiastic performer of his music.

The influence of the violinist Adolf Busch (his future father-in-law), whom he met in 1920, was deeper still. Having accepted Busch's invitation to move to Berlin, he lived with Busch's family as a pupil might live with his guru; and it was to Busch that he owed the commitment to chamber music which was to shape his career and development from then onwards. From 1921 they had a duo which lasted until Busch's death, and their magnificent HMV recordings in the 1930s of the Schubert *Fantasie* in C (D934) and some of the Beethoven and Brahms sonatas were groundbreaking at a time when international violinists were not accustomed to treating their pianists as equal musical partners in this repertory. Their trio recordings have proved similarly durable, notably those of Schubert's E♭ Piano Trio, with Busch's cellist brother Hermann, and of Brahms's Horn Trio, with Aubrey Brain.

As a soloist, Serkin made a pioneering recording with the Busch Chamber Players in 1938 of Mozart's Piano Concerto in E♭ K449; it remains among the finest recorded examples of his art. He was also particularly admired in these years for his Bach, and with Busch's orchestra took part in their recording of the Fifth Brandenburg Concerto.



In 1934 the Nazis tried to prevent Busch from performing with Serkin; Busch's response was to give no more concerts in Germany and to move with Serkin to Basle. Having made his American début in 1936 with the New York PO and Toscanini, Serkin began to spend more time in the USA, and in 1939, when he started to teach at the Curtis Institute in Philadelphia, he settled there permanently. Busch also emigrated. The establishing of the Marlboro Festival in Vermont in 1950 is attributed to Busch, but Serkin (among others) was there from the beginning, and on Busch's death in 1952 it was natural for him to assume its leadership. In the spirit of its founder, it became an environment for the study of chamber music, free from the pressures and restrictions of conventional concert life, with an emphasis on rehearsal

rather than the performance of pre-determined programmes – a meeting-place too for professional musicians of all ages, backgrounds and nationalities. For 40 years Marlboro complemented Serkin's teaching, and through his direction of it and example as a performer it had (and continues to have) a profound influence on generations of musicians.

At the same time Serkin became one of the most celebrated soloists in the USA. He was a virtuoso who worked ceaselessly at his technique: impeccable transparency, clean attack and consummate control, together with an anti-sentimental sonority, had been there from the beginning and they were characteristics of his playing all his life. The latter could sometimes seem like hardness, or severity; it came from a stance that was rigorous in maintaining the importance of realizing everything that could possibly be realized about a work. Nothing less was good enough.

The responsibility for what was at stake in his endeavours could inhibit his achievement like a weight, and colleagues and students have said how complicated Serkin was as an artist; yet it was perhaps the conflicts in his make-up that gave his playing such power. His selflessness and devotion to the text could put him in shackles; but when his temperament as a virtuoso (which was the equal of Horowitz's) broke through, in works such as the Brahms concertos, and the Diabelli Variations, the Hammerklavier Sonata, the Fifth Concerto and the Choral Fantasy of Beethoven, the experience was unforgettable. His sensitivity was acute and he was capable of great delicacy; some of his finest achievements were in Mozart, whom he never underplayed.

At the core of his repertory were the Austro-German classics from Bach to Brahms. There were extensions to Reger and Strauss's *Burleske* and to Bartók's First Concerto and Prokofiev's Fourth (for the left hand). After his earlier enthusiasm, Schoenberg and the Second Viennese School fell away; it is intriguing to speculate how the reception of some of their music might have been different had he continued to champion it to a wide public. The microphone was not his friend and his solo recordings are on the whole unrepresentative. With orchestras, or colleagues in chamber music, it was another matter. His American recordings from the 1950s onwards (later remastered for CD by Sony Classical) include magisterial accounts of the Brahms and Beethoven concertos with such conductors as Szell, Ormandy and Bernstein and the Philadelphia Orchestra, Cleveland Orchestra and New York PO; there are distinguished accounts of Mozart concertos, too, with Szell and Alexander Schneider. The 40th anniversary of the Marlboro Festival was marked by issues of chamber music recordings, among which Serkin frequently appears. When he was at his best and the explosive tension behind his playing was in harmony with his pianism, he was indeed a 'fiery angel' and without doubt one of the great classical pianists of the 20th century. For all that, he was a man for whom music was always more interesting than the piano.

Rudolf Serkin

STEPHEN PLAISTOW

Serlo of Wilton (*b* England, *c*1110; *d c*1181). English poet. He settled early in Paris, where he was a brilliant teacher in the schools, writing Latin didactic grammatical poems and erotic lyrics until his spectacular repentance, after which he retreated into the Cluniac monastery at La Charité-sur-Loire; there he found the discipline too lax, and moved to the Cistercian abbey at Aumône, becoming its abbot in 1171. From his conversion come his moralistic poems *Versus de contemptu mundi*, but by far his best works are his youthful love-lyrics. His 84 surviving poems are mostly in hexameters (generally leonine), pentameters and elegiac distichs. He displays a profound knowledge of the classics and shows great mastery of rhyme and flexibility of rhythm. Serlo's language was much imitated, and its influence can be seen in the texts of contemporary Notre Dame and related conductus.

GORDON A. ANDERSON/THOMAS B. PAYNE

Serly, Tibor (*b* Losonc, 25 Nov 1901; *d* London, England, 8 Oct 1978). American composer and theoretician of Hungarian birth. He was born into a musical family which emigrated to New York in 1905; he became an American citizen in 1911. His first musical studies were with his father, Lajos Serly, a former pupil of Liszt. From 1922 to 1925 he attended the Budapest Royal Academy, where he studied composition with Kodály, violin with Hubay and orchestration with Weiner, graduating with the highest honours.

After his return to the USA (1925) Serly played in several major orchestras, including the Cincinnati SO (1926–7), the Philadelphia Orchestra under Stokowski (1928–35) and the NBC SO (1937–8). From 1929 date his enduring friendship with Ezra Pound and his association with Pound's circle. Meanwhile his music was beginning to receive more attention. In 1935 he conducted the Budapest PO in an all-Serly concert that included the première of his Viola Concerto; the following year Ormandy gave the first performances of his First Symphony in Philadelphia and New York. In 1938 Serly resigned from the NBC SO to develop his own ideas; from then on he taught privately.

In 1940 Bartók and his wife arrived in New York as refugees, and for the next five years Serly devoted most of his efforts to their support. (Serly had met Bartók in Budapest in 1925 and the two had become firm friends.) He made arrangements of piano pieces from Bartók's *Mikrokosmos* for chamber groups and orchestras, and undertook both the posthumous completion of the Third Piano Concerto and the reconstruction of the Viola Concerto.

Many of Serly's own compositions make use of the 'modus lascivus' (named after the medieval term for the diatonic scale), which, in his own words, 'permanently divides the chromatic scale into two separate segments, thus creating a multimodal chromatic scale system'. Other techniques Serly explored include the simultaneous performance of seemingly unrelated movements, as in the *Concertino 3 x 3*, wordless voice in the song series *Consovowels* and unusual string sonorities in *Rondo Fantasy in Stringometrics*, which calls for 14 types of pizzicato. Serly's pupils included Pleasants and Herzog. He also wrote three theoretical books, the last of which, *The Rhetoric of Melody* (written in collaboration with the Canadian poet Norman Newton), remains unpublished. Despite the efforts of admirers, notably his second wife, the pianist Miriam Molin, his compositions and teachings have not been widely recognized.

WORKS

WORKS IN THE 'MODUS LASCIVUS'

Ballet: Cast out, 1973, unperf.

Orch: Conc., 2 pf, 1943–58 [last 2 movts only in 'modus lascivus']; Conc., trbn, chbr orch, 1952–4; Lament (Homage to Bartók), 1955; Concertino 3 x 3, pf, chbr orch, 1965; Canonic Fugue in 10 Voices, str, 1971

Vocal and inst: Pf Sonata no.1, 1946; Suite, 2 pf, 1946; Sonata, vn, 1947; 40 Etudes, pf, 1947–60; Canonic Prelude, 4 hp, 1967; Chorale, 3 hp, 1967; Adagio and Scherzo, fl, 1968; Consovowels: l, S, 1968, 2, S, cl, 1970, 3, S, cl, 1971; Menuet in Bi-Modals, 2 rec, 1970; Consovowels 4, 5, both S, vn, 1974

JEANNE BEHREND/MICHAEL MECKNA

Sermilä, Jarmo (Kalevi) (*b* Hämeenlinna, 16 Aug 1939). Finnish composer. He began his career as a jazz musician. He then studied composition at the Sibelius Academy in Helsinki with Kokkonen, gaining a composition diploma in 1975; in the same year he was awarded a master's degree at Helsinki University. He also studied composition in Prague in 1972. In addition to composing, and continuing to perform occasionally as a jazz trumpeter, Sermilä has had a particularly notable influence on Finnish musical life. He has been active as chairman of the Finnish Music Information Centre, of the Finnish Composers' Union, of the Finnish section of the ISCM and as artistic director of Finnish Radio's experimental studio. In 1976 he founded the Jasemusiikki publishing house, and in 1988 became artistic director of the Viitasaari (central Finland) Time of Music.

As a composer Sermilä came before the public relatively late, his first work dating from 1969. His early output was strongly influenced by Varèse. Since then a rhythmically freer fabric to his work has been joined by a clear pulse, and his music has shown certain minimalist effects. His central concerns are tone colours and textures and the relations between them, often forming his tone picture through random counterpoint and improvisation. Sermilä has, however, disregarded his background in jazz in his choice of material. His output has concentrated on ever-changing chamber ensembles, and he has avoided traditional formal genres such as the symphony and the sonata. During the 1970s he composed several works for orchestra, but from the 1980s he concentrated increasingly on chamber music.

OSMO TAPIO RÄIHÄLÄ

Sermisy [Cermisy, Sermizy, Sermysy, Sernisy, Servyzy], **Claudin** [Claude] **de** (*b* c1490; *d* Paris, 13 Oct 1562). French composer. He was one of the recognized masters of the Renaissance chanson and a significant composer of religious music. Claudin, as his name appears in most contemporary publications, was associated with the royal court of France under several monarchs (particularly Anne of Brittany, François I and Henri II) as well as with the Ste Chapelle du Palais in Paris and was one of the most important contributors to the earliest French publications of polyphonic music. The numerous instrumental transcriptions and contrafacta of his compositions attest to the esteem in which he was held in his time.

1. Life. 2. Reputation. 3. Sacred works. 4. Secular works.

1. Life. Both biographical information found in beneficial records and the existence of present-day place names of which 'Sermisy' might have been an old form suggest that the composer came from the area around Noyon in Picardy, though the Ile-de-France and Burgundy have also been proposed as possible areas of origin. The earliest document to mention Sermisy (dated 19 July 1508) describes him as one of the lower clergy at the Ste Chapelle. Apparently he left the palace chapel choir in the late autumn of 1508, when King Louis XII, Queen Anne of Brittany and the Duke of Bourbon plundered the choir by taking its best singers for their private retinues. Papal records dated 4 February and 8 June 1510 identify Sermisy as a singer in the queen's private chapel and a cleric of the diocese of Noyon. His name does not recur in the records of the palace chapel until 20 September 1533, when he was received as one of its 13 canons. Sermisy probably entered the king's chapel after the queen's death on 1 January 1514, at which time the queen's chapel was dissolved and the number of singers in the *Chapelle du roi* more than doubled. He was one of 23 royal chapel musicians who performed for the funeral and obsequies of Louis XII in January 1515, at least eight of whom previously had been in Anne's employ.

Sermisy remained in the royal chapel under King François I and almost certainly accompanied the new monarch to Italy in the summer of 1515. He was probably present when the royal chapel sang Mass with the papal choir during the meeting between François and Pope Leo X held in Bologna from 11 to 15 December 1515. After the meeting (which resulted in the Concordat of Bologna), Leo demonstrated his graciousness by rewarding several members of the king's entourage. On 17 December he granted the position of apostolic notary to both the royal *maître de chapelle* Antoine de Longueval and the court's chief composer, Jean Mouton, and on 30 January 1516 he granted dispensations to Sermisy ('Claudio de Sermysy canonico Noviomensis') and four other royal singers (Jean Richafort, Guillaume Cousin, Noel Galoys and Johannes Durand dit Le Fourbisseur) that allowed them to hold incompatible benefices. On 31 March the pope also gave the royal singer and organist Pierre Mouton a priory. Sermisy's name follows immediately after that of Jean Mouton in a list of 34 royal chapel singers employed by François from 1 October 1517 to 31 September 1518. He probably participated in the festive masses performed jointly by the English and French royal chapels when François and King Henry VIII of England met at the Field of the Cloth of Gold from 7 June to 10 July 1520 and at Boulogne between 21 and 29 October 1532. At the latter

meeting the French royal chapel apparently also sang Sermisy's ceremonial motet *Da pacem Domine*.

By 1533 Sermisy had become *sous-maître* over the musicians of the royal chapel under the administrative headship of Cardinal François de Tournon, a diplomat, humanist, author of a text set by Sermisy and close friend of the king. The *sous-maître* directed the performances of the approximately 40 adult singers and six choirboys comprising the musical contingent of the king's chapel during the 1530s and 40s (the sizable group of chapel clerics listed in the account books of the *Maison du roi* was independently administered), and he also was responsible for the care of the boys and the upkeep of the chapel liturgical and music books. As *sous-maître* Sermisy earned wages and living expenses totalling 400 livres tournois in 1533, 600 livres from 1543 to 1545 and 700 livres in 1547. He held this position to at least 1555, sharing it with Jean-Loys Hérault from 1543 to 1545 and with both Guillaume Belin and Hilaire Rousseau from 1547 to 1553.

Thanks to the exemption from local residency requirements enjoyed by all members of the private chapels of the French kings and queens, Sermisy was able to augment his salary throughout his career with numerous ecclesiastical benefices. In 1510 he obtained the Augustinian priory of St Jean de Bougeuennes in the diocese of Nantes and requested papal permission in the same year to hold three incompatible benefices. In 1516 he held a canonicate in Noyon, as noted above, and at some time he also obtained a canonicate at Notre-Dame-de-la-Ronde in Rouen, which he resigned before 10 December 1524 in favour of a chapel in the parish church of Camberon near Abbeville. At about the same time as his appointment as royal chapel *sous-maître* Sermisy was nominated to the eleventh canonry of the Ste Chapelle, a post that he kept until his death. This position offered both substantial revenue and a house in Paris, which he used in 1559 to shelter the canons of Saint Quentin after their city was invaded by Spanish troops. In 1554 he added to this a prebend at Ste Catherine, Troyes. Upon his death he was buried in the lower chapel of the Ste Chapelle.

Sermisy had two nephews. One, Jean, was an artist in stained glass; the other, Gilles de Sermisy, a priest and canon at Vivier-en-Brie and curé of St Samson in the diocese of Le Mans, wrote a laudatory poetic epistle as a preface to Pierre de Manchicourt's *Liber decimus quartus XIX musicas cantiones continet* (Paris, 1539).

2. Reputation. Sermisy was highly regarded by contemporaries. In one of his noëls, Jean Daniel placed him in a group of famous musicians that included Prioris, Josquin, La Rue, Févin and Janequin. Pierre Certon, a colleague of Sermisy's at the Ste Chapelle, dedicated his second book of motets (1542) to him, as did Maximilian Guilliaud his *Rudiments de musique practique* (1554). In his *Discours de la court* (1543), a lengthy rhymed panegyric to François and the royal court, Claude Chappuys referred to the composer as the father of musicians, whose motets were sung at the king's daily Mass. Barthélemy Aneau, in his *Quintil Horatian*, listed him with Certon, Sandrin and Villiers as 'renowned musicians', and in the prologue to the fourth book of Rabelais's *Pantagruel*, Sermisy and other French musicians are pictured seated in a garden singing an indelicate song. In a *déploration* on his death by Certon, Sermisy is called 'grand maistre, expert et magnificque compositeur' and 'le thresor de musique'.

Nor was his reputation confined to France. In a letter the Duke of Ferrara asked Sermisy to recruit singers for him; unable to do so, the composer apologized and sent him a copy of his motet *Esto mihi*. At least four of his masses circulated in Italy (the *Missa 'Domini est terra'*, *Missa 'Philomena'*, *Missa plurium motetorum* and the Requiem Mass), and his motets were widely disseminated throughout Europe. Instrumental versions of his vocal music circulated in over 60 printed collections from the 16th century, and his compositions were often drawn upon by composers as polyphonic models for masses. *Si bona suscepimus*, for example, was the model for Phinot's mass of the same name, as well as for an anonymous keyboard piece and one for lute by Giovanni Maria da Crema.

In spite of his renown during his lifetime, he was rather quickly forgotten after his death. A new edition in 1572 (RISM 1572[2]) of a collection of chansons omitted the only piece by Sermisy that was included in its first printing by Le Roy & Ballard in 1560. Some of his chansons reprinted in the 1560s and later are ascribed to other composers or to no-one in particular. Historians and editors of music (Burney and Van Maldeghem, for example) have at times mistaken him for Claude Goudimel or Claude Le Jeune. More recently, however, he has been recognized as 'a veritable dean of French musical life during the second quarter of the [16th] century' (Daniel Heartz).

3. Sacred works. Both the shared aesthetic and the similar melodic and rhythmic vocabularies employed in Sermisy's chansons and sacred music have tended to colour assessments of the latter until very recently. The euphonious harmonies, formal lucidity and relatively high degree of tunefulness characteristic of his motets, in particular, have suggested to some scholars that when composing sacred music he was unduly influenced by the burgeoning popularity of the homophonic chanson in Paris during the second quarter of the 16th century. Comparison of his sacred compositions with those of Févin, Mathieu Gascongne and especially Jean Mouton, however, strongly suggests that the translucent style of his masses and motets resulted primarily from his exploration and codification of tendencies already present in numerous sacred works composed by the preceding generation of royal chapel composers, rather than from any direct influence of the homophonic chanson. The relatively high degree of stylistic homogeneity distinguishing Sermisy's sacred oeuvre from the works of his immediate predecessors arose from his strong tendency to favour the lucid and unambiguous presentation of text over contrapuntal elaboration, and not because he pioneered a new compositional method. In his text-sensitive approach to sacred composition, Sermisy was adhering to the official position on religious music in the Gallican Church during François's reign, a position that adumbrated musical reforms enacted by the Council of Trent more than a quarter of a century later.

Sermisy composed sacred music throughout his long professional career and, after Mouton, was the most prolific French royal court composer of sacred polyphony from the first half of the 16th century. 13 complete Mass Ordinary settings, 78 motets and more than 20 pieces of liturgical polyphony (most of which were published by the first royal printer of music, Pierre Attaingnant) can be securely attributed to him. The earliest sacred works are

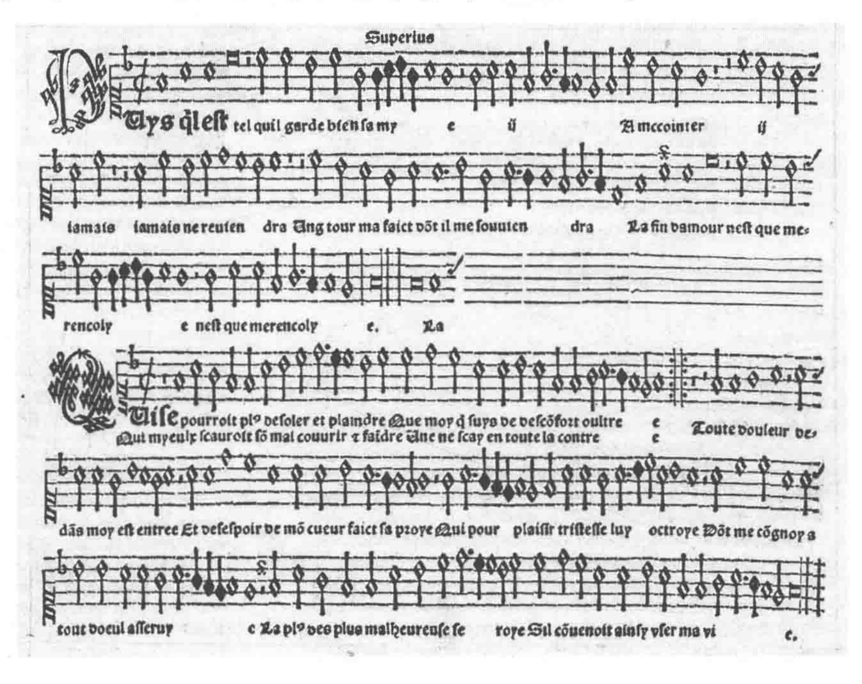
two motets, *Vox in rama* and *Aspice Domine de sede*, composed by 1518 and 1523 respectively. About half of his mass settings, motets and smaller liturgical settings were written before 1535. Anthologies devoted to his motets were published in 1542 and 1555 by Attaingnant and Le Roy & Ballard respectively. The latter firm, which succeeded Attaingnant as royal printer, also posthumously published a set of polyphonic *Magnificat* settings by Sermisy. The remainder of his sacred output appeared piecemeal between 1535 and 1558.

Most of Sermisy's mass settings are what are called 'imitation' or 'parody' masses. About half are based on motets by Sermisy himself or other composers associated with the royal court such as Févin, Gascongne, Richafort, Josquin and Jean Conseil. Three masses are based on secular models, and three derive significant portions of their melodies from plainchant, one of which, the *Missa 'Novem lectionum'*, was well enough regarded to have been the subject of a foundation made to the Ste Chapelle in 1583 by Claude Rossignol. Unusually, two of Sermisy's masses, the *Missa plurium motetorum* and the *Missa plurium modulorum*, draw from not one but multiple polyphonic sources. Although the style of Sermisy's models affected his compositional decisions to a certain extent (most significantly in his only five-voice mass, the *Missa 'Quare fremuerunt gentes'*), there is a constant tendency in the 'imitation' masses to return to the pellucid harmonic style typical of both his free motets and chansons. Thus, although the opening movement of the *Missa 'Philomena'* (which derives much of its melodic content from Richafort's motet *Philomena praevia*) employs decidedly more angular melodies and colourful harmonies than is typical of Sermisy's works, in later movements of the mass Sermisy departed from Richafort's style by introducing repeated notes into motifs derived from the motet and by presenting the text in increasingly syllabic, word-generated and motivic melodies, this in turn leading to musical textures increasingly governed by consonance and euphony rather than by the demands of strict contrapuntal imitation. Sermisy's masses are distinguished from those of Mouton by their greater conciseness and tunefulness, their greater stylistic homogeneity and their tendency to favour the creation of consonant harmony over the demands of strict counterpoint.

Perhaps the most characteristic sacred genre for Sermisy is the motet, the majority of his pieces being examples of free composition in four voices. His style in these works is marked both by great sensitivity to the rhetorical, syntactic and expressive implications of his texts and by considerable regularity of compositional technique. To project his texts clearly Sermisy employed lucid harmonies, generally varied the musical texture in accordance with natural text divisions, used uncomplicated rhythms and set the majority of syllables to slower notes at the beginning of phrases. When it was musically feasible he also consistently employed a hierarchic system of musical articulation that projected the syntax of the text at the highest level by means of formal repetitions and at middle and low levels by his use of part-writing, by choice of cadential 'goal' tones and by systematic placement of stereotypical 'chansonesque' rhythmic motifs. An important, but secondary, factor in his aesthetic was his apparent desire to create well-rounded musical form, a desire that encouraged him either to select texts that incorporated refrains (e.g. Great Responsory texts) or to devise new texts that reiterated phrases of rhetorical significance. So pervasive was this approach to composition that Sermisy employed elements of it even in several motets that paraphrase Gregorian chants (e.g. *Alleluia, O filii et filiae* and *Veni sancte spiritus*). When writing for three voices Sermisy usually worked in a more florid and contrapuntal style. His ten settings for five, six and eight voices tend to avoid strong cadential articulations and exhibit considerably less textural variety and more contrapuntal continuity than his four-voice motets.

Twenty additional sacred works were composed to serve specific liturgical functions. Two years after his death Le Roy & Ballard published eight polyphonic *Magnificat* settings, one for each of the eight traditional Gregorian tones. These predominantly four-voice works set the odd verses of the canticle in *falsobordone*. Frequently the even verses are set as simple imitative duos or trios that employ the plainchant recitation formulae in loose paraphrase in the cantus or tenor. Half of the settings conclude by expanding to five voices, and several incorporate simple canons. Some earlier settings of *Magnificat* verses first published in Attaingnant's motet series of 1534–5 employ a more animated rhythmic and contrapuntal style, in which the plainchant formulae inspire the melodic content of all parts through pervasive imitation. Most of the remainder of Sermisy's liturgical polyphony was composed for use during Holy Week, including settings of the Tenebrae responses for the *triduum sacrum*, the Lamentations of Jeremiah, the Passion according to St Matthew and the Easter introit. All these works (with the possible exception of the setting of the Lamentations) require interpolated plainchants for performance and were undoubtedly composed to exploit the division of the royal chapel singers during the mid-1520s into a *chapelle de musique* and a smaller *chapelle de plainchant*. The words of Sermisy's Passion derive solely from the Gospel according to St Matthew, as claimed in the title, unlike Longueval's St Matthew Passion, which contains texts from all four gospels. Longueval's is a motet Passion, whereas Sermisy's is of the dramatic type. Sermisy composed three additional liturgical works for use at Mass, including strictly chordal settings of the responses to the Mass Preface and *O salutaris Hostia* (which was traditionally sung in the royal chapel at the moment of the Elevation of the Host) and a more contrapuntally complex arrangement of the *Asperges me* antiphon. One additional work, a *Nunc dimittis*, sets the Canticle for Compline in homorhythmic style. Most of the *chansons spirituelles* ascribed to Sermisy are contrafacta of his own earlier secular works.

4. Secular works. Sermisy is generally credited with bringing the lyrical type of 'Parisian' chanson to its apex, as Janequin is especially noted for his mastery of the narrative type. Such works, which were published in considerable numbers by Attaingnant during the second quarter of the 16th century starting with the *Chansons nouvelles* of 1528, may be distinguished from chansons composed in France and the Low Countries before 1500 by their greater contrapuntal simplicity and their freedom from the formal and poetic conventions of the *formes fixes*. Seemingly this new approach to chanson composition was largely the work of French musicians such as Févin, Mouton, Ninot Le Petit and others from the younger generation of composers represented in Petrucci's *Odhecaton*, *Canti B* and *Canti C*, who chose to



write three- and four-part arrangements of popular melodies rather than to set poems expressing the rarefied sentiments of courtly love. Possibly under the influence of Italian musical idioms, these composers and Sermisy and Janequin after them gradually abandoned the melismatic, somewhat abstract musical writing favoured by the previous generation to compose in a simpler, more syllabic and more homophonic style.

Many of the texts set by Sermisy were by contemporary poets of the royal circle; he set 22 of Clément Marot's texts – more than any other composer – and the initial results of their collaboration, which appear anonymously in the *Chansons nouvelles*, antedate by four years the first literary edition of the same poems in the *Adolescence clémentine*. Only exceptionally did Sermisy select 15th-century poems for his chansons. His texts are in French, except for one in Italian (*Altro non*) and another mostly in Gascon (*Hari bouriquet*). The favourite topic is unhappy love, whether courtly or profane. A few are of a popular sort, such as drinking-songs (e.g. *Ceulx de Picardie*), animal songs (e.g. *Je ne menge point de porc*) or 'malmariée' songs (cheerful pieces about young women who are dissatisfied with their ugly, tired old husbands – for example *Pilons l'orge*). Whatever the theme, the writing is usually simple and direct. Poetic types include several rondeaux, an exceptional ballade and many free, monostrophic types labelled 'quatrain' (e.g. *Puisqu'il est tel*; see illustration), 'cinquain' (e.g. *Contre raison*), 'sixain' (e.g. *Je veulx tousjours*), 'septain' (e.g. *Dont vient cela*), 'huitain' (e.g. *Pour ung plaisir*), or 'dixain' (e.g. *Orsus, Amour*), depending on the number of lines they contain. In general the quality of the poems is high, except for those in a popular style.

Sermisy and other 'Parisian' composers published by Attaingnant favoured the Dorian and Lydian modes and the superius as the bearer of the principal melodic material. Cadential formulas and the rhythmic profiling of most phrases appear standardized. A majority of his lyrical chansons are set in what may be described as contrapuntally enlivened homophony. Some 25 pieces, however, are entirely or almost entirely homorhythmic (e.g. *Je n'ay point plus d'affection*), and about 50 are predominantly polyphonic, with free imitation and juxtaposition of voices, either in pairs or as one against three. A few have two voices in canon (e.g. *Ton feu s'estaint*), but sometimes this texture is maintained for only part of the chanson.

Most often in his four-voice settings Sermisy set decasyllabic poetic quatrains rhyming *abba*, observing an overall repetition scheme of *ABCAA* or *ABCAA'*. For longer poems repetition was also used at the beginning, or at both beginning and end, for example in the patterns *ABCADD*, *AABCDD*, *ABABCDEE*, and so on. Regardless of the number of poetic lines, Sermisy's melodies often observe a quadripartite structure in which the framing exterior sections are stable and the internal sections (*B* and *C*) are markedly unstable and contrasting in character. The rhyme schemes of the poetry, the repetition and phrase structure of the music and the tonal ordering of the cadences are all extremely lucid. The length of musical phrases is determined by that of the poetic line; the cadence corresponds with its end, whether or not there is an enjambement. Each decasyllabic line is usually divided musically by a caesura between the fourth and the fifth syllables, and a rhythmic pattern consisting of three anacrustic minims frequently begins the second hemistich.

Sermisy's melodic lines are on the whole longer than those of many of his contemporaries (though the pieces are often shorter) and usually begin syllabically, becoming slightly melismatic towards the end. The chansons display an unusual amount of symbolism, not by chromatic, onomatopoeic or other detailed means that can be found in Italian madrigals or some French chansons of a later period, but by less extreme methods, such as descending lines for sad thoughts (e.g. *Las je m'y plains*), melismas for significant words or repetition of words and phrases for emphasis. The close imitation of the four voices in *Martin menoit*, on the words 'serre Martin', is a particularly appropriate musical equivalent of the text.

Superius parts of 'Puisqu'il est tel' and 'Qui se pourroit plus desoler et plaindre' from Sermisy's 'Second livre contenant XXVII chansons nouvelles à quatre parties' (Paris: Attaingnant & Jullet, 1538)

Sermisy's chansons were reprinted countless times in France and abroad. Clément Marot in his *Dialogue de deux amoureux* mentioned two of them. Some, particularly the earlier ones such as *Le content est riche*, were transcribed more or less freely as many as a dozen times, for various instruments: viols, organ, clavichord and other keyboard instruments, cittern and, chiefly, lute, by French, Italian, German and Polish instrumentalists. Some were arranged for voice and lute, the accompaniment being more or less a reduction of the remaining vocal parts of the original. A few were models for parody masses, such as Clemens non Papa's *Missa 'Or combien est'*. Several were transformed into basses danses or other dances (some of their titles were cited by Rabelais). *Jouyssance* and the doubtful *Au pres de vous* appear in paintings. An important portion, if not the majority, of fragments identified in the *fricassées* published by Attaingnant and Moderne are derived from his chansons. Given Sermisy's lifelong service to the Roman Catholic Church, there is a certain irony in the fact that many Protestant spiritual poems, such as those by Eustorg de Beaulieu, the psalms from the *souterliedekens* and both Scottish and German contrafacta, were sung to the tunes of his chansons.

WORKS

Editions: *Claudin de Sermisy: Opera omnia*, ed. G. Allaire and I. Cazeaux, CMM, lii (1970–) [AC]
Treize livres de motets parus chez Pierre Attaingnant en 1534 et 1535, ed. A. Smijers and A.T. Merritt (Paris and Monaco, 1934–64) [SM]

MASSES AND MASS SECTIONS

Missa 'Ab initio', 4vv, AC vi, 1 (on plainchant)
Missa ad placitum (sur fantaisie), 4vv, AC vi, 129
Missa 'Domine quis habitabit', 4vv, AC vi, 155 (on Sermisy's own motet)
Missa 'Domini est terra', 4vv, AC v, 113 (on Sermisy's own motet)
Missa 'Novem lectionum', 4vv, AC v, 30 (on plainchant)
Missa 'O passi sparsi', 4vv, AC vi, 220 (only superius extant; on canzona by Sebastian Festa)
Missa 'Philomena praevia', 4vv, AC v, 1 (on motet by Richafort)
Missa plurium modulorum, 4vv, AC vi, 187 (on chansons, including Sermisy's own J'ayme bien mon amy and Jouyssance vous donneray)
Missa plurium motetorum, 4vv, AC v, 59 (on motets by Josquin, Gascongne, Conseil, Févin, Sermisy, and anon.)
Missa 'Quare fremuerunt gentes', 5vv, AC vi, 86 (on Sermisy's own motet)
Missa 'Tota pulchra es', 4vv, AC vi, 30 (on Sermisy's own motet)
Missa 'Voulant honneur', 4vv, AC vi, 60 (on a chanson by Sandrin)
Requiem Mass, 4vv, AC v, 85 (on plainchant)
Credo, 4vv, AC vi, 213 (fauxbourdon)

OTHER LITURGICAL POLYPHONY

Amen, Et cum spirito tuo, 4vv, ed. in P. Wagner, *Geschichte des Messe* (Leipzig, 1913/*R*), 248 (Responses to the Mass Preface)
Asperges me Domine, 4vv, 1546[1] (antiphon for the Asperges at Mass)
Kyrie eleison . . . Parce famulis, 2–6vv, SM x, 58 (Tenebrae responses for Holy Week)
Lamentations, 4vv, AC ii, 1
Magnificat primi toni, 4vv, AC i, 1; Magnificat secundi toni, 4vv, AC i, 7; Magnificat tertii toni, 4vv, AC i, 12; Magnificat quarti toni, 4vv, AC i, 18; Magnificat [quarti toni], 3vv, SM v, 155 (only verses 6, 8, 10); Magnificat quinti toni, 4vv, AC i, 23; Magnificat sexti toni, 4vv, AC i, 27; Magnificat septimi toni, 4vv, AC i, 33; Magnificat octavi toni, 4vv, AC i, 39; Magnificat octavi toni, 4vv, AC i, 44; Esurientes, 2vv, AC i, 52; Quia fecit, 2vv, AC i, 51
[Nunc dimittis . . .] secundum, 4vv, 1564[7] (Canticle for Compline)
[O salutaris Hostia] quae caeli, 4vv, 1546[1] (for the Elevation)
Passio Domini secundum Matthaeum, 4vv, AC ii, 14
[Resurrexi] et adhuc tecum, 4vv, SM x, 179 (introit for Easter)

Averte faciem tuam, 4vv, *D-ROu* 60 (contrafactum of Or combien est malheureux)

Date siceram maerentibus, 5vv, *D-Mu* 326 (contrafactum of Josquin: Je ne me puis tenir)

Iacta tuam curam super, 4vv, *D-Z* 100/4 (contrafactum of Vous perdez temps)

Quis est homo qui desiderat, 4vv, *D-ROu* 60 (contrafactum of Orsus amour)

DOUBTFUL AND MISATTRIBUTED WORKS

sacred

Aspice Domine quia facta est, 4vv (attrib. Sermisy in *I-Rvat* C.G.XII.4; doubtful on stylistic grounds)

Ave sanctissima Maria mater, 6vv, SM iii, 166 (attrib. Verdelot in table of contents in 1534[5], Sermisy in contratenor partbook; concerning a possible attribution to La Rue, see M. Picker: *The Chanson Albums of Margaret of Austria: MSS 228 and 11239 of the Bibliothèque Royale de Belgique, Brussels*, Berkeley, 1965, pp.91–2)

Deus regnorum, 4vv, SM xi, 118 (attrib. Sermisy in index to 1535[3], attrib. Gascongne above the music in each partbook)

Domine Deus omnipotens, 4vv, CMM, xxxi/10 (1971), 21 (attrib. Sermisy in 1542; attrib. Arcadelt in 1538[5] and *BrownI*, 1552[11]; assigned to Arcadelt on the basis of style)

Nisi Dominus aedificaverit, 4vv, SM ix, 165 (attrib. Sermisy in *F-CA* 125–8; attrib. Lhéritier in 1532[10] and 5 other sources; attrib. Le Heurteur in 1535[1] and 1555[15])

Philomena praevia temporis, 4vv, AC v, 130 (attrib. 'Glandin' in *P-Cug* 48; by Richafort)

secular

Amour est bien de perverse nature, 4vv, AC iii, 5 (attrib. Certon in 1536[4]; attrib. Sermisy in 1549[17])

Amy souffrez que je vous ayme, 3vv, AC iii, 14 (attrib. Le Heurteur and Moulu in 1553[22]; attrib. Sermisy and Moulu in 1578[14]; attrib. 'Do. Izagha' in *I-Fn* XIX.117; 4vv version anon. in *CH-Bu* F.IX.59–62; *D-Mbs* 1516)

Au pres de vous secretement demeure, 4vv, AC iii, 21 (attrib. Jacotin in 1528[6] and 1536[2]; attrib. Sermisy in 1551[7-8], 1555[23] and 1571[4])

Au pres de vous secretement demeure, 3vv, AC iii, 23 (attrib. Sermisy in Attaingnant 1535 and 1539[18]; attrib. Janequin in 1541[13])

Au pres de vous secretement demeure, 2vv, AC iii, 25 (attrib. Sermisy in 1545[7], anon. in 1551[20])

C'est grand malheur a creature née, 3vv, AC iii, 36 (attrib. Sermisy in only source, 1578[15]; doubtful on stylistic grounds)

Je ne le croy et le scay seurement, AC iii, 125 (attrib. Sandrin in 1538[11], 1540[9], 1549[18] attrib. Sermisy in 1551[4-5])

Las qu'on congneut (François I), AC iii, 148 (attrib. Sandrin in 1539[15-66], 1561[7], 1561[12]; attrib. Sermisy in 1538[17])

Le cueur est bon (music missing; attribution to Sermisy comes from the index of 1536[2]; an anon. setting of Le cueur est bon in 1528[3], ed. in AC iv, 3, is probably not by Sermisy)

Les yeulx bendez de triste cognoissance (François I), AC iv, 15 (attrib. Vermont in 1533[1]; attrib. Sermisy in *F-CA* 125–8)

Long temps y a que je viz en espoir (Marot), AC iv, 17 (attrib. Dulot in 1536[3]; attrib. Sermisy in 1537[3])

Mon petit cueur n'est point a moy, 2vv, AC iv, 31 (attrib. Le Heurteur in 1539[19] and other sources; attrib. Sermisy in 1564[13])

Puisqu'elle a mis a deux son amytié, AC iv, 63 (attrib. Crecquillon in 1544[12]; attrib. Sermisy 1536[5])

Si mon malheur m'y continue, AC iv, 94 (attrib. Pelletier in 1532[12]; attrib. Sermisy in 1537[3])

Si mon travail vous peult donner plaisir, AC iv, 95 (attrib. Sandrin in 1540[9] and 11 other sources; attrib. Sermisy in 1538[17])

Trop tost j'ay creu y prenant tel plaisir, AC iv, 106 (attrib. Mornable 1542[15]; attrib. Sermisy 1550[6])

Viens tost despiteux desconfort, AC iv, 119 (attrib. Appenzeller in *Des chansons a quattre parties, composez par M. Benedictus*, Antwerp, 1542; attrib. Jacotin in *F-Pn* n.a.fr.4599; attrib. Sermisy in *F-CA* 125–8)

ISABELLE CAZEAUX/JOHN T. BROBECK

Serna (Asturisaga), Estacio de la [Laserna, Lacerna, Estacio de] (*b* Seville, *c*1570; *d* ?Peru, after 1616). Peruvian organist and composer of Spanish birth. He was the son of Alexandro de la Serna, a well-known bass at Seville Cathedral. Estacio succeeded Hernando de Tapia as organist at the collegiate church of S Salvador in Seville on 29 October 1593. He resigned on 6 March 1595 to accept an appointment as organist of the royal chapel at Lisbon, a post he held from 1 April 1595 to 25 February 1604. He apparently spent the rest of his life in Peru, where until 18 April 1614 he was *maestro de capilla* of Lima Cathedral; he then exchanged posts with Miguel de Bobadilla (*d* 1626), the cathedral organist. Martín de León, in *Relacion de las exequias* (Lima, 1612), praised Serna's *Officium defunctorum*, composed in memory of

Queen Margaret of Spain and performed in the cathedral on the evening of 3 November 1612, in a service that lasted five hours. Serna's only surviving works are two tientos for organ (ed. in MME, xii 1952).

ROBERT STEVENSON

Serocki, Kazimierz (*b* Toruń, 3 March 1922; *d* Warsaw, 9 Jan 1981). Polish composer. He studied at the Łódź Academy with Sikorski (composition) and Szpinalski (piano) and then in Paris with Boulanger and Lazar Lévy. While in Paris he became acquainted with the Leibowitz's writings on serialism. Until 1951 he pursued a career as a pianist; two years earlier, together with Baird and Krenz, he had formed Grupa 49, a composer alliance dedicated to promoting socialist realism in music. He was for brief periods general secretary and vice-president of the Polish Composers' Union, and in 1956 co-founded the Warsaw Autumn Festival of Contemporary Music. He received several State Prizes, including one for his film score *Młodość Chopina* ('Young Chopin') in 1952 and two for his whole output, in 1963 and 1972. The Sinfonietta received an honourable mention at the UNESCO International Rostrum in 1959.

Serocki's output is predominantly orchestral. In the years 1949–56 his music was conditioned by prevailing cultural dogma. Of the songs and cantatas, pre-eminent is the pictorial *Symfonia pieśni* ('Symphony of Songs'), a setting of texts describing rural life, in a style that bears echoes of folk music, Szymanowski and Stravinsky. His considerable talent as a symphonist, however, is more apparent in the first Symphony (1952), a work embodying the heroism of socialist realism but which nevertheless breached the boundaries of the permissible by including highly chromatic melodies and frequently changing metre. Despite the freshness of its allusions to Bartók, Ravel and folk idioms, the Piano Concerto, composed in 1950, remains a neglected work, whereas the Trombone Concerto, both vigorous and lyrical, is one of several still popular works which Serocki wrote for the instrument in 1953–4. A tougher, Prokofievian quality is apparent in the Piano Sonata than in the delicately jazz-inflected harmonies of the *Suita preludiów* ('Suite of Preludes'), though both works further incorporate 12-note melodic lines into an essentially neo-classical idiom at a time when serialism was officially denounced.

Serocki's experimental tendencies were released after the neo-classical Sinfonietta of 1956. The song cycles of that year and the next embrace both Viennese 12-note lyricism and French Impressionism, but the purely orchestral *Musica concertante* (1958), *Epizody* (1959) and *Segmenti* (1961) chart a more radical course. Here Serocki explores postwar pointillistic textures without being subservient to the integral serial technique of his models, and though *Musica concertante* is clearly indebted to both Webern and Boulez, its serial organization is comparatively unsophisticated. *Epizody*, with its unusual seating arrangement for strings and three percussion groups (Serocki had heard Stockhausen's *Gruppen* at Darmstadt in 1958), combined with a greater interest in sustained lines and sound-masses, illustrates the parity between Serocki, Górecki and Penderecki during these years. In *Segmenti*, which has no string section, other experiments with colour dominate the proceedings as do the extended instrumental techniques and reliance on time-space notation. The culmination of these explorations is the *Freski symfoniczne*, a brilliant and extrovert essay in which free notation develops organically into synchronized rhythm; thus underlining his capacity for musical drama.

Unusually for Polish composers in the mid-1960s and the 70s, Serocki was reluctant to relax his pursuit of an avant-garde ideal. His compositional aesthetic was formed in works such as *Freski* and *A piacere* (1963) and ideas from both inform later pieces as well as his next instrumental work, *Continuum* (1966). *A piacere*, with its simple open form – three sections, each with ten miniature mobile segments, to be played in any order – was modelled on Stockhausen's *Klavierstück XI*, while *Continuum*, on the other hand, anticipates Xenakis's *Persephassa* in its placing of six percussionists around the perimeter of the hall. In contrast, the two vocal works of the late 1960s, *Niobe* and *Poezje*, while fine pieces in their own right, do not participate as fully in Serocki's quest as the instrumental pieces. The former is an example of the Polish postwar cantata for speaker and orchestra, while *Poezje* is couched in a quasi-operatic style. Both works are settings of leading postwar poets.

In the late instrumental works, Serocki employs an astonishingly wide range of musical ideas which never fail to coalesce. *Dramatic Story* (1968–70), originally intended as a ballet score, includes modal or diatonic melody as well as an intricate harmony and means of orchestration more commonly associated with Lutosławski. Additionally, for the first time in his output, players are here required to produce sounds from removed mouthpieces, a practice put to humorous effect in his four-minute jazz parody, *Swinging Music*.

Serocki was intent on searching for new sonorities, and this is most evident in his pioneering writing for recorder. *Impromptu fantasque*, scored for recorders, mandolins and guitars, is particularly notable for its use of extended playing techniques, while the *Concerto alla cadenza*, for one player and six recorders, is a bravura study involving glissandos and multiphonics. If *Ad libitum* is the epitome of Serocki's kaleidoscopic orchestral dynamism, *Pianophonie*, with its incorporation of electronic transformation of much of the soloist's music, is a logical and memorable outcome of the composer's ceaseless and energetic application of performing techniques to expressive ends. Serocki was a musical abstractionist for whom colour was both decorative and substantive, both transitory and structural.

ADRIAN THOMAS

Seroussi, Ruben (*b* Montevideo, 1 Jan 1959). Israeli composer and guitarist of Uruguayan birth. After emigrating to Israel in 1974, he studied the classical guitar with Menashe Baquiche and composition with Jan Radzynski. He obtained the BMus (1984) and MM (1986) at the Rubin Academy of Music, Tel-Aviv University, where his teachers included Leon Schidlowsky and Seter. He began to teach at the Rubin Academy in 1995. One of the foremost guitarists in Israel, his honours include two ACUM prizes (1992) and the Prime Minister Prize for composers (1994). As a composer, Seroussi has drawn inspiration from a variety of sources, including Luis Buñuel's films, Henri Matisse's paintings and the poetry of Pablo Neruda and Antonio Machado. His style, influenced by European avant-garde pitch content and Latin American orchestration, tends towards new complexity. His orchestral composition *Lux: in memoriam Mordecai Seter* (1995) begins and ends with bright, high-pitched organ pedal points and tremolos representing light; these are contrasted with blocks of dense, rhythmic colour and blocks of 'violent' silence. The long coda expands the sound of the beginning using rising scales, reminiscent of Seter's original modes.

RONIT SETER

Serov, Aleksandr Nikolayevich (*b* St Petersburg, 11/23 Jan 1820; *d* St Petersburg, 20 Jan/1 Feb 1871). Russian composer and critic. Although he never occupied any official position, never taught, and belonged to no organized group or faction, Serov was one of the most significant and, except for Anton Rubinstein, the most influential Russian musician of the 1860s. His critical writings are unrivalled in his country's literature for breadth and weight. Many of his essays have been reprinted numerous times and have continued to exert a strong authority. His operas were the outstanding contributions to the Russian musical stage between Dargomïzhsky's *Rusalka* and the early works of Tchaikovsky and The Five. They have not survived in the repertory.

1. Life. 2. Background, influences and activity as a critic. 3. The operas.

1. LIFE. Serov's mother was of German-Jewish origin, his father a distinguished civil servant. He was educated at the School of Jurisprudence, where music was encouraged. There he became friendly with fellow student Vladimir Stasov, four years his junior, with whom he later quarrelled irrevocably. He left the school in 1840, and, although he hankered after an artistic career, his father insisted that he should enter the civil service. He

took up music in a dilettante fashion, but, despite ambitious but abortive operatic projects, nothing more materialized in these early days than some weak fantasias on operatic airs for cello and piano (both of which instruments he played), and a few drawing-room songs and piano pieces. In 1845 he was appointed president of the Court of Appeal at Simferopol′ in the Crimea, where he met the brother of the anarchist Bakunin and had a not altogether discreet affair with a married woman. While in the south, he arranged through Stasov for postal tuition in counterpoint with the Czech theorist Joseph Hunke, who lived in St Petersburg. It was also in that period that his first identified article about music appeared, in the *Odesskiy vestnik* of 6/18 September 1847. In 1848 he resigned his post (though it was really only a sinecure) and returned to the capital, but his father forced him to take up a similar position in Pskov. In the early 1850s he completed an opera based on Gogol′s *Mayskaya noch′* ('May Night'). Stasov roundly condemned the work, one version of which is said to have been burnt. It is in his correspondence with Stasov that Serov's operatic projects of 1843 to 1854 are documented.

Serov finally gave up his government post in 1851. He became a martyr to his art, dressing shabbily (he is reputed to have worn the same hat for 20 years) and existing on the slender proceeds of musical criticism. From 1851 until 1865, when a crown stipend at last assured his livelihood, he maintained a frenzied literary productivity that made him an extraordinary reputation but virtually eclipsed his true musical vocation; his activity as a critic continued until his death. In 1858, during a visit to Germany, he made the acquaintance of Wagner. He had the good fortune to be patronized by the Grand Duchess Yelena Pavlovna: as a result of this (and the support of other influential aristocratic friends) no expense was spared in producing his opera *Yudif′* ('Judith') at the Mariinsky Theatre in 1863. This five-act opera, with a libretto concocted by a number of hacks and one genuine poet (Maykov) from the apocryphal book of *Judith*, was astonishingly successful both with the public and with the conservatory staff and students, including the young Tchaikovsky. Only the Balakirev–Stasov circle remained hostile. The financial benefits of the success enabled Serov to marry Valentina Bergmann, a talented pianist and student at the conservatory who herself became an opera composer (her opera *Uriel Acosta* was produced in Moscow in 1885); their son Valentin became an accomplished portrait painter (see illustration). Serov followed up his success with an even greater triumph. Like Verstovsky's still-popular *Askold's Tomb*, *Rogneda* (produced 1865) was based on a historical drama of the time of Vladimir the Great (i.e. the 10th century), with a libretto by the minor dramatist D.V. Averkiyev. This folk opera had as much success in Russia as *Der Freischütz* in Germany, and for much the same reason, despite its musical inferiority. For the next decade or two, no other Russian folk opera could compete with *Rogneda*, which received about 70 performances at the Mariinsky alone between 1865 and 1870. The tsar granted the composer a pension.

At the end of 1865 Serov was offered a post at the Moscow Conservatory by Anton Rubinstein's brother Nikolay, but his finances were now in such good order that he was able to refuse the offer, involving as it did being 'exiled' to the rather provincial second city of

Aleksandr Nikolayevich Serov: posthumous portrait by Valentin Serov, 1889 (Russian Museum, St Petersburg)

Russia. (Tchaikovsky accepted the post in his stead.) In 1866 he delivered to the Russian Musical Society some lectures on Glinka and Dargomïzhsky which revealed a comparative lack of bigotry, and he later commented favourably on the music of Rimsky-Korsakov; but in his very last years he reviled Balakirev mercilessly in the *Muzïkal′nïy sezon*, a new periodical financed by Yelena Pavlovna. She had quarrelled with Balakirev and forced him to resign the conductorship of the Russian Musical Society, of which Serov became a board member. Serov's last opera, *Vrazh′ya sila* ('The Power of the Fiend'), was left incomplete at his sudden death from heart disease, and was finished by his widow and N.F. Solov′yov. It is based on a typically realistic play about contemporary Russian life by the celebrated Aleksandr Ostrovsky.

2. Background, influences and activity as a critic. Like many 19th-century composers, Serov gave expression to many of the ideas most important to his composing in his work as a critic; as in other cases however, there was often a considerable gap between the ideals set forth in prose and their author's musical practice. The influence of Glinka was virtually inescapable for a Russian of Serov's generation, and the pioneer of artistically successful music, especially opera, using Russian subjects and of Russian musical cast could not fail to serve as an example. Again like many of his generation, Serov championed the

notion that there was much to be done in Russian music by encouraging the creation of indigenous repertories.

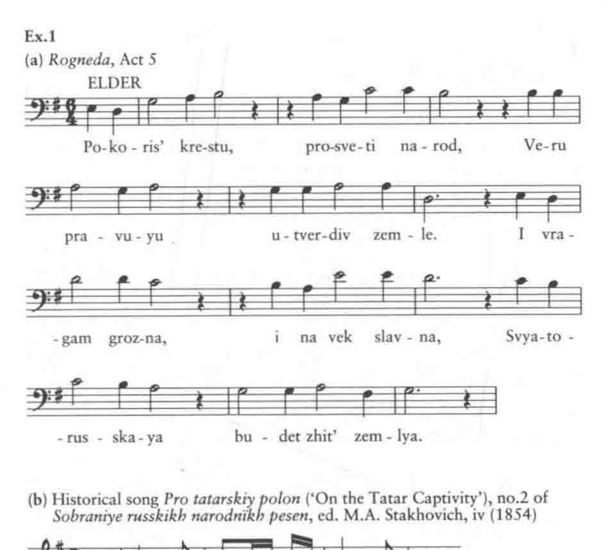
Serov became known to the public as a critic some 12 years before he did as a composer. His critical voice was from the first that of a frustrated operatic composer: all of his most important essays were prolix, high-minded and compulsively polemical tracts on the aesthetics (which for him amounted to the ethics) of dramatic music. The tone which he employed did nothing for his relationships with other musicians, to whatever camp they might belong.

The first of these programmatic pieces was *Spontini i yego muzïka* ('Spontini and his Music', 1852), in which he gave first Russian voice to the well-worn reformist position (there attributed to Gluck) that the criteria of musical drama 'are the same as those of spoken drama, that music drama must be, in fact, and above all, *drama*'. For this blessed union to come about, he asserted, it would be necessary to reconcile the demands of musical beauty with those of 'truth of expression', which implied the rapprochement of the Italian and German schools. Disillusioned with Meyerbeer, he looked forward to the advent of 'a new operatic genius, inclined towards the tragic genre', who would 'loose the Gordian knot'.

Within months of writing these words, Serov discovered *Oper und Drama*, and this began his long involvement – personal, professional and propagandistic – with Wagner, in whom he instantly recognized a kindred spirit. He met Wagner in Weimar in 1858, immediately after being bowled over by *Tannhäuser*. In 1863 he heralded Wagner's Russian tour and proclaimed himself a disciple. His incautious advocacy of a composer from whom other Russian musicians tended to hold aloof did his reputation more immediate harm than good, and has also affected posterity's view of him, placing him in an unfortunate double bind. His aesthetic position is often described as wholly derivative from Wagner's, though the Spontini article shows it to have been basically in place by the time of his 'conversion'. More seriously, the fact that his subsequent creative work does not so obviously derive from Wagner has been taken as evidence not merely of a lesser gift, but of inconstancy and opportunisn as well.

This unfair assessment is due to Stasov, with whom Serov fell out over a divergent view of Glinka's legacy (and over Stasov's brief amorous entanglement with Serov's sister). As a partisan of the Balakirev circle, Stasov upheld *Ruslan and Lyudmila* as a model of Russian national music despite its dramaturgical shortcomings. Serov, true to his puritanical idealism, rejected *Ruslan* in favour of the dramatically stronger *A Life for the Tsar*. Their estrangement erupted into a bitter and protracted press war after Glinka's death, in which Serov was portrayed as a blind 'Zukunftist' hostile to the 'New Russian School', despite his uniformly warm critical reception of Balakirev, Cui, Musorgsky and Rimsky-Korsakov on their respective débuts. (His later hostility to Balakirev and Cui was a response to overt provocation.) Stasov, who outlived Serov by more than 30 years, continued to besmirch his memory in a torrent of abusive writings, including the great synoptical articles that formed the basis for Western reception of Russian music in the early 20th century.

Whatever disadvantages may have accrued to Serov from his Wagnerian leanings, they were amply outweighed by the simple fact that it was Wagner's example – the proof, as it were, that the ideal was attainable – that reawakened Serov's dormant appetite for musico-dramatic creation. In 1857 he turned to another Russian Wagnerite – Konstantin Zvantsov, an official of the Imperial Theatres who later translated *Tannhäuser* and *Lohengrin* for their Russian premières – with a proposal that they become a team. For three years they got nowhere with choosing a subject; but on the night of 20 December 1860/1 January 1861, the two of them were sitting together in a box at the Mariinsky Theatre when the touring Italian tragedienne Adelaida Ristori, speaking her own language, scored a sensation as the title character in *Giuditta* by Paolo Giacometti. This was it at last: two and a half years later, at the same theatre, the 43-year-old Serov finally made his operatic début with *Yudif'*.



3. THE OPERAS. The music of *Yudif'* is raw, blatant and stylistically anonymous. It also exhibits what César Cui, no friend of its composer, had to recognize as 'a nose for theatre' coupled with a respectably 'conscious attempt to embody a truly contemporary view of art'. Wagnerian affinities are not to be sought in the musical details but in the flexible formal design, in which full closes are avoided for exceedingly long stretches. The opera enjoyed far more than the predicted *succès d'estime*. The mounting success at the première was surely due in part to a canny scenario that followed a pair of severe acts depicting the besieged Hebrews with a pair of gaudy ones set in the Assyrian camp. *Yudif'* played 20 times to full houses during its first season, an extraordinary success for a Russian opera.

The critical reception, like that of the public, was also unusually friendly, with an especially lengthy and appreciative review from the poet Apollon Grigor'yev, through whom Serov was introduced to a literary circle known as *pochvenniki* ('men of the soil'), clustered round Dostoyevsky's journals *Vremya* ('Time') and *Epokha*. It was in this conservatively nationalistic milieu that Serov's second opera, *Rogneda*, gradually took shape. Set at the time of the christianization of Russia, it celebrated the union of the Russian church and state. True to his critical principles (or so he imagined), Serov copied the dramaturgical shape of *A Life for the Tsar*, opposing 'pagan' and 'Christian' music (as Glinka had opposed Russian and Polish) in an accelerating rhythm of confrontation, meanwhile planting a melody for multifarious symbolic reprise and eventual blazing culmination, 'thematic' in a dual sense (ex.1).

The ease with which Serov's antagonists (chiefly Stasov and Cui) were able to hoist the poor composer with his own petard, even as the old-guard press was extolling his 'civic deed', has made the critical reception of *Rogneda* a famous tragicomedy. The action, pieced together from miscellaneous factual and fictional sources, could hardly have been less coherent; the opera's historical gaffes could scarcely have been more glaring; nor, despite the composer's claims, was it at all short on conventional operatic trappings or formal numbers, many – especially the folklike ones – of a triviality it was only too easy to expose.

Vrazh'ya sila ('The Power of the Fiend') occupied the composer for more than five years, but remained unfinished because of the huge, paralysing rift that developed between the cantakerous composer and his librettist Ostrovsky. It was a great pity, for the opera was on its improbable way to becoming a genuine masterpiece, as far removed in concept as one could imagine from the

gaudy monumental spectacles on which Serov had made his reputation. Even in its ersatz redactions (see the work-list), the work represents the high-water mark of 'genre realism' (the realism of simple everyday life) in Russian opera, and the most thorough-going integration of Russian folk idioms into art music ever attempted.

Genre realism implies an unpretentious, even casual formal design, and Serov, with fine theatrical instinct, cast the work in an unashamed numbers format not far removed from the lowly status of the vaudeville, a genre still current on the St Petersburg stage, where an active French theatre (both spoken and modestly musical) remained popular throughout the 19th century. In place of spoken dialogue, however, Serov concocted an idiosyncratic sort of recitative that was no less imbued than the lyric numbers with the 'intonations' of urban folksong. And, having decided to end the opera with a bloody denouement to replace Ostrovsky's happy ending (the source of their falling-out), Serov composed music that for studied ugliness had no precedent in the music of his time. In the best scenes (the Act 3 finale, the Shrovetide panorama in Act 4) the combination really jelled; the opera has an originality of style and an integrity of tone at which nothing in Serov's earlier output had so much as hinted.

Serov's compositions were not influenced by Wagner, or by his use of the leitmotif technique: rather, he used reminiscent themes in much the same way as Meyerbeer or Verdi, and there is nothing so comprehensive in any Serov opera as Glinka's use of the reminiscence technique in *A Life for the Tsar*. As Tchaikovsky wrote, Serov 'knew how to catch the crowd' and was capable of piling up 'sensational effects'. This Russian Meyerbeer was influenced not only by that composer, but by Gounod, Verdi, Spontini, Halévy, Glinka and Dargomïzhsky, among others: he was as catholic in this respect as he was narrow in his critical writings. In their turn, Serov's operas greatly influenced later Russian composers. Perhaps it was in his manipulation of crowd scenes that Musorgsky was most indebted to Serov. A good example from *Rogneda* is the naturalistic crowd (3 tenors, 1 tenor, 1 bass, another bass etc.) in the finale of the last act: this kind of crowd treatment is found throughout *Boris Godunov*. Some dramatic ideas in that opera which probably originated in Serov's operas are Boris's hallucination (Holofernes's hallucination in *Yudif'*); the scene with Pimen (bass), Grigory (tenor) and chorus: Act 3 of *Rogneda*, with the Old Pilgrim (bass), Rual'd (tenor) and pilgrim's chorus; and the idea of the Simpleton (the Fool and his song in *Rogneda*, which Musorgsky quoted in his satirical song *The Peepshow*). *Vrazh'ya sila*, especially the carnival scene, certainly influenced Musorgsky's *The Fair at Sorochintsï*, but more interesting than this obvious connection is the influence of both *Yudif'* and *Rogneda* on Tchaikovsky: in his ballet music (dances and chorus of the Odalisques in *Yudif'* and the girls' dance in Act 2 of *Rogneda*); in his opera *Vakula the Smith* (dance of the buffoons in Act 2, and folklike chorus of women in Act 4 of *Rogneda*); in *The Oprichnik* (many passages, especially the chord of the 'Russian' augmented 6th in a tonic context in the penultimate number of Act 4 of *Yudif'*); and in *Yevgeny Onegin* (certain descending scale passages both in Rogneda's monologue and the last scene of Act 4 of *Rogneda*). There are also numerous examples of influence on the music of Rimsky-Korsakov and Borodin, as for instance the epic folklike final chorus of Act 5 of *Rogneda*: this might have come straight from Borodin's *Prince Igor* or Rimsky-Korsakov's *Sadko* (for the latter, Rimsky also plundered the opening figure of Act 1 of *Rogneda*). In almost all the cases mentioned, and in many others, Musorgsky, Rimsky-Korsakov, Tchaikovsky and Borodin were stimulated to greater things by the ideas adumbrated by Serov. Musorgsky wrote to Balakirev that at the beginning of Act 1 of *Yudif'* the chorus of starving Jews lies there silently, and 'Serov forgets about them'; if he had managed it otherwise it would have turned out 'new and interesting'. And in his autobiography Rimsky-Korsakov acknowledged his use in *Antar* of a triplet figuration taken from the finale of Act 5 of *Rogneda*, 'only mine is better and more subtle than Serov's'.

If *Rogneda* is a mere hotch-potch of variegated scenes, *Yudif'* is much more satisfactory structurally. The epic Acts 1, 2 and 5, which take place in the besieged Jewish city, flank the oriental Assyrian Acts 3 and 4. His attempts at epic grandeur sometimes fell flat, and he could sink lower than the Mendelssohn oratorio choruses which some contemporary critics thought were the prototypes of his Jewish choruses. Also, more often than not, he failed to use his palette of oriental colours in the Assyrian acts with the assured genius Glinka had revealed in *Ruslan and Lyudmila*, and his recitatives lacked the distinctive qualities which frequently raise those in Dargomïzhsky's *Rusalka* and *The Stone Guest* above the commonplace. Serov's operas will probably remain museum pieces. But among the dross of the many vulgar or insipid pages may be found the gold of a few really inspired passages, and his instrumentation is always effective and sometimes truly original, as Wagner was the first to point out. As was the case with Meyerbeer, who was similarly influential in the West, Serov was reviled, envied and imitated in about equal proportions by other composers.

WORKS
(*selective list*)

Mel'nichikha v Marli [The Miller-Girl from Marly] (comic op, Serov and D'yachenko), 1844, inc.

Mayskaya noch' [May Night] (comic op, 2 or 3, P. Bakunina, after N.V. Gogol'), 1850–54, destroyed

Yudif' [Judith] (op, 5, A. Maykov and others, after the book of Judith), 1861–3, St Petersburg, Mariinsky, 16/28 May 1863, vs (Moscow, 1885)
Rogneda (op, 5, Serov and D.V. Averkiyev), 1863–5, St Petersburg, Mariinsky, 27 Oct/8 Nov 1865, vs (St Petersburg, 1866)
Noch' pod rozhdestvo [Christmas Eve] (comic op, 3, Ya. Polonsky, after Gogol'), 1866, sketches only
Vrazh'ya sila [The Power of the Fiend] (op, 5, Serov and A.N. Ostrovsky, after Ostrovsky: *Ne tak zhivi, kak khochetsya* [Live Not the Way You'd Like to, but as God Commands]), inc.; completed by N.F. Solov'yov and V.S. Serova, St Petersburg, Mariinsky, 19 April/1 May 1871, vs (Moscow, 1885); completed and ed. B. Asaf'yev, Moscow, Bol'shoy, 30 May 1947

EDWARD GARDEN, STUART CAMPBELL

Serova [née Bergman], **Valentina Semyonovna** (*b* Moscow, 1846; *d* Moscow, 24 June 1924). Russian composer and writer on music. She was the wife of the composer Aleksandr Serov and mother of the painter Valentin Serov. In 1862 she entered the St Petersburg Conservatory with a scholarship to study the piano with Anton Rubinstein, but left and studied privately with Serov, whom she married in 1863. Together they published *Muzïka i teatr* (1867–8), which included her earliest writings on music. In January 1871, Serov's opera *Vrazh'ya sila* ('The Power of the Fiend') was in production when the composer died, leaving Act 5 incomplete. Serova, aided by Nikolay Solov'yov, finished it in time for the première. The intense emotional experience revived her interest in composition and resulted in four original operas. Her first opera, *Uriel Acosta* (1885), was the only one to be performed at the Bol'shoy in Moscow; *Marie d'Orval* (composed during the 1880s) is set in the French Revolution; *Il'ya Muromets* (given by the Mamontov Private Opera in Moscow in 1899) is based on a Russian heroic tale; the last, *Vstrepenulis'* ('They Roused Themselves Up'), relates to the political unrest of 1904–5. Serova also wrote music criticism between 1865 and 1915 and vigorously promoted music education among the people.

MALCOLM HAMRICK BROWN/R

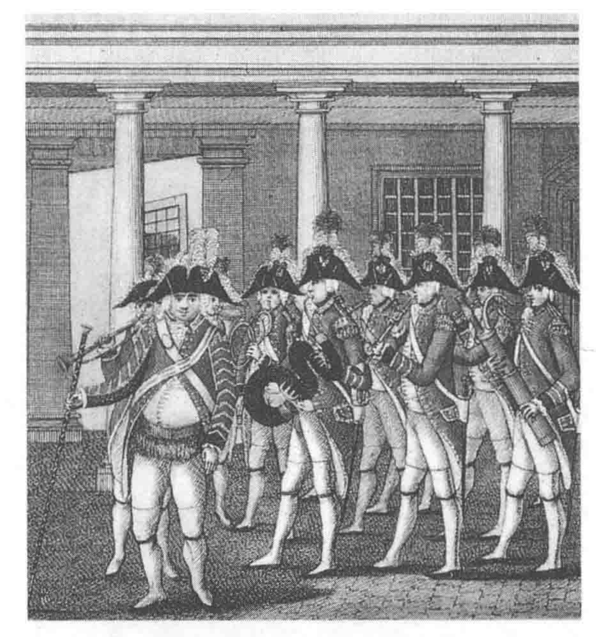
Serpent (Fr. *serpent*; Ger. *Serpent*, *Schlangenrohr*; It. *serpentone*). A lip-energized wind instrument with side holes and a cup-shaped mouthpiece, sometimes called the 'bass of the cornett family'. Its original purpose was to strengthen the sound of church choirs, especially in Gregorian plainchant. In the mid-18th century it was adopted by military bands, where it was gradually replaced during the 19th century by the valved bass brass instruments.

In the Hornbostel-Sachs classification the serpent is ranked as a trumpet.

1. Description. 2. History. 3. Makers. 4. Players.

1. DESCRIPTION. The serpent differs from the 'great' (bass) cornett – from which it is evidently derived – by the more pronounced conicity of its bore, its thinner walls, and the absence of a thumb-hole. It consists of a sinuous

1. Serpents: (a) keyless, almost certainly French, late 17th century (private collection); (b) with three keys, English, c1800; (c) with seven keys, by Thomas Key, London, c1815 (both in Bate Collection, Faculty of Music, Oxford); (d) with twelve keys, by Thomas Key, London, c1840 (Museum of Welsh Life, Cardiff)



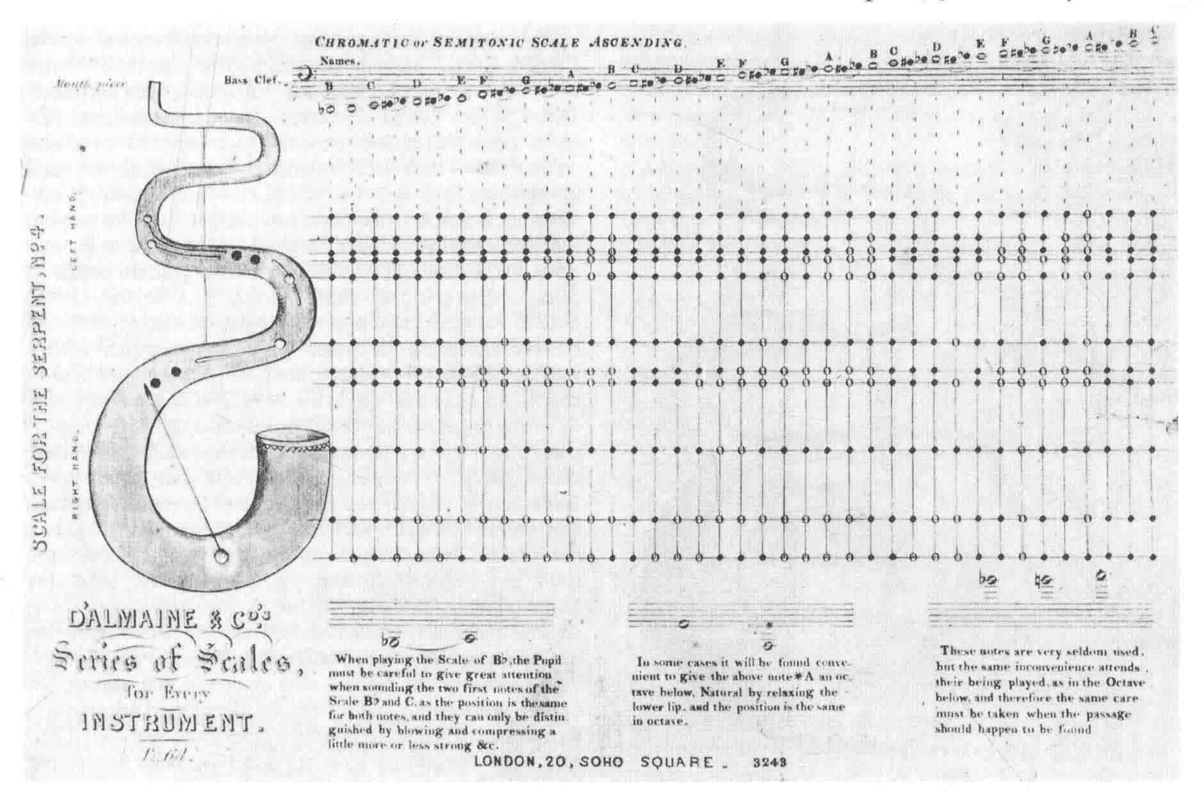
conical tube about 2·13 metres long; inserted into its smaller end is a right-angled metal crook, which increases the length to about 2·44 metres. The bore expands from about 1·3 cm to nearly 10·2 cm. The mouthpiece is generally of ivory or horn and is similar to that of the bass trombone, sometimes nearly hemispherical in shape and with an exceedingly narrow rim. A metal mouthpiece with a wider rim came into use later, mainly among military-band players. The serpent originally had six finger-holes (fig.1*a*), arranged in two groups of three with a distance of about 30·5 cm between the lowest hole of the upper group and the highest of the lower group. The

upper group was fingered in the same way as other woodwind instruments, but the lower group could also be fingered with the order of the fingers reversed, the right hand being placed palm upwards below the bend (fig.2). During the 19th century instruments were made with two to eight additional holes governed by closed keys (figs.1*b*, *c* and *d*). In its final form the serpent had 14 such keys, with no holes directly fingered. English and continental serpents differ in outline, the English instruments being more compactly folded (figs.1*a* and *b*).

Serpents were nearly always made of wood, usually walnut. Surviving instruments show two distinct methods of construction. The earlier was to shape and hollow out two complete halves from solid blocks of wood and glue them together to make a tube, strengthening the parts subject to stress with ox sinew and covering the whole with leather. The second method, favoured by 19th-century English makers, was to build up the instrument from fairly short overlapping half-sections. These were glued, reinforced across the joints with metal staples, and lapped with canvas and then with leather. The two ends of the tube were further strengthened with brass mounts. In a few early serpents the two methods were combined as the available material dictated. Although Mersenne said that serpents could equally well be made of brass or silver, no early metal instruments seem to have survived. Metal serpents are said to have been made around 1800 by August Grenser (i) of Dresden, and by Feidhart, a pewterer of Leipzig. In the Reid Collection (Edinburgh University) there is a late-style serpent of copper signed 'Joseph Taylor, Glasgow'.

Originally the serpent was held vertically, but during the 18th century Abbé Lunel, a celebrated serpent player at Notre Dame, Paris, introduced a method of holding the instrument diagonally with the second bend over the forearm. Hermenge, in his serpent tutor (*c*1817), advocated a nearly horizontal position with the first bend between the left forearm and the body. Hermenge notwithstanding, as late as the mid-19th century, serpentists in Amiens Cathedral were still holding the serpent d'Eglise vertically and examination of the drilling of the finger holes in extant early 19th century French church serpents suggests the vertical position remained in favour. Military serpents, on the other hand, being by design more compact and sturdy than church serpents, lent themselves almost immediately to a more horizontal playing position; in England, tradition has it that George III suggested both the method (used by military marching bands) of holding the serpent on the diagonal (fig.2), and the slightly outwards-turned bell that is characteristic of most later English instruments.

Like all cup-mouthpiece instruments the serpent sounds a number of the partials of the harmonic series. Opening of successive finger-holes modifies the effective length of the air column and so enables the formation of new fundamentals (here the terms 'fundamental' and 'harmonic' are used in the broad sense common among playing musicians). Chromatic intervals are obtained by half-opening the finger-holes or by fork fingering, the former being the older method. As the finger-holes are opened towards the mouthpiece the tone quality becomes progressively poorer, though skilful breath control can mitigate inequalities in resonance. The 8th partial, obtained with all holes covered, was probably the upper limit of the range. The serpent's large bore enables the



2. Serpent held diagonally (the first of three holes, and thus the player's left hand, would normally be on the second bend), with trumpet, horns, oboes and bassoons in a military band: detail of an engraving of the changing of the guard at St James's Palace, London, c1790

fundamental to sound readily, and the diatonic scale of the first octave consists entirely of fundamentals. The rather curious proportions of the instrument, however, afford the player considerable latitude in the pitch of these fundamentals and, to a lesser extent, of their partials, which can by lip adjustment be lowered by as much as a 4th. This explains why on most charts the downward compass of the instrument is shown as extended by two or more semitones below the note sounded with all finger-holes closed and normal lip tension, and may also account for the many divergences between one fingering chart and another. Of eight such charts published between *c*1760 and *c*1835 (listed in Table 1) no two agree as to either fingering or compass. All except the last are for serpent without keys and indicate occasional fork fingering; four call for some half-stopping as well. The last is for a seven-key instrument on which all the chromatic notes are obtained by means of the keys (fig.3). In England it was customary to consider the serpent's true fundamental (all holes closed) as *C*, while the French tutors and Fröhlich give it as *D*. *D* is possible on English instruments, but

French instruments seem to be more responsive at the lower end of their compass, though there is little apparent difference in size.

During the mid-19th century a few larger serpents were built. A contra-serpent exactly twice the size of the ordinary instrument was made about 1840 by two brothers named Wood. It was played in York Minster and elsewhere in the York area, and is now in the Edinburgh University Collection of Historic Musical Instruments. Another large instrument, in E♭, was reported to have been displayed by James Jordan, a Liverpool maker, at the 1851 Exhibition in London; Jordan's exhibition leaflet makes no mention of a contra-serpent, but does describe his 'newly invented Euphonic Serpentcleide in C. Lowest note CCC, or an octave below the ordinary serpent .... Its power and beauty of tone is perceptible from the lowest F of the Pianoforte'. There is no illustration of this monster, whose price is quoted at £31 10s.

2. HISTORY. According to Abbé Leboeuf (*Mémoire concernant l'histoire ecclesiastique et civile d'Auxerre*, Paris, 1743) the serpent was invented about 1590 by Edmé Guillaume, a canon of Auxerre and an official of Bishop Amyot's episcopal household, who discovered the art of making a cornett in the form of a serpent. This new instrument is said to have given fresh zest to Gregorian plainsong and was soon in widespread use in churches. The earliest known serpent player (apart, presumably, from Guillaume himself) was Michael Tornatoris, who in 1602 was appointed player of the serpent and bassoon (the bassoon was then only in the dulcian stage) to the church of Notre Dame des Doms, Avignon.

Praetorius made no mention of the serpent, which was apparently unknown in Germany before about the mid-18th century. The first detailed description is found in Mersenne (1636–7; fig.4); from this it may be surmised that the earliest serpents were about 46 to 61 cm shorter than the 18th-century instruments and had a true fundamental of *E* instead of *D*. Kircher (1650) included a drawing and a brief description, stating that the serpent was then used extensively only in France. In at least one European collection large cornetts of more or less serpentine form, undoubtedly made as early as or earlier than the true serpent, have been wrongly identified as 'Italian serpents'. This has given rise to the view that the serpent originated in Italy and at an earlier date than had been generally supposed; but the alleged 16th-century serpents were examined by Morley-Pegge and proved to conform to all the criteria of the cornett, including the thumb-hole not found on the true serpent. Aimé Cherest (*Bulletin de la Société des Sciences Historiques et Naturelles de l'Yonne*, iv, 1850, pp.29–53) also cast doubt on the reliability of Leboeuf's statement. He asserted an earlier origin for the instrument, basing his view on an entry in the accounts of the archdiocese of Sens for 1453–4, but the entry is ambiguous and seems almost certainly to refer to repairs made to some metallic part of the church furniture.

The serpent was probably brought to England from France after the Restoration. The James Talbot manuscript (*GB-Och*), which is thought to date from about 1695, gives details and measurements that show that the instrument was then nearly identical with that of a century later. According to Talbot's notes, chromatic intervals were obtained by half-stopping the holes, but he did not

4. *Keyless serpent, with details of mouthpiece and range: woodcut from Mersenne's 'Harmonie universelle' (1636–7)*

mention fork fingering. The names of the two leading players of the day, Le Riche (or La Riche) and Lewis, are also given.

Apart from Busby's account (*Concert Room and Orchestra Anecdotes*, 1825) of how Handel first heard the serpent in England – by no means improbable, since it appears to have been unknown at that time in Germany – the instrument seems to have attracted little attention until 1783, when a German band was recruited in Hanover for the Coldstream Guards. This band included a serpent, and within ten years or so the instrument was found in most English military bands. Doane's *Musical Directory* (1794) mentions four players attached to Guards' bands, as well as Louis Alexandre Frichot, serpent player in the Concert of Ancient Music orchestra in 1793.

Chromatic keys were evidently added to the serpent earlier in England than elsewhere: in the early 1800s three keys became standard; their application to the convoluted serpent was no doubt suggested by the three-key upright BASS-HORN with which Frichot was experimenting early in the 1790s. About 1817 the bandmaster of the Prince Regent's band, Christian Kramer, is said to have devised improvements which made every note 'equal in strength and roundness of tone'. He 'added both to the number and size of the holes; constructed keys with a double action, which lie conveniently under the hand, and enable the performer to slur through the chromatic scale'. His instrument was reputed to have a compass of 'three octaves from double C' and was no doubt the forerunner of the seven-key serpents made in London by Thomas Key of Charing Cross.

The serpent made a significant contribution to the English church band in the early 19th century, although it was not as prevalent as has previously been surmised. D.J. Blaikley (*Grove2*) stated that the instrument 'for many years was an indispensable member of the primitive orchestras which accompanied the singing in rural churches in England'. In 1922 K.H. MacDermott (*Sussex Church Music in the Past*, p.41) noted that the serpent was 'practically obsolete in England, but still to be met with in France'. He referred to four church bands in Sussex where it had been played. S.J. Weston (1995, p.223) located examples of its use in six of the nine eastern counties. He noted 21 extant serpents with a known church provenance, both on the mainland and on the Isle of Man and the Scilly Isles. The serpent was used in much the same way as bassoons and cellos to support the church band's texture; the serpent's close relatives, the ophicleide and bass-horn, were less often used. Examples of church bands which used a mixture of bass instruments include Hucknall, Nottinghamshire, where a 'bass fiddle', ophicleide, trombone and two bassoons were used in conjunction with the serpent. At Seagrave, Leicestershire, however, it seems that the serpent was superseded by an ophicleide, although the two instruments are preserved together, displayed in the same glass case.

In Germany the serpent was evidently first adopted in certain wind bands around the middle of the 18th century. A number of military marches composed between 1750 and 1764 containing serpent parts have been discovered by Karl Haas, but no earlier evidence of the serpent in German wind bands has come to light. Although the 19th-century upright serpent was used to some extent in Germany, it did not have so long a life there as elsewhere, no doubt because the valve was developed earlier in Germany than elsewhere.

In France the serpent was used mainly in sacred music, and it is doubtful that it was used in military bands before the Revolution. Gaspard Veillard, who taught serpent at the newly formed Paris Conservatoire from 1796 to 1803, was a member of the Musique des Gardes Françaises as early as 1771, but as he was also a bassoonist at the Paris Opéra he probably played a bassoon and not a serpent in the military band. A bassoon-serpent introduced in 1788 was the first of many forms of upright serpent widely used during the first half of the 19th century. Although its inventor, J.J. Régibo, was a Frenchman, France seems to have been the last country to adopt this type.

The main cause of the serpent's decline in popularity in the 19th century seems to have been the increasing tendency to extend its compass upwards and to use the instrument in ways for which it was structurally unsuited. According to a manuscript serpent tutor by J.B. Métoyen, musician-in-ordinary to Louis XV and Louis XVI from 1760 to 1792, who was referring to the use of the serpent in church, it was becoming all too common among players to finish off on the 'fourth D in the third octave' (i.e. the 8th partial) instead of on a 'belle pédale'. In addition, since good serpent playing depended above all upon a good sense of pitch, the addition of keys in the 19th century very probably led to a deterioration in the average quality of playing. Players were encouraged in the fallacious belief that keys cured faulty intonation, whereas keys actually had no influence on the instrument's remarkable inherent flexibility. The serpent tended to be neglected by more sensitive musicians and so fell into

disrepute, encountering devastating criticism from Choron, Berlioz and others. Such criticism, levelled at the serpent by musicians who can hardly have heard it at its best, has been frequently repeated by others who never heard it at all. Whatever its shortcomings may have been in the hands of poor players after it had been unscientifically mechanized, in its simple form it had performed useful service for at least two centuries. Burney compared its tone, in incompetent hands, to that of a 'great hungry, or rather angry, Essex calf', but he also admitted that when judiciously played it supported voices better than the organ. A later partisan, commenting in *Musical World* (3 June 1841) on an improvement made by Thomas Key, said 'thus the fine quality of tone of the serpent may, henceforth, be available in the orchestra, and the hog-song of the ophicleide will, we fervently hope, be speedily tacitted or banished altogether'.

During the second half of the 20th century the early music movement brought about a revival of the serpent, giving rise to some new repertory. The early-brass specialist Alan Lumsden gave the first performance of Simon Proctor's Concerto for Serpent in South Carolina in 1989. Other composers have included Judith Weir, Clifford Bevan and Robert Steadman. Peter Maxwell Davies scored for the instrument in his opera *Taverner* (1962–8).

3. MAKERS. Most surviving serpents, apart from the upright forms, are without attribution. Rarely one finds an example of the 18th century or very early 19th with an otherwise unknown name on it, but there is nothing to show whether the name is that of an obscure maker or of the instrument's owner; the latter seems more probable since there is no known instance of two such serpents with the same name.

5. (a) Serpent militaire, c1810, based on the French 'Serpent Piffault' (Royal College of Music, London); (b) Serpent Forveille with three keys by Klemmer, Paris, c1835 (Bate Collection, Faculty of Music, Oxford)

In England, where the instrument in its convoluted form survived later than elsewhere, there are a number of 19th-century examples by such makers as Milhouse, Thomas Key and Gerock, all of whom were well-known woodwind makers. During the second quarter of the century there were a few serpent specialists, such as Francis Pretty, maker of horns and trumpets, who appears to have specialized in bass-horns and serpents (1838–40), Charles Huggett (1843–9) and possibly Beacham (who has been credited with inventing the serpentcleide played by Prospère, the renowned ophicleidist of Jullien's band).

Among the Paris specialists were Piffault, maker of *serpents militaires*, an upright form (*c*1806; see fig.5*a*), and Baudoin (convoluted *serpents d'église*, usually with three keys, *c*1812). The *serpent Forveille* was a variety of upright serpent devised by the Paris maker Forveille shortly before 1823, when he was awarded an honourable mention for this instrument at the Paris Exposition, and it became popular in France. The bell half of the instrument is of wood; the remainder consists of two sharp U-bends of brass, with the smaller end terminating in a swan-neck crook which carries the mouthpiece (see fig.5*b*). There are six finger-holes and three or four keys; fingering and general technique – shown in several fingering charts and in tutors by Hermenge and Schiltz – are those of the ordinary serpent. Similar in design, though with more complicated keywork, were the *chromatisches Basshorn* (*c*1820) by Johann Streitwolf of Göttingen and Haseneier's *Bass-Euphonium* (*c*1850). Coëffet's *ophimonocléide*, patented in 1828, derived its name from the fact that it had but one large, open-standing key near the brass bell; the body of the instrument was of wood. The key was closed only for C♯ and D♯ in all octaves, for B in the third octave, and for E♭ and F in the fourth octave. The instrument also had a slide whereby its pitch could be altered from opera to cathedral pitch (a difference of about one-third of a tone). It appears to have had little success but surviving examples are preserved in the Bate Collection, Oxford, and at the Royal College of Music, London; an incomplete specimen is at the City Museum, Weston Park, Sheffield. By 1850 in any case (the date of the Haseneier instrument notwithstanding) all instruments of this type had become obsolete.

Parisian makers who produced serpents of the RUSSIAN BASSOON type were Baumann (*c*1800–*c*1830), who also made serpents with six keys (of the *serpent d'église* type), Pezé (*c*1807), Boileau *fils* (*c*1818) and Galander (*c*1835). Forveille's pupil Turlot made and repaired serpents of all kinds. Outside Paris, Tabard (*c*1820), Jeantet of Lyons (*c*1820), Printemps of Lille (*c*1820) and Coëffet of Chaumont-en-Vexin (*c*1828) also produced excellent serpents of the Russian bassoon type.

Belgian makers who produced upright serpents (mainly of the Russian bassoon type) as well as other instruments include Bonne (Ghent), Van Belle (Ghent), Dupré (Tournai), Van Engelen (Lierre), Charles Sax (Brussels) and Tuerlinckx (Mechelen). Streitwolf (Göttingen), Stiegler (Munich) and Luvoni (Milan) also made upright serpents. Only two makers, Milhouse and Tuerlinckx, are known

to have been active before 1800. Sachs illustrated a 19th-century serpent (which he described as 'tubaform'), the original of which is preserved in the Rijksmuseum, Amsterdam. This is an upright instrument with a forward-facing bell of true serpent shape, rather than the ophicleide-type bell which is a feature of the ophimonocleide, among other instruments.

Late 20th-century makers of the serpent included Christopher Monk (who was succeeded by Keith Rogers), and David Harding of Abingdon.

4. PLAYERS. Although the serpent, with its very low normal register, does not lend itself to virtuoso display, there have been a few players whose exceptional skill attracted notice. Abbé Aubert, serpent player at Notre Dame, Paris, from about 1750 to 1772, was said by Francoeur to have been the finest player up to that time. His successor, Abbé Lunel, also had a great reputation in his day, but both confined their playing to ecclesiastical circles. Louis Alexandre Frichot, the French serpent player, lived in England after escaping from the Revolution, but appears to have played there only on the bass-horn, his own invention. Hurworth of Richmond in Yorkshire was a member of George III's private band and could execute elaborate flute variations on the serpent with perfect accuracy. André, of the Prince Regent's band and later of the remarkable Montpellier Spa band near Cheltenham, appears to have been the outstanding serpent player of all time. It was for him that Christian Kramer arranged the Corelli sonata that Domenico Dragonetti, the great double bass player, performed as a showpiece. (On one occasion at Montpellier Spa when André played the sonata, Dragonetti, who was present, loudly applauded the performance.) André was held by his contemporaries to be fully as great a player on the serpent as was Dragonetti on the double bass. He retired from active playing about 1853. Jepp, of the Coldstream Guards, was another exceptional serpent player. Somewhat younger than André, he never attained the latter's outstanding position, but his services were in great demand at music festivals and even for chamber music. He was a member of Sir George Smart's select band that played before Queen Victoria at the Guildhall in 1837. The serpent gradually declined during the remainder of the 19th century, in spite of Sir Michael Costa's championship of its cause. In 1897 Prout noted that 'the serpent is now so entirely obsolete that when, some years ago, the author was arranging for a performance of *St Paul*, he was unable to find a player on the instrument in the whole of London, and the part had to be played on a tuba'.

The revival of interest in the serpent since the late 20th century is chronicled in the *Serpent Newsletter*, edited by Paul Schmidt, who also maintains the Serpent Website. Modern performers include the London Serpent Trio (comprising Philip Humphries, Andrew van der Beek and Clifford Bevan), Michel Godard, Bernard Fourtet and Douglas Yeo.

Serpent-basson (Fr.). *See* RUSSIAN BASSOON.

Serpentcleide. A wooden OPHICLEIDE, also described in some 19th-century sources as a SERPENT or a RUSSIAN BASSOON. Its invention has variously been ascribed to Charles Huggett, Beacham, and T.M. Glen; *see* GLEN family.

Serpent-droit (Fr.). *See* RUSSIAN BASSOON.

Serpent Forveille. A form of serpent invented by the Paris maker Forveille. *See* SERPENT.

Serpentone (It.). Brass instrument. *See* CIMBASSO; RUSSIAN BASSOON; SERPENT.

Serpette, (Henri Charles Antoine) Gaston (*b* Nantes, 4 Nov 1846; *d* Paris, 3 Nov 1904). French composer. Son of a wealthy industrialist, he first became a lawyer before deciding to devote himself to music. In 1868 he entered the composition class of Ambroise Thomas at the Paris Conservatoire, and in 1871 won the Grand Prix de Rome with *Jeanne d'Arc*, a cantata which was performed at the Opéra in November of the same year. On his return from Italy Serpette experienced difficulty gaining acceptance at the Opéra-Comique, and the success of his three-act *La branche cassée* at the Bouffes-Parisiens in January 1874 persuaded him to continue with works in a similar vein. *Le manoir du Pic-Tordu* (1875) and *Le moulin du vert-galant* (1876) promised well, but Serpette was destined to continue, along with Varney, Vasseur, Roger and Lacome, in the shadow of such French operetta composers as Planquette, Audran and, later, Messager. Many of his theatrical scores were for works of a fantastic nature and for the slicker vaudeville operettas: to these he brought

taste and charm but no strong individuality. Serpette also composed successful salon pieces such as *Marche funèbre sur La fille de Madame Angot*, a parody of Lecocq. His best works are in miniature forms, and his music often displays amusing parody. He was music critic for a number of Paris newspapers and journals.

WORKS

OPERETTAS AND VAUDEVILLES

All first performed and published (vocal score) at same time, in Paris unless otherwise stated

ANDREW LAMB

Serqueira [Serqueyra] **de Lima, Juan** [Sequeiros, Juan de Lima] (*d* Madrid, *c*1726). Portuguese harpist, guitarist and composer. In 1676 he was working as a musician for a company of actors in Granada, when he was sent to Madrid for the *autos sacramentales* being prepared for Corpus Christi, which that year included Calderón's *La serpiente de metal*. Serqueira remained in Madrid as a harpist and musical director for the annual *autos*, for *comedias* in the public theatres and for the court plays (*comedias*, zarzuelas, semi-operas and operas). In 1679, while he performed with the company of Manuel Vallejo, he composed music for minor theatrical pieces (*loas* and *bailes*) at court and additional or replacement songs for 'the missing acts [*jornadas*]' to Calderón's *El hijo del sol, Faeton* in revival. In 1682 he composed for the *autos sacramentales* of Corpus Christi, and in 1685 and 1686 he again provided new music for court *loas* and *bailes*. His name is consistently present in documents of various kinds pertaining to the theatres throughout the late 17th century, and he performed and composed music for the company of José de Prado from 1711 to 1719, and again in 1723 after his official retirement. While performing with Prado's company he was also called upon to compose music for plays performed by other troupes; for example, he composed the music for *Santa Cecilia* (1713), though it was performed by the company of Joseph Garcés in the Teatro del Príncipe.

Serqueira was the most prestigious and talented theatre musician of his time in Spain, working for companies in Madrid for nearly 50 years. His extant music (in *E-Bc*, *E*, *Mc*, *Mn*, *SA*, *SAc* and *US-SFs*) consists mainly of songs for *autos sacramentales*, *bailes* and other theatrical pieces, several cantatas and a villancico. His music for the *loa* to *Decio v Eraclea*, a partly sung spectacle play performed at the Buen Retiro palace in August 1708 to celebrate the first birthday of the future King Luis I, survives incomplete (*E-Mn*). It is curious that he was never given recognition or a pension at court, though he was paid a pension by the administrators of the public theatres in his last years. A short manuscript biography (*E-Mn* 12918; see Shergold and Varey, 1985) describes his two marriages (to the actress Theresa Garay and then to María de Prado, a 'lady of quality' at court), his love affair with the singer and actress Bernarda Manuela ('La Grifona') and his arrest and imprisonment by the Inquisition in 1691 for saying his nightly rosary before La Grifona's image, which he apparently hung in a curtained niche in his house.

LOUISE K. STEIN

Serra, Luis (*b c*1680; *d* Zaragoza, 1759). Catalan composer. On 19 May 1699 he succeeded against five other

contenders for the post of *maestro de capilla* of S María del Mar, Barcelona. He became *maestro* of Nuestra Señora del Pilar at Zaragoza, as successor to the polemical Joaquín Martínez de la Roca y Bolea, on 23 March 1715. Bernardo de Miralles, Serra's successor, took office on 10 May 1759. From no later than 1721 up to 1758 he composed villancicos to texts printed annually at Zaragoza. He was a musician of some erudition and a highly successful teacher; his pupils included Pedro Aranaz y Vides and Oliac y Serra. In his approbation of Pablo Nassarre's *Escuela música segun la practica moderna*, dated Zaragoza 7 May 1723, he elaborated on Isidore of Seville's dictum 'without music no discipline can be perfect'.

Apart from a *Te Deum*, his works for S María del Mar (all burnt with the destruction of the basilica in 1936) include *Goigs de Carles Tercer* for four voices in honour of the Austrian pretender to the Spanish throne. Continuing the finest traditions of Spanish classical polyphony, he composed for El Pilar eight unaccompanied *Magnificat* settings for eight voices in the 1st to 8th tones; at his own expense they were luxuriously copied on vellum in 1739 (*E-Zvp*). He also wrote five *Salve regina* settings and six Marian antiphons, for four voices, all similarly copied in 1737. In other Spanish archives he is represented by instrumentally accompanied Latin works, including psalms, motets and *Magnificat* settings for between six and ten voices (*Ac*, *CU*, *E*, *J*, *SA*, *VAc*), as well as villancicos (*Bc*, *G*, *J*).

His Latin music was also circulated in Spanish America. In his four-voice unaccompanied Mass in B♭ ('De 5°. Tono punto bajo') in Guatemala Cathedral, each major movement begins with the same head-motif in an imitative point. Like his predecessors at El Pilar, Diego de Casseda and Ambiela, and other Spanish middle Baroque composers, he delighted in showing *prima prattica* mastery in Latin works while composing his villancicos (dated 1716–57) in a piquant and evolving up-to-date style.

ROBERT STEVENSON

Serra, Michelangelo (*b* Mantua, 1571; *d* in or after 1628). Italian composer. He was a priest and canon regular at S Salvatore, Venice, before becoming *maestro di cappella* of S Maria in Vado, Ferrara, about 1603. He moved from there to fulfil the same function first at Urbino Cathedral, from 1 March 1608 to 30 March 1612, and then at Ravenna Cathedral, where his name appears in the records in December 1614 and 1628. Although his smaller works show evidence of contemporary techniques in their use of the continuo, most of his strictly liturgical works are conservative; all but one of his masses are *a cappella*. The pure counterpoint of the *Missa sexti toni* (1615) was clearly influenced by the 16th-century polyphonic tradition, to which Serra also paid homage in reprinting masses by Clemens non Papa and Lassus in his 1608 collection. His eight-part psalms for double choir are also retrospective in style.

WORKS

Completorium romanum (Venice, 1603), lost
[4] Missae ... item Missa pro defunctis Clementis non Papae, 4vv (Venice, 1606, lost; 2/1608[1]) [also incl. mass by Lassus]

□

Serradell Sevilla, Narciso (*b* Alvarado, Veracruz, Mexico, 25 Feb 1843; *d* Mexico City, 25 Oct 1910). Mexican composer. It is believed that he studied music for a short time at the Convento de S Francisco in Mexico City and later studied medicine. He is remembered for his song *La golondrina*, which he wrote to a text by Niceto de Zamacois in about 1862 and which he sang that year as a farewell to Mexico when exiled to France; he had been captured by French troops following the Battle of Puebla. Released shortly after arrival in France, he lived in Paris and taught music and Spanish. In 1865 he returned to Mexico, to Tlalixcoyán in Veracruz, where he practised medicine and directed military bands and *orquestas típicas* (regional orchestras performing traditional music). Several printings of *La golondrina* appear to have been issued before the 1880s; early editions were not attributed to Serradell, but his authorship was later acknowledged. Besides this song, which is still known and performed throughout Mexico, Serradell composed in most of the popular salon and dance genres of the time.

JOHN KOEGEL

Serrano (y Ruiz), Emilio (*b* Vitoria, 13 March 1850; *d* Madrid, 9 April 1939). Spanish composer and teacher. He studied at the Royal Conservatory in Madrid with Eslava and Arrieta, and later taught successively solfège, piano and composition there until 1920. He succeeded Arrieta as professor of composition, and his pupils included José Subirá, Conrado del Campo and others of the so-called *generación de maestros* ('master generation'). He composed in a variety of genres and was a strong partisan of Spanish opera. He succeeded in securing premières of four works at the Teatro Real, Madrid, where he was artistic director. Although his roots were in the Italian tradition, he practised a simple type of nationalism, using folk themes, and his operatic work also showed Wagnerian influence. His last work, *La maja de rumbo*, was given its first performance in Buenos Aires; it is typical of his best work, perhaps because it follows more faithfully a Spanish line. He had a great influence

on the musical life of Madrid through his positions as court musician to the infanta Isabel, founder of the Círculo de Bellas Artes concerts and president of the music section of the Real Academia de S Fernando.

WORKS
(*selected list*)

STAGE

CARLOS GÓMEZ AMAT

Serrano (Simeón), José (*b* Sueca, Valencia, 14 Oct 1873; *d* Madrid, 8 March 1941). Spanish composer. Coming from a musical family, he studied first with his father, then at the Valencia Conservatory with Salvador Giner and in Madrid with Bretón and Chapí. He composed a mass, fugues and songs, as well as zarzuelas performed in Valencia, before the success in Madrid of *El motete* (1900) launched him on a successful career as a theatre composer. He continued to specialize in one-act works, ranking with Vives as the most popular zarzuela composer of his time. He was a fluent composer of richly melodic, vibrant and sensuous music, as much at home in intensely Spanish creations as in evoking Venice in *El carro del sol* (1911) and the Bay of Naples in *La canción del olvidó* (1916). Retiring by nature, he withheld from performance a three-act opera *La venta de los gatos* on which he worked for many years and which was finally produced in 1943.

WORKS
(*selective list*)

for fuller list see GroveO

*c*100 theatre works incl. the following pubd in vocal score in Madrid: La reina mora (1, S. Alvarez Quintero and J. Alvarez Quintero), 1903; Moros y cristianos (1, M. Thous and E. Cerda), 1905; Alma de Dios (1, C. Arniches and E. García Alvarez), Madrid, Comico, 17 Dec 1907; La alegría del batallón (1, Arniches and Quintana), Madrid, Apolo, 11 March 1909; El carro del sol (1, Thous), 1911; La canción del olvidó (1, F. Romero and G. Fernández Shaw), Valencia, Lirico, 17 Nov 1916; Los de Aragón (1, J.J. Lorente), Madrid, Centro, 16 April 1927; Los claveles (1, L. Fernández de Sevilla and A.C. Carreño), Madrid, 6 April 1929; La dolorosa (2, Lorente), Valencia, Apolo, 23 May 1930
Songs, religious music, etc.

ANDREW LAMB

Serranus [Seger, Seeger, Säger], **Johann Baptista** (*b* Lehrberg, nr Ansbach, bap. 23 June 1540; *d* Vincenzenbronn, nr Ansbach, 15 Aug 1600). German composer. He was a choirboy in the Ansbach court choir. In 1560 he enrolled at Wittenberg University to study theology and was financially supported there from at least 1565 onwards by the Margrave of Brandenburg-Ansbach. He neglected his studies for a time in order to devote himself more fully to music and was duly reported to the Margrave by his tutor Paul Eber. In 1568 he was appointed Kantor at St Johannis and at the Lateinschule, Ansbach. From 1573 until his death he was parish priest at Vincenzenbronn. He was evidently active as a composer only during his student days. Between 1565 and 1568 a number of works by him appeared separately or in anthologies, mainly at Wittenberg. They include one or two occasional works (details in *MGG1*), as well as the six-part *Erhalt uns, Herr* and five-part *Herr Gott himlischer Vater* in *Das Christlich Kinderlied D. Martini Lutheri: Erhalt uns, Herr* (Wittenberg, 1565), which also includes a setting of the chorale by Andreas Schwartz. The most interesting piece is *Das Gebet Josaphat: II. Paral. XX, Wenn wir in höchsten Nöten sein*, for five voices (Wittenberg, 1567; facs. in Ameln, 1964); it is also found in a four-voice version (in *D-Usch* 235a; ed. in *Gott ist mein Licht: Chorgesänge des 16. Jahrhunderts*, Waiblingen, nr Stuttgart, 2/1951, p.76) and in an embellished form for organ in Ammerbach's *Orgel oder Instrument-Tabulatur* (RISM 1571[17]; ed. in A.G. Ritter: *Zur Geschichte des Orgelspiels*, ii, 1884, p.103). The work is a setting of a poem by Eber; obviously with his agreement – possibly even on his instructions – Serranus set it polyphonically to the tune of the *Dix commendements* (to Marot's words 'Lève le cueur, ouvre l'aurelle') from the Geneva Psalter. The piece seems to have been popular; it bears only the composer's first names. Marpurg (*Kritische Briefe über die Tonkunst*, ii, 1761, pp.207ff) cited it as an example of 16th-century compositional technique and reproduced the first seven bars.

KONRAD AMELN

Serrao, Paolo (*b* Filadelfia, Catanzaro, 11 April 1830; *d* Naples, 17 March 1907). Italian composer and teacher. His professional life was spent at the Naples Conservatory where he was admitted as early as 1839 to study piano with Francesco Lanza, harmony with Gennaro Parisi and composition with Carlo Conti. After his graduation in 1852 he started teaching piano and counterpoint there, and later succeeded Parisi in the chair of harmony. In 1861 he replaced the indisposed Giuseppe Lillo in the teaching of counterpoint and composition and finally took over that prestigious post on Lillo's death in 1863. Serrao became one of the most authoritative masters of the Neapolitan school and on Mercadante's death (1870) he stepped in as acting director of the Conservatory until

Lauro Rossi was appointed. In March 1871 Serrao (along with A. Mazzucato, Casamorata and Gaspari) was appointed to a committee, chaired by Verdi, for the reform of musical studies. His best energies were spent in teaching and among his pupils were Cilea, Giordano, Leoncavallo, Martucci, Mugnone and Denza.

Serrao's compositions include liturgical works (he made his début in 1849 with a mass for four voices and orchestra), chamber music and a large number of piano pieces including several fantasias for four hands on fashionable operas. Like most conservatory professors of his time, he also composed for the theatre; three of his five operas were performed in Naples, *La duchessa di Guisa* (1865) being the most successful. His productions remain undistinguished in the rich repertory of mid-19th-century Italian opera dominated by Donizetti and Verdi.

MATTEO SANSONE

Serré (Fr.). *See* STRETTO (ii).

Serre, Jean-Adam (*b* Geneva, 14 Nov 1704; *d* Geneva, 22 March 1788). Swiss painter and music theorist. From 1723 to 1727 he studied natural sciences at the University of Geneva. After working as a miniaturist in Vienna, he went to Paris in 1751, where he published criticism of the theories then being expounded by Blainville, Rameau and Euler. He later visited London (in 1756) but returned to Geneva, where he published a volume of *Observations* (1763), questioning the theories of D'Alembert, Tartini and Geminiani, and responding to criticisms of his own views which had appeared in the intervening years.

Serre's writings on music dealt primarily with the philosophical and methodological aspects of the important theoretical ideas of his day. His arguments attempted to clarify theoretical principles and develop them through critical, analytic and scientific procedures. His most significant contributions concerned the foundations of harmonic theory, Rameau's *basse fondamentale*, temperament and resonance, combination tones, the derivation of the minor mode and related topics. His thoughts had considerable currency in publications of the time, and they influenced the works of such writers as Rousseau, J.A. Hiller (who published a German edition of the *Observations*) and J.-B. de La Borde.

ALBERT COHEN

Serrurier, Georges. *See* SERVIÈRES, GEORGES.

Sertor, Gaetano (*b* ?Venice, *c*1760; *d* 1805). Italian librettist. In the libretto to *Protesilao* he is identified as 'abate Sertor di Venezia'. He was among the first to incorporate into his librettos elements that Verazi had introduced in his librettos for the opening of La Scala, Milan, during the 1778–9 season. In 1780 he began working with Francesco Bianchi; their association spanned 11 years and resulted in six works. Their operas of the early 1780s – *Arbace*, *Zemira*, *Piramo e Tisbe* and *Aspardi* – depart from the traditional pattern of recitatives and arias. Ensembles of increasing and decreasing numbers of personnel, and arias and duets with interjections by other characters (*pertichini*) or the chorus, occur sparingly. Sertor follows Verazi's lead in borrowing from comic opera the *introduzione* and the finale incorporating some action. In Bianchi's *Piramo e Tisbe* (1783), Sertor planned to retain the three suicides but in the performance the original ending was replaced with a happy one in which none of the characters dies. The original tragic ending was used in Borghi's setting for Florence later the same year – a significant move towards the introduction of staged death to *opera seria*.

In Giordani's *Osmane* (1784, Venice) Sertor's interest in blending lyrical and declamatory elements into more fluid and dramatic constructions becomes more evident. In a solo scene near the end of Act 2, Zadira's aria grows out of the obbligato recitative to which it returns at the sounds of battle. The singer remains on stage for the trio finale, which also emerges seamlessly from obbligato recitative. *Enea e Lavinia* and *Armida abbandonata* incorporate some French-inspired spectacle. *Enea e Lavinia*, which Guglielmi composed for Naples, contains two terrifying appearances of Dido's ghost, borrowings from Verazi's *Enea nel Lazio*. Like Mozart's *Idomeneo*, also written for Munich, *Armida* contains lavish spectacle, choruses, ballets, pantomimes and a quartet; with the exception of several cavatinas and arias without exit, however, the work adheres formally to the Italian tradition.

Sertor's libretto *La morte di Cesare* proved to be his most influential work, ushering in a series of 'morte' operas in the 1790s. Though the assassination of Caesar took place behind closed doors, the tragic ending was still a break with tradition, and audiences would have been shocked to view the corpse of Caesar lying on stage during the final scenes. The chorus assumes a prominent role in the drama, participating in the ensembles and the closing action finale, and acting as *pertichini* in Caesar's

aria in Act 2. A ballet is incorporated into the coronation scene, and a pantomime is used to portray Calpurnia's premonition. The opera contains a duet for two men and an early oath scene (*giuramento*), which closes the opera.

In his librettos of the early 1790s Sertor continued to reduce the number of exit arias by replacing them with aria-length cavatinas and ensembles. By 1792, introductions, ballets, action ensembles and multiple choruses (alone and in combination with ensembles and solos) were becoming commonplace in Venice. *Tarare* contains two scene complexes – combining cavatina, chorus, instrumental music and dance bound together with obbligato recitative – one serving as the finale to Act 1, the other occurring within Act 2. Such scene complexes eventually replaced ensemble finales in Venetian opera. Late in his career Sertor also wrote a comic piece, *Il divorzio senza matrimonio*.

Servais. Belgian family of musicians.

(1) **Adrien François Servais** (*b* Hal, nr Brussels, 6 June 1807; *d* Hal, 26 Nov 1866). Cellist and composer. He first played the violin, but after hearing a concert by N.-J. Platel, he decided to study the cello and was soon a pupil of Platel at the Brussels Conservatory. He won a *premier prix* almost immediately and from 1829 assisted Platel in his teaching. His first major success, in Paris in 1834, was followed by concerts in London in 1835, a return to Belgium for further study, and then several tours through Europe and Russia, during which he often performed his own compositions. In 1848 he succeeded Platel at the conservatory. Servais, described by Berlioz as 'Paganinian', was probably the finest cello virtuoso of his day. He was praised for his intense, pure sound, flawless intonation and acrobatic technique. His enormous Stradivari, later inherited by his son, is still known as the 'Servais' cello.

WORKS

Vc, orch: Concs., opp.5, 18 (Mainz, n.d.); 16 fantasias (Mainz, n.d.)
Chbr: 6 caprices, vc, 2nd vc ad lib, op.11 (Mainz, ?1854); 6 studies, vc, pf (Paris, n.d.); 14 duos on op themes, vc, pf (Mainz, n.d.), collab. J. Grégoir; 3 duets collab. Léonard and 1 duet collab. Vieuxtemps on op themes, vn, vc (Mainz, n.d.); other duos on op themes, vc, pf; duos, vn, pf

(2) **François** [Franz] **Mathieu Servais** (*b* St Petersburg, 1847; *d* Asnières, nr Paris, 14 Jan 1901). Composer and conductor, ? adopted son of (1) Adrien François Servais. For some time rumoured to be the illegitimate son of Liszt, who later became a close friend (but see Walker), he won the Belgian Prix de Rome in 1873 with the cantata *La mort du Tasse*. He spent over 20 years working on the opera *Apollonide* (later *Jôn*, produced at Karlsruhe in 1899), and wrote symphonic works and songs in a rather formal style. He founded the Concerts d'Hiver in Brussels.

(3) **Joseph Servais** (*b* Hal, 23 or 28 Nov 1850; *d* Hal, 29 Aug 1885). Cellist and composer, son of (1) Adrien François Servais. He studied with his father and won the first prize in cello at the Brussels Conservatory in 1866. From 1868 to 1870 he played in the court orchestra at Weimar, and in 1872 he became cello professor at the Brussels Conservatory. His playing was less virtuoso than his father's, but more delicate and lyrical. His compositions include a string quartet and an unfinished cello concerto.

PATRICK PEIRE

Servandoni, Giovanni Niccolò [Servandony, Jean-Nicolas] (*b* Florence or Lyons, 2 May 1695; *d* Paris, 19 Jan 1766). Italian or French stage designer. It is not known whether he was a Florentine who took French citizenship or a Frenchman who followed fashion and italianized his name. He was a pupil of the painter Giovanni Panini and later studied architecture in Rome. He settled in Paris in 1724, and in 1726 the Académie Royale de Musique asked him to design a set showing the Palace of Ninus for the première of Rebel and Francoeur's first opera, *Pyrame et Thisbé*. In 1728 he was appointed chief scene painter at the Opéra. There are only a couple of sketches definitely attributed to him, but the *Mercure de France* gives detailed accounts of his *veduta* work for opera, including Lully's *Proserpine*, with a waterfall of silver gauze (1727), Lacoste's *Orion*, a Nile landscape with pyramids (1728), Lully's *Thésée*, mixing real and painted perspective (1729), Rameau's opéra-ballet *Les Indes galantes* (1735) and Rebel and Francoeur's opera *Scanderberg*.

In 1738 he opened a *spectacle d'optique* in the Salle des Machines in the Tuileries, where he mounted pantomime plays to music, illustrated with motifs from mythology and the epics, that mixed mechanical and mobile figures with live actors. Lighting was an essential and expensive element. Servandoni worked in Lisbon (1742) and Bordeaux (1745) and was employed by John Rich at Covent Garden from 1747. In London he designed a set-piece for the fireworks display in St James's Park to celebrate the treaty of Aix-la-Chapelle (1748). In Dresden (1755–6) he was responsible for the lighting of large operas at court. He also worked in Vienna (1760) and Württemberg (1763).

Servandoni's careful studies of perspective helped him to modify stage space to increase verisimilitude and the impression of spaciousness. He broke with the principle of symmetrical, regular perspective, introducing oblique perspective (*per angolo*) to the Opéra. He alternated transverse space with space seen in depth, but above all, and it was in this that he showed his greatest originality, he made use of the entire height of the stage. He suggested vast proportions by showing fragments of architecture in

the foreground, their height increasing as the eye approached the back of the stage, and by representing only the lower part of a column or tree. As the upper part was unseen, the spectator's own imagination could supply and extend it. Some of his designs and plans are preserved in Vienna (Albertina), New York and Stockholm (the Tessin collection), but our knowledge of his work comes chiefly from descriptions in the *Mercure de France* from 1726 to 1758.

Serventoys. A medieval song form. *See* TROUBADOURS, TROUVÈRES.

Service. A term used in the Anglican liturgy to refer to musical settings of the canticles for Matins and Evensong, and to settings of certain parts of the Ordinary of Holy Communion. It is also applied to settings of sentences from the Burial Service. The term apparently derives from earlier Latin usage ('plenum servitium BMV' meant 'the full [as opposed to abbreviated] Office of the BVM'), but is not found in post-Reformation musical sources before the early 17th century.

A service may comprise any or all of the following elements (the texts being in English): for Matins: *Venite*, *Te Deum*, *Benedicite*, *Benedictus*, *Jubilate*; for Evensong: *Magnificat*, *Cantate Domino*, *Nunc dimittis*, *Deus misereatur*; for Communion: Kyrie, Gloria, Creed, Sanctus, Benedictus, Agnus Dei; and for the Burial Service: *I am the resurrection*, *I know that my redeemer liveth*, *We brought nothing*, *Man that is born of woman*, *In the midst of life* and *I heard a voice*. The *Benedicite* and *Jubilate* are alternatives to the *Te Deum* and *Benedictus* respectively, and the *Cantate Domino* and *Deus misereatur* may be sung in place of the *Magnificat* and *Nunc dimittis*. Some of the earliest services include a litany to be sung at the end of Matins. The other musical elements of the Anglican choral service – Preces, responses, psalms and anthems – are not normally included in the service, although one or two 16th- and early 17th-century services do provide simple anthems. The various elements of a service are bound together by a common musical style and mode (or key), and these are usually mentioned in the service title, for example Child's Short Service 'in A re'; Stanford's setting 'in B♭'; Wood's 'in the Phrygian Mode'; Howells's 'in G'. Some consist only of music for one service, and are known as 'Morning Service', 'Communion Service' or 'Evening Service'; others provide for all three services, and 17th-century sources refer to 'the Whole Service'. Whole services may be linked not only by scoring, key and style but also by formal procedures and thematic links, in a manner akin to the cyclic Latin Mass. In the 20th century there has been an increasing tendency for composers to dedicate their service settings to particular choirs: hence, for instance, Howells's *Magnificat* and *Nunc dimittis Collegium regale* (for King's College, Cambridge) and Leighton's *Magnificat* and *Nunc dimittis Collegium Magdalenae oxoniense*.

1. Liturgical history. 2. Musical history.

1. LITURGICAL HISTORY. The pattern of Anglican choral worship derives almost entirely from the Book of Common Prayer (1549) and especially the revised version of 1552 on which all later issues are based. Only since 1965 have alternative services been authorized in the Church of England; these have not had a significant impact on the choral repertory. The services of the Book of Common Prayer drew on medieval Latin forms as well as on the work of foreign reformers (e.g. Luther and Quiñones), but the final results are unique to the Anglican Church. At the end of the Middle Ages, Latin Matins was often followed directly by Lauds, and Vespers by Compline; that is reflected in the conflation of elements of both pairs of services in English Matins and Evensong. English Matins takes the *Te Deum* from festal Latin Matins and the *Benedictus* from Lauds; Evensong takes the *Magnificat* from Vespers and the *Nunc dimittis* from Compline. In the 1552 revision of the Communion Service, the Kyrie was replaced by the recitation of the Ten Commandments (with 'Lord have mercy upon us' as response), the Benedictus and Agnus Dei were omitted, and the Gloria was relocated after the communion.

Following the dissolution of all monastic and many collegiate foundations, choral polyphony was sung in fewer than 60 cathedral, collegiate and parish churches after 1550. Composers during the reign of Edward VI provided complete sets of music for all three services, often with additional materials. From the reign of Elizabeth onwards Holy Communion was sung only as far as the Creed (so-called ante-Communion); the rest of the service was said. Whole services written between about 1560 and 1640 most often consist of the *Venite*, *Te Deum*, *Benedictus* or *Jubilate*, Responses to the Commandments, the Creed, *Magnificat* and *Nunc dimittis*. Apart from a period of High Church activity in the reign of Charles I during the ascendancy of William Laud, eventually Archbishop of Canterbury, the celebration of choral Holy Communion was increasingly rare (often only once in each month). After the Restoration the Sanctus was most often sung as an introit to the ante-Communion. Between 1660 and 1880 most services consist only of canticles for Matins and Evensong; settings of the Sanctus and Gloria are particularly rare.

Three principal styles of service music developed: short service (mostly syllabic and homophonic), great service (including melismatic polyphony) and verse service (including sections for solo voices with organ accompaniment). The reformed English liturgy largely eliminated the distinction between festal and ferial observance by the suppression of ceremony and Proper texts. Nevertheless, there are indications that different styles of service music were used, at least in the early 17th century, to differentiate liturgical celebrations; for instance, in the Durham Cathedral partbooks copied during the reign of Charles I, the great services (two with solo verses) are placed with preces and psalms designated for specific feast days in one set of books (*GB-DRc* E4–11) and the short services are grouped in another (*DRc* C8 only survives).

English reformers demanded audibility and comprehensibility, prescribed extended scriptual reading, and gave prime consideration to the needs of parish churches in the formation of orders of public worship; such features

imposed limits on the complexity and scale of service music. Endowment and patronage of church music was limited. Outside the Chapel Royal instruments were not commonly used in the main services. Large-scale works in cantata style with orchestral accompaniment were very rare and specifically occasional: Purcell's *Te Deum* and *Jubilate* for St Cecilia's day in 1694, and Handel's setting of the same texts to celebrate the Treaty of Utrecht in 1713. This contrasts with the Roman Catholic Church abroad, where ceremonial opportunity and patronage enabled composers to write settings of *Te Deum*, the Mass and *Magnificat* on a sumptuous scale in a liturgical context where musical, textual and ritual elements were overlaid in largely asynchronous simultaneity. Large and widely used selections of service music were published in Barnard's *The First Book of Selected Church Musick* (1641) and Boyce's *Cathedral Music* (1760–73).

During the 18th century service music was inevitably affected by the decline of royal interest in the Chapel Royal (the hub of church music since 1550) and by the lack of spiritual and liturgical vigour in cathedrals. In the early 19th century new liturgical impetus came from the Oxford Movement and the Tractarians; its musical impact was strongest in parish churches with the establishment of robed choirs and the singing of Holy Communion, most often to the chants published by Merbecke in 1550 (five editions appeared between 1843 and 1853). It was also 'for Parochial or General Use' that George C. Martin edited the series of *Short Settings of the Office of Holy Communion* for choir and organ, reinstating the Sanctus and Gloria after the Kyrie and Creed.

In the late 19th and early 20th century composers once again included the Benedictus and Agnus Dei in some settings of the Communion Service, reflecting the liturgical outlook of the time. The revised Book of Common Prayer (1928) allowed these texts, but the book failed to gain parliamentary approval, and their use was technically not sanctioned until the Alternative Services Measure (1965). As a result of the reinvigoration of the eucharistic life of the Church which has been central to the new liturgical movement the Sunday celebration has become the focal, and in some parishes the only, service. Even in cathedrals the Sung Eucharist (i.e. choral Holy Communion) is normally the principal service. The re-establishment of the Latin order of the Ordinary and of the Kyrie texts, the willingness to allow the performance of music with Latin texts in the Anglican liturgy, the availability of new editions of Latin masses from the period 1550–1820, and the reluctance of contemporary composers to engage with the new texts have together meant that the response to the opportunities for composing complete Communion services has been limited. Some of the most widespread services are congregational, and there is an uneasy tension between popular accessibility and musical merit.

Changes in working practices and educational expectations have resulted in the decline of daily choral Matins in choral foundations since World War II, although it is still sung in many cathedrals on Sunday morning. Evensong is sung almost daily during term in cathedrals and collegiate chapels and choral foundations. The order and the texts are almost exclusively those of the Book of Common Prayer (1662); only Magdalen College, Oxford, has responded to the modern liturgical movement by introducing a new form of weekday Evening Prayer in 1982.

2. MUSICAL HISTORY. Following the introduction of the vernacular Prayer Book in 1549, Merbecke set the principal texts of Matins, Holy Communion, Evensong and the Burial Service to simple monophonic chant adapted or derived from the Latin Rite in *The Booke of Common Praier Noted* (1550). It is an indication of wider practice which extended to polyphony. Use of psalm tones and the technique of faburden occur in service music found in the three principal early sources, all containing repertory composed before 1553 – the Wanley Partbooks (*GB-Ob* Mus.Sch.E.420–22), the Lumley Partbooks (*Lbl* Roy App 74–6) and John Day's *Certaine Notes* of 1560. The Wanley manuscripts also include adaptations of two of Taverner's 'Mean' and 'Small Devotion' Masses to English texts; indeed this source places particular emphasis on the Communion Service with ten complete settings. Also apparent is the pairing in the source of morning and evening canticles. This is taken further in Day's *Certaine Notes*, where three complete sets of services are provided for Matins, Holy Communion and Evensong; there are two further Evening Services as well as offertories, Lord's Prayer, litany and 16 anthems. Two unique characteristics of Anglican service music may therefore be discerned in these early stages: the musical pairing of canticles, and the cyclic treatment of service music for an entire liturgical day.

Between 1565 and about 1644 (when choral services were discontinued) more than 60 full services were composed, together with a further 20 collections of canticles for Matins and Evensong, some 25 for Matins (many consisting of the *Te Deum* only) and more than 60 sets of canticles for Evensong (all comprising *Magnificat* and *Nunc dimittis*).

These 16th- and early 17th-century settings may be divided into three basic categories: the 'short' service, the 'long' or 'great' service and the service 'for verses'. The short service, as its title implies, is the simplest of the three. Derived orginally from pre-Reformation improvised polyphony based on a psalm tone faburden, it is essentially chordal in structure, the words are set syllabically, and the majority of settings are simply scored for treble, alto, tenor and bass without independent organ accompaniment. Tallis's Short Service, often referred to in late sources as his Service 'in the Dorian Mode', is one of the earliest and one of the most successful examples of the genre. It is through-composed, although the musical design mirrors to some extent the old-established practice of antiphonal chanting between the two sides of the choir (AA^1BB^1C etc., musical phrase A being set to the first half of verse one, and so on). The short service is the commonest of the three service types, and was obviously appropriate for weekday services. The great service is on the other hand a festal composition, constructed on the largest scale and intricately scored for a large choir dividing into as many as eight parts. Cranmer's letter to Henry VIII on the subject of church music has so often been quoted out of context that it comes as something of a shock to discover that some of the earliest services are of this kind. Robert Parsons's 'First Service of 4, 5, 6 and 7 parts' is based on 1549 Prayer Book texts, and therefore probably dates from about 1550. It is elaborately contrapuntal and closely akin in style to such works as Sheppard's 'Frences' Mass. There are comparatively few extended settings of this kind, but they include a colourful Evening Service 'in medio chori' by William Mundy; a

five-part *Te Deum* and a canonic service, 'two in one' by Tallis; a *Magnificat* and *Nunc dimittis* in seven parts by Weelkes; and Byrd's monumental Great Service, otherwise known as the 'New suite of service for meanes'.

The verse style began to take shape during the 1550s, in connection with the metrical psalm, the consort song and the anthem. Among the first composers to develop the new idiom were Richard Farrant, William Mundy and Byrd. Neither Farrant nor Mundy appears to have written a verse service, and Byrd's one essay in the form – his Second Service – is basically a short service with brief interpolated solo sections. The earliest substantial verse service is by Morley, and there are others by Edmund Hooper and Nathaniel Giles (both members of the Chapel Royal) and by John Holmes, a comparatively unknown provincial musician, all of whose music is in the new style. Morley's *Magnificat* and *Nunc dimittis* from his First Service are colourfully scored for a large solo group – two meanes, two altos, tenor and bass, with a five-part choir dividing into separate decani and cantoris sections and organ. In form it follows the verse-anthem principle of a continuous alternation of solo verses with sections for the full choir, some of the verses being prefaced by short organ preludes. As in the verse anthem the organ is given an independent role in the solo sections, but it simply doubles the voices in the choral sections. Of the three types of service, the verse service offers the greatest scope for expressive word-setting. For this reason perhaps, and for the purely practical reason that it demanded much less of the full choir than the great service it became increasingly popular with composers during the early years of the 17th century.

From the Restoration until the early 19th century the service was regarded as of subsidiary importance to the anthem. Many services were composed, but the main concern seems to have been to provide singable music that demanded little of the choir and got through the text as quickly as possible. The change is well illustrated in the work of William Child. His 17 services cover a wide range of keys from the then unusually 'sharp' key of D major to C minor and E♭ major. They divide into 'verse' and 'short' categories, the verse services being of the simplest kind, with little of the colour and contrapuntal vigour that characterize the best services of the earlier period. Bryne, Henry Loosemore, Lowe and Rogers are the most important of Child's immediate contemporaries.

Blow was the most prolific Restoration composer. His music is conservative in style, having a certain rough contrapuntal strength at its best, as in the G major Evening Service. The organ has no more than a continuo role in this work and it was not again to be considered independent of the voices until the time of Walmisley and S.S. Wesley. The services of Pelham Humfrey and Purcell established a pattern that was to be followed by many 18th-century composers. The textures are basically homophonic and choral throughout, but verses are interposed from time to time, common groupings of solo voices being two trebles and an alto, and two altos, tenor and bass. Minor composers whose services achieved some popularity at the time include Aldrich, Croft, Hawkins and Charles King. Music for the Communion is less prolific and Aldrich, Croft, Ebdon and Hawkins are among the few who set the Sanctus and Gloria. Of the 30 or more services published by Boyce and Arnold in their six volumes of *Cathedral Music*, only two include settings of these movements.

While much service music was written in the 18th century, only Maurice Greene's C major Service is of any substance. It is an impressive essay in what was by then spoken of as the 'church' style. Its textures are elaborately contrapuntal and divide in places into as many as eight parts. The organ's role is simply that of a continuo instrument. Sections of the service are scored for small solo groupings, in the manner of Humfrey and Purcell.

S.S. Wesley and T.A. Walmisley between them did much to lay the foundations of the Stanfordian style of service. In his D minor Service (probably 1855) Walmisley was the first to show, as Bumpus observed, 'how effectively broad, unisonus passages may be handled with a fine organ accompaniment'. Wesley had already shown the way to some extent in his big E major Service (1845), in which the organ is given some independence of the choir. In this, Wesley was consciously breaking with tradition and striving for a new and more expressive idiom. As he wrote in the preface to the service:

> It is a fact beyond dispute that while in its secular departments the Art has been making the most rapid progress towards perfection, as regards the Church it has remained almost stationary, or worse, for centuries. ... However unsuited to Our English Cathedral Service the light, flimsy Masses of Mozart and Haydn may be, they are at least the productions of great men, if their worst. Mozart, it is well known, thought as little well of them as any others can do.; but 'little' as there may be 'in a name', the Kings, the Scrogginses, Jones, Porters, and Smiths of Cathedrals! – what have they been known to do well?

While Wesley's E major Service certainly covers new ground in the way that the organ is handled and blended with the voices, its overall structure is too loosely designed to be wholly successful. In this respect the services of Stanford represent the culmination of Wesley's work. The through-composed structures that characterize practically all service settings before Stanford's day gave way to integrated forms, coherently organized by means of motivic development. The various movements of Stanford's C major Service op.115 (his last, and reputedly his favourite) are each founded on one or two short motifs: the *Te Deum* is bound together, for instance, by a rising and falling scale of eight notes. This idea then recurs in the Gloria Patri used at the end of the *Benedictus*, *Jubilate*, *Magnificat* and *Nunc dimittis*. Many other subsidiary ideas are worked out during the course of the service.

Charles Wood, Stanford's pupil, colleague and eventually his successor as professor of music at Cambridge, continued to work in a similar vein, although without quite the same dramatic flair. His interest in plainsong and Renaissance polyphony is reflected in his own work, notably in the fauxbourdon settings of the canticles and his unaccompanied Communion Service in the Phrygian Mode.

The most successful contribution to the service repertory in the 20th century has been made by Howells, whose many settings of the evening canticles (*Collegium sancti Johannis Cantabrigiense*, *Collegium regale*, 'for New College, Oxford', 'for St Paul's Cathedral', 'for the Collegiate Church of St Peter in Westminster', and for many other churches) bear witness to the high regard in which his music is now held. The *Magnificat* and *Nunc dimittis* of the 'Gloucester' Service represent the composer at his best: slowly-moving harmonies (involving the frequent juxtaposition of flat 7ths and sharpened 4ths), richly-scored contrapuntal textures and a symphonic

organ accompaniment create an effect of spacious grandeur that is in its way unique.

There is a substantial repertory by minor organist-composers, but apart from Howells no composer of distinction has written a body of service music in the 20th century. There are, however, some distinctive examples: settings of *Te Deum* by Vaughan Williams (in G, 1928; F, 1937) and Britten (in C, 1934; E, 1944), and Britten's energetic and playful *Jubilate* (1961); Tippett's evening canticles for St John's College, Cambridge (1961), in which the declamatory juxtapositions of organ and choir in the *Magnificat* contrast with the solo writing of the *Nunc dimittis*; and settings of *Magnificat* and *Nunc dimittis* by Elizabeth Lutyens, using serial techniques (1965), Jonathan Harvey, with some late modernist features including aleatoricism (1978), and John Tavener, drawing on the textures and incantatory qualities of Orthodox Church music (1986). The less technically demanding settings by Kenneth Leighton and William Mathias are used more widely.

Less imagination is apparent in the smaller number of settings of English texts of the Communion Service. The revival of choral music for Holy Communion in the later 19th century was directed primarily to amateur parish choirs and there is nothing of distinction. The contributions by Stanford are comparable with his other service music, but Howells's Communion Service *Collegium Regale* is no match for the morning and evening canticles, and Vaughan Williams and Britten set the Latin text of the Mass.

Music for the Burial Service forms a modest appendix to the main corpus of Anglican service music. The sung texts of the Burial Service consist of two series of scriptural sentences sung in succession at the church and the grave, much in the manner of pre-Reformation processional antiphons. The Wanley Partbooks contain the earliest setting. Morley's set of burial sentences was used at the funerals of Elizabeth I (1603) and Prince Henry (1613). They were revived in 1695 for the funeral of Queen Mary II, for which Purcell provided *Thou knowest Lord*, apparently because Morley's version of that sentence was missing at the time (Wood, 1996). Croft incorporated Purcell's *Thou knowest Lord* into his setting of the sentences (*Musica sacra*, 1724); these may have been written for the funeral of Queen Anne (1714) or the Duke of Marlborough (1722) and remain in use today. All the settings are written in a straightforward, predominantly homophonic idiom, dignified and suitable for singing in procession.

JOHN HARPER (1), PETER LE HURAY/JOHN HARPER (2)

Servières [Serrurier], **Georges** (*b* Fréjus, 13 Oct 1858; *d* Paris, 25 July 1937). French musicologist. He was one of the earliest chroniclers of the Wagnerian movement in France and in 1887 published a detailed analysis of Wagner's French career divided into three 'periods', beginning with his sojourn in Paris (1839–42) and ending, at the inception of the 'third period', with the publication of the *Revue wagnérienne* in 1885. Servières' method was to build up a comprehensive picture of an event by painstakingly recording a large amount of documentation: this was also his procedure in his classic study of the production of *Tannhäuser* at the Opéra in 1861 and in a work on Massenet's early operatic career. Servières' other interests were the development of French music in the latter half of the 19th century and (in common with many of his generation) French music of the 17th and 18th centuries, on which he wrote several articles of a more specialized nature.

JOHN TREVITT

Servin [Servyn], **Jean** (*b* ?Orléans or Blois, *c*1530; *d* ?Geneva, after 1595). French composer active in Geneva. His collection of psalm harmonizations, issued in Orléans in 1565 (and dedicated to the Cardinal de Châtillon), has been taken as an indication of his place of origin, but it also seems likely that he could have come from Blois, as noted in a Geneva document from 1572 recording a recent influx of Huguenots escaping from anti-Protestant violence in France. Servin is also mentioned in Genevan archives as late as 1596. There is no evidence to suggest that he worked in or visited Lyons, the title pages to his last four publications notwithstanding – these books were almost certainly produced in Geneva by Charles Pesnot, one of a number of expatriate French bookmen who sought to circumvent prohibitions on the importation of Genevan books through the use of false or misleading colophons or imprint data.

These publications, like a number of other Genevan or crypto-Genevan books of spiritual music, seem to have been crafted for a highly literate readership. Servin worked his own name (in the form of an acrostic) into one of the chansons from his *Meslanges*; the name of one of his dedicatees, Henri de La Tour, is transformed as an anagram in his *Deuxiesme livre*, while the *Premier livre* includes a six-voice setting of an epitaph sonnet for Claude Goudimel, the text of which was previously included among the liminary materials of *La Fleur des chansons*, a pair of 1574 books issued in Lyons and devoted partly to the works of Goudimel. Servin's books also offer other curiosities: two settings of Guéroult's poem *Susanne un jour*; a strikingly dramatic chanson, *Les regrets de Didon*; a *fricassée* of urban songs and cries; and a set of four-voice treatments of Latin psalm paraphrases by the Scots preacher George Buchanan.

WORKS

Les 150 pseaumes de David, composés à 3 parties, dont l'une est le chant commun, 3vv (Orléans, 1565)
Premier livre de chansons nouvelles, 4–8vv (1578)
Deuxième livre de chansons nouvelles, 4–6, 8vv (1578)
Meslanges de chansons nouvelles, 4vv (1578)
Psalmi David is a G. Buchanano versibus expressi, 4–8vv (1579)

RICHARD FREEDMAN

Serwaczyński, Stanisław (*b* Lublin, 1791; *d* Lwów, 30 Nov 1859). Polish violinist, conductor, composer and teacher. He began his musical studies with his father, Michał, conductor of the cathedral orchestra at Lublin. From his father's correspondence it is known that he was to begin studies at the Warsaw Conservatory in 1816, but according to other sources he studied in Vienna. From 1814, for about four years, he was conductor of the theatre orchestra in Lwów. Critical acclaim of his virtuosity came in 1818 and 1819 through a series of concerts at the Schuppanzigh winter gardens in Lwów, and in the following few years he gave concerts in Kraków, Warsaw and Kiev. In 1831 he gave a concert tour in Austria (his first concert in Vienna was on 19 April 1831) and Italy; in Venice (according to reviews in the press) his playing was favourably compared to that of Paganini. Early in 1832 he gave concerts in Lwów, Buda and Vienna; and in the latter part of the same year he assumed the position (for one season only) of soloist with the orchestra of the newly established theatre in Josephstadt, Vienna. From 1833 to 1838 he was leader, then conductor of the opera orchestra at Buda, he was also co-founder of the Music Institute there. He gave concerts in Romania in 1837, in Vienna in 1838, and in 1840 he returned to Lwów as leader and conductor for a theatre newly established by Count Skarbek; he also performed the same functions for the Dominican church (until 1842). From this time on he rarely travelled.

Serwaczyński's playing was characterized by great technical facility, faultless intonation, a rich tone and a sparkling staccato, and his repertory included chamber and salon music as well as virtuoso works. His pupils included Joseph Joachim (in Pest, 1836), Henryk Wieniawski and Tytus Jachimowski (in Lwów, 1840). His compositions, which were printed in Leipzig, Warsaw and Vienna, are now rarely played; copies can be found in the Jagellonian Library in Kraków and the National Library in Warsaw.

BARBARA CHMARA-ŻACZKIEWICZ

Seryogina, Natal'ya Semyonovna (*b* Novokuznetsk, 1 June 1943). Russian musicologist. She studied with D.V. Zhitomirsky in the faculty of theory and composition at the M.I. Glinka State Conservatory of Nizhniy Novgorod (1965–70) and undertook postgraduate studies with M.V. Brazhnikov at the Leningrad State Conservatory (1970–3), after which she became a researcher at the Russian Institute for the History of the Arts. In 1975 she defended her *kandidat* dissertation on early Russian chant and, in 1995, her dissertation on the manuscript book *Stikhirar' mesyachny* ('Menological stikhiras') for a doctorate in arts history. Her research has focussed on early Russian culture, the aesthetics of hymnography, choral art, the hymns of the *Stikhirar'*, the penitential texts, and problems of links between modern Russian and early Russian culture. She has also written articles on contemporary and film music. In addition to academic work, she has been actively involved in the dissemination

of knowledge of early Russian choral music, contributing to concert programming, films and television, and radio programmes. She has performed canticles which she has transcribed with a choir and written scripts for television and feature films.

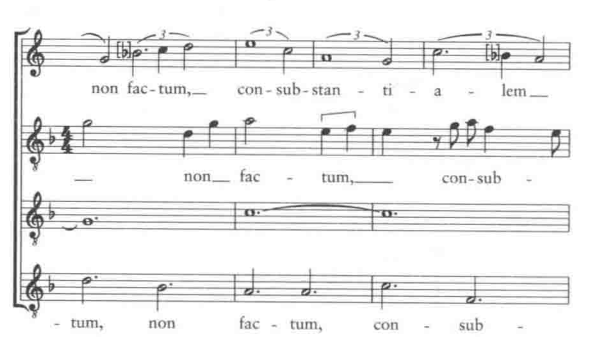
Sesquialtera (Lat.: 'the whole and a half'). (1) In early music theory, the ratio 3:2. In terms of musical pitch, two



Ex.1

lengths of the string of the monochord in this ratio sounded the interval of a 5th; *sesquitertia* (4:3) sounded the 4th. In the mensural notation of the Middle Ages and Renaissance, the *proportio sesquialtera* indicated a diminution of the relative value of each note shape in the ratio 3:2; similarly, *proportio sesquitertia* (4/3) and *sesquiquarta* (5/4). All these proportions (and 2/1, the octave, or *proportio dupla*) belonged to the *genus superparticularis*, represented by the formula $n + 1 : n$. *Sesquialtera* was the most commonly used of all proportions. It was frequently indicated merely by the signature 3, and took over the name *tripla* (properly 3/1 not 3/2); the German *Nachtanz* of the 16th and 17th centuries which stood in *sesquialtera* relationship to its preceding dance was known as *Proportz tripla* or simply *Proportz*. Although the HEMIOLA resembled *sesquialtera* in effect ('three in the time of two'), the term 'hemiola' is used to refer to the momentary intrusion of a group of three duple notes in the time of two triple notes, and was notated by coloration (three red notes for two black ones, three black notes for two white ones, etc.). Ex.1, the famous passage from Du Fay's *Missa S Antonii de Padua* (cited in this context by Tinctoris, *CoussemakerS*, iv, p.176), has the discantus in *sesquialtera* to the tenor: three *breves* (here as minims) in the time of two. At bar 212 this becomes what would strictly be called *sesquioctava*, nine in the time of eight. Perhaps the most famous and complex example of *sesquioctava* is also by Du Fay, at 'Genitum non factum' in the Credo of his *Missa 'L'homme armé'* (ex.2).

(2) In Spanish and Latin American music, a metre, probably derived from the Arabic rhythm called 'saraband', meaning 'unequal ternary', found in theoretical writings from al-Fārābī (*d c*950) to modern Egyptian theory. Its characteristic feature is the alternation or superposition of duple and triple time within groups of six quavers. At the same time the beat is distorted, the first and fourth quavers being prolonged and the remainder shortened. This rhythmic phenomenon is commented on by Juan Bermudo in his *Declaración de instrumentos* (1555/*R*, f.56*r*), by Francisco de Montanos in his *Arte de musica theorica y pratica* (1592) and by Andrés Lorente in *El porqué de la música* (1672); they all associated it with the villancico. Indeed, the *sesquialtera* metre basically defined the characteristic rhythms of the villancico from the time of Bermudo until the early 18th century, and also

Ex.2

Ex.3

had a strong influence on Spanish song and in theatre music. The metres designated by the number 3 or by C3 were used more or less interchangeably in the 17th-century villancico, and hemiola rhythms were often notated with coloration. As may be seen in the villancico *Al pan de los cielos* by the 17th-century composer Cristóbal de San Jerónimo (ex.3), the superposition of duple and triple time in villancicos could be extensive. Francisco Correa de Arauxo, in the introduction to his *Libro de tientos y discursos* (1626, f.6r) stated:

and this manner of execution (even though it is difficult) is the most used by organists, and consists in detaining more in the first note and less in the second and third, then more in the fourth and less in the fifth and sixth .... This is almost like making the first note a minim, and the second and third, crotchets; or, halving the note values, a crotchet and two quavers.

In modern Spanish terminology this is still known as *sesquialtera*, and applies to *sones* (traditional music) generally. (*See also* MEXICO, §II, 2.)

Sessa d'Aranda (*fl* 1571). Composer active in Italy. His surname suggests that he may have been born in one of the three places in Spain and Portugal called Aranda. His principal known work, *Il primo libro de madrigali a quatro voci* (RISM 1571[12]), which according to its dedication is also his first, contains a number of Petrarch settings together with two madrigals by Francesco da Cedraro, who is described as his pupil. The volume was evidently popular since it was reprinted three times; in the last two reprints, both published in Helmstedt by Giacomo Luzio, Cedraro's pieces are replaced by Weelkes's *Aye mee my wonted joyes*, an inclusion sufficiently noteworthy to be advertised on the title-page of the 1619 edition.

Adam Crause's dedication of this edition to the Landgrave of Hesse was not entirely paying conventional lip-service in its extravagant claim of Sessa d'Aranda's popularity ('così in Italia come nella [Ger] Magna'); Praetorius acknowledged his indebtedness to him in his *Syntagma musicum* (iii, 1618, 2/1619, p.243). Sessa's only other known piece is a four-voice sacred composition with basso continuo, *Nun dancket alle Gott* (RISM 1646[4]), probably a contrafactum of one of the earlier madrigals.

IAIN FENLON

Sessé [Sesé] **y Balaguer, Juan de** (*b* Calanda, nr Zaragoza, 24 May 1736; *d* Madrid, 17 March 1801). Spanish organist and composer. A letter to Latassa which outlines his career reveals that owing to failing eye-sight he abandoned a career in letters to become an organist, completing his studies in Zaragoza. He came to Madrid around 1760 as *maestro de capilla* and organist at S Felipe Neri. In late 1768 he won the post of organist at the royal chapel and entered service in January 1769. He moved to third organist in 1774 and second in 1787, in which position he remained for the rest of his life. His reputation as a musician is attested by Bails, who consulted him in preparing his own *Lecciones de clave* (1775). From 1773 to the 1790s many of his publications were announced in Madrid periodicals by the printing firm Librería de Copin, including fugues, versets, minuets, sonatas and other pieces for organ, harpsichord or piano, as well as quartets and violin sonatas. All these prints appear to have been lost except his undated op.1, *Seis fugas para órgano y clave* (ed. A. Howell, Madrid, 1976), which passed with the Fétis collection to the Bibliothèque Royale, Brussels, and his also undated op.6, *Quaderno primero de una colección de piezas música para clavicordio, forte-piano, y órgano*, now in the Biblioteca Nacional, Madrid. Op.1, announced in 1773 (according to Saldoni), was apparently the first keyboard music printed in Spain since Correa de Arauxo's *Facultad orgánica* of 1626. Op.6, which was advertised in 1786 (*Biblioteca periódica anual para utilidad de los libreros y literatos*, i/3, 1786, p.104) consists of seven single-movement works, in a *galant* style, grouped by key. Eight manuscript fugues by Sessé, some with preludes, are also extant (ed. in Rubio), though their present whereabouts are unknown. The fugues are excessively long, showy virtuoso pieces, somewhat casual in counterpoint, but striking in their harmonic colour, motivic development and rising climaxes of figuration.

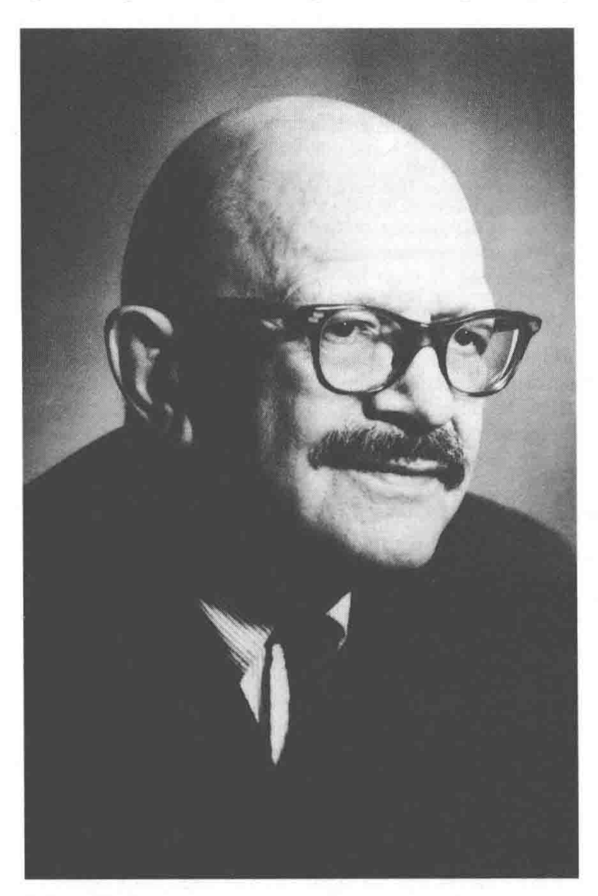
ALMONTE HOWELL/ALMA ESPINOSA

Sessions, Roger (Huntington) (*b* Brooklyn, NY, 28 Dec 1896; *d* Princeton, NJ, 16 March 1985). American composer, teacher and writer on music.



1. LIFE. Sessions was the third of four children whose parents were second cousins and came from old, but not wealthy, New England families. His maternal grandfather was an important Episcopalian bishop and religion played a significant role in the family. The parents separated when Sessions was four, a circumstance that 'didn't make life easier for the children'.

An intellectual prodigy, Sessions had written an opera at the age of 13, entered Harvard at 14 and graduated with the BA (1915). He received the BMus from Yale (1917), where he studied with Horatio Parker. His most influential composition teacher was Ernest Bloch, whom Sessions sought out in New York in 1919. He taught at Smith College from 1917 to 1921, when he became Bloch's assistant at the Cleveland Institute (1921–25). In 1920 he married a Smith student, Barbara Foster. The couple lived in Europe from 1925 to 1933, supported by two Guggenheim Fellowships (in Paris and Florence), a

three-year Rome Prize and a Carnegie grant (in Berlin). He had, therefore, first-hand experience of the rise of fascism in both Italy and Germany, and this sharpened his left-leaning political sensibilities.

During the years 1928–31 his close friend Copland presented the Copland-Sessions Concerts in New York. Since he was still in Europe, Sessions only distantly participated. Already fluent in French, German and Italian, he learnt Russian during this period, writing to Stravinsky, Slonimsky and Koussevitzky in their own language. After his return to the US, Sessions divorced in 1936 and married Elizabeth Franck, with whom he had two children. In the 1930s he was sometimes viewed more as a European than an American composer, and he befriended many Europeans who came to the US, including Krenek, Schnabel, Klemperer, Casella, Milhaud and Schoenberg. One of his closest relationships in the 1960s was with Dallapiccola.

Sessions was president of the American section of the ISCM (1934–42) and a teacher, briefly, at the Malkin Conservatory, the Dalcroze School, the Boston Conservatory and Douglass College. His teaching career at Princeton began in 1936. He left to teach at the University of California at Berkeley from 1945 to 1953, when he returned to Princeton until his retirement in 1965. He was appointed Bloch Professor at Berkeley (1966–7), and gave the Norton lectures at Harvard (1968–9). He accepted a post at the Juilliard School in 1966, remaining there until 1983. In his teaching and writing Sessions upheld high ideals, stressing craftsmanship and, by example, integrity of purpose. Numerous honours were bestowed on him including election to the American Academy of Arts and Letters (1953) and the American Academy of Arts and Sciences (1961), the Brandeis Creative Arts Award (1958), the Gold Medal of the American Academy of Arts and Letters (1961), a MacDowell Medal (1968) and two Pulitzers (a career award in 1974 and for his Concerto for Orchestra in 1982). He received 14 honorary doctorates.

1. Roger Sessions

During the course of a 62-year teaching career, Sessions profoundly influenced numerous important students. They include Babbitt, Larry Bell, Cone, Maxwell Davies, DeVoto, Del Tredici, Diamond, Eaton, Lehman Engel, Vivian Fine, Joel Feigin, Kenneth Frazelle, Gideon, Harbison, Imbrie, Earl Kim, Kirchner, Machover, Mambk, Martino, Nancarrow, Newlin, Rzewski, Salzman, Harold Schiffman, Tsontakis, Weisgall and Ellen Taaffe Zwilich. Sessions published four books and numerous essays (collected in a fifth), including articles on theories by Krenek, Schenker and Hindemith. His teaching, academic honours and writings led critics to describe Sessions as an 'academic' composer, a charge he denied but did not escape.

2. Works. Having been a child prodigy, Sessions felt that he developed unevenly as an adult, the length of his creative life and the pattern of his compositional career paralleled by few others. Remarkably, the bulk of his work was written after 1950, his most productive period being from 60 to 85, at which age he won his second Pulitzer Prize. His reputation rests on nine symphonies, three piano sonatas, four concertos, two quartets and a string quintet, two operas, and four orchestral works with voices. The output is notably lacking in minor or occasional pieces, but though he is considered mainly a symphonic composer, Sessions may eventually be equally regarded for his almost as extensive body of vocal music. Excluding juvenilia, Sessions's 42 pieces can be divided into five creative periods, delineated sometimes by a change of place of residence and often by large, frequently vocal, works. Nothing from the juvenilia and his work with Parker or Bloch is published except a suite version (1928) of the 1923 *The Black Maskers* incidental music. This somewhat expressionistic work, written under Stravinsky's influence, remains, however, the composer's best-known piece.

(i) 1924–35. The impact on Sessions of living in Europe until 1933 was enormous, but did not result in the production of much music. The only important works from this period are the First Symphony (1926–7), the Piano Sonata (1927–30) and the Violin Concerto (1930–35). His habit of procrastination and slow pace of composition frustrated early supporters such as Copland and Koussevitzky, who gave the première of the First Symphony with the Boston SO in 1927, the only Sessions work performed by him. The tonal Symphony may be described as neo-classical, but his own stylistic traits are also clearly in evidence: long phrases, dense polyphonic accompaniments, dissonance, colourful orchestration, and highly contrapuntal and rhythmically complex textures. The Violin Concerto, which took eight years to complete, marked a turning point, Sessions juxtaposing in it extremes of violence and lyricism. But its technical difficulty, seen by its début performer as insurmountable, gave it an unwarranted reputation as unplayable.

(ii) 1936–47. Sessions, the internationalist, did not believe in cultivating 'Americanism' in music, a position at odds with that of Copland. His Americanness revealed itself in more subtle ways; for example, despite his multilingual abilities, he only set English (including Whitman twice), and the pitch and rhythmic inflections are in accord with American accentuation. Important pieces from this time include the String Quartet no.1 (1936), Duo for violin and piano (1942), and the Second Symphony (1944–6) and the Second Piano Sonata (1946). The largest and most impressive work of the period is the one-act, 13-scene opera on Brecht's radio play, *The Trial of Lucullus* (1947). Written unusually quickly, for a student production at Berkeley, this effective, dramatic and lyrical opera has to date been produced only four times (besides Berkeley, at Princeton, Northwestern and Juilliard), and has been neither published nor recorded. Copyright problems with the Brecht estate have prevented one of Sessions's greatest works from being more widely disseminated.

(iii) 1948–63. The Trial of Lucullus paved the way for his magnum opus, *Montezuma*, which he had already begun in the mid-30s and which underlies this entire period. The libretto, by the Sicilian Antonio Borgese, about the conquest of Mexico, was reduced by Sessions from four acts to three after Borgese's death in 1952. But it has still been criticized for an over-elaborate nature: it uses a narrator, alternates prose with rhymed iambic and trochaic couplets, omits many articles and pronouns, inverts normal word order and incorporates Aztec, Spanish and Latin. Sessions felt the story was similar to *The Trial of Lucullus*, illustrating the futility of conquest; as well as being fascinating on an historical level, the action displays rich pageantry and an array of powerful emotions. The musical response shows him at his most passionate, with a large, colourful orchestra dominating the opera. Ostinatos underline scenes of conspiracy and violent death, and exotic percussion instruments lend a Mexican flavour, while the dry, rasping sound of Sprechstimme is used at times as a literal illustration of the words. The two most memorable moments – the meeting of Cortez and Montezuma, and the human sacrifice – are relayed in tableau, the stage picture matched by a lush, vivid music. As an opera composer and in writing for the voice, Sessions was a Verdian rather than a Wagnerian (despite the almost Wagnerian orchestration). He venerated Verdi's music and devoted full semesters to teaching *Falstaff*. Originally produced in German (in Berlin), *Montezuma* was not given its American première until 1976, the New York première following in 1982.

At the beginning of the 1950s, in part inspired by a growing friendship with Schoenberg, Sessions gradually adopted the 12-note method, beginning with the String Quartet no.2 (1950–51) and then the Violin Sonata (1953), in which 12-note organization was unconsciously incorporated. But the large-scale *Idyll of Theocritus* for soprano and orchestra (1954), which uses two refrains and graphic musical climaxes to tell its love story, demonstrates that his approach was not as rigorous as that of its dedicatee, Dallapiccola, or as Schoenberg's. The fact that the music he had already composed for *Montezuma* by that time did not have to be revised shows how little such a change of technique affected his well-formed individual style. Though he continually downplayed its use – never writing about it and remarking, 'the music is God; the 12-tone system is just parish priest' – the new method, nevertheless, seemed to free him compositionally. Productivity increased despite teaching commitments, and the Piano Concerto (1955–6), Third Symphony (1957), String Quintet (1957–8), Fourth Symphony (1958) and Divertimento for orchestra (1959–60) flowed from his pen in what was for him rapid succession, meeting with success.

(iv) 1963–70. After *Montezuma* came Sessions's most prolific period. He produced *Psalm 140* for soprano and orchestra (1963), the Fifth Symphony (1964), the Third Piano Sonata (1964–5), the Sixth (1966), Seventh (1966–7) and Eighth (1968) symphonies, and a Rhapsody for Orchestra (1970). The latter three symphonies can be viewed as a trilogy dealing with Sessions's reactions to the Vietnam War.

(v) 1970–81. Again, a large vocal work delineates a new era in Sessions's music. The last decade of composition was inaugurated by his masterpiece *When Lilacs Last in the Dooryard Bloom'd* (1964–70), dedicated to the memory of Martin Luther King and Robert Kennedy, both assassinated while Sessions was working on the piece. Based on Whitman's poem, the work is scored for three soloists – soprano, contralto and baritone – mixed chorus and orchestra (fig.2). During this period Sessions

2. First page of the autograph manuscript of Roger Sessions's 'When Lilacs Last in the Dooryard Bloom'd', 1964–70

also wrote a Double Concerto for violin and cello (1970–71), a Concertino for chamber orchestra (1971–2), Three Choruses on Biblical Texts (1971–2), the Ninth Symphony (1975–8) and the Concerto for Orchestra (1981). The pace of composition slowed. Nevertheless, at the age of 80, Sessions optimistically began work on a third opera, *The Emperor's New Clothes* (to a libretto by Andrew Porter). That this would have been a comedy paralleled *Falstaff*, also a product of an octogenarian.

Long revered by students, musicians and other composers, Sessions has not yet been accepted by the public. This is partly because his music, to quote his friend Casella, was 'born difficult'. Recordings have been slow in coming: not until 1996 were all nine symphonies available, while of the ten vocal works and operas only *Lilacs* is commercially recorded. His lofty personality, New England upbringing and idealism would not allow him to engineer – much less pay for – performances or recordings. Such indifference doubtless hindered his career. Fortunately, he possessed infinite patience, a knowledge of music history, a sense of humour and the self-confidence to wait for larger acceptance. These qualities were repaid in part when in 1988 the Roger Sessions Society, Inc. was formed to promulgate his music. His centennial year celebrations included performances by the New York PO and broadcasts by the BBC. After his death, Andrew Porter wrote of him, 'For music, he embodied what is finest in American thought, character, and genius. In nine symphonies, in concertos, two operas, and many other works, he gave it utterance. He was one of the country's – and the world's – great men' (1985).

Symphony no.9, 1975–8; Syracuse SO, cond. C. Keene, Syracuse, 17 Jan 1980
Concerto for Orchestra, 1981; Boston SO, cond. S. Ozawa, Boston, 23 Oct 1981
Inc., unpubd: Strophes, pf, orch, 1927–9; Orch Suite, 1929; Sym., 1929; Ballata [after G. Boccaccio: *Decameron*], 1929–30; Waltzes, 1929–31, lost; Sym., 1934–5

VOCAL

Romualdo's Song (Andreyeff), S, orch, 1923; Northampton, MA, June 1923
On the Beach at Fontana (J. Joyce), S, pf, 1930; London, 1930
Turn, O Libertad (W. Whitman), mixed chorus, pf 4 hands/2 pf, 1944; cond. Sessions, New York, April 1944
Idyll of Theocritus (Theocritus, trans. R.C. Trevelyan), S, orch, 1954; A. Nossaman, Louisville SO, cond. R. Whitney, Louisville, 14 Jan 1956
Mass for Unison Choir, 1955; cond. Sessions, New York, April 1956
Psalm 140, S, org, 1963; Princeton, NJ, June 1963; version for S, orch, A. Elgar, Boston SO, cond. E. Leinsdorf, Boston, 11 Feb 1966, orch score unpubd
When Lilacs Last in the Dooryard Bloom'd (cant, Whitman), S, A, Bar, chorus, orch, 1964–70; H. Joseph, S. Friedman, A. Shearer, cond. M. Senturia, Berkeley, 23 May 1971
3 Choruses on Biblical Texts (Ps cxxx, Bible: *Isaiah*, Pss cxlvii, cxlviii, cl), chorus, orch, 1971–2; cond. L. Spratlan, Amherst, MA, 8 Feb 1975

CHAMBER

Piano Trio, 1916, unpubd
Violin Sonata, 1916, unpubd
Pastorale, fl, 1927, lost, unpubd
String Quartet no.1, e, 1936; Coolidge String Quartet, Washington DC, April 1937
Duo, vn, pf, 1942; J. Antal, R. Sessions, Princeton, NJ, Jan 1943
String Quartet no.2, 1950–51; Pro Arte Quartet, Madison, WI, 28 May 1951
Violin Sonata, 1953; R. Gross, San Francisco, 1953
Quintet, 2 vn, 2 va, vc, 1957–8; movts 1 and 2 only, Berkeley, 1958, Griller Quartet, F. Molnar; complete, Lenox Quartet, J. Fawcett, New York, 23 Nov 1959
6 Pieces, vc, 1966; J. Sessions, New York, 31 March 1968
Canons (to the memory of Igor Stravinsky), str qt, 1971; London, 1972
Duo, vn, vc, 1978; C. Macomber, T. Mook, New York, Jan 1989 [inc.]
Inc., unpubd: miscellaneous compositions, 1935–44; Studies in Counterpoint, 1938–41; Violin Sonata, 1981

KEYBOARD

3 Chorale Preludes, org, 1924, 1926; J. Yasser, New York, Dec 1927
Piano Sonata no.1, 1927–30; J. Duke, New York, 6 May 1928
4 Pieces for Children, pf: Scherzino, 1935; March, 1935; Waltz, 1936; Little Piece 1939
Pages from a Diary (From my Diary), pf, 1937–9; Sessions, New York, Nov 1939, 2nd movt rev. 1940
Chorale, org, 1938; R. Hufstader, Princeton, NJ, April 1938
Piano Sonata no.2, 1946; A. Foldes, New York, March 1947
Piano Sonata no.3, 1964–5; J. Lateiner, Berkeley, March 1969
5 Pieces, pf, 1974–5; R. Miller, Davis, CA, May 1977
Waltz, pf, 1977–8

ANDREA OLMSTEAD

Sestairo [Sestaro, Sestarron], **Albertet de.** *See* ALBERTET DE SESTARO.

Šesták, Zdeněk (*b* Citoliby, Bohemia, 10 Dec 1925). Czech composer. On leaving school he entered the Prague Conservatory, where he studied composition with Hlobil and Krejčí (1945–50); concurrently he studied musicology with Hutter at Prague University. In the 1950s he embarked on a career as a composer, and as a scholar specializing in 18th-century Czech music (he has written about the Kopřiva family of musicians and overseen the publication and recording of works by composers from Citoliby). While his first compositions were inspired by 20th-century masterpieces by composers such as Stravinsky and Honegger, in the 1970s he sought a non-compromising style of expressive chords and clearly defined themes. In his approach he rejected the randomness of improvisation, preferring concise forms and proportional balance, and became convinced of the ample opportunity for creativity within strict formal boundaries. Many of his works have a philosophical dimension.

WORKS
(*selective list*)

Orch: Sym. no.2, 1970; Sym. no.3, 1971; Conc. for Str, 1973; Sym. no.4, str, 1973; Sonata sinfonica, winds, bell, timp, 1976; Sym. no.5 'Chronos', 1978; Sym. no.6 'Věčný nepokoj srdce' [Eternal Unrest of the Heart], 1979; Symfonické variace 'Zpřítomnění okamžiku' [Making the Moment Alive], 1980; Vn Conc. no.1 'Sursum corda', vn, wind orch, hp, cel, gong, timp, 1981; Va Conc. 'Sokratovské meditace' [Socratic Meditations], 1982; Pamět' [Memory], sym. fresco, 1983; Vn Conc. no.2 'Jan houslista' [John the Violinist], 1985

Choral: Hommage à Apollinaire, unaccomp. chorus, 1972; Portrét Konstantina Biebla, unaccomp. chorus, 1974; 4 dramatické fragmenty (chbr cant., V. KAREL STEINMETZ

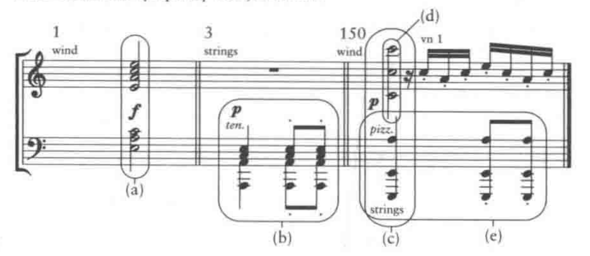
Sestetto (It.). *See* SEXTET.

Sestetto Chigiano. Italian chamber ensemble that developed in 1966 from the CHIGI QUINTET.

Sestina (It.). *See* SEXTOLET, SEXTUPLET.



Set. An unordered collection of associated musical elements, usually pitch classes.

1. Sets as representations of musical structures. 2. Historical background of set theory. 3. Synopsis. 4. Meaning. 5. Other types of set.

1. SETS AS REPRESENTATIONS OF MUSICAL STRUCTURES. The concept is based on the representation of music as discrete events characterized by properties such as pitch, duration, timbre and onset time. This representation is consistent with musical notation and with practical descriptions such as 'the tuba's low E' or 'the loud harmonic in bar 6'. In this view, the similarity of events in some of their properties associates them into structures, while dissimilarity distinguishes events within and between those structures. For example, a chord is composed of events that have the same onset time but differ in pitch, and a melodic motif is composed of events that are played consecutively, usually by the same instrument. Chords and motifs are specific instances of more general types known as 'segments'. Examples of these types are indicated by circles in exx.1 and 2, which present characteristic passages of tonal and atonal music respectively. The central columns of Tables 1 and 2 indicate the shared properties that associate the events in each segment.

Although events may be identical in some respects, they necessarily differ in at least one property. In a set, associated events are represented by distinct values that denote their differences in one specific property. These values are listed within set brackets, {}, to indicate their segmental coherence. There are as many set representations of a given segment as there are properties in which its events differ. For example, various set representations of the segments in exx.1 and 2 are given in the right column of Tables 1 and 2. If two events in a segment are identical in some property that otherwise distinguishes events in the same segment, then both events are denoted in the set by a single element. In segment 1(e), for instance,

Ex.1 Beethoven: Symphony no.7, 2nd movt

Ex.2 Schoenberg: *Erwartung* op.17, bars 1–2

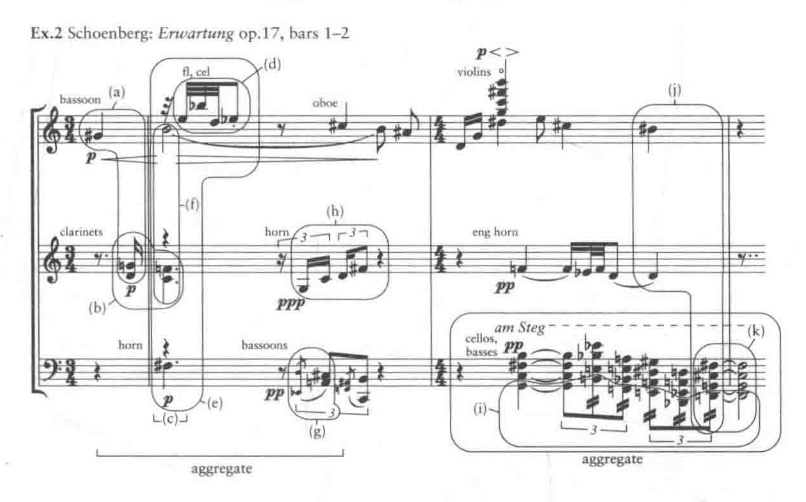


TABLE 1

Segment	*Properties shared by events in the segment*	*Set representations of differing properties*
(a)	intensity (*f*), onset time (1st beat), duration (𝅗𝅥), section (wind)	pitch: {E3, A3, C4, E4, A4, C5, E5} pitch class: {A, C, E}
(b)	intensity (*p*), section (strings)	pitch: {A1, A2, C3, E3} pitch class: {A, C, E} onset times, in ♪ beats: {1st, 3rd, 4th} durations: {♩, ♪}
(C)	onset time (1st beat)	pitch class: {A, C, E} durations: {𝅗𝅥, ♩} sections: {wind, strings}
(d)	pitch class (C), and, same as (a): intensity, onset time, duration, section	pitch: {C4, C5, C6} no others
(e)	same as (b)	pitch: {E1, E2, A3}: different from (b) pitch class: {A, E}: a subset of (b) onset times and durations: same as (b)

TABLE 2

Segment	*Shared properties, or relations to other sets*	*Set representation of pitch classes*
(a)	intensity (*p*), section (wind), timespan	D, G, G♯}
(b)	intensity (*p*), instrument (clarinet), consecutiveness	{C, D, F, G}
(c)	onset time (1st beat)	{B, C, F, F♯}
(d)	instrument flute, celesta), register (high), consecutiveness	{B♭, D, E♭, F}
(e)	[see text]	{B♭, B, C, D, E♭, E, F, F♯} [union of (c) and (d)]
(f)	[like (c)]	{B, C, F} [subset of (c)]
(g), (h), (k)	[like (c) or (d)]	respectively {A, C♯, D, E♭} {C, D, F♯, G} and {C♯, D, F♯, G}
(i)	instrument (cello, bass), register (low), consecutiveness	{B♭, B, D, E, F, G}
(j)	[timespan]	{C, C♯, D, F♯, G} [superset of (h) and (k)]

several distinct events have the same pitch class, E, so in the pitch-class-set representation of the segment, {A,E}, the element E denotes all of them.

Representing an ordered segment as an unordered set of values discloses a fundamental identity that the segment shares with all other segments of events represented by the same values. For example, the segments (a), (b) and (c) in ex.1 are represented by the same sets of pitch classes, despite their many differences; and segments (b) and (e) can be represented by the same sets of onset times and durations, despite their complete difference in pitch.

2. Historical background of set theory. Although a disregard for order seems antithetical to a temporal art, it is in fact central to many important theories of music. Both the modal classification system, which attributes the same mode to different orderings of the same pitches, and theories of tonal harmony and figured bass, which assert the functional equivalence of different registral orderings of the same pitch classes, can be framed as theories of musical sets. In such theories, the unordered representation of ordered segments supports the recognition of unity among apparently diverse musical structures, and leads to the discovery of processes – such as root progression – that cannot be defined in less abstract representations.

Musical developments of the 20th century, however, stimulated a more explicit development of set theories. Precedents may be found in compositional treatises by Hauer, Hába, Schillinger and others, which recast the harmonic definition of chord inversion as a registral permutation of scale degrees, making it possible to catalogue all possible combinations of notes from any scale, even chromatic or microtonal. (In contrast, Hindemith's classification scheme asserts that the majority of chords cannot be inverted.) Composers such as Messiaen extended the concept of mode to embrace sets of durations and intensities. A crucial contribution was Babbitt's introduction of algebra and number theory to model 12-note rows and operations. The idea that the structural relations central to the 12-note system could form a basis for analysing pitch structures in the pre-serial, atonal music of Schoenberg and his contemporaries was subsequently developed by Perle and Forte, leading to more rigorous theoretical formulations by Rahn, Morris and Lewin. The theory has influenced the practice of some composers, notably Elliott Carter.

3. Synopsis. Pitch-class set theory treats the properties and relations of unordered collections of pitch classes. The basic properties of any set are its content and its cardinality, which is the number of elements it contains. A dyad is a set of two pitch classes, a trichord a set of three, and so on through tetrachord, pentachord, hexachord, heptachord and octachord. The set of all 12 pitch classes is called the 'aggregate', and the 'complement' of a pitch class set S is the set of all members of the aggregate that are not members of S.

The simplest content relation of pitch-class sets is expressed by their intersection, a set that contains the pitch classes they have in common. For example, in ex.2 segments (b) and (h) intersect in the trichord {D,G,C}. This intersection creates continuity between successive segments, just as common notes link harmonies in tonal progressions. The greater the cardinality of the intersection, the more alike are the contents of the sets. The closest content relation arises when one set includes all the pitch classes of the other; in this circumstance the smaller set is called a 'subset' of the larger set, which is called the 'superset'. Inclusion relations help account for the similarity of segments that use many but not all of the same pitch classes. For example, segment (j) in ex.2 includes the same trichord, {D,G,C}, that is the intersection of (b) and (h), and segment (e) includes a set, {B,F,E,B♭,D}, that is also a subset of the concluding segment, (i). Large sets, such as (e), can be understood as unions of smaller sets. In the music of the Second Viennese School, even before their 12-note works, the largest set of all – the aggregate – is formed regularly in this manner. As shown in ex.2, an aggregate results from the union of the first, essentially non-intersecting sets (a), (c), (d) and (g); at the end of the excerpt, the low strings also build up a larger set, creating closure by completing the aggregate at the last chord.

Another property of a pitch-class set is its interval-class content, which tallies how many of each interval class are formed by the set's dyadic subsets. This property makes some sets quite distinctive. Augmented-triad sets, for example, contain only interval class 4, while all other trichords contain at least two different types of interval class. The diatonic-scale set is also distinctive: it contains more instances of interval class 5 than any other heptachord. Equality of interval-class content constitutes another basis, besides inclusion, for relating sets. For example, it accounts for the similarity we attribute to different inversions of C major and F♯ minor triads, which include no common pitch classes. To quantify the relation of sets that have different interval-class content, various measures of similarity have been proposed. They show, for example, that segment (c) in ex.2 is very similar to the last cello chord, (k), because five out of the six interval classes in the corresponding sets are the same (both sets contain two interval-class 1s, two 5s, and one 6).

Other pitch-class-set relations of compositional and analytical interest arise from considering pitch-class transformations such as transposition and inversion. If pitch classes are represented by numbers, these transformations may be formulated as arithmetic operations that possess an algebraic group structure; another less familiar but formally similar transformation is multiplication by 5 and 7. The transformation of a given pitch-class set S is defined as the set of pitch classes that result from applying that transformation to each of the pitch classes in S. Of course, set transformations can represent the relations of segments that are clear pitch-transpositions or pitch-inversions of each other, such as the cello chords in the second bar of ex.2, but they can also reveal more abstract relations among segments with different registral or temporal orderings. For instance, the trichord {B,C,F} that represents the bassoon-clarinet chord (f) is an inversion of the trichord {D,G,G♯} that represents the preceding, identically orchestrated segment (a), even though the segments are not related by pitch inversion. Transformational set relations are reinforced by other relations; for instance, sets that are transpositions or inversions of each other always have the same interval-class content, although the converse is not always true.

Although two sets are equal only if they contain the same pitch classes, two different sets are considered 'equivalent' if one is a transformation of the other. According to the group structure of the mathematical

model, each type of transformation – transposition, inversion and multiplication – induces an equivalence relation among sets. Two sets belong to the same transformational equivalence class (or 'set class') if they are equivalent under that type of transformation. For example, since all major triads are transpositionally related, they belong to the same transpositional equivalence class; all minor triads belong to another transpositional class; and the sets {C,D♭,F} and {D♯,E,G♯} belong to yet another transpositional class. Under transposition and inversion together, however, all major and minor triads belong to the same equivalence class, while the other two sets still belong to another class. Under transposition and inversion together with multiplication by 5, all these sets are equivalent. The formal definitions of set class make it possible to name the type of any set without any reference to possibly inappropriate tonal-harmonic descriptions.

One branch of pitch-class-set theory distinguishes set classes by the degree to which their sets are invariant (do not change their content) under transformation. Common-tone theorems relate the interval-class content of a set, and the pairwise sums of its pitch classes, to the cardinality of the intersection of the set with its transpositions and inversions respectively. Some types of set, called 'symmetric', are completely invariant under certain transformations. However, many hexachords, as well as most smaller sets, are capable of being transformed into sets with entirely different pitch classes. A set that can be combined with transformations of itself to form the 12-note aggregate is said to possess the property of 'combinatoriality'.

Many of the connections linking inclusion, complementarity, interval-class content and transformation have been investigated in the literature on set theory. For example, the precise relation of the interval-class contents of complementary sets is expressed by the generalized hexachord theorem. 'Z-equivalence' denotes the relation of sets that have the same interval-class content but are not related by transposition or inversion. Forte has proposed ways of grouping set classes themselves into larger set complexes and set genera on the basis of abstract inclusion relations, which obtain between two sets if one includes a subset that is transformationally equivalent to the other. From another standpoint, Lewin has shown that inclusion and interval content are specific instances of more general functions of sets, and has proposed an 'injection function' that subsumes these relations as part of a generalized set theory.

4. Meaning. Pitch-class set theory can be a compositional resource. A knowledge of the properties of a given set type – its interval-class content, symmetry, combinatorial potential, invariance and its subsets and supersets – may suggest specific processes and forms for which the set is well suited. For example, invariance properties such as combinatoriality are especially pertinent to 12-note serial composition and to non-serial textures that consistently feature the aggregate.

On the other hand, much of the theory has been designed to support analysis, especially of the problematic atonal repertory. The set relations remarked above in connection with ex.2 exemplify some of the basic types of analytical observations enabled by the theory: equivalence relations may be brought to bear in demonstrating the motivic unity of a piece that presents various orderings, transpositions and inversions of a few pitch-class sets, and the more abstract similarity and inclusion relations may be cited in demonstrating the coherence of a piece that exhibits a diversity of set classes.

Critiques of pitch-class-set analysis focus on the fundamental identity of sets, on segmentation and on the meaning of the more abstract set relations. In theory, the same set, characterized only by its pitch-class and interval-class content, can represent segments that differ greatly in rhythm, in registration and in the specific ordered intervals that are emphasized. The motivation for such an identification, and its benefits, are most evident in analyses of music that shuns overt repetition of pitch and interval structures. In cases where this abstract representation is appropriate, the analyst must strike a balance between identifying segments purely on the basis of rhythmic and textural cues and minimizing the number of set types across the entire composition; the task is clouded by the difficulty of determining how events associate in the highly variable textures of non-repetitive atonal music. Lastly, as with most abstractions, there is disagreement among scholars about the degree to which equivalence, inclusion and similarity relations are audible or analytically pertinent.

5. Other types of set. One sign that these difficulties are not insurmountable is the continuing development of new set theories for composition and analysis. For example, set models of the diatonic system as a seven-pitch-class aggregate have revealed the special structural properties of its triadic subsets. An exploration of the properties of the diatonic heptachord with respect to the 12-note aggregate has stimulated the discovery of similar sets embedded within aggregates with greater and lesser cardinalities. In the domain of rhythm, as well as that of pitch, the work of Babbitt has been seminal. Many of his compositions rhythmicize events in a way that is analogous to 12-note composition: for example, by placing every attack on one of the beats of a 12-beat mensural unit, so that the series of attack time-points in each rhythmic segment constitutes an ordering of all 12 possible beats. This system has fostered a theory of beat-class sets for analysing the content and form of Steve Reich's 'phase-shifting' music; each repeated rhythmic pattern is represented by a set of beats that are attacked in the mensural unit, and the shifting of a pattern with respect to the notated bar is modelled as a temporal transposition of the set. Future directions in set theory may take into account Lewin's model of intervals and transformations, which provides a very general framework for theorizing sets of time-points, durations, pitches and more complex elements.

JOHN ROEDER

Setaccioli, Giacomo (*b* Corneto Tarquinia, Viterbo, 1868; *d* Siena, 1925). Italian composer. While in his lifetime he enjoyed a high reputation based on his undoubted skills as a teacher, Setaccioli's music, including that of his most productive and successful period of 1910–25, has not remained in the repertory. In addition, much of his output has disappeared, a particularly serious loss being that of the Symphony in A, in which he made a serious attempt at a form unusual for Italian music of the day, dominated, as it was, by the Respighian symphonic poem. After the work's single performance in Rome, Paribeni commented on its remarkable synthesis of post-Brahmsian architecture and Mediterranean lyricism. A tendency to strike a balance between elements which are difficult to reconcile is characteristic of Setaccioli's extant work in general. In the opera *Il martellaccio*, for example, the only one of four to have survived, a gentle expressivity softens the somewhat rhetorical nature of the libretto. Of the chamber music, the particularly fine Sonata for clarinet and piano shows the clear influence of Impressionism adapted to traditional structures with an intelligent, critical sense.

ROBERTO COGNAZZO

Setār [saitār, sehtār, setā, setór, sihtār]. Persian word, meaning 'three strings', used in Iran for a lute of the ṬANBŪR family with a small body, a long neck and four metal strings (three until the middle of the 19th century). It is played in classical Iranian music, mostly solo or to accompany singing. Like the TĀR, which it resembles in the number of frets and the tuning system, it is held in high esteem because of its antiquity (it originated in the 15th century, or even earlier) and because its delicate and intimate tone restricts it to art music. Its manufacture, technique and playing style probably contributed to those of the *tār* at the end of the 18th century.

The pear-shaped body of the *setār* is made of mulberry wood assembled in strips or carved out of a single piece, and the long, narrow neck is provided with 25 to 27 movable frets producing the same intervals as on the *tār*; the strings are most often tuned *c–c′–g–c′*. The vibrating string is 62 to 70 cm long and the body is 25 cm long, 15 cm wide and 15 cm deep. The instrument is delicately made and weighs only 300 to 400 grams. The *setār* is distinguished from numerous other three- and four-string lutes in the region by a technique which uses only the index finger of the right hand in an oscillating motion. This makes for extreme fluidity and a richness of rhythmic and decorative patterns (*mezrāb* or *nākhon*). The Iranian musician AHMAD EBADI (1906–93) was a significant exponent of solo *setār* playing; his performances encouraged interest in the instrument among a younger generation of players.

In Baluchistan, the *setār* (also *tanburag*) is a larger instrument with one low string and a double course tuned a 4th higher. It serves solely as a rhythmic drone for the singing of bards (*pahlavān*) or to accompany other instruments, notably the *sorud*.

In Central Asia, the *sato* or *satār* is a large version of the Central Asian *tanbur*. It has three or four metal playing strings, between eight and 12 sympathetic strings and about 16 tied frets. It is held vertically and is usually played with a bow but may occasionally be plucked with a plectrum. The Uzbek *sato* has three drone strings, while the Uighur *satār* has 10–12 sympathetic strings. For discussion of the *tanbur* in Uzbekistan and Tajikistan, *see* ṬANBŪR.

The *setār* (*sehtār*, *saitār*) of Kashmir is a long-necked lute of the devotional art-music ensemble *ṣūf yāna kalām* ('Sufic utterance'; *see also* SANTUR). It is around 100 cm in length, though older players use a smaller version. The resonator is small in proportion and is composite at the back; an upper wooden shoulder-piece narrows to join the neck and with the main wooden part forms a fairly deep ovoid shell with a ridge at the back. A rare use of wood and gourd has been recorded for the shell. Both types suggest original carvel-building. The table is wooden and carries a deep bridge of the type commonly found on the Indian long lutes. The string holder is inferior. The neck carries a rigid nut and 14 bound gut frets, set to the diatonic major scale through two octaves, or with flattened 3rds or 7ths. The older type of *setār* has seven metal strings, of which six are tuned in unison to the tonic and the seventh to the dominant; the first two are a double course for the melody, the others drones. A newer type adds two thinner strings, with pegs further down the neck, tuned like the *cikārī* strings of the Indian *sitār*. The Kashmiri *setār* often has a decorative inlay, and is played with a wire plectrum like that of the Indian *sitār* (*see* SITĀR, fig.1*c*).

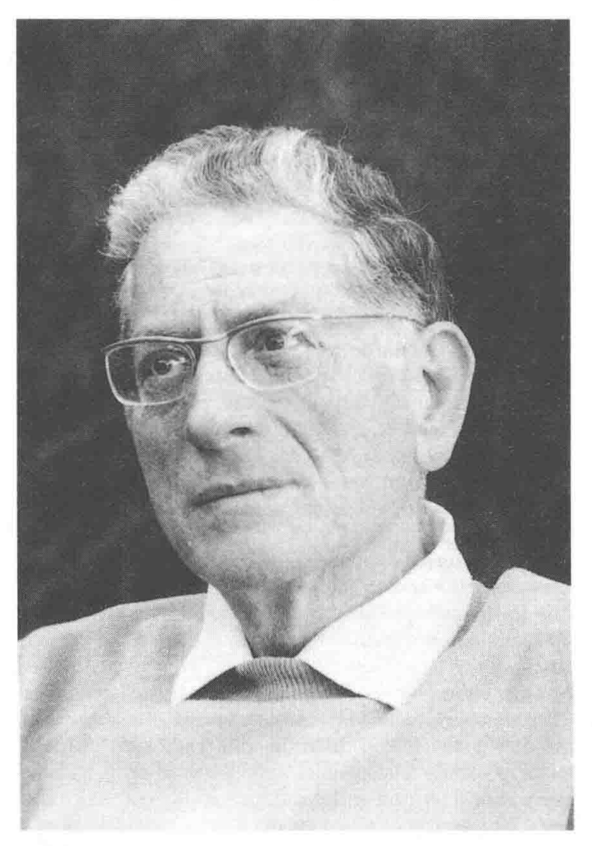
JEAN DURING, ALASTAIR DICK

Seter, Mordecai [Starominsky, Marc] (*b* Novorossiysk, 26 Feb 1916; *d* Tel-Aviv, 8 Aug 1994). Israeli composer of Russian birth. One of the founding fathers of Jewish-Israeli contemporary music, his *Midnight Vigil* is acclaimed as the finest oratorio in Israeli music, creating a unique style of direct national appeal.

1. Life and works. 2. Periodization and style. 3. Reception.



1. LIFE AND WORKS. The son of a pharmacist and a music connoisseur, the young Seter studied the piano in Novorossiysk and in Tbilisi, where his family moved prior to their emigration to Palestine in 1926. He continued his piano studies in Tel-Aviv with Jacob Weinberg and Rivka Burstein-Arber and made early attempts at composition while attending the prestigious Herzlia Hebrew Gymnasium. In 1932 he went to Paris for further study with Georges Dandelot (theory) and Lazare Lévy (piano). After two years he entered the Ecole Normale, where he studied composition with Paul Dukas and Nadia Boulanger, his most influential teacher. He also took a few lessons with Stravinsky. Among his first compositions published by Fortin in Paris were the Debussy-influenced piano preludes (1933). In two intensive, formative years with Boulanger he mastered early and contemporary European music, especially Renaissance choral music and French Impressionism, both major influences on his works. In 1937 his work with her ended owing to what he perceived as her blind admiration for Stravinsky and neo-classicism, and he returned to Palestine.

Seter's first encounter with Mizraḥi folklore of Palestine (traditions originating in Middle Eastern Jewish communities) occurred in 1938, when Joachim Stutschewsky suggested he look at Sephardi liturgical tunes from Idelsohn's *Thesaurus*. Seter became immersed in this material, naturally suited to the Sephardi-accent of Palestinian Hebrew, and soon regarded it as cantus firmi for his works. From 1941 to 1944 he transcribed 144 Mizraḥi cantilation tunes (originating in Palestine, Syria, Egypt and Corfu), published later as *Nigunim* ('Chants'). That research, followed in the 1950s by transcriptions of Yemenite tunes, permeated all his major compositions between 1939 and 1968, and arguably even his late style. His 1940 *Sabbath Cantata* (premièred 1941, Engel Prize 1945), his first significant work, is considered a cornerstone of the Israeli choral repertory. This was followed by other choral works: *Mo'adim* ('Festivals'), *Shirei mo'ed* ('Festive songs') and *Motets*. In these and other works of the 1940s the use of Mizraḥi and Yemenite liturgical tunes is clearly perceptible, amalgamated with Renaissance choral writing and the influences of Stravinsky and early 20th-century French music.

In the late 1940s, after a decade of writing choral music, Seter turned his attention to instrumental writing (mostly for strings, which he regarded as most closely associated with the human voice). Despite his change in genre, Mizraḥi *melos* remained central to his work, notably in *Partita* and *Sonata*. *Ricercar* for strings became one of the most widely known and performed of Seter's instrumental works during the 1960s. As a ballet choreographed by Glen Tetley it has been danced by the world's leading companies.

Seter's association with Sarah Levi-Tanai and her Inbal Dance Theatre in 1957 enhanced his interest in Yemenite folklore. He composed two ballets for the company: *Eshet ḥayil* [Valiant Woman] (the first version of the *Yemenite Suite*) and the first version of his magnum opus, the 1961 oratorio *Tiqqun ḥatsot* ('Midnight Vigil'). The later version of this work won the 1962 Premio Italia and the 1965 Israel Prize. It was not until 1957 that he wrote his first full orchestral work, the Sinfonietta. This was followed by the Variations (Israel PO commission, 1959). Among his notable orchestral works of the 1960s were three additional ballets: two commissioned for Martha Graham, *The Legend of Judith* and *Part Real Part Dream*, and one for the Batsheva Dance Company, *Jephthah's Daughter*. These are written in a freely serial style that emphasizes occasional tonal centres.

Jerusalem and *Hallel* ('Dithyramb'), both choral works of 1966, begin to hint at Seter's enigmatic late style of the 1970s and 80s. This transformation of styles, which is commonly perceived as a drastic change towards an individual, almost autistic set of late works, comprising almost half of Seter's oeuvre, is better understood as an organic, teleological and consistent process, culminating

Mordecai Seter

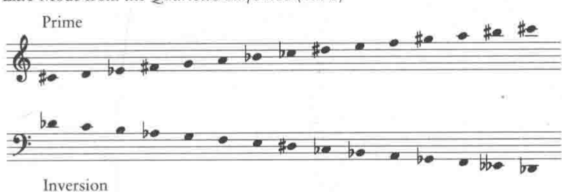
in an exceptionally coherent opus of late chamber and piano works.

Seeing himself as an artist who wrote according to inspiration, Seter refused to accept commissions after the mid 1960s. Unlike his close friends, composers Boskovitch and Partos, and his colleague Tal, he was rarely involved in institutional activities. He taught at the Music Teachers' College (from 1946) and at the Israel Conservatory (from 1951; later the Rubin Academy of Tel-Aviv University), where he became professor in 1972. In 1983 he was awarded the ACUM prize for lifetime achievement. His pupils included the composer Tsvi Avni and the conductor Gary Bertini, who later directed the premières of almost all of his choral and orchestral music. From 1952 until his death in 1994 Seter wrote 29 personal journals in Hebrew, French, English and Russian that note his works, his performances, and various literary and poetic citations from these languages, but contain almost no other personal information. These, as well as his manuscripts and sketches, are held in the National Archive in the Hebrew University of Jerusalem.

2. Periodization and style. Seter's works can be divided into four main periods, which retain a remarkable consistency in their orchestration and exhibit a gradual progression in style. Choral music dominates his first decade as a mature composer (1940–51). His interest in chamber music, which began in the late 1940s, blossomed until 1957, when he finished his first orchestral piece. He continued to expand his orchestral output until 1968; his distinctive late style emerged two years later.

The choral phase of Seter's works begins with the *Sabbath Cantata* (1940), a Renaissance-like polyphonic piece, surprisingly dissimilar to homophonic arrangements ubiquitous at the time in Palestine, based on Idelsohn's Sephardi cantus firmi and occasionally tinted with early Stravinskian rhythms and harmonies. It ended with *Motets* (1939–51), which features early Messiaen-like slow harmonic progressions, effective strettos, chordal sections and ornamental closures.

Perhaps it is no coincidence that Seter's more idiosyncratic style crystallized at a time when he hebraicized his name in 1950. Although his chamber music peaked with *Ricercar*, his idiom became more and more individual until it could no longer be considered representative of the Mediterranean style common to the music of Ben-Haim, Lavry, and early Partos and Boskovitch. *Ricercar*, based on a borrowed Mizraḥi tune and two other Mizraḥi-like themes (a common approach of many Mediterranean composers at the time), features a clear, organic structure and exquisite polyphonic sections. At once a triple fugue and a series of variations, conforming to its motto from Thomas Mann, 'continuity through change', *Ricercar* was perceived by Seter as a drama of three characters. Indeed, drama as present in classical music, using Renaissance and Baroque forms, became one of the most significant characteristics of Seter's music.



The influences of Bartók and Kodály, whose scores he studied with his friends Partos and Boskovitch, became significant in Seter's chamber period. This well known 'troika', Partos-Boskovitch-Seter, who protested against the Mediterranean style of Lavry and Ben-Haim and supported instead a national Israeli style, enjoyed enduring influence among young Israeli composers of the 1950s and 60s. Bartók's ideology is particularly evident in Seter's 1950s pieces, in which the 'synthesis [between Mizraḥi and Western elements] should be performed from within [as a deep, non-ornamental/ oriental process]. . . . I consider forms as instrumental variation and toccata, motet, cantata, chaconne, and passacaglia – as optimal for this synthesis: these forms are independent of [Western] harmony, and exist in either Mizraḥi [Eastern] or Western musics. . . . The Motets of the Thirteenth and Fourteenth centuries are not far from the oriental concept of music, neither form the modern concept' (M. Seter, 1960). The *Variations* for orchestra (1959) make up a drama of the individual searching for his identity through various experiences; the formal consequence being the emergence of the theme through the gradual unveiling of its inherent potentialities until it achieves its final form.

From the late 1950s, as he embraced orchestral writing, Seter's treatment of pitch gradually changed. Along with liturgical melodies, he worked predominantly with predetermined rows and modes of his own. *The Legend of Judith* and other ballets of the early 1960s evolve from a row; *Jerusalem* and *Hallel* (both 1966) share the same five-pentachord mode as the basis of pitch content; even the earlier *Midnight Vigil* (1961), incorporating Yemenite and other Mizraḥi themes, is based on a unifying mode of alternating minor and augmented 2nds. This work '. . . a monodrama building up, taking place and being presented within its sole character – a [Jewish] worshipper conducting his personal midnight vigil in an empty synagogue' (W. Elias). The worshipper's visions – the longings for the Holy Land in the Diaspora, the majestic High Priest of the Temple, God's promise to the Holy Land to Israelites

in Jacob's Dream, the redemption in the Hallelujah – are the central scenes of the oratorio, which ends with a spoken canon of the morning prayer by the congregation, bringing the worshipper back to reality. Its textures vary from monophony to complex polyphony.

Seter's late style is also tied to a change in genre. Having reached the peak of his national and international fame, he turned to chamber music in the 1970s, and mostly to piano music in the 1980s. Characterized by introversion, bitterness, and personal and national disappointment, this period of Seter's life may have been a reaction to the avant garde and its negative effect on audiences. He turned away from commissions and honours and, for more than five years in the mid-1980s, even refrained from submitting scores for publication. Written in a conservative style, his late works do not place emphasis on sound, rhythm, new textures or innovative orchestration. Partly influenced by Schoenberg's serial music and Messiaen's approach to modes and slow tempos, Seter employed modes and rows that are consistently diatonic; he almost never used any transpositions, thus enhancing Seterian harmonic functionality in pieces that might have seemed atonal. His 33 diatonic modes, serving as core pitch material for 35 of his 46 late works, each comprise an aggregate ranging between 12–25 notes. All are made up of minor, major, augmented and doubly-augmented 2nds, such as the mode of the *Quartetto Sinfonico* (String Quartet no.2; ex.1), and typically contain more minor and augmented

Ex.1 Mode from the *Quartetto Sinfonico* (1976)

2nds than major and doubly-augmented ones. The most significant technique in the *Quartetto*, as in most of Seter's other late works, is the simultaneous unfolding of the mode and its inversion in the climactic middle movement. The first movement is based on a repetition of a row derived from this mode, or, as he would describe it, is a set of variations on a theme.

3. Reception. Seter was always deeply admired, especially by Israeli composers. Although his public fame dropped considerably after the 1960s, due to his introverted, enigmatic late style, his acclaim among musicians never faded. Indeed, his stature has assumed mythical proportions over the years. Uniquely among his generation, he developed as a composer in Palestine; his peers emigrated there in the 1930s as mature composers. His innate grasp of Hebrew bestowed upon his choral music a more natural sound than was achieved by many of his contemporaries.

His legendary appeal also emerged from his humble, introverted and austere, yet forceful and magnetic personality; his consistent avoidance of institutionalized honours; and his profound knowledge of Western music, literature, art and history. His special status was confirmed in the Israel PO's Millennium Festival programme, which included Beethoven's Ninth, Bach's B minor Mass and Seter's *Midnight Vigil*.

WORKS

BALLETS

38	Eshet ḥayil [Valiant Woman] (choreog. S. Levi-Tanai), 1957; Tel-Aviv, 1957
39	Tiqqun ḥatsot [Midnight Vigil] (choreog. Levi-Tanai), 1957; Tel-Aviv, 1957
43	The Legend of Judith (choreog. M. Graham), 1962; Tel-Aviv, 1962
44	Part Real Part Dream (choreog. Graham), 1964; New York, 1964
45	Jephthah's Daughter (choreog. R. Schoenfeld), 1965; Tel-Aviv 1965
-	?Stone of Destiny (choreog. Graham); Tel-Aviv 1974

ORCHESTRAL

29	Sinfonietta (Divertimento), 1953–7, rev. 1966–70
30	Ricercar, str trio, str, 1953–6

RONIT SETER

Set-piece. A term sometimes used in 18th- and 19th-century Anglo-American sacred music to denote a through-composed setting of a metrical text.

In use in England from the beginning of the 18th century, the term began to appear in American tune books as early as 1795, when both Thomas Atwill's *New York Collection* (Lansingburgh) and Daniel Read's *The Columbian Harmonist*, iii (New Haven), mentioned 'anthems and set-pieces' in their titles. The distinction observed by Atwill and Read, and continued by Andrew Law, Lowell Mason, and some other American compilers as well, is that anthems are settings of scriptural prose, set-pieces of metrical poetry. Further south and somewhat later the term was applied to short, non-strophic compositions. The 'set-pieces' in John McCurry's *Social Harp* (Philadelphia, 1859) do not match their New England counterparts in length, but they do maintain the specific text–music relationship which is implicit in the Anglo-American set-piece and missing from strophic hymnody.

RICHARD CRAWFORD

Setti (de Castro Lima), Kilza (*b* São Paulo, 26 Jan 1932). Brazilian ethnomusicologist, composer and pianist. She graduated as a pianist in 1953 from the Conservatório Dramático e Musical, São Paulo, where she also studied composition with Camargo Guarnieri. She undertook private studies in ethnomusicology and anthropology, and in 1970 a Gulbenkian Foundation grant enabled her to continue her ethnomusicological research in Portugal, with the cooperation of Michel Giacometti and Fernando Lopes Graça. She subsequently obtained her doctorate in social anthropology from São Paulo University after submitting a dissertation (published in 1985) on the music and culture of the Brazilian Caiçara fishermen; she has also conducted research into the music of the Mbyá-Guarani and Krahô Indians of Brazil. She taught folklore

and ethnomusicology at the Santa Marcellina music faculty, Perdizes, 1975–7, and postgraduate courses in musical anthropology at São Paulo University in 1985 and ethnomusicology at Bahia University, Salvador, in 1991. As a researcher, she has given conferences and published articles in Brazil and abroad. She is a member of the International Council for Traditional Music and of the Sociedade Brasileira de Musicologia. Setti's compositional output reflects a preference for choral music, songs and chamber works, some of which were published by Novas Metas and Ricordi Brasileira (both in São Paulo). She has developed a free and individual musical style, having presented works at the Brazilian Contemporary Music Biennial (Rio de Janerio). She has won several composition prizes, among them the Rádio MEC awards in 1961 and 1962; her *Canoa em dois tempos* for chorus was commended by the musical institute of the Fundação Nacional de Arte in 1982. A catalogue of her works was published in Brasília in 1976.

IRATI ANTONIO

Settimana Internazionale di Nuova Musica. Festival held in PALERMO between 1960 and 1963, and in 1965 and 1968.

Setting (i). *See* TEXT-SETTING.

Setting (ii). A type of arrangement involving only a melody, not the accompanying parts in the original, if any; in some repertories, such as folksong arrangements, the two terms are often used interchangeably. Vocal settings typically adopt the same text as the original, unless contrafactum is also involved. Changes to the melody are relatively few, although an introduction or interludes may be added.

Early polyphonic treatment of chant might be classed as setting but is generally considered organum or discant. The earliest large repertory of settings in the modern sense is found in 15th-century hymns, the *Magnificat* repertory and mass movements, by Du Fay and others, that PARAPHRASE a chant melody in the top voice and accompany it with simple harmonization in the other parts (*see* BORROWING, ex.5). CANTUS FIRMUS treatment can be considered a setting as long as the melody remains clear and retains its text if sung, as in the German Renaissance Tenorlied; the use of a cantus firmus in a motet or mass is clearly a different procedure, in which the borrowed tune serves as a foundation and is not the featured melody. Settings of chorales, psalm melodies and hymn tunes are frequent from the 16th century on, including harmonizations in four parts with the melody in the upper voice or tenor, cantus-firmus settings, and settings for organ or other instruments with imitative or figurative accompaniment or with an embellished presentation of the melody over relatively simple accompaniment (*see* CHORALE SETTINGS and CHORALE PRELUDE). The multiple settings of the Passion chorale 'O Haupt voll Blut und Wunden' in Bach's *St Matthew Passion* illustrate the variety of harmonic progressions that can accompany a single modal tune. By the late 18th century, settings of existing tunes tended to present the melody relatively unaltered over a simple or figured accompaniment, as in Haydn and Beethoven's folksong settings, or in harmonizations for choral performance. This has remained the pattern for vocal settings and for most instrumental settings. Folksongs, chorales and hymns, popular songs, national anthems, Christmas songs and black American spirituals are among the types of melody most frequently treated in settings.

See also TEXT-SETTING.

For bibliography *see* BORROWING.

J. PETER BURKHOLDER

Ševčík Quartet. Czech string ensemble formed in Prague in 1901 by former members of Otakar Ševčík's violin class – Bohuslav Lhotský, Karel Procházka and Karel Moravec – and the cellist Bedřich Váška, a pupil of Wihan and Becker. At first they worked in Poland, calling themselves the Czech Quartet of the Warsaw Philharmonic; but when they returned to Prague in 1904 to become full-time quartettists, Ševčík gave them permission to use his name. Later they were known as the Ševčík-Lhotský Quartet. They toured widely, first visiting London in 1907, and soon became as celebrated as their seniors in the Bohemian Quartet – with whom they sometimes played octets. In 1912 Váška emigrated to the USA, and the cello chair was filled successively by Ladislav Zelenka, Antonín Fingerland and František Pour. The sudden death of Lhotský in 1930 brought the ensemble's disbandment but Moravec continued to play and record as a soloist. He and the other two survivors also became influential teachers. The Ševčík-Lhotský Quartet made outstanding recordings which represented a distinct improvement on those of the Bohemian Quartet, although they complained that they often had to play faster in the studio than they would have done in the concert hall. Most of their records have been reissued on compact disc.

TULLY POTTER

Seventeenth. *See under* ORGAN STOP (*Tierce*).

Seventh (Fr. *septième*; Ger. *Septime*; It. *settima*). The INTERVAL between any two notes that are six diatonic scale degrees apart (e.g. *c–b*, *d–c′*, *f–e♭′*, *g–f♯′*); the complement of the 2nd, that is, the interval produced when the 2nd is inverted at the octave. An octave less a diatonic semitone is called a major 7th, and an octave less a whole tone is called a minor 7th. A minor 7th from which a chromatic semitone has been subtracted is called a 'diminished 7th' (e.g. *c♯–b♭*, *e♯–d′*); a major 7th that has been increased by a chromatic semitone is called an 'augmented 7th' (e.g. *c–b♯*, *d♭♭–c′*, *g♭–f♯′*). The so-called HARMONIC SEVENTH, the interval between the 4th and 7th harmonic partials, is slightly smaller than a minor 7th.

See also DIMINISHED SEVENTH CHORD and DOMINANT SEVENTH CHORD.

WILLIAM DRABKIN

Seventh chord. A four-note chord consisting of a bass note with a 3rd, 5th and 7th above it. In thoroughbass it is usually indicated by the figure 7. A 7th chord may be inverted, so any one of its notes may become the bass; the normal thoroughbass notations for these inversions are: 6-5 (3rd in the bass), 4-3 (5th in the bass), 4-2 or simply 2 (7th in the bass).

See also DIMINISHED SEVENTH CHORD, DOMINANT SEVENTH CHORD and INVERSION.

Sévérac, (Marie Joseph Alexandre) Déodat de, Baron de Sévérac, Baron de Beauville (*b* Saint-Félix-Caraman [now Saint-Félix-Lauragais], Haute-Garonne, 20 July 1872; *d* Céret, Pyrénées-Orientales, 24 March 1921). French composer. Born into a family able to trace its descent back to the 11th century, he learnt the rudiments of music from his father, Gilbert de Sévérac, a talented painter, before being entrusted to the organist of Saint-Félix, Louis Amiel. On graduating in 1890 from the Dominican-run college at Sorèze where he had studied the piano, the organ and the oboe, he enrolled, on his father's insistence, at Toulouse University to study law. Three years later, his father relented and he transferred to the Conservatory. In 1896 Sévérac left Toulouse for the Schola Cantorum in Paris. He remained there until 1907, studying the organ with Pirro and Guilmant, choral conducting with Bordes, and counterpoint and composition with Magnard and d'Indy. He formed friendships there with Albéniz who gave him advice on his piano-playing and with fellow composition students including the pianist Blanche Selva (who was to write the first book about him), Canteloube, Labey, Roussel and Sérieyx. Outside the Schola his circle included not just the composers Dukas, Fauré, Ravel, Schmitt and Delage, but also poets (Léon-Paul Fargue and Jean Moréas), painters and sculptors (Redon, Picasso and Gris) and critics (Calvocoressi and Lalo). He also frequented several salons, including that of the Princesse de Polignac.

Sévérac composed prolifically while a student: as well as beginning work on his opera *Le coeur du moulin* in 1903, he produced an organ suite, two substantial sets of piano pieces – *Le chant de la terre* (1899–1900) and *En Languedoc* (1903–4) – numerous *mélodies* and the choral-orchestral work *Nymphes au crépuscule* (1901–2), in addition to two collections, one of old French songs for Yvette Guilbert and two of 18th-century songs. His composition did not prevent him from contributing to newspapers and journals, both national and *toulousain.* His studies at the Schola culminated in 1907 with the defence of his thesis, *La centralisation et les petites chapelles musicales.* In it, he pleaded for the decentralization of French music, which, he argued, in order to rid itself of Germanic influence, should seek inspiration from the diverse resources of the regional folk traditions. For Sévérac this meant drawing on the culture of the Mediterranean region. He therefore abandoned the capital and returned to the village of his birth, where he was elected to the municipal council (1900–19) and founded a brass band called La Lyre du Vent d'Autan. Some of his best-known piano pieces date from these first years back at Saint-Félix: they include *Stances à Madame de Pompadour* (1907), *Baigneuses au soleil* (1908) and 'Les Fêtes', one of the five 'pièces pittoresques' of *Cerdaña* (1908–11). Early in 1910 Sévérac moved to Céret, the Roussillon village where he was to serve as organist of the church of St Pierre until his death. There he immersed himself in a three-act *tragédie lyrique*, *Héliogabale*, which received its first performance in 1910 before an audience of over 13,000 in the arena at Béziers. A concert version was given at the Salle Gaveau in Paris the following year. In this work, the first of a number written for open-air performance (including *Lo cant del Vallespir*, 1911, *Mugueto*, 1911 and *La fille de la terre*, 1913) Sévérac combined the standard symphony orchestra with instruments of the traditional Catalan *cobla* such as the *flabiol*, *tiple* and *tenora*. Also in 1911 he began the two collections of piano pieces entitled *En vacances*, and completed *Navarra*, a work left unfinished by his late friend Albéniz.

During World War I, Sévérac was posted successively to Carcassonne, Perpignan, St Pons and Prades: he composed nothing during these years, apart from a few brief occasional pieces, such as military marches and patriotic songs. After demobilization in January 1919, he finished his *Naïades et le faune indiscret* for piano (begun in 1908), composed two pieces for piano and violin, (*Minyoneta* and *Souvenirs de Céret*) and published his last major piano work, *Sous les lauriers roses* (1919). But other scores set aside before the war were never completed. Among the many which remained unfinished at his death were an oratorio *Méditerranée*, and an opera on Emile Pouvillon's novel *Les antibel*, a project on which he had been working since 1907 and one he valued particularly highly. In 1920, the year before his death, he was made Chevalier of the Légion d'Honneur.

Sévérac ranks among the most significant French musicians of the generation of Debussy, Dukas, Fauré and Ravel. His reputation undoubtedly suffered with his voluntary retreat to the Mediterranean. During his time in Paris his music had featured regularly on the programmes of the Société Nationale (and later also the Libre Esthétique in Brussels), while works such as *En Languedoc* and *Nymphes au crépuscule* had elicited praise from Debussy. His deliberate decision to leave Paris for good in 1907 led some to dismiss him as a provincial musician, hence a composer of the 'second rank'. Still his estrangement from Parisian musical life is probably not the only reason behind his comparative neglect: his piano music, for example, perhaps the most representative portion of his oeuvre, may not pose conventional virtuosic challenges, but is nonetheless exacting in its demands for subtlety, lightness of touch and meticulous pedalling. While his music, in its general modal flavour and cultivated assimilation of folk tradition, bears traces of the influence of the Schola Cantorum, and Bordes in particular, Sévérac remains a highly individual composer whose works, though humanized by colourful images of people and landscapes, are at the same time characterized by a certain nostalgia and melancholy. Even his few humorous works, such as the piano piece *Pippermint-Get* (1907) and the operetta *Le roi Pinard* (1919) seem to mask in self-effacement an underlying sense of tragedy.

WORKS

(selective list)

works published unless otherwise stated

STAGE

Le mirage (incid music, 1, L. Damart), Royan, Aug 1903, unpubd

Le coeur du moulin (pièce lyrique, 2, M. Magre), 1903–8, Paris, Opéra-Comique, 8 Dec 1909

Héliogabale (tragédie lyrique, 3, E. Sicard) [with prol Les deux triomphes, C. Guéret, and epilogue ballet-mime La résurrection d'Adonis, G. Boissy], Béziers, Arena, 21 Aug 1910
Mugueto (incid music, 3, M. Navarre), Rabastens, Tarn, 13 Aug 1911, unpubd
Hélène de Sparte (incid music, E. Verhaeren), Paris, Châtelet, 4 May 1912, unpubd
La fille de la terre (tragédie lyrique, 3, Sicard), Coursan, 22 Aug 1913
Le roi Pinard (opérette, Sévérac and A. Bausil, after L. Lointier: *La princesse d'Okifari*), 1919, unpubd

VOCAL

Choral: Ave verum corpus, SS/TT, org (1898); Chants de vacances (J. Combarieu), 3-part canon, 1898 [pubd in *ReM*, 1909]; Mignonne allons voir si la rose (P. Ronsard), male chorus 4vv, 1901; La cité (cant., V. Gastilleur), solo vv, male chorus, 1909; Lo cant del Vallespir (Catalan, J. Amade), solo vv, chorus, orch, 1911, unpubd; Sorèze et Lacordaire (cant., F. Tresserre), solo vv, choir, orch, 1911; O sacrum convivium, 4vv, org, 1919; Tantum ergo, 4vv (1920)
Solo vocal (1v, pf unless otherwise stated): Le chevrier (P. Rey), 1897–8; Les cors (Rey), 1897–8; Les hiboux (C. Baudelaire), 1898; L'infidèle (M. Maeterlinck), ?1898; L'éveil de Pâques (Verhaeren), 1899; La chanson de Blaisine (Magre), 1900; Le ciel est, par-dessus le toit (P. Verlaine), 1901; Un rêve (E.A. Poe, trans. S. Mallarmé), 1901; A l'aube dans la montagne (Séverac), 1903; Temps de neige (H. Gauthier-Villars), 1903; Les housards de la garde (Chanson de route), 1906; J'ons eun' joulie maison! (Chanson picarde), 1906; Philis, 1907 [after 18th-century rondeau]; Chanson de Jacques (Magre), 1908; Aubade (M. Navarre), ?1910; Chanson de la nuit durable (L. Espinasse-Mongenet), 1910; Chanson pour le petit cheval (P. Estieu), 1910; Chant de Noël (Goudouli), ?1910; Canzone dans le mode hypolydien, vocalise-étude, 1911; 4 cantiques, 1v, org/hmn, 1913; Ma poupée chérie (Séverac), 1914; Salve regina, Mez, vn, org (1917); La mort y la Donzella (Catalan) (1918); 3 aquarelles (1945)
Edns: Chansons du XVIIIe siècle, 2 collections (Paris, 1905, 1907); Les vieilles chansons de France (Paris, 1905)

INSTRUMENTAL

Orch: 2 Sym. Poems: L'automne, L'hiver (Séverac), v, orch, 1900; Nymphes au crépuscule, orch, offstage female chorus, 1901–2, unpubd; Didon et Enée, sym. suite, 1903; Triptyque, 1903–4 [after poem by L. Le Cardonnel]; Les grenouilles qui demandent un roi, sym. poem, 1909–21
Chbr: Sérénade au clair de lune, fl, ob, 2 cl, bn, 2 hn, perc, str qnt (1913); Minyoneta (Souvenir de Figueras), vn, pf, 1919; Lied romantique, vn/vc (1929); Souvenirs de Céret, vn, pf (1931)
Pf: Sonata, b♭, 1899; Vent d'Autan, 1899; Le chant de la terre, poème géorgique, 1899–1900; En Languedoc, 5 pieces, 1903–4; Le soldat de plomb: histoire vraie en 3 récits, pf duet, 1904; Pippermint-Get, waltz, 1907; Stances à Mme de Pompadour, 1907; Baigneuses au soleil (Souvenir de Banyuls-sur-mer), 1908; Cerdaña, 5 études pittoresques, 1908–11; Les naïades et le faune indiscret, 1908–19; En vacances I (Au château et dans le parc), 8 pièces romantiques, 1911; En vacances II, 1911 [only 3 pieces finished]; Sous les lauriers roses (Soir de carnaval sur la côte catalane), 1919
Org: Suite, e, org, 1897–9; Prélude de quatuor, org, *c*1898; Versets pour les vêpres d'un confesseur non pontife, org, 1912; Petite suite scholastique, org, 1912–13

Principal publisher: Rouart-Lerolle/Salabert

PIERRE GUILLOT

Severi, Francesco (*b* Perugia, late 16th century; *d* Rome, 25 Dec 1630). Italian composer and singer. He joined the papal choir as a soprano castrato on 31 December 1613 and remained there for the rest of his life. In the preface to his *Salmi passaggiati* he said that his teacher was Ottavio Catalani, and it is clear from the dedication that he was also in the service of Cardinal Scipione Borghese.

Salmi passaggiati, Severi's first and most important publication, is one of the most valuable documents for the performance of early 17th-century vocal music, and shows that he was a leading exponent of the florid style of ornamentation favoured in Rome at the time. It contains verset settings, mostly for solo voice and organ, of eight vesper psalms, the *Magnificat* and the *Miserere*. The voice part consists of elaborate divisions on *falsobordone*, which in the *Miserere* was composed by Fabrizio Dentice and in the other items is based on the psalm tones. Detailed instructions on performance are found in Severi's preface, which says that such embellishments were

normally improvised and that his psalms are typical of the Roman style, which was cultivated especially by the castratos of the papal choir and is echoed in the toccatas of Frescobaldi. Severi's *Arie* (now lost) was one of the largest collections of secular songs of the period. It included solo madrigals, sonnets, strophic arias and strophic variations, canzonettas, six duets and a three-voice dialogue. The pieces printed by Chilesotti are not particularly distinguished.

WORKS

Salmi passaggiati . . . sopra i falsi bordoni di tutti i tuoni ecclesiastici . . . con alcuni versi di Miserere sopra il falso bordone del Dentice (Rome, 1615), ed. in RRMBE, xxxviii (1981); Sicut erat from Nisi Dominus ed. in Mw, xxxi, 57

Ecce Maria, motet, 2vv, bc, 1621[3]

O di raggi, aria, 1v, bc, 1622[11]

Arie, 1–3vv, chit/hpd, con alcune arie con l'alfabeto per la chitarra alla Spagnola, bk 1, op.2 (Rome, 1626), lost; 10 canzonettas ed. in Chilesotti, 851–9

COLIN TIMMS

Séverin [Severijn], **André** [Andries, Andry] (*b* Maastricht, *c*1605; *d* Liège, 2 May 1673). Dutch organ builder. He became a citizen of Liège on 16 January 1629, as a member of the merchants' guild; his tomb in St Jacques, Liège, bears an epitaph. Séverin was probably a pupil of the younger Florent (Floris) Hocquet, who worked frequently at Maastricht and Liège during the first decades of the 17th century. On 18 November 1626 the Liège inventor Jean Gallé pledged himself to instruct Séverin in 'la façon de faire orgues positives, régales, espinettes et clavis, lesquelles par son invention se pourront haulser et abaisser, s'accordantes à touts tons avec une harmonie meilleure qu'à l'ordinaire, pouvant commencer Ut par tout l'octave'. This contract obviously does not refer to the building of organs in general, but to the use of a transposing keyboard. It is not known if Séverin applied this invention.

Séverin was by far the most important 17th-century organ builder in the Meuse valley from Huy to Venlo. His work was concentrated in Liège, with its many churches. Séverin's activities in Tongres and Maastricht were also important. His main work was at St Denis, Liège (1638; repairs); Onze Lieve Vrouwebasiliek, Tongeren (1639–44; repairs); Notre Dame, Huy (1640–53; repairs or a new organ); St Pierre, Liège (1648; repairs); Onze Lieve Vrouwekerk, Maastricht (1652; still extant in altered condition); St Jansspitaal, Tongeren (1653; new organ); St Martinuskerk, Venlo (1660; new organ).

MAARTEN ALBERT VENTE

Severino, Giulio (*b* Naples; *d* before 1602). Italian lutenist and composer. He was a sufficiently well-known player to be mentioned, together with his father Vincencello and his brother Pompeo, by Cerreto in 1601 as being among the 'outstanding lute players of the city of Naples now no longer alive'. His works are included in Pietro Vinci's *Madrigali libro primo* (Venice, 1561; ed. MRS, v, 1985) and also in two collections (1568[12] and 1599[18]). One *canzone francese* and an intabulated madrigal are in a 16th-century manuscript lute tablature (in *D-Bsb*).

Cerreto also mentioned that Gioan Antonio Severino was a living lute composer; he was certainly a relative. All the musicians in this family were known by the name 'della Viola' and by the name of their place of origin, 'napolitano'.

PIER PAOLO SCATTOLIN

Severus of Antioch (*b* Sozopolis, Pisidia, *c*465; *d* Xois, Egypt, 8 Feb 538). Greek hymnographer and theologian. He studied law and philosophy in Alexandria and Berytus and in 488 was baptized in Libya. He became a monk and is thought to have founded a monophysite monastery near Maiuma in Palestine. Because of the persecution of Palestinian monophysite monks, Severus went to Constantinople in 508, where he opposed the teachings of the Council of Chalcedon and succeeded in gaining the support of Emperor Anastasius I for the monophysite cause. In 512 he became Patriarch of Antioch, but with the suppression of monophytism following Anastasius's death in 518 he was removed from office and went into exile in Egypt. In 535 Severus returned to Constantinople, but he was excommunicated in 536 and again fled to Egypt where he later died.

One of Severus's intentions after he had taken up office was to create a magnificent rite (according to his biographer, Joannes bar-Aphthonia). Realizing that the people of Antioch loved both sacred and secular music, he composed many hymns and employed ecclesiastical singers to attract more people to church services. He was a prolific writer, whose surviving works have mostly come down in Syriac translation, among them the hymnal *GB-Lbl* Add.17134 entitled *Ma'niāthā d'qadisha ogṭānā Seoira paṭriarka d-Anṭiokia* (*Ma'niāthā* of holy and blessed Severus, patriarch of Antioch'). This manuscript represents the oldest version of the hymnal and was probably copied at the end of the 7th century; it is based on James of Edessa's revised Greek edition of 675, which probably came very close to Severus's original text, even

though James was revising Paul of Edessa's early 7th-century Syriac translations with their various reworkings and interpolations. (The original Greek title is not known: *ma'nithā*, singular of *ma'niāthā*, is usually translated *antiphōna* but may originally have been *hypēchēsis*, i.e. 'echo' or 'response'.)

GB-Lbl Add.17134 contains 295 hymns, most of them by Severus himself, but texts by Joannes bar-Aphthonia and Joannes Psaltes are also included. A number of the hymns provide information about the modes of the melodies to which they would have been sung. Many manuscripts of later date that are based on James's edition diverge widely from each other in the arrangement of the hymns; some are ordered according to the *Oktōēchos*, and consequently the collection came to be known, incorrectly, as the 'Oktōēchos' (*I-Rvat* syr.94, an early 11th-century copy of *GB-Lbl* Add.17134, was described by Assemanus as 'Octoechus sive Cantus tonis octo expressi', although only the second part is so ordered). Severus's hymnal, however, followed the liturgical calendar of Antioch, in which the Church year begins at Christmas; the first hymns in the collection, therefore, are those for feasts from Christmas to Pentecost, followed by the feasts of the Holy Innocents, the Theotokos (Mother of God), John the Baptist, Stephen the Protomartyr, the Apostles etc. The collection also contains communion hymns and – perhaps unusually – songs for the Brumalia (the Roman festival of the winter solstice) and for the theatre.

GERDA WOLFRAM

Sevillana. A flamenco-style song and dance of Andalusian origin; *see* FLAMENCO, Table 1, and SPAIN, §II, 4.

Seville (Sp. Sevilla). City in Spain. Called Hispalis in antiquity, by Strabo's epoch (63 BCE – 23 CE) Seville was regarded as the 'most famous' city of southern Spain. Both the emperors Trajan and Hadrian were born at Italica, 8 km north-west; the latter was responsible for building an amphitheatre larger than any outside Italy. ISIDORE OF SEVILLE (*c*559–636), brother of Leander and in about 599 his successor as Archbishop of Seville, ranks as the most learned polymath of Gothic Spain. In his *Etymologies* he gave more definitions of music than any previous Latin author and also a fuller list of instruments. Ornithoparchus, whose *Musicae activae micrologus* was translated by John Dowland (London, 1609), harked back to Isidore for his musical dicta.

In the Muslim epoch (712–1248) Seville became the centre of instrument making for north Africa as well as southern Spain. The Sevillian Al Shaqandī (*d* 1231) specified 20 different types of instrument made at Seville. After the reconquest, the city became the first to draw up elaborate *ordenanzas* regulating instrument manufacture (one set was published in 1502 and others appeared frequently thereafter).

With the retaking of Seville from the Moors and the intermittent residence there of both Fernando III and his son Alfonso X (1221–84, who died at Seville), *juglares* and *trovadores* poured into the city. An immense Gothic cathedral was built in the 15th century on the site of the city's chief mosque. Its musical establishment included many of the finest musicians in Spain, and most cathedrals of Spanish America looked to it as a model. Among its *maestros de capilla* were Pedro de Escobar, Francisco Guerrero and Alonso Lobo. Cristóbal de Morales was a native of Seville. Others active there before 1600 included Francisco de la Torre and Francisco de Peñalosa. Francisco Correa de Arauxo was organist at the collegiate church of S Salvador from 1599 to 1636.

Three of the chief Renaissance music imprints were issued by Martín de Montesdoca of Seville in the years 1554, 1555 and 1556: Fuenllana's *Orphénica lyra*, Guerrero's *Sacrae cantiones* (partbooks at *US-NYhsa*) and Vásquez's *Agenda defunctorum* (*E-Bc*). The latter's *Recopilación de sonetos y villancicos* (MME, iv, 1946) was published at Seville by Juan Gutiérrez in 1560. None of these bibliographical treasures survives in any Sevillian archive or library; the riches of the Colombina Library, once an almost complete collection of every music publication in Europe, were systematically rifled during the second half of the 19th century. The music surviving at the cathedral is less than a tenth of the wealth owned by the cathedral before the concordat of 1852. As a result of these losses, even the works of such significant *maestros de capilla* as Ripa and Eslava (1832–47) are better represented in distant South American archives (Lima, Archivo Arzobispal; Santiago Cathedral) than at Seville.

During the 19th century, the cathedral remained the site of serious musical endeavour, even when subservient to Italian romantic innovations. Visits to Seville by Liszt and Gottschalk, in particular, inspired the founding of local societies such as the Liceo Artístico y Literario (1838), the Sociedad Filarmónica (1845) and the Sociedad de Conciertos (1871) to promote concerts by visiting musical celebrities. The Sociedad de Conciertos were patrons of an 80-member orchestra which, under the direction of Manuel Cresj, was the first ensemble to bring Beethoven symphonies to Seville.

Nonetheless, Italian opera dominated musical entertainment after 1845. The Anfiteatro was opened in 1846 with Verdi's *Ernani* and the luxurious Teatro de S Fernando (cap. 3000, designed by French architects) was inaugurated on 21 December 1847 with *I lombardi*. Singers such as Tamberlik, Tetrazzini and Tito Schipa were engaged until World War I. The Conservatorio de Música, founded in 1882 in Calle Imperial, was modelled on the Milan Conservatory as late as 1922, with Luis Mariani as director.

In 1922 Falla created the chamber orchestra, Bética, under the patronage of the Sociedad Sevillana de Conciertos. He was helped by the cathedral maestro de capilla Eduardo Torres, a prolific composer himself and a vigorous defender of new music in *El noticiero Sevillano*. The pre-eminent composer Joaquín Turina (1882–1949)

was another to break from the operatic niche. He began his orchestral oeuvre with *La procesión del Rocio* (1913), a symphonic poem set in Seville, followed by the equally successful *Sinfonía sevillana* (1920), the only symphony by a native Spaniard of his era. Although he always lived outside Seville, nearly all Turina's successful works portray the scenes of this most Spanish of cities, for example *Sevilla* (1909), *Rincones sevillanos* (1911) and the seven-movement *Canto a Sevilla* (completed 1925).

During the Franco epoch Seville further consolidated its position as a leading tourist centre; flamenco alternated with international concert attractions to lure festival crowds to the city from spring to autumn. A tourist-aimed opera season, featuring Plácido Domingo, opened in 1992 with *Carmen* at the Teatro de la Maestranza (opened the previous year). The programme, which scheduled *Otello* and *Un ballo in maschera*, also included one Spanish work, *El gato montés* by Penella. The theatre was host to more opera seasons in the 1990s, including one in 1996 with Vjekoslav Sutej conducting the Real Orquesta Sinfónica de Seville, and one in 1998–9 in which Domingo returned to the city in *Le Cid*. Although opera no longer occupies its former position of importance at Seville, the name of the city lives on in such works as *Le nozze di Figaro*, *Don Giovanni*, *Fidelio*, *Il barbiere di Siviglia* and *Carmen*.

ROBERT STEVENSON

Sex, sexuality. The present article considers the ways in which sex and sexuality, as fundamental categories of human experience, filter into the composition of music and its understanding. 'Sex' sustains several meanings that can bear upon music, as well as referring to the physiological and biological characteristics that distinguish categories of beings and genital union or other erogenous activity. In casual parlance, 'sex' is often used to denote the larger category within which fit culturally perceived differences between men and women; in modern scholarly discourse the discussion of these issues is normally subsumed within consideration of gender (*see* GENDER; *see also* FEMINISM and GAY AND LESBIAN MUSIC).

Taking cognizance of the various meanings of the term, 'sexuality' (best understood as a phenomenon of relatively recent origin rather than as a fixed, transhistorical essence) refers to a cultural production that configures the relationship between sexual practice and identity; it thus not only contributes to a personal, interior sense of self, it also serves as a nexus for relations of power. From ancient times to the present, texts that treat sexual difference and sexual union have been set to music; more recently, instrumental and balletic works have also sought to represent aspects of sexual behaviour. Inquiries into notions of sex and sexuality have profitably informed a wide range of musical scholarship, including biographical studies of composers, performers and other actors in the musical realm, investigations into the institutions that have fostered the production of music and explorations of the signification and structure of musical works themselves.

Human beings, of course, have always taken part in sexual activity, but the nature of sexual activity has not always remained the same. Steeped in the ubiquitous sexual content of popular music, and conditioned by apparently transparent representations of sexual desire in the canonic classical repertory (the love duet from *Tristan und Isolde*, the opening bars of *Der Rosenkavalier*), modern listeners can readily misconstrue convergences of sex and music from earlier eras. While the definition of 'sex' as the sum of physiological and biological characteristics that distinguish categories of being might appear to imply a relentless dimorphism, at different times and in different cultures it has been more flexibly configured. Both 'one-sex' and 'third-sex' formations have affected musical composition and comprehension. The 'one-sex model' of sexual difference that reigned within the prevalent Galenic medical tradition lies behind the poetic conceit of orgasmic 'death' commonly encountered in the Renaissance madrigal (Arcadelt's *Il bianco e dolce cigno* and Marenzio's *Tirsi morir volea* both famously deploy it). This tradition viewed women as imperfect versions of men and construed their genital organs accordingly. Women's genital functions also mimicked men's: if men released 'spirit' during sex in order to conceive, so too did women; if orgasm was necessary for men, then so too was it for women. (Death also brought about a release of 'spirit', which accounts for its popularity as a metaphorical substitute for terms for orgasm.) That metaphors of 'dying' drew upon a widely shared cultural understanding of the necessity for mutual release in sex suggests then that attempts to interpret the nature of the musical settings of these metaphors should focus on relationships of contiguity rather than of difference. Various 'third-sex' categories have contributed to musical understanding, with castratos perhaps the most famous and visible of them. But other 'third-sex' classifications have also entered more indirectly into the reception of music: 19th-century writers who described Chopin's person, playing and music by evoking such otherworldly beings as fairies, sylphs and angels deployed metaphors that implicitly (and sometimes explicitly) framed Chopin within the 'third-sex' categories of androgyne, hermaphrodite or sodomite.

'Sexuality' also has a history; the claim that the concept emerged relatively recently hinges on a distinction between

behaviour and identity. There is a difference between committing a sexual act of some type and being a homosexual, a heterosexual or a transsexual. According to this view, while Gombert and Britten may, four centuries apart, have shared an erotic interest in boys, the meanings of their sexual activities will have differed sharply, both for their senses of self and for the music they composed. To invoke sexuality is to call upon a nexus of institutions, desires and acts that together endow an identity. Before this governing concept took shape, these institutions, desires and acts either existed independently of one another or were linked in different sorts of ways. Two chronologically separate instances of musical production being measured against sexual reproduction illustrate the importance of this distinction. When C.F. Zelter (in a letter to Goethe of 14 September 1812) described Beethoven's works as resembling 'children whose father is a woman or whose mother is a man', and contraposed Beethoven's devotees to 'partisans of Greek love', he did not mean his comparison to reflect in any way on Beethoven's personal sense of self; his concatenation of same-sex desire and transsexual parentage instead attempts to account for the flaws he perceived in Beethoven's compositional offspring by calling on long-standing medical theories of monstrous birth (theories that explained, among other things, the existence of physical and psychical hermaphrodites, as 'partisans of Greek love' were often described at the time). But when Richard Strauss, in the *Symphonia domestica* (1902), followed the section of the work that depicts the husband (a representation of Strauss himself) in the act of composing music with one that represents the husband and wife having sexual intercourse, the juxtaposition is meant to reflect on a basic aspect of the protagonist's being. The explanation for this gesture goes beyond mere exhibitionism: Strauss, alert to the centrality of sexuality in the modern constitution of identity, in effect asserts an essential and self-defining continuity between acts of creation and acts of procreation.

The development of the concept of sexuality marked a momentous and complicated shift in the ways of construing individuals, one intimately connected with the emergence of modernity, its attendant notions of the individual and its new versions of subjectivity. When this shift took place is a matter of contention; scholarly opinion focusses primarily on dates between the early 18th century and the mid-19th. But by the second half of the 19th century the modern phenomenon of sexuality was widely established, its presence most readily perceptible in the nascent discipline of sexology, the quasi-Darwinian science that comprehensively mapped sexual persons and forms of desires. While the vocabulary of sexology, including such coinages as 'homosexual' and 'heterosexual', continues to inform thinking about sexuality today, the field of knowledge that has contributed most to modern conceptions of sexuality is psychoanalysis. The theories of Sigmund Freud, Jacques Lacan and their followers decisively shifted interpretations of sexuality away from biological, reproductive imperatives onto notions of unconscious drives formed in infancy. These theories have proved immensely influential not only among psychoanalysts but also among cultural critics interested in the relationships between eroticism and human pursuits, including ideology, politics, philosophy, religion, art, literature and music. As central as they are, however, psychoanalytic models of sexuality have been challenged on several fronts, most significantly in the work of Michel Foucault. Foucault set his central task (for his planned history of sexuality) as the exploration of the historical relations of power and discourse on sex. He viewed sexuality not as a drive but rather as a complicated point of transfer for structures of power between human beings (power here understood as a productive relation, not as a force exerted in an authoritarian manner); his emphasis on sexual discourse as productive of meaning encouraged much of the ensuing research in sexuality, particularly in such areas as queer theory and gender studies.

It is no mere chance that the era of 'sexuality', with its attendant emphasis on the tracing of concealed inner drives, coincides so closely with the rise of modern musical analysis, with its concern for explicating background structures and processes of aesthetic gratification in compositions. The evident affinities between the two domains have stimulated scholars to use the tools of modern musical analysis (e.g. the parsing of form and the close reading of harmonic processes) both to derive sexual meanings from compositions and to illustrate how music can foster the construction of sexualities within society. An analysis of, say, Debussy's *Prélude à l'après-midi d'un faune* would not only hope to reveal how such constructive elements as its chromatic harmony, formal patterning and timbral control produce the haze of diffuse eroticism that surround the work; it would also try to suggest how Debussy's music, experienced intimately by individual listeners, contributes to the very notion of eroticism in modern society. Thus in the best scholarly work of this type, music and its attendant realms emerge not only as mirrors of the sexual currents and ideologies of an age, but also as producers of these very modes of discourse.

JEFFREY KALLBERG

Sex Pistols, the. English punk rock group. Its members were Steve Jones (*b* London, 3 May 1955; guitar), Johnny Rotten (John Lydon; *b* London, 31 Jan 1956; vocals), Paul Cook (*b* London, 27 July 1956; drums) and Glen Matlock (*b* London, 27 Aug 1956; bass), who was later replaced by Sid Vicious (John Simon Ritchie; *b* London, 10 May 1957; *d* New York, 2 Feb 1979; bass). Initially named the Swankers, the group was assembled in 1975 by entrepreneur Malcolm McLaren (formerly the manager of the American punk group New York Dolls), and during a three-year career they combined corrosive music and lyrics with a determinedly anti-social lifestyle. A series of spectacular performances in small London clubs and halls and fervent publicity from a small clique of journalists sparked record company interest. In 1976 EMI Records signed the group and issued *Anarchy in the UK* as a single. The furore following a television appearance caused EMI to cancel the contract and after another brief signing to A&M Records, the Sex Pistols were signed (1977) by Virgin, which issued *God Save the Queen* in the month of the silver jubilee of Queen Elizabeth II. Despite being banned by all British radio stations and the refusal of chain stores to stock it, the record was a substantial hit. Like its predecessor, *God Save the Queen* combined a cacophonous wall of sound constructed by its producer Chris Thomas from Jones's guitar chords with lyrics expressing rudimentary but savage social criticism, delivered with malevolent glee by Rotten. By this time Matlock had been replaced by Lydon's friend Sid Vicious and the group was recognised as the spearhead of a punk rock movement whose other leaders included the Clash, the Damned and the Stranglers.

Pretty Vacant and *Holidays in the Sun* were further hits before the release of the album *Never Mind the Bollocks ... Here's the Sex Pistols* (1977), which became the subject of an unsuccessful court action brought under the 1899 Indecent Advertisements Act. In 1978 the group undertook a brief tour of the USA where audiences were less impressed with their outrageous stage act and soon afterwards Lydon left the group. The Sex Pistols folded after the issue of a single which included Vicious intoning *My Way* and *No one is innocent*, featuring the English fugitive Ronald Biggs. McLaren later issued various albums based on unissued recordings and material used in the film *The Great Rock 'n' Roll Swindle* (1979) which was loosely based on the group's career. Lydon subsequently formed Public Image Limited which explored avant-garde rock with some success during the early 1980s. In 1996 he, Jones and Cook reunited for an international tour. Vicious died of a drug overdose after being indicted for the murder of his girlfriend.

DAVE LAING

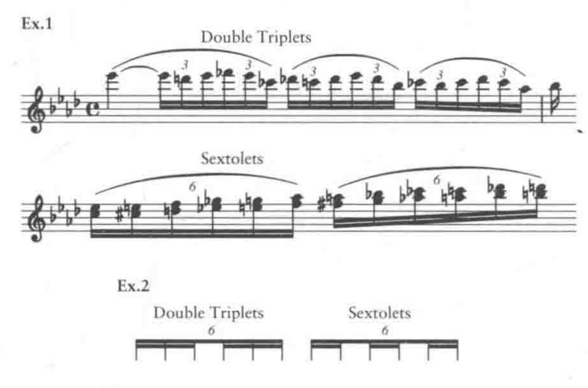
Sext (Lat. *sexta*, *hora sexta*, *ad sextam*). One of the LITTLE HOURS of the DIVINE OFFICE, recited at midday, or at the 'sixth hour'. *See also* LITURGY OF THE HOURS.

Sextet (Fr. *sextette*, *sextuor*; Ger. *Sextett*; It. *sestetto*). By analogy with the septet, octet and nonet, the term 'sextet', first used at the beginning of the 19th century, denotes a composition in the nature of chamber music for six instruments. It was obviously used to define the sextet more precisely in relation to functional music such as the divertimento (usually with two horns and string quartet) and *Harmoniemusik* for wind ensemble (2 oboes, 2 horns, 2 bassoons). Beethoven published his own compositions in these genres as sextets (op.81*b*, 1794, and op.71, 1796, both published 1810). At a later period, works for six wind instruments were written by Carl Reinecke (op.271, *c*1905) and Janáček (*Mládí*, 1924).

The string sextet (2 violins, 2 violas, 2 cellos) developed into a genre in the stricter sense in the middle of the 19th century. Despite some earlier compositions – by Boccherini (op.23, 1776) Luigi Arditi (*Sestetto di bravura*, 1843), Spohr (op.140, 1848) and Borodin (1860–61, unfinished) – it was the two ingenious works by Johannes Brahms (op.18, 1860, and op.36, 1864–5) that really inspired many composers to write for the same ensemble. These composers included Niels Gade (op.44, 1863), Ernst Rudorff (op.5, 1865), Louis von Stainlein (op.20, 1867), Joachim Raff (op.178, 1872), Rimsky-Korsakov (1876), Anton Rubinstein (op.97, 1876), Dvořák (op.48, 1878), Nicolay von Wilm (op.27, 1882), Tchaikovsky (*Souvenir de Florence* op.70, 1890), Louis Glass (op.15, 1892), Schoenberg (*Verklärte Nacht* op.4, 1899), Hakon Børresen (op.5, 1901), Glier (op.1, 1900, op.7, 1902, and op.11, 1906), Bridge (1906–12), Reger (op.118, 1910), Korngold (op.10, 1914–16), Egon Kornauth (op.25, 1918–19), Schulhoff (1920–24), d'Indy (op.92, 1927), Martinů (1932), Kagel (1953, rev. 1957) and Walter Piston (1964).

The piano sextets with strings popular in the first half of the 19th century (for an ensemble consisting of piano, string quartet and double bass) are notable for a more brilliant, concertante style in which the keyboard instrument is often at the centre of the music. Outstanding works for this combination were written by Ferdinand Ries (op.100, 1820), Mendelssohn (op.110, 1824, published 1868), Henri Bertini (opp.79, 85, 90, 114, 124 and 172), Glinka (1832), William Sterndale Bennett (op.8, 1835), Paul Juon (op.22, 1902) and Albert Roussel (Divertissement op.6, 1906). There are piano sextets with wind by Martinů (1929), Henk Badings (1931) and Poulenc (1932–9), and for mixed ensembles by Ignaz Moscheles (op.35, 1815), Georges Onslow (op.30, 1825) and Ernő Dohnányi (op.37, 1935). In addition, a small separate repertory for an ensemble consisting of clarinet, string quartet and piano developed in the 20th century, comprising works by Prokofiev (Overture on Hebrew Themes op.34, 1919), Felix Petyrek (1922), Roy Harris (Concerto, 1926), Copland (1937), Karl Schiske (1937) and Pfitzner (op.55, 1945).

It seems doubtful to extend the term 'sextet' to works that require six musicians, their texture is not obviously that of chamber music, and sometimes the titles of the works themselves point in other directions, as in the case of Chausson (*Concert* op.21, 1892), Milhaud (Chamber Symphony no.6 op.79, 1923, for four voices, oboe and cello), Martinů (*La revue de cuisine*, 1927), Falla



(Harpsichord Concerto, 1923–6), Stockhausen (*Kreuzspiel*, 1951) and Morton Feldman (*Durations V*, 1961).

In opera, ensembles with six solo singers have also sometimes been described as sextets, and occur chiefly in finales.

For bibliography *see* CHAMBER MUSIC.

MICHAEL KUBE

Sextolet, sextuplet (Fr. *sextolet*; Ger. *Sextole*; It. *sestina*; Sp. *seisillo*). A group of six notes of equal length, taking the place of several (normally four) notes of the same kind, from which they are usually distinguished by a figure 6. The true sextolet is formed by dividing each note of a triplet into two, thus giving six notes, of which the first alone is accented. More frequently used, however, is the double triplet, properly marked as such, but usually marked with a 6 and called a sextolet, although it carries a slight accent on the fourth note as well as the first. Both types are found, for instance, in the Largo of Beethoven's Piano Concerto no.1 (ex.1); to ensure correct accentuation such passages are better grouped as in ex.2.

FRANKLIN TAYLOR

Sextuor (Fr.). *See* SEXTET.

Sextus (Lat.: 'sixth'). A sixth part in vocal or instrumental polyphony, particularly in the 16th and 17th centuries, when such music was published in partbooks. *See* PARTBOOKS and QUINTUS.

Sextus Empiricus (*fl* Rome and Alexandria, *c*200 CE). Greek physician and head of the sceptical school of philosophy during its final phase. His writings are divided into two major groups: the *Outlines of Pyrrhonism*, comprising three books summarizing sceptical doctrines and criticizing other philosophical systems, and *Against the Professors*, consisting of 11 books, the last five of which are sometimes known collectively as *Against the Dogmatists*. The first six books of *Against the Professors* present refutation of *ta mathēmata*, including grammar, rhetoric, geometry, arithmetic, astrology and music. Initially (*Against the Professors*, i.8), Sextus intimates that he will criticize music, to which the sixth book, *Against the Musicians*, is devoted, by questioning the existence of its fundamental constituents, sound and time (*phōnē*, *chronos*). He does so in the latter half of his discussion (vi.29–51, ed. Greaves), employing the paradoxical methods of disproof developed by his predecessors to further their questing examination (*skēpsis*) of the real and knowable. First, the technical theory of musical sound – especially the theory of notes, intervals and genera – is demolished (vi.29–42), and then the theory of rhythm, which depends on time, is shown to be logically absurd (vi.43–50).

The preceding chapters (vi.6–28), more often cited, are devoted to setting up and knocking down traditional arguments for the utility of music; Sextus employs the sceptic modes of Aenesidemus, introduced and discussed in the first book of the *Outlines of Pyrrhonism*. Music, he maintains, does not possess an intrinsic nature but depends upon our interpretation (vi.15); at best, it affects our behaviour merely by providing a temporary distraction (vi.16); whereas a poetic text may benefit us, its melody can only provide pleasure (vi.22). Sextus Empiricus concludes the first part of his refutation by showing that music is neither necessary nor useful (vi.23–7). The relative ethical valuation of the text and the musical setting reproduces a view propounded much earlier by the Epicureans, and the idea of music as a distraction may owe something to both Epicurus and Aristotle. Indeed, the entire treatise is essentially a compilation of existing knowledge or belief; although Sextus proceeded intelligently, he resembles Quintilian in showing no deep knowledge of music. His attack on music theory is distinguished by rigorous sceptical modes of argument.

More unusual is the comment (vi.2) that when a painting has been correctly executed, either the work or the painter may sometimes be described as 'musical'. Precisely the reverse use of synaesthetic terms had drawn Plato's censure (*Laws*, ii, 655a5–10), but Sextus's analogy is similar to instances in ARISTIDES QUINTILIANUS (*On Music*, ii.4, iii.8) and PLUTARCH (*Table-Talk*, 657d); cf Aristotle, *Politics* (viii, 1340a14–18) and Pseudo-Plutarch, *On Music* (1146a-b). Also noteworthy is Sextus's view that Achilles' lyre playing and singing were intended to calm passion (vi.9, 19), and his designation of *ēthos* as a name for actual melodic types (vi.35).

Sextus Empiricus's treatise exhibits significant parallels with the surviving fragments of PHILODEMUS, including a number of specific examples, and with the *Institutio oratoria* of QUINTILIAN. Sextus Empiricus's purpose in his treatise is, however, distinct: as a sceptic, he wished to demonstrate the fallacy of dogma and therefore the need for suspension of judgment, leading eventually to *ataraxia* (quietude or calmness). In this context, *Against the Musicians* is unique among all ancient musical writings.

WARREN ANDERSON/THOMAS J. MATHIESEN

Sextzug (Ger.). *See* ZUG (i).

Seydelmann [Seidelmann], **Franz** (*b* Dresden, bap. 8 Oct 1748; *d* Dresden, 23 Oct 1806). German Kapellmeister

and composer. As the son of Franciscus Seydelmann, a tenor in the electoral Kapelle in Dresden, he received an early and thorough musical education from the organist J.C. Weber and the composers J.G. Schürer and (from 1764) J.G. Naumann. He and his fellow pupil Joseph Schuster accompanied Naumann on a study tour of Italy from 1765 to 1768. He completed his education in Naples, Palermo, Bologna and Padua; he also sang with some success on the Italian stage. In 1772 he was appointed a church composer to the court in Dresden and in 1787 Kapellmeister, in both cases simultaneously with Schuster. Among his duties were the care of sacred music in the Catholic court church and the 'Accompagnement der opera buffa'; occasionally the direction of the operas lay entirely in his hands because both Naumann and Schuster frequently took extended leave of absence. In 1773 Seydelmann's earliest known stage work, *La serva scaltra*, was performed at the Kleines Kurfürstliches Theater in Dresden, followed by several other operas in succeeding years. His 'Chinese' spectacle *Il mostro, ossia Da gratitudine amore* (1786) was particularly successful, as was his best Italian opera, *Il turco in Italia* (1788), which Constanze Mozart described after a performance in Vienna in 1789. Although his operatic output virtually ceased in 1790 with *Amore per oro*, he wrote sacred music until the end of his life. Besides three oratorios he wrote many pieces to be used in Catholic services. He also composed secular solo cantatas, lieder, keyboard sonatas (including six for keyboard duet, 1781, ranked by Newman among the best of 18th-century examples of this genre) and chamber works.

Seydelmann wrote fewer operas than his Dresden colleagues, but their quality, at least in the most successful, met the current exacting standards of the city. His works make sensitive use of thematic recall in the manner of Naumann, contain many grandiloquent through-composed sections and rich orchestration, and occasionally reach a tone of deep conviction; on the other hand, the arias and melodic structure show many conservative, even conventional, traits. Seydelmann also contributed to the cultivation of German Singspiel and a national opera. In the fairy tale Singspiel *Arsene* (1779) traces of Georg Benda's monodrama can be seen, while the German comic opera *Der lahme Husar* (1780) has the naturalness of Singspiel. Gluck's influence is apparent in the dramatic French solo cantata *Circé* (composed in 1787 as a commission from the Russian ambassador and protector of Seydelmann, Prince Belosel'sky) as well as in the oratorio *La morte d'Abele* (1801). His later works show his study of C.P.E. Bach and Haydn and display artful thematic invention in extended development sections.

Seydelmann was not well known outside Saxony, although his operas were occasionally performed in centres such as Vienna. His work consists largely of liturgical music, which is of a consistently high quality. The view of him as an alcoholic derives from a pun made by Mozart in a letter to Constanze (16 May 1789) and cannot be substantiated. Most of his works survive in autograph manuscript in Dresden's Landesbibliothek.

DIETER HÄRTWIG/LAURIE H. ONGLEY

Seyfert, Johann Caspar (*b* ?Augsburg, ?1697; *d* Augsburg, 26 May 1767). German composer. A pupil of the Augsburg Kantor Philipp David Kräuter, he completed his musical training at various courts, notably with J.G. Pisendel and S.L. Weiss in Dresden. A violinist and lutenist, he became choral director at the church of St Anna in Augsburg in 1723; in 1741 he succeeded Kräuter

as Kantor of that church and as director of Protestant music. Apart from his activities as a musician, Seyfert was also an archivist and private secretary. Opinions about him are varied. Whereas a posthumous verdict is that he not only trained good musicians but also composed and performed many fine works, and one of his contemporaries praised his skill on the violin and lute and emphasized that his 'sacred compositions and oratorios' had brought him fame, one of his pupils, Mertens, described him as a not even mediocre composer who abided by the rules, composed without taste, fire or gracefulness, and found only little acclaim. The cantata *Der Liebhaber des Gelds, des Weins, des Frauenzimmers*, found at the beginning of the fourth *Tract* (attributed to Seyfert) of the Augsburg *Tafel-Confect*, uses a convivial text written several decades earlier by Erdmann Neumeister and shows Seyfert not as an innovator, but as a follower of J.V. Rathgeber, who was responsible for the first three *Tracten*.

WORKS

Oratorio in praise of the Augustan Confession (M.L. Marggraf), 1730, lost, formerly *D-As*

Den in dem Löwen Aase des Undancks gefundenen Honig der Danckbarkeit (orat), text only extant

Das in Bitte, Gebet, Fürbitte und Dancksagung bestehende Opffer (Abendmusiken for church of St Anna), 1744, 1745, 1746, 1747, texts only extant

Vierte Tracht des Ohren-vergnügenden und Gemüth-ergötzenden Tafel-Confects (Augsburg, 1746), ed. in EDM, 1st ser., xix (1942), 141–82

Choralbuch, 1748, *Mbs*

GÜNTER THOMAS

Seyfert [Seifert], **Johann Gottfried** (*b* Augsburg, 11 May 1731; *d* Augsburg, 12 Dec 1772). German composer. The younger son of Johann Caspar Seyfert, he was given his first instruction by his father; Johann Zach was one of his first teachers on the keyboard. He went to Bayreuth in 1747 and was the pupil of 'Leitdorfer' (possibly Johann Daniel Leuthard) for three years. From there he travelled through Leipzig to Dresden, 'where he profited from Hasse's erudition', and then to Berlin, where he became a pupil of C.P.E. Bach and also came into contact with the brothers C.H. and J.G. Graun and with C.G. Krause. Returning to Augsburg at the end of 1752, he soon moved on to Venice, and then to Vienna, where he studied under G.C. Wagenseil; he finally returned to Augsburg at the end of 1753. There he first assisted his father and became a member of a society of music lovers which performed his works and which occasionally commissioned compositions from him. He succeeded his father as Kantor and musical director. According to Schubart, Seyfert was not only 'one of the foremost keyboard virtuosos of his time' but was also so successful as a composer that his name 'echoed throughout the whole of Europe'. Burney wanted to visit him in August 1772 but was unable to meet him.

WORKS
most lost

VOCAL

Passion oratorio (Picander [C.F. Henrici]), 1747

Jesus Christus, der auferstanden ist von den Toten (orat, M.F. Krauss), 1754

Der Sterbenstag Jesu (orat, K.F. Brucker), 1757

Der von Gott Deutschland geschenkte Friede (orat, Brucker), for the Peace of Hubertusburg, 1763

Cants., incl.: 'Nachtmusik' (Brucker), for the selection of David von Stetten as Augsburg Stadtpfleger, 1768; Ino (K.W. Ramler), *c*1770; Roland (P. von Stetten), *c*1770

Motets for street singing and music for the annual 'Friedensfest', according to Mertens; an Italian opera for Venice and several masses, according to Schubart

GÜNTER THOMAS

Seyffarth [Seifarth, Seiffart, Seyfart], **Johann Gabriel** (*b* Reisdorf, 1711; *d* Berlin, 6 April 1796). German composer and violinist. His first teacher in music (rudiments and keyboard playing) was J.G. Walther; after moving to Zerbst he studied the violin with Carl Höckh and then composition with J.F. Fasch. Before 1741, having gained some reputation as a violinist, he became a chamber musician in Berlin for Prince Heinrich, Margrave of Brandenburg-Schwedt; after that date he was a *Capell-Bedienter* in the royal chapel. Marpurg listed him as a violinist among Frederick the Great's musical forces in 1754; but around that time, and probably before, he was also occupied as composer for the royal ballet. In 1749 he became a member of the newly founded Musikübende Gesellschaft, for whose meetings he is said to have composed a number of violin concertos.

Seyffarth's compositions display many features of the *galant-empfindsamer Stil* that was in vogue in the mid-18th century; his music often bears a distinct resemblance to that of C.P.E. Bach. Though many of his works are lost, they were highly regarded during his lifetime, and covered a broad range: songs (five published from 1756 to 1759 in Marpurg's *Neue Lieder, Geistliche Oden* and *Berlinische Oden und Lieder*, one in *Musikalisches Allerley*, 1761), keyboard works (of which a 'Balletto' was published in Marpurg's *Raccolta*, 1756), cantatas, concertos, symphonies and dances for instrumental ensemble. Works surviving in manuscript include a New Year's cantata, keyboard concerto, sonatina and three dances for keyboard (all *D-Bsb*) and a symphony (*B-Bc*, *S-Uu*).

EUGENE HELM/DARRELL BERG

Seyfried, Ignaz (Xaver), Ritter von (*b* Vienna, 15 Aug 1776; *d* Vienna, 27 Aug 1841). Austrian composer, conductor, teacher and writer on music. His brother Joseph (1780–1849) was a prolific dramatist, librettist and writer. Ignaz von Seyfried is said to have studied keyboard with Mozart and Kozeluch, and composition with Albrechtsberger and Winter. He studied philosophy in Prague in 1792–3, intending to take up law, but he eventually devoted himself entirely to music. From 1797 he was a conductor in Schikaneder's Freihaus-Theater auf der Wiedon, furnishing it and later the Theater an der Wien with innumerable scores: the first, *Der Friede*, was given in May 1797, the last in 1827, the year after he resigned as Kapellmeister – though he continued to supply occasional works and arrangements for other theatres. It has been estimated that his music was heard on 1700 evenings in the Theater an der Wien alone. He was on friendly terms with Beethoven, whose *Fidelio* he conducted at its première in 1805, and his versatility won him a unique place in Vienna's musical life; however, almost none of his music is marked by real originality or distinction.

Four of Seyfried's scores (including his setting of Schikaneder's *Der Wundermann am Rheinfall*, 1799, about which Haydn wrote him a complimentary letter) were among the 12 most often performed works in the Freihaus-Theater; many of his operas and Singspiele for the Theater an der Wien also enjoyed frequent performance. He was highly regarded not least for his biblical music dramas, which include *Saul* (1810), *Abraham* (1817), *Die Makabäer* (1818) and *Noah* (1819). Among his numerous arrangements were *Ahasverus, der nie Ruhende* (1823) and *Der hölzerne Säbel* (1830), both based on melodies by Mozart, and *Rochus Pumpernickel* (1809), a pasticcio by Stegmayer for which the music was arranged by Seyfried and Jakob Haibel. He also reorchestrated or composed numbers for many earlier works, including *La clemenza di Tito*, *Zémire et Azor*, and C.P.E. Bach's oratorio *Die Israeliten in der Wüste* (1817). Plays for which he wrote incidental music include Schiller's *Die Räuber* (1808) and *Die Jungfrau von Orleans* (1811), and Grillparzer's *Die Ahnfrau* (première, 1817). Himself the author of music for several parodies, his opera *Idas und Marpissa* (1807, text by Stegmayer) was parodied by Perinet and Tuczek under the same title in 1808, both works proving highly popular. He also wrote ballets, melodramas, cantatas, symphonies, songs, concertos, marches, pieces for wind instruments and, especially after his retirement from the post of musical director at the Theater an der Wien, a quantity of chamber and church music, including nearly 20 masses, countless smaller works and arrangements of sacred music (Palestrina, Pergolesi, Handel, Mozart, the Haydns and Cherubini). Among his many pupils, only the two later masters of the Viennese musical play and operetta are remembered: Karl Binder (to whom he left his musical collection) and Franz von Suppé.

Connected with Seyfried's pedagogical activities was his publication of Albrechtsberger's *Sämmtliche Schriften* (1826), Preindl's *Wiener Tonschule* (1827) and *Ludwig van Beethoven's Studien im Generalbasse, Contrapuncte und in der Compositions-Lehre* (1832). A large number of Seyfried's works were published in Vienna, and some in Germany; he also contributed articles and reports to the *Neue Zeitschrift für Musik, Allgemeine musikalische Zeitung*, *Cäcilia*, and Schilling's *Encyclopädie*. His works, in manuscript and in print, are in the important libraries in Vienna.

PETER BRANSCOMBE

Seyler, Abel (*b* Liestal, nr Basle, 23 Aug 1730; *d* Rellingen, nr Hamburg, 25 April 1800). Swiss impresario and actor, active in Germany. He was one of the 12 merchants of Hamburg who founded the German National Theatre in 1767. After the death of his first wife, or perhaps his divorce from her, his infatuation with the actress (Friederike) Sophie Hensel (née Sparmann), whom he later married, led to his wholehearted espousal of the theatre. He gained a controlling interest in the Hamburg theatre but in 1769 financial difficulties forced him to accept a post as director of George III's theatre at Hanover; there he formed an excellent company which settled in Weimar in 1772. After fire destroyed the Weimar theatre in 1774, Seyler's company moved to Gotha. In the following year he obtained a licence to perform in Saxony and they visited Dresden in winter and Leipzig in summer and at fair-times. The association between Seyler and the dramatic poet Klinger dates from this time and *Der Wirrwarr*, better known under its alternative title *Sturm und Drang*, was first given in 1776 by Seyler's company. From 1777 Seyler performed in Frankfurt, Mainz, Cologne and Mannheim, where for two seasons from 1779 he was artistic director of the Elector Carl Theodor's Nationaltheater. In 1781 Seyler left Mannheim after his wife's jealousy had provoked an unfortunate incident, and for most of the next 11 years he served as director of the Schleswig court theatre. In 1792 he returned briefly to Hamburg, but then retired. He spent his last years at Schröder's estate at Rellingen.

Seyler was in advance of his time in appointing a resident theatre poet (initially J.B. Michaelis) and a musical director; from 1769 the latter post was held by the experienced Anton Schweitzer. By that time the musical side of the company had been strengthened by the arrival of two very good singers, Herr Helmuth and his future wife Demoiselle Heise (Heisin). Schweitzer wrote several Singspiele for the company, including a setting of Weisse's *Der lustige Schuster* 'in Piccinis Manier'. During the period that the company spent in Weimar and Gotha, librettos by Gotter, Wieland and Brandes were available, and they gave the first performances of works by E.W. Wolf, Georg Benda and Schweitzer; these included Benda's *Medea*, the melodrama in which Sophie Seyler was given the chance to rival Madame Brandes' earlier success in *Ariadne*, and *Der*

Jahrmarkt, the most successful of the Singspiele by Gotter and Benda. Seyler's company also played an important part in the popularization of Shakespeare in Germany. He enjoyed Lessing's esteem and affection, and was indeed generally respected.

His second wife was a very fine actress, as Lessing admitted, but she was a troublesome and tempestuous character. She is now remembered mainly as the author of the romantic Singspiel after Wieland, *Oberon König der Elfen*, published in 1789 and at once pillaged by Giesecke for his libretto for Wranitzky's well-known opera.

Seyler, Leonhard. *See* SAILER, LEONHARD.

Seyve, de. *See* SAYVE family.

sf [sfz]. *See* SFORZANDO.

Sfetsas, Kyriacos (*b* Amphilochia, 29 Sept 1945). Greek composer. He studied composition under M. Vourtsis and the piano under Krino Kalomiri at the National Conservatory in Athens (1959–66). In 1967 he moved to Paris and received a French government grant, which enabled him to pursue his studies in composition, conducting and analysis with Max Deutsch (1969–72), benefiting at the same time from advice given by Xenakis and Nono, although the earlier works, such as *Docimologie* (1969), are more reminiscent of Pousseur in their sensitive instrumentation and the clear harmonic relationships between isolated sounds. In 1975 Sfetsas went back to Greece, where he worked for Hellenic Radio, becoming musical director of both the First (1978–82) and the Third (1982–94) Programmes. His return coincided with a bewildering expansion of his musical vocabulary, in works such as *Diafánies moussikis kontsértou* ('Concert Music Slides', 1977), which now embraced tonal and modal as well as atonal melody, elaborate developmental alongside improvisational writing, elements of Greek folksong and neo-Byzantine church music and allusions to jazz and rock music. His attempts to link these apparently incompatible musical gestures were not altogether without success, though they occasionally led to somewhat overblown musical proportions, for instance in the hour-long *To fos tis kaktou* ('Cactus Light', 1980–83). With works rich in musical and dramatic character, including *Ichissi parontos mellontos* ('Sounding of Present and Future', 1986) and *Diplochromia* ('Double Colours', 1988), the crisis came to an end, Sfetsas emerging as one of the most stimulating figures active in Greece at the end of the century.

GEORGE LEOTSAKOS

Sfogato (It.: 'let loose'; past participle of *sfogare*: 'to give vent to', 'to let out'). A direction used occasionally as an expression mark. Two famous and contrasting examples are in Chopin's Barcarolle (*dolce sfogato* over an extremely delicate filigree passage) and in Liszt's Hungarian Rhapsody no.14 (*ff sfogato con bravura*).

□

Sfondrino, Giovanni Battista (*fl* 1637). Italian composer and guitarist. He composed one book for the guitar: *Trattenimento virtuoso disposto in leggiadrissime sonate per la chitarra* (Milan, 1637). Although entirely in the *battute* style, the work is extensive compared with other guitar books of the time, with 96 pages and more than 200 pieces. It is thoroughly notated with bar-lines and metre and rhythm signs. All the major genres of the day are represented, especially passacaglias, correntes, chaconnes and folias, providing a compendium of *battute*-style guitar music up to the late 1630s. Sfondrino's style incorporates advanced techniques of chordal substitution,

use of the higher positions and occasional single-string effects, much in the manner of Corbetta's first book (1639).

GARY R. BOYE

Sforza. Italian family of music patrons. They were the ruling family of the Duchy of Milan from 1450 to 1535. During their rule, Milan was one of the most active centres of Renaissance culture, including music. The first Sforza duke, Francesco I, already had a number of trumpeters and wind players in his service when he seized the duchy in 1450. His son Galeazzo Maria (ruled 1466–76) was himself a musician and in 1473 established a ducal chapel for which he recruited musicians both from Italy and abroad. He employed some 40 singers, most of them French or Flemish. About half were attached to the court chapel, which was directed by Antonio Guinati; among these were Josquin, Alexander Agricola, Loyset Compère, Johannes Martini and Jean Cordier. The others belonged to the duke's chamber, where the music was directed by Gaspar van Weerbeke; among these were Jacotin and George Brant. The international character of these bodies contrasted with the predominantly Italian membership of the chapel of Milan Cathedral, directed by Gaffurius. There were reciprocal influences between them and the cathedral.

Largely because of his wife, Beatrice d'Este, musical development reached a very high level under Ludovico il Moro, who acted as a regent for Galeazzo Maria's son Gian Galeazzo from 1479 and ruled in his own right from 1495 (he was defeated by the French in 1499 and died a prisoner in France in 1508). In addition to the chapel and chamber musicians, the court was entertained by fiddlers and singers such as Atalante Migliorotti (a friend of Leonardo da Vinci) and Serafino Aquilano (previously employed by Cardinal Ascanio Sforza in Rome along with Josquin). Such men introduced the vogue for less sophisticated forms such as the frottola, *strambotto* and *barzelletta*, which were often settings of poems by Gaspare Visconti. Musical festivities were particularly sumptuous (see illustration). Leonardo da Vinci, who was at the court from 1482 to 1499, designed sets and stage machines for some of these performances, including the celebrated *Festa del Paradiso* of 12 January 1490 on the occasion of the wedding of Gian Galeazzo to Isabella of Aragon, to a text by Bernardo Bellincioni based on a subject suggested by Ludovico il Moro. Dancing was extremely popular, Ippolita Sforza, daughter of Francesco I, being a noted practitioner; Antonio Cornazano dedicated to her the first edition of his *Libro dell'arte del danzare* (1455).

The Sforza family also fostered the theoretical and didactic aspects of music. Ludovico il Moro appointed Gaffurius lecturer on music at court; Florentius dedicated a *Liber musicae* to Cardinal Ascanio (it is an illuminated manuscript now in *I-Mt*). Instrument makers were encouraged too, among them Isacco Argiropulo, organist and organ builder, who was at the court in 1472–3, and Lorenzo Gusnasco of Pavia, a maker of viols, organs and clavichords who was highly esteemed by Beatrice d'Este and her sister Isabella Gonzaga. Leonardo da Vinci invented a new kind of *lira* while at court.

Massimiliano Sforza carried in triumph, with musicians playing trumpets and pipe and tabor: miniature from Aelius Donatus's 'Ars minor', late 1490s, written and illuminated for Massimiliano's parents Ludovico il Moro and Beatrice d'Este (I-Mt 2167, f.29r)

After the defeat of Ludovico il Moro in 1499, the Sforza chapel was dissolved. Ludovico's sons Massimiliano and Francesco, however, had as *maestro* until 1509 the Flemish musician Simon de Quercu. Massimiliano recovered the duchy in 1512, and in that year Marchetto Cara and his pupil Roberto Avanzani lived at his court. He soon lost the duchy again to the French, but his brother regained it in 1522 and ruled as Francesco II until his death in 1535.

MARIANGELA DONÀ

Sforzando (It.: 'forcing', 'compelling'; gerund of *sforzare*). A strong ACCENT. Like the past participle of the same verb, *sforzato*, it is abbreviated *sf* or *sfz*; *fz* is an abbreviation of *forzando* ('forcing') or *forzato* ('forced'). In Beethoven and most other 19th-century composers it is used for an accent within the prevailing dynamic and need not necessarily be very loud; but in the work of many 20th-century composers it is intended as an exceptional mark, irrespective of its context.

□

Sgabazzi [Scabazzi], **Petronio Maria Pio** (*b* Bologna, 15 Oct 1716; *d* ?Bologna, after 1740). Italian composer. His father was Domenico Maria Sgabazzi, organist of S Petronio, Bologna, from 25 February 1697 until his retirement on 6 August 1743. Sgabazzi studied music with his father and counterpoint with Padre Martini. Evidence of his lessons in counterpoint is found in a manuscript, dated between 9 November 1735 and 12 July 1736, in which he recorded his compositions (*I-Bc* KK. 87). His other known compositions were written between 1736 and 1740. The five introits in strict counterpoint, composed during his apprenticeship with Martini, use cantus firmi. The concerted style of his other works resembles the style of his contemporaries in Reggio nell'Emilia, but the string parts (particularly the soloistic passages for the first violin) are carefully elaborated. (*GaspariC*, i, iii, iv; *MGG1* (O. Mischiati))

Sgambati, Giovanni (*b* Rome, 28 May 1841; *d* Rome, 14 Dec 1914). Italian composer, pianist and conductor. He first played the piano in public at the age of six and soon afterwards began to compose. After the death of his father in 1849 he moved with the family to Trevi, where he continued his musical studies with Natalucci, a pupil of Zingarelli. In 1860 he returned to Rome, where he quickly made his mark as a pianist, studied counterpoint with Giovanni Aldega and in 1866 received the *diploma di socio onorario* of the Accademia di S Cecilia. Meanwhile, in 1862, he had met Liszt, who at once recognized his talent, seriousness and receptivity to the various types of non-operatic music then neglected in Italy. He became Liszt's pupil and protégé, and the two remained close friends until the older man's death. This friendship was decisive for Sgambati's development, and in return he did much to promote Liszt's music (along with that of other important foreign composers). In 1866–7 he introduced the *Dante Symphony* to Italy and conducted the première of the first part of *Christus*.

In 1869 Liszt took him to Germany, where he met Anton Rubinstein and first encountered the music of Wagner, whom he was to meet in 1876 in Rome. On that occasion Wagner was impressed by Sgambati's two piano quintets and recommended them to Schott for publication. By then Sgambati had become internationally known as a pianist; he played in England in 1882 and 1891 and in many other countries. In 1881 he was offered a teaching post at the Moscow Conservatory, which he refused. He evidently did not wish to uproot himself from Rome, where he had made lasting and important contributions to the city's musical life. Notable among these was his founding (in collaboration with Ettore Pinelli) of the Liceo Musicale (later Conservatorio) di S Cecilia, linked to the much older Accademia. The Liceo began informally, as early as 1869, as a free school for poor piano students in Sgambati's house; in 1877 it was put on an official basis, and he continued to teach there until his death.

Sgambati is of unquestionable historical importance as a leading figure in the late 19th-century resurgence of non-operatic music in Italy. Yet his works have endured far less well than those of his younger contemporary Martucci. He nevertheless had a fluent talent, and a movement such as the First Piano Quintet's mercurial scherzo, which begins and ends in fast 5/8 time, shows that in his youth he was not without originality. Occasionally later pieces, too, reveal signs of independent thinking, as in the unexpectedly adventurous Prelude in the Suite op.16 (published as op.21), with its piquant, glittering dissonances. Nor was he without Italian characteristics, despite the influence of various foreign composers, from Mendelssohn, Chopin and Schumann to Liszt. Like Martucci's, his music sometimes has a sunlit radiance reminiscent of Domenico Scarlatti (see, for instance, the Gigue published as op.23 no.6), and at other times there are reminders of Liszt's consciously 'Mediterranean' side – the fifth Nocturne op.24 (op.31), with its languid cantabile melodies and its indolent diatonic dissonances, might almost be called a 'poor man's *Sonetto di Petrarca*'.

Even in compositions such as these, however, the danger of lapsing into facile, easy-going charm, with repetitive rhythms and figurations, is not altogether overcome, and such dangers weigh heavily on many other pieces. Moreover, Sgambati's larger instrumental works (with the possible exceptions of the early quintets) do not indicate that he needed large abstract musical forms to embody his ideas. The D minor Symphony is more satisfactory than the Piano Concerto precisely because it is lighter and less pretentious. Even the once internationally popular String Quartet in C♯ minor is too rhapsodic, and at times too turgid, to convince as a whole. Nevertheless, for all their shortcomings, these works played an essential part in preparing the ground for more durable Italian instrumental music; and special mention should be made of the Requiem, repeatedly used at Italian royal funerals, whose sober dignity and manifest sincerity can still impress, despite the extreme conservatism of the style.

WORKS

first set of op. nos. Sgambati's own, as printed in de Angelis (1912), and Casella (1925); published in Mainz unless otherwise stated.

JOHN C.G. WATERHOUSE

Sgatberoni, Johann Anton (*b* c1708; *d* Graz, 5 Feb 1795). Austrian composer. He was a musician at Graz parish church by 1773 and remained there until his death. Four harpsichord concertos and three partitas by him, from the collection of the Attems family in Styria around the middle of the 18th century, are in the Studijska knjižnica, Ptuj. The concertos (two are in MAM, xxviii–xxix) seem to have been modelled on Vivaldi's in their form and are among the earliest examples of the harpsichord concerto in Austria.

HELLMUT FEDERHOFER

's-Gravenhage (Dutch). *See* HAGUE, THE.

Sgrizzi, Luciano (*b* Bologna, 30 Oct 1910; *d* Monte Carlo, 11 Sept 1994). Italian harpsichordist and pianist. He studied the piano, organ, composition and music theory in Bologna, Parma and Paris until 1938. Besides his musical activities, he was also a literary critic, wrote radio plays and arranged literary works for the radio. He began to appear as a pianist when he was 13, but from 1948 became better known as a harpsichordist and clavichordist, so that his repertory lay mainly between Frescobaldi and Mozart. He performed at the festivals of Spoleto, Salzburg and Flanders, among others, and made many recordings. He edited many works for practical performance by such composers as Banchieri, Pergolesi and Monteverdi, and had them performed, often with the Società Cameristica conducted by Edwin Löhrer, at concerts, on records and on radio, particularly for Italian–Swiss Radio in Lugano, where from 1947 to 1974 Sgrizzi was active as a pianist and harpsichordist. With Lorenzo Bianconi he edited *12 sonates pour clavecin* by Benedetto Marcello (Le Pupitre, xxviii, Paris, 1971). His compositions included *Suite belge* and English Suite for chamber orchestra, *Capriccio* for flute and small orchestra and *Ostinati* for piano. Sgrizzi's interpretations, particularly of Italian music and of Scarlatti sonatas (of which he recorded a complete cycle), were distinguished by a feeling for style, delicate nuances and spirited virtuosity; because he started as a pianist, his harpsichord playing had no tendency towards dryness. The recordings of Monteverdi made with Löhrer bear witness to his qualities as an ensemble player.

JÜRG STENZL/R

Shabalala, Bhekizizwe Joseph (*b* Tugela, Ladysmith, South Africa, 28 Aug 1941). South African composer and singer. He is the leader of the world-renowned *a cappella* group Ladysmith Black Mambazo and the chief exponent of *isicathamiya*, a tradition of male choral performance and dance that emerged in the 1920s and has remained popular with Zulu-speaking migrant labourers. His early recordings in the 1970s highlighted themes typical of the genre such as longing for ancestral homelands, the Zulu past and a world of stable gender relations. But Shabalala also reinvigorated the genre by introducing new choreography and by replacing the more voluminous sound of earlier *isicathamiya* singing with highly polished, subtle sound textures. After converting to Christianity in 1975, he produced a series of albums of religious inspiration, before collaborating in 1986 with Paul Simon on the *Graceland* album. In 1987 Shabalala became the first South African musician to win a Grammy Award for his album *Shaka Zulu*. Collaboration with Simon and subsequent projects with Andreas Vollenweider, Ray Phiri and Michael Jackson have led Shabalala to explore new ways of broadening the international appeal of *isicathamiya* by emphasising the cross linkages to African-American gospel, South African *Mbaqanga* and mainstream popular music.

VEIT ERLMANN

Shabbāba [şebbabe, shabbābah, shbiba]. Arabic term, used in Iraq, Syria, Jordan and by Palestinians, for an obliquely-held, endblown flute. It is also known as a *nay* or *blīl* (*see* NEY). It is made from a cylindrical tube of apricot wood, white beech or metal, with six or seven finger-holes and one thumb-hole. The average length is about 55 cm. As a solo instrument, it is particularly associated with shepherds and played during harvest in open places. More often, it is used by young amateurs. The *şebbabe* is held sacred by the Yezidi sect in northern Iraq and Syria (*see* KURDISH MUSIC, §4). Together with the frame drum it accompanies their ceremonies, at which it is played by a low-ranking priest-musician, *al-qawwāl* ('the one who speaks').

□

Shadows, the. English pop instrumental group. Its members included Hank B. Marvin (Brian Robson Rankin; *b* Newcastle, 28 Oct 1941; lead guitar), Bruce Welch (*b* Bognor Regis, 2 Nov 1941), Jet Harris (Terence Hawkins; *b* 6 July 1939) and Tony Meehan (*b* London, 2 March 1942). Originally the backing musicians for Cliff Richard, they became the most influential instrumental performers in British and European popular music during the first half of the 1960s. Beginning with Jerry Lordan's *Apache* (1960), they recorded a long series of hit singles which featured the precise and melodic lead guitar playing on a Fender Telecaster of Hank Marvin. Their hits included Michael Carr's *Man of Mystery*, record producer Norrie Paramor's *The Frightened City*, Lordan's *Wonderful Land* and *Foot Tapper* by Marvin and Welch. The group split up in 1969, with Marvin and Welch forming a new vocal and instrumental trio with Australian guitarist John Farrar. They re-formed the Shadows to perform Welch's *Let me be the one* in the Eurovision Song Contest (1975). Subsequently the group had hit recordings with versions of Tim Rice and Andrew Lloyd Webber's *Don't cry for me Argentina*, Stanley Myers's *Cavatina* (the theme from the film *The Deer Hunter*) and Stan Jones's *Riders in the Sky*. In 1983 the Shadows were given an Ivor Novello award for their services to British music.

DAVE LAING

Shadwell, Thomas (*b* Broomhill, Norfolk, 24 March 1640 or 1641; *d* London, 20 Nov 1692). English dramatist, poet and amateur musician. He entered the Middle Temple in July 1658 but did not practise law for long, concentrating rather on establishing himself as a man of letters. From 1668 onwards he wrote 18 plays. Realistic, often satirical, comedies form the most important part of his output, but his main interest for musicians lies in his contribution to semi-opera.

On or about 30 April 1674 an operatic version of the Davenant-Dryden adaptation of Shakespeare's *The Tempest* was produced by Thomas Betterton at the Dorset Garden Theatre with great success. Shadwell seems to have provided the words for the new musical sections, notably the masque in Act 5, but to what extent he was responsible for the other alterations is disputed. The vocal music was set mainly by John Banister (i) and Pelham Humfrey, the act music was supplied by Locke and the dances (now lost) by G.B. Draghi. At about the same time Shadwell was certainly engaged in writing a semi-opera (based on Molière's *Psyché*), which was first performed on 27 February 1675. As in *The Tempest*, the main action is carried out in speech, but extensive musical scenes with dancing and elaborate stage machinery are introduced through the inclusion of subsidiary, often supernatural, characters. Shadwell made a real attempt to integrate the musical sections into the plot, and his detailed stage directions show a keen sense of instrumental colour. The music was composed mainly by Locke, though Draghi provided instrumental music which has not survived. These two works (both ed. in MB, li) set the pattern of English 'opera' for the rest of the century. Shadwell also used music extensively in other plays, notably *The Libertine* (1675) and *Timon of Athens* (1678); Purcell wrote music for later revivals of both. Shadwell was also known as a lutenist, and at least seven songs written by him are to be found in contemporary songbooks and manuscripts.

In the political polarization of the early 1680s Shadwell became a vehement Whig and was involved in vitriolic controversy with Dryden. After the accession of William and Mary in 1689, he was appointed Poet Laureate and Historiographer Royal in place of the Catholic Dryden, and in this capacity wrote four or five official odes. He also wrote the St Cecilia's Day Ode for 1690, which was set by Robert King.

MARGARET LAURIE

Shafran, Daniil Borisovich (*b* Petrograd [now St Petersburg], 13 Jan 1923; *d* Moscow, 7 Feb 1997). Russian cellist. He began his studies with his father, principal

cellist of the Leningrad SO, and then with Aleksandr Shtrimer at the Leningrad Conservatory from the age of ten. He made his début in Leningrad in 1935 conducted by Albert Coates and the same year won first prize in the National Cello Competition in Moscow: one of the awards was a fine Antonio Amati cello which he played until his death. In 1949 and 1950 he shared two top prizes with Rostropovich in Budapest and Prague respectively. Shafran toured internationally from this time, making his American début in 1960 and his British début in 1964; he was created Honoured Art Worker of the RSFSR in 1955 and People's Artist of the USSR in 1971. He served on the jury of many international competitions and from 1974 chaired the jury of the Tchaikovsky Competition in Moscow. Shafran's playing was distinguished by profound musicality, subtle lyricism, and unusual elegance and brilliance of technique, particularly in Bach's solo cello suites. He also had a talent for the deft characterization of musical miniatures.

I.M. YAMPOL'SKY/MARGARET CAMPBELL

Shaftesbury, Lord (1671–1713). English philosopher and aesthetician. *See* ANALYSIS, §II, 2.

Shaham, Gil (*b* Champaign-Urbana, IL, 19 Feb 1971). American violinist. He studied at the Rubin Academy in Jerusalem with Samuel Bernstein, and made his orchestral début with the Jerusalem SO at the age of ten, playing with the Israel PO under Mehta the following year. In 1982 he took first prize in the Israeli Claremont Competition, which provided a scholarship to study with Dorothy DeLay and Hyo Kang at the Juilliard School in New York. His subsequent solo career brought him engagements with the New York PO, the Philadelphia Orchestra, the LSO, the Berlin PO, the Frankfurt RSO, the Orchestre de Paris and others; in 1989 he caused a sensation when he replaced, at short notice, an indisposed Perlman, playing the Bruch and Sibelius concertos with the LSO at the Royal Festival Hall, London. He made his London recital début at the Wigmore Hall the following year. Shaham has also made a number of recordings, including an outstanding disc coupling the violin concertos of Barber and Korngold. He is possessed of a dazzling technique allied to a rich, colourful tone reminiscent of earlier generations of great violinists; but he also has the intellect and dramatic flair to transcend routine interpretations. He plays a Stradivarius dated 1699, the 'Countess Polignac'.

MARGARET CAMPBELL

Shaheen, Simon (*b* Tarshīha, Galilee, 1955). Palestinian *'ūd* player, violinist, composer and teacher. He comes from a family of musicians and began to study the *'ūd* at the age of five with his father, the composer and conductor Hikmat Shaheen. At the age of seven he entered the Rubin Conservatory in Haifa to study the violin and Western classical music. He graduated from the Jerusalem Rubin Academy of Music and Dance in 1978 and remained there for two years as an instructor in the performance and theory of Arab music.

In 1980 he moved to New York, where he studied at the Manhattan School of Music and later at Columbia University. He subsequently performed as a soloist and as a member of the Near Eastern Music Ensemble, which he founded in 1982, and he has given workshops and lecture-demonstrations at several American colleges and universities. His performances have ranged from classical Arab compositions to contemporary jazz fusion. In 1992 he formed the Alcantra Fusion Ensemble and in 1994 he became producer of the Annual Arab Festival of Arts in New York.

In his first important composition, Theme and Variations, for *'ūd* and orchestra, Shaheen used a variety of Western classical compositional techniques; the work is a tribute to the Egyptian composer Muhammed Abdel-Wahab, to whom Shaheen later dedicated a CD. His subsequent works include traditional Arabic compositions and arrangements, jazz, and film and theatre scores, notably those for the films *The Sheltering Sky* and *Malcolm X*.

In 1994 he received a National Heritage Fellowship Award for his contribution to traditional music; his blend of tradition and innovation has forged important musical links between the Arab world and the West.

REEM KELANI

Shahidi, Tolib (*b* Dushanbe, 13 March 1946). Tajik composer. The son of composer Ziyadullo Shahidi, he graduated from Ter-Osipov's class at the Dushanbe Music College in 1965 before taking a postgraduate course under Aram Khachaturyan at the Moscow Conservatory (graduating in 1972), where he came under the influence of Schnittke and Eshpay. He gained recognition comparatively early and has since won prizes in the USA and elsewhere. His awards included the title of People's Artist of Tajikistan and Rudaki State Premium of Tajikistan. His music combines Western techniques with Tajik folklore, especially that associated with Sufi tradition. In his *Recitatives of Rumi* (1982) the musical development mirrors the spinning of a Sufi dance, while in his first and second piano concertos (1981 and 1991) he employs a dodecaphonic style embellished with Tajik rhythms. The Third Piano Concerto (1993) imposes modern techniques on modes derived from Indian ragas.

WORKS
(*selective list*)

Prazdnestvo [Celebration], sym. poem, orch, 1975; Smert' rostovshika [The Death of an Usurer] (ballet, S. Azamatova and K. Ayni), 1978; Tajiki/Sym. no.2, 1978; Rubaiy Hayama (film-ballet, V. Chaykovsky), 1980; Pf Conc. no.1, 1981; Recitatives of Rumi, fl, pf, 1984; Sado, sym. poem, orch, 1984; Kalif aist [Caliph Stork] (op), 1986; Karlik-nos [Dwarf-Nose] (op), 1987; Usuph and Zuleikha (ballet), 1988; Siuavush (ballet), 1990; Pf Conc. no.2,

1991; Pf Conc. no.3, 1993; Vn Conc., 1994; Conc., str, 1998; Phirdousiada, str, 1998; Sufyiskiye tantsï [Sufi Dances], 1998; many chbr and vocal works

RAZIA SULTANOVA

Shahnazi, Ali Akbar (*b* Tehran, 1897; *d* Tehran, 1985). Iranian *tār* player, composer and teacher. He came from a family of celebrated musicians. His father was Aqa Hossein Qoli and his uncle Mirza Abdollah, both highly respected *tār* and *setār* players. He studied the *tār* with his father from the age of eight and, on his father's death in 1915, he continued further training with his uncle. He was 14 when he made his first recording, accompanying the singer Jenab-e Damavandi. Other recordings, both as a solo *tār* player and as an accompanist to singers, followed. By the early 1920s he was widely recognized as the country's foremost *tār* virtuoso.

In his maturity, Shahnazi developed a highly colourful and dramatic style of *tār* playing. He favoured strongly delineated dynamics; his plectrum strokes were clear, rapid and diversified. Many of his broadcast performances are preserved in the archives of Tehran Radio; the Iranian Ministry of Culture also holds a recorded collection of his rendition of all the *dastgāh*s of traditional music. As a teacher, Shahnazi was active throughout his adult life. He taught both privately and at the Conservatory of National Music in Tehran; many of the leading *tār* players of the late 20th century were his pupils.

Shahnazi was also active as a composer. During the early years of the 20th century, the practice of composition independent of extemporized performance gained popularity in Iran under the influence of Western music, and the composition of *tasnif*s, *Chāhārmezrāb*s, *Pišhdarāmad*s and *reng*s became central to the activity of the more progressive musicians. Throughout his life, Shahnazi made major contributions to the development of these new compositional forms; he left a large corpus of compositions in all four categories.

HORMOZ FARHAT

Shajariān, Mohammad Rezā (*b* Mashhad, north-east Iran, 23 Sept 1940). Iranian singer. He was one of a group of musicians important in the renaissance of traditional music and other arts in the period following the 1979 Islamic Revolution. Born into a family with a long musical tradition, Shajariān joined the local radio in Mashhad at the age of 18. In 1966 he moved to the National Iranian Radio Organization in Tehran; at this time he rose to prominence with his distinctive combination of vocal warmth and technical mastery. He studied with several masters including Ahmad Ebādi, Esmail Mehrtash, Farāmarz Pāyvar, Abdollāh Davāmi and Nur Ali Borumand. Shajariān performed regularly on Iranian Radio between 1966 and 1986, and many of the broadcasts were subsequently released as commercial recordings. He also appeared frequently on national television between 1971 and 1976. Since 1977 he performed and recorded with several ensembles, giving concerts in Europe, North America and Asia. His work as a singer reflects his extensive knowledge of classical Iranian poetry.

Shajariān also plays several instruments, notably the *santur*. In addition to his work as a performer, he taught at the University of Tehran from 1977 until 1979 and returned there in 1990. His interest in the regional musics of Iran dates from his earliest musical experiences in the region of Khorasan where he was born and raised, and he has carried out research into various folk musics of Iran. He has also worked on an introduction to singing technique and the vocal *radif*. Shajariān commands great popularity and respect in Iran where he is generally regarded as the foremost classical vocalist of the post-revolutionary period.

LAUDAN NOOSHIN

Shake. A term used to denote several types of ornaments, many of which are types of trill. *See* ORNAMENTS, §6.

Shake-a-leg [malgari]. A type of Australian aboriginal dance performed in northern regions, concluded by jumping steps executed with quivering limbs. *See* AUSTRALIA, §I, 1(v).

Shakers, American. The United Society of Believers in Christ's Second Appearing, popularly known as Shakers or Shaking Quakers, was a millenarian community under the leadership of Ann Lee (1736–84) of Manchester, England, who emigrated to America in 1774. The Shakers believed that Mother Ann was the female incarnation of the dual Saviour, fulfilling the Gospel prophecy of Christ's second coming, and to be certain of salvation they remained unmarried and sexually abstinent, organizing their reclusive lives around work and prayer. By the mid-19th century the sect had some 4000–6000 adherents residing in about 20 Shaker villages from Maine to Indiana and Kentucky; it was by far the most successful of all the 19th-century American communal societies. After the urbanization and industrialization of the eastern USA following the Civil War, Shaker communities gradually declined. By the end of the 20th century they were all but extinct, their only remaining influence lying in their simple but functional furniture, much prized by collectors, their cooking and their music.

The Shakers left an astonishing legacy of some 8000–10,000 religious songs and dance-tunes, preserved in almost 800 manuscripts and a few printed tunebooks, notably Isaac N. Youngs's *A Short Abridgement of the Rules of Music* (New Lebanon, NY, 1843, repr. 1846) and Russel Haskell's *A Musical Expositor* (New York, 1847). These tunebooks detailed the classic form of Shaker music theory, notation and tunes. While the theory was rather commonplace, the notational system and the tunes and their provenance were unique.

Reports of early Shaker ritual indicate that they liked to dance and sing with extravagant gestures and exaggerated melodic phrases that some likened to barking or screaming. Emphasizing 'gifts' or spiritual revelation, many Shakers were seized by hymns and other tunes which they sang or whistled to scribes (*see* SINGING IN TONGUES). The scraps of paper on which these tunes were captured were then collated into neat manuscript hymnals. As Shaker communities became more disciplined, the individualistic displays of piety were curbed and greater conformity was pursued through publication of accepted hymns, spirituals and work songs, and dances.

The musical notation in the Shaker manuscripts is of several types: besides shape-note notation, apparently derived from such earlier tunebooks as *The Easy Instructor* (Philadelphia, 1801) of Little and Smith, and conventional 'round-note' notation (used by the Shakers only after about 1870), Patterson (1979) identified numerical, shorthand and Amerindian notations, and, most important, letter notation, a primitive non-diastematic system of musical letters to which were joined conventional rhythmic values. Four types of letter notation have been observed: capital, small, linear and cursive.

Shaker music has been grouped in seven categories: songs of the gospel parents (that is, the first British followers of Ann Lee); solemn songs (songs in what the Shakers themselves called an 'unknown language'); labouring songs (songs for religious dances and marches); hymns and ballads (strophic songs); extra songs (short, one-stanza songs sung while resting between dances); anthems (longer songs to prose texts); and gift songs (songs from the decade-long period of renewed Shaker spiritual dedication beginning in 1837). Typified by 'Simple Gifts' (the tune used by Copland for the variations near the end of the ballet *Appalachian Spring*), Shaker music combines pentatonic or horn-call melodies with memorable rhythms always appropriate to the prosody of the text. Besides texts in plain English, lyrics consisting of nonlexical vocables and words from unknown tongues and dialects abound, chiefly imitative of Amerindian and black-American speech. These borrowings may indicate that Shaker scribes made the first transcriptions of Amerindian or black music years before such music became the object of more general curiosity.

VICTOR FELL YELLIN/H. WILEY HITCHCOCK

Shakespeare, William (*b* Stratford-on-Avon, bap. 26 April 1564; *d* London, 23 April 1616). English playwright.

1. Music in Shakespeare's plays.

(i) Shakespeare's use of music. Music has an important role in Shakespeare's works: any of his plays would suffer only in its total impact if sound effects and processions, fencing and costumes were eliminated, but the actual sound of vocal and instrumental music is essential to Shakespeare's dramatic purpose. It remains of course complementary to the sound of verse and prose, but where it punctuates the dialogue it could be omitted only at considerable loss. Beyond this, the traditional associations of music, its divine and degrading powers, often play their part in providing the dramas with a network of wider associations, not only in the actual use of music in the dramatic action but in the frequent use of musical imagery in the text of the play, for important structural and thematic purposes. These allegorical and symbolic functions of music are integral elements of what has been called the Elizabethan 'world-picture'.

In accordance with the conventions of Elizabethan and Jacobean drama, the integration of music in Shakespeare's plays operates on differing levels of sophistication and meaning. The majority of musical cues can be readily divided into four main categories: stage music, magic music, character music and atmospheric music. 'Stage music' is the most straightforward category. It encompasses functional or occasional music, prompted by or announcing an action on stage, usually eschewing allusion or hidden metaphor. It is used to accompany a banquet or procession, a duel or a battle where the 'stage army' (e.g. the Prologue to *Henry V*) is not very impressive and the aural excitement would make up for the rather minimal visual effects. Or it may herald the arrival or entry of kings and nobles. Trumpets and kettledrums announce the royal procession in *Hamlet* (3.ii). A flourish of trumpets conventionally ushers in Duke Frederick, lords, Orlando, Charles and attendants as the mood changes in Act 1 Scene ii of *As You Like It*. Likewise a flourish of cornetts announces the arrival of the Prince of Morocco (*Merchant of Venice*, 2.i) and his entry with Portia later in the same act. 'Stage music' may also be employed simply and quietly for a serenade, as in *The Merchant of Venice*, 5.i, or *The Two Gentlemen of Verona*, 4.ii.

The second category, 'magic music', is connected with the age-old concept of the 'ethos' of music, where the art of tones assists in inducing sleep or falling in love or a miraculous healing. When Lady Mortimer sings Mortimer to sleep in *1 Henry IV*, 3.i, her singing, accompanied by Hotspur's quizzical humour, involves and questions the extraordinary goings-on of Glendower, with his strange folklore and 'skimble-skamble stuff'. Lear's disordered mind is healed by the power of soft music; likewise in *Pericles*, Cerimon revives Queen Thaisa with soft or 'still' music. When the fairies sing Titania to sleep in *A Midsummer Night's Dream*, 2.ii, we know that theirs is no ordinary lullaby. Ariel entices Ferdinand 'to these yellow sands' in *The Tempest*, 1.ii, with a magic song. The origin of such 'magic music' is frequently invisible, or at least not to be seen by the characters on stage who are so wondrously affected. Glendower's musicians who

> Hang in the air a thousand leagues from hence,
> And straight they shall be here (3.i)

were hidden, most probably behind the curtain or arras at the back of the Globe stage, as were the spirits who accompany Ariel.

The use of music to portray and reveal character in a play demands real skill and knowledge of the differing effects of music. More than most playwrights, Shakespeare excels in his use of 'character music'. The songs in *The Winter's Tale*, following each other in fairly close succession, characterize Autolycus and his position in life. Without them, much of Shakespeare's dramatic 'conceit' is lost. They rank among his most intense character songs, being psychological rather than philosophical. In *Troilus and Cressida* the nature of Pandarus, the provider of soft luxuries, the diseased pander, is characterized by his sophisticated, lecherous song, 'Love, love, nothing but love, still love, still more!' (3.i). Pandarus's song also reflects upon the characters of Paris and Helen for whom he sings, as well as upon the Elizabethan gentry whom

Shakespeare was satirizing. Sometimes the personality generated through music is assumed rather than real. In *Othello*, Iago pretends to conviviality and pleasantness, while coldly plotting Cassio's downfall, when he sings, 'And let me the cannikin clink, clink' (2.iii). Bassanio is clearly marked as the preferred suitor in *The Merchant of Venice* by being the only one favoured with a song before he chooses a casket: 'Tell me where is fancy bred, / Or in the heart, or in the head?' (3.ii). Feste's 'O Mistress mine, where are you roaming?' (2.iii) is sung for Toby and Andrew in *Twelfth Night* because their creed of *joie de vivre* will brook no Puritan restrictions. A 'song of good life' would be a waste of the 'sixpence' offered to Feste, the professional clown. Songs often characterize not the singer but the patron. Feste's 'Come away, death' (2.iv) portrays Duke Orsino's unbalanced love-sickness by his demand for an excess of that music which is the food of love. Similarly, 'Take, O take those lips away', sung by a boy in *Measure for Measure* (4.i), shows Mariana's self-indulgent brooding on her betrayal and loneliness. Probably the most notable example of character music in Shakespeare occurs in Ophelia's mad scene (*Hamlet*, 4.v), where both her singing and her songs themselves characterize her state of mind and preoccupations.

Perhaps more than any other theatrical device, music is capable of indicating to an audience a change of tone within the drama. Shakespeare realized this more than any other dramatist of his day. 'Atmospheric music' is the most subtle of the four categories because it is concerned with such intangibles as mood, tone and emotional feeling, and because it may involve changes from suspicion to trust, from vengeance to forgiveness or from hatred to love. The highly romantic dénouement of *The Merchant of Venice*, after the harsh words and near tragedy of the trial scene, is prepared initially by increased lyricism in the poetry, with songlike stanzaic speaking and a setting of moonlight, stars and candlelight; and finally by background music for Portia's arrival, with the martial interruption of a flourish of trumpets to bring on the menfolk, adding to the romance their masculine swagger and impropriety. Music helps identify the stages of Prospero's personal development in *The Tempest*. Here we have both 'atmospheric' and 'character' music because the categories are never mutually exclusive. The coming to life of the statue, some 50 lines before the end of *The Winter's Tale*, announcing the reconciliation between the king and queen, combines 'magic' with 'atmospheric' music. Ariel's 'atmospheric' song 'Where the bee sucks' in *The Tempest*, 5.i, presaging calm seas and auspicious gales, is also 'character' music as the airy spirit sings to himself.

The artistry and significance of Shakespeare's use of music increased steadily as he progressed from the gravedigger in *Hamlet* to Feste in *Twelfth Night*, to Pandarus in *Troilus and Cressida*, to Lear's fool and, in the clown's final apotheosis, to Autolycus in *The Winter's Tale*. A similar process of perfection leads from the farcical pinching-songs of the fairies in *The Merry Wives of Windsor* to the miraculous transformations performed by Ariel and his band in *The Tempest*. Shakespeare's advances in his application of music might well have been connected with the changing personnel and circumstances in his troupe. When Robert Armin succeeded William Kemp, Shakespeare increasingly emphasized the importance of the adult actor-singer until, in the role of Autolycus, he created a figure who is both essential to the action and able to add another dimension through his singing.

As for instrumental music, Shakespeare was usually specific because he wished to employ late medieval and Renaissance mythologies and 'ethos'. Certain instruments might be used to signify war or peace, to suggest divine or diabolical intervention, or to announce that a scene is domestic, courtly or military. Such contextual music often depended for its effect on the significance of opposites: loud, harsh music (*musique haute*) meant the opposite of soft, peaceful music (*musique basse*); trumpets, cornetts, bagpipes and hoboys contrasted with viols, lutes and citterns. When Othello bids farewell to war, he bids farewell to the 'shrill trump, the spirit-stirring drum, th'ear-piercing fife' (3.iii). Squealing hoboys foretell doom, as in the banqueting scenes in *Titus Andronicus* and *Macbeth*, and in their ominous music under the stage in *Antony and Cleopatra*. The brazen din of trumpets provokes men (and horses) to battle. In contrast, heavenly music, with its quasi-Pythagorean and neo-Platonic associations of moral reward, healing, prophecy and divine intervention is generally represented by soft music, gentleness being as much an excellent virtue in music as it is in a woman's voice.

A recurring symbolic reference in Renaissance literature, drama and art, and one used by Shakespeare, concerned the ancient legend of the musical contest between Apollo and Marsyas (or Pan), where the silver, sweetly tuned strings of Apollo signified the music of the spheres and the discordant, harsh-sounding pipes of Marsyas reflected the unpropitious conjunctions of the planets. The peace and unity of the commonwealth, whose sovereignty was embodied in the person of the monarch (a special Elizabethan political theme propounded through the myths of the musician-king, e.g. in *The Tempest*), were set against the disruption of civil war so feared and denounced in Shakespeare's works. The 'ethos' theory provides this interlocking connection between the tuning of the cosmos, that of musical instruments and the minds of men influenced by these instruments. It is with horror that the protagonists of the great tragedies contemplate man out of tune with himself. Rejected by Hamlet, Ophelia 'that suck'd the honey of his music vows' sees Hamlet's 'noble and most sovereign reason / Like sweet bells jangled, out of tune and harsh' (3.i). Similarly out of tune are King Lear, 'Who sometime, in his better tune, remembers / What we are come about' (4.iii) and Cleopatra, who is afraid when 'saucy lictors / Will catch at us like strumpets, and scald rhymers / Ballad us out o' tune' (5.ii). The analogy with internal strife which destroys the commonwealth is expounded in Ulysses' speech in *Troilus and Cressida*: 'Take but degree away, untune that string, / And hark, what discord follows.' (1.iii), and is expanded in the whole play in the contrasting psychology of Greeks and Trojans, the politics of reason and passion, of the individual and the state. *Othello* is another structuring of a whole play around musical imagery. At its centre is Iago's 'O, you are well tun'd now! / But I'll set down the pegs that make this music' (2.i), and the destruction of harmonious and beautiful love is mirrored in the gradual destruction of Othello's splendidly musical poetry as it moves into prose and then into ugly and incoherent discord, only to be

revived at the very end in Desdemona's song and Othello's final rhetorical splendour.

Shakespeare never employed music as a simple divertissement or idle distraction; its effect is carefully calculated in poetic and dramatic terms. 'The words of Mercury', says Don Armado as he brings *Love's Labour's Lost* to a close, 'are harsh after the songs of Apollo'. It was Shakespeare's achievement to have broken down that opposition, to have fused the message of Mercury and the music of the sun god, so that the music of words, of instruments and of melody coalesced to form a uniquely varied and sensitive dramatic medium.

(ii) The music. Of the 100 or more songs, snatches or quotations of songs scattered through the 36 plays in the First Folio, for the large majority we have neither certain knowledge of, nor even a historically acceptable hypothesis for, the tune actually used by the King's Men in a first performance or early revival. Even when a melody has the appropriate title, incipit or rubric in a commonplace book, manuscript miscellany or printed source of the period, we cannot be certain that it was the tune used. Very little instrumental music for the stage has survived from Shakespeare's time. It is therefore virtually impossible to discover what was played in a particular production. But it is less important to know exactly what was played compared with what kind of music was intended. What has survived (notably *GB-Lbl* Add.10444, mostly music for the Stuart masque) shows that dances, marches, entries and so on were short, simple and mainly homophonic pieces.

The music for the songs, snatches, rounds etc. ranges from simple, traditional material (mostly ballads), fitted as a rule to lines of three or four stresses, to specially composed or adapted art songs, generally accompanied and set to poems of greater prosodic complexity. Most of the popular songs would be well-known to the Elizabethan audience; some are simply referred to by name, as for example when Mistress Ford exclaims: 'They do no more adhere and keep place together than the Hundredth Psalm to the tune of "Greensleeves"' (*Merry Wives*, 2.i), or when Autolycus sells a merry ballad that 'goes to the tune of "Two maids wooing a Man"' (*Winter's Tale*, 4.iv). Nearly all such popular tunes were unaccompanied and therefore could be sung at any time and any place by anyone. The presence of an accompanying instrument such as lute or cittern would have suggested that a musical performance was planned rather than spontaneous. Such are the ballad-like ditties performed by the Fool in *King Lear*, by Silence in *2 Henry IV* (5.iii) and by Ophelia in *Hamlet* (4.v). Although the first quarto has the stage direction, 'Enter Ophelia playing on a lute, and her hair down, singing', it is not repeated in the second quarto or first folio. Nor is there any reference to a lute or other instrument in the surrounding dialogue. A simple accompaniment is unnecessary here; on the other hand it would not be out of place. In *Othello*, however, Desdemona would have found it difficult to accompany herself on a lute while Emilia was attending her. The song she sings, having stanzas of two lines each with four stresses interspersed with the 'willow' refrain, freely and incompletely recalls a pre-existent song (see list under *Othello*, 'The poor soul sat sighing').

In contrast to the simple ditties are art songs, distinguished by their prosodical sophistication, their dramatic context and their restricted length. Most art songs have only one stanza, whereas ballads, even incompletely performed, may well run into several, like Ophelia's 'Tomorrow is Saint Valentine's Day' and 'How should I your true love know?'. When the audience has been prepared and forewarned, a song can allow the singer more textual depth and careful performance. The instrumental accompaniment that is generally required may well be alluded to in the surrounding dialogue. In *Julius Caesar*, Brutus refers four times to the 'instrument' with which Lucius is to accompany himself (4.iii). In *Henry VIII*, Queen Katharine commands, 'take thy lute, wench' (3.i). In *Troilus and Cressida*, before beginning his song, Pandarus says, 'Come, give me an instrument' (3.i), and at another point, 'I'll sing you a song now'. And when Helen commands 'Let thy song be love', Pandarus obliges with a lyric far removed in quality and sophistication from the metrically simple songs and ditties, say, of Autolycus in *The Winter's Tale*, whereas Ariel's songs in *The Tempest* demand professional skill and presentation, especially 'Full fathom five' and 'Where the bee sucks', for both of which near-contemporary settings by the court lutenist Robert Johnson survive (see list).

2. Shakespeare and music since 1616.

(i) 17th century. The production of Shakespeare's plays on the London stage was naturally affected by his death in 1616; and at first there were few revivals. However, the publication of the First Folio in 1623, which collected 18 plays already published singly in quarto and another 18 not previously published, made the texts of virtually all his dramatic output accessible to the interested reader. The outbreak of the Civil War in 1642 led to the closure of the theatres, so that before the Restoration in 1660 and the reopening of the theatres there was a gap of nearly 20 years, sufficient to break the continuity and tradition of play production and performance. The new theatrical order ushered in by the Restoration was exemplified by the granting of two patents – the first (1662) to Sir Thomas Killigrew and his company of King's Players, the second to Sir William Davenant (1663) and his company of Duke's Players – thereby establishing a drama monopoly which continued with these companies and their descendants until the passing of the 1843 Act for Regulating Theatres. By dispensation of the Lord Chamberlain the right to revive Shakespeare's plays was shared, more or less equally, by the King's Players and the Duke's Players.

Davenant, reputed to have been Shakespeare's godson, started his stage career as a playwright and by the 1630s was closely involved in writing texts for some of the last and most spectacular of the Caroline court masques. Though no musician himself, he was closely involved with composers, and towards the end of the commonwealth found an ingenious way of evading the ban on public performances of stage plays by presenting a number of operatic experiments disguised as 'moral representations'. When he obtained control of the Duke's Players after the Restoration, he made it a matter of policy to revive some of Shakespeare's plays; and the two that particularly attracted him, in view of the Lord Chamberlain's express condition that they should be 'reformed', were *Macbeth* and *The Tempest*. Both were revived at Lincoln's Inn Fields Theatre in the 1660s. For *Macbeth* Davenant inserted into Shakespeare's text the Hecate scenes from Middleton's *The Witch* (*c*1610). For *The Tempest*, he

collaborated with Dryden in making extensive alterations in the text.

Although these revivals were successful with the public, Davenant was not satisfied. He felt both plays deserved the sort of treatment with music and spectacle that would bring them closer to opera. For this a new and larger theatre would be necessary, but Davenant died in 1668 before anything could be done about it. His widow went ahead with building plans; a handsome new theatre was opened in Dorset Garden in 1671, and arrangements were made to present new versions of *Macbeth* and *The Tempest* there 'in the nature of an opera'.

The 1673 revival of *Macbeth* included some of the music originally written by Robert Johnson (ii) for *The Witch*, and also new music by Matthew Locke; it proved very popular and was frequently revived. About the turn of the century new music for the play was written by John Eccles and Richard Leveridge; but the reputation of the Locke music was so powerful that when in the late 18th century the score of what was almost certainly Leveridge's incidental music was published by William Boyce, it was erroneously ascribed to Locke.

As for *The Tempest*, the Dryden-Davenant recension of the text was further altered by Thomas Shadwell; and the music for the 1674 revival was written by several composers – John Bannister, G.B. Draghi, Pelham Humfrey, Pietro Reggio and Locke, who was responsible for the instrumental numbers (separately published in 1675). In this form *The Tempest* also became extremely popular and was frequently revived. A new musical version, possibly by John Weldon, seems to have been composed about 1712 and was published in the mid-18th century when, probably erroneously, it was attributed to Purcell (see Laurie, 1963–4).

These reformed versions of *Macbeth* and *The Tempest* preluded Purcell's 'dramatic operas', among which *The Fairy Queen* (Dorset Garden, 1692) provided a vivid example of the strengths and weaknesses of that peculiar art form. The librettist (variously identified as Thomas Betterton, John Dryden or Elkanah Settle) based his text on Shakespeare's *A Midsummer Night's Dream*. Purcell's music was confined to four separate masque-like entertainments, each inserted into one of the acts; none of the surviving songs has a Shakespeare text, though the air 'The woosel-cock so black of hue' (3.i) may derive from Shakespeare. Four years after Purcell's death a similar formula was used when an adaptation of *Measure for Measure* by Charles Gildon (Lincoln's Inn Fields, 1700) had the prologue and three acts of Purcell's *Dido and Aeneas* inserted into four of its acts in the form of four musical entertainments.

In the latter part of the 17th century, an interesting musical experiment was made at the behest of Samuel Pepys. Being an admirer of the Italian *stilo recitativo*, particularly as exemplified in Davenant's *The Siege of Rhodes* (1656), he persuaded some composer in London (perhaps Cesare Morelli) to make a recitative setting of Hamlet's soliloquy 'To be or not to be'. This experiment does not seem to have had any particular sequel, and whether or not it offers evidence of late 17th-century prosodical renderings of Shakespeare is questionable.

(ii) Since 1700. During the 18th century and the early part of the 19th, drama continued to be a monopoly of the two London patent theatres; this meant that there was a long, unbroken tradition of presenting Shakespeare, often in altered versions, at Drury Lane and (after 1732) at Covent Garden. New incidental music or revisions of existing scores were frequently provided, sometimes by the theatres' resident composers. In the 18th century, for instance, new settings of many of Shakespeare's lyrics were made by Thomas Arne and William Boyce. Nothing was contributed by Handel, however, who evidently preferred Milton.

During his period as actor-manager at Drury Lane, David Garrick conceived the idea of a Shakespeare Festival. The immediate occasion was the dedication of a new town hall at Stratford-on-Avon in 1769. Garrick had been approached to donate a bust of the bard to fill the niche over the central arch on the north side of the building. The programme of the Jubilee, as it came to be called, contained a setting by Arne of an ode specially written by Garrick, and various songs and serenades by Charles Dibdin, but not a single production of a Shakespeare play. Later the same year *The Jubilee, or Shakespeare's Garland* was produced at Drury Lane as a dramatic entertainment with music by Dibdin. Garrick's Jubilee was the precursor of the Shakespeare festivals that from 1827 became regular events at Stratford-on-Avon.

The 'dramatic operas' of Purcell and his contemporaries did not carry the seeds of operatic development in them; and shortly after Purcell's death the type became extinct. But during the 18th century other types of opera flourished in different parts of Europe, and composers began to turn to Shakespeare (now beginning to be available in translations of variable worth) for libretto material. One of the earliest examples was *Rosalinda*, an *opera seria* partly derived from *As You Like It* that Paolo Rolli wrote for Francesco Veracini to set, produced (in Italian) in London at the King's Theatre in 1744. In 1786 Lorenzo Da Ponte wrote the libretto for *Gli equivoci*, a 'dramma buffo' based on *The Comedy of Errors*, and this was set by the English composer Stephen Storace, then resident in Vienna, and produced at the Burgtheater just after Mozart's *Figaro* in 1786.

At the end of the 18th century and beginning of the 19th the Romantic movement had a profound effect on all the arts, particularly music; and in Britain this was partly due to the writings of authors such as James Macpherson (Ossian), Lord Byron, Thomas Moore and Sir Walter Scott. Abroad the same British writers were equally fashionable and influential, but with the addition of Shakespeare, whose plays increasingly came to be known outside the English-speaking world through translation. This widening interest in Shakespeare came at a moment when symphonic music was passing through an important phase of development: so it is not surprising that Shakespearean music of the 19th century should often be more at home in the concert hall than in the theatre.

Mendelssohn's overture to *A Midsummer Night's Dream* (1826) was one of the earliest pieces of descriptive music specifically intended for concert rather than dramatic performance (though he later added incidental music for an actual production of the play in 1843). It was enormously successful with the public, and proved to be the first of many inspired Shakespearean pieces of the 19th century. In France, Berlioz developed an intense enthusiasm for Shakespeare and his plays. In 1830 he composed a fantasia on *The Tempest*, which later became absorbed into *Lélio*, and in 1831 an overture to *King*

Lear. A dramatic symphony on the theme of *Romeo and Juliet* followed in 1839, and later two movements of *Tristia* (1848) based on scenes from *Hamlet* – 'La mort d'Ophélie' and 'Marche funèbre'. Liszt's *Hamlet* began life in 1858 as an overture and was later rewritten as a symphonic poem. In Russia, Balakirev produced an overture to *King Lear* (1859), which led later to a set of incidental music for the play, but this was not performed or published until 1904. Tchaikovsky conformed to the Romantic convention with his fantasy overtures to *Romeo and Juliet* (1869) and *Hamlet* (1888), and wrote a fantasia on *The Tempest* (1873). Among British composers, Sullivan composed incidental music to *The Tempest* as a student exercise at Leipzig in 1861, apparently with no particular stage production in view. In 1888 he wrote an overture for Irving's production of *Macbeth* at the Lyceum. Elgar composed a remarkable symphonic study *Falstaff* in 1913.

It is difficult to be certain of the amount of music accompanying productions of Shakespeare's plays, in the theatre or broadcast, since so much of it is unpublished. But it is undoubtedly very large. *A Shakespeare Music Catalogue* (1991) lists over 20,000 items of theatrical and non-theatrical music. The 20th century especially has seen newly composed music for new productions, probably because, as Dent pointed out, 'the problem of Shakespeare music is in a certain sense the problem of all incidental music to plays. Every age must find its own solution to it'. In the late 19th century, actor-managers (notably F.R. Benson at Stratford) tended to commission arrangements of well-known (often non-Shakespearean) pieces such as Beethoven's *Coriolan*, Nicolai's *Merry Wives*, Thomas' *Hamlet* and the ever-popular Mendelssohn *A Midsummer Night's Dream*, to be played before and at appropriate moments in a play. As the Victorian approach to production began to be superseded by the more historically faithful presentations of Poel and Granville-Barker in the early years of the 20th century, so the type of music gradually changed. 'Elizabethan' music was introduced, following pioneering expositions on the subject by Wooldridge, Naylor, Fellowes and others. New composers (e.g. Vaughan Williams at Stratford, 1912–13) and arrangers (e.g. Rosabel Watson) were engaged to write specifically for productions. In the latter part of the century, Shakespeare companies have employed composers as musical directors. Guy Woolfenden (Royal Shakespeare Company, Stratford-on-Avon) has written music for the complete cycle; David Amram (New York Shakespeare Festival), Louis Applebaum (Stratford Shakespearean Festival, Ontario, Canada) and Conrad Susa (San Diego National Shakespeare Festival, USA) have also been prolific.

(iii) Operas and related music. More than 270 operas and a little over 100 operettas and musicals based on the dramatic works of Shakespeare were listed by Wilson (*GroveO*). Since then have appeared Jacobo Durán-Loriga's *Timon of Athens*, freely adapted by Luis Carandell (Madrid, 1992); Hans Gerfor's *Der Park*, a 'psychological interpretation', by Botho Straus of *A Midsummer Night's Dream* (Wiesbaden, 1992); Bibalo's *Macbeth* (Berne, 1995).

17th- and early 18th-century settings are scarce. Except for Purcell's *The Fairy Queen* (1692), which employs about 750 lines from Shakespeare's original 2100 and another 400 which are clearly derivative, other 'operas' are less Shakespearean and more dependent on Restoration 'improvements', notably by Davenant, Dryden, Shadwell and others. These include Locke's *Macbeth* (1673); Bannister's and others' *The Tempest, or The Enchanted Island* (1674); and Weldon's *The Tempest* (?1712). Continental works, such as Mattheson's *Die unglückselige Cleopatra* (Hamburg, 1704), Gasparini's *Ambleto* (Venice, 1706) or D. Scarlatti's *Ambleto* (Rome, 1715), used librettos similarly based on secondary sources far removed from the original Shakespeare. Later 18th-century operas continued to use adaptations of Shakespeare more in keeping with the theatrical trends of the day than with what we now know as the genuine product. Gotter's revision (1791) of Einsiedel's *Die Geisterinsel* (1778) – the first important German version of *The Tempest* – affirms its contemporary Singspiel mode, with its mixture of spectacle, farce, serious moralizing, magic, love and discovery. Mozart was powerfully attracted by it in 1791. Dittersdorf, who later set *The Merry Wives of Windsor* in 1796, was tempted in 1792 but demanded too many textual revisions. Fleischmann, Reichardt, Zumsteeg and Haack (1799) were less hesitant. Other Singspiel-type 'Tempests' were written to different librettos by Ritter (all 1798), Hensel (1799), Müller (1798) and Winter (1798).

As more editions and performances of Shakespeare were produced throughout Europe in the 19th century, so the number of operas increased. Librettos were still far removed from the Elizabethan original despite a growing historicist awareness. Scribe's *Tempest*, for example (rejected by Mendelssohn in 1846 but set by Halévy in 1850), incorrectly claimed authenticity. Rossini's *Otello* (1816) was long regarded as the first truly great Shakespearean opera, whose success certainly inhibited Verdi when he came to consider the subject. The libretto by Francesco Maria Berio is based on Ducis' fairly free adaptation of Shakespeare's text (without acknowledgment in early printed editions), and incorporates a happy ending in the 1819 revision. Closer to Shakespeare, though heavily romanticized and necessarily simplified, are the three masterpieces by Verdi: *Macbeth* (Florence, 1847; rev. Paris, 1865), *Otello* (Milan, 1887) and *Falstaff* (Milan, 1893). Other notable 19th-century settings include Wagner's adolescent *Das Liebesverbot* (Magdeburg, 1836) based on *Measure for Measure*; Nicolai's ever-popular *Die lustigen Weiber von Windsor* (Berlin, 1849); Berlioz's fascinating *Béatrice et Bénédict* (Baden-Baden, 1862) based on *Much Ado about Nothing*; Gounod's *Roméo et Juliette* (Paris, 1867; rev. 1888); and Thomas' stylistically diverse *Hamlet* (Paris, 1868). Bellini's *I Capuleti e i Montecchi* (Venice, 1830), long thought to be one of the most attractive 19th-century Shakespearean operas, has little if anything to do with Shakespeare's *Romeo and Juliet*.

The 20th-century has witnessed a growing sensitivity to historical correctness and textual faithfulness in many facets of the performing arts, not least in Shakespearean production. In opera, Barkworth's *Romeo and Juliet* (1916) adheres entirely to the original text; it was not, however, a success. An outstanding example of a faithful Shakespearean opera and one which, like its 17th-century forebear (not without coincidence), also preserves the ethos of its Shakespeare original, is Britten's *A Midsummer Night's Dream* (Aldeburgh, 1960). Other significant 20th-century operas include Castelnuovo-Tedesco's settings of

All's Well that Ends Well (1958) and *The Merchant of Venice* (1961); Samuel Barber's *Antony and Cleopatra* (1966; rev.1975); Reimann's *Lear* (1978); Nabokov's *Love's Labour's Lost* (1973); Bloch's *Macbeth* (1910); Orff's *Ein Sommernachtstraum* (1964); Respighi's *Lucrezia* (1937) and Britten's chamber opera version, *The Rape of Lucretia* (1946); and several by Malipiero.

A discussion of theatrical vocal treatment of Shakespeare in the 20th century would be incomplete without mention of Bernstein's memorable *West Side Story* (1957), indebted to *Romeo and Juliet*, and Rodgers's *The Boys from Syracuse* (1938), related to *The Comedy of Errors*.

There have been comparatively few Shakespearean ballets. Of that number, *Romeo and Juliet* has been the most productive inspiration, providing the basis for, among others, Lorenzo Baini's *Giulietta e Romeo* (Venice, 1785), Constant Lambert's *Romeo and Juliet* (Monte Carlo, 1926), Michel Beuret's *Juliette et Roméo* (Tours, 1986) and Prokofiev's impressive *Romeo i Dzhul'etta* (Brno, 1938; rev. Moscow, 1946). Otherwise, incidental music by Berlioz, Mendelssohn, Liszt, Tchaikovsky and their like has been used to accompany ballets.

Music specially composed to accompany Shakespeare films and television productions has resulted in some distinguished scores, notably by William Walton for *Henry V* (1944), *Hamlet* (1947) and *Richard III* (1955) – all with Laurence Olivier in the title roles – and the BBC Television Shakespeare of the 1970s and 80s involving various composers, particularly Stephen Oliver. Non-classical works such as Duke Ellington's *Such Sweet Thunder* (New York, 1957) and John Dankworth's *Shakespeare & All That Jazz* (London, 1964) have given the term 'Shakespeare music' a new interpretation.

EARLY SETTINGS OF LYRICS IN SHAKESPEARE PLAYS

near-contemporaneous settings, not necessarily used in early productions

† – *traditional songs, including ballads (others are art songs)*

MST – F.W. Sternfeld: *Music in Shakespearean Tragedy* (London, 1963, 2/1967) [p. nos. refer to 2/1967]

VSPS – P.J. Seng: *Vocal Songs in the Plays of Shakespeare* (Cambridge, MA, 1967)

As You Like It

'What shall he have that killed the deer?' (4.ii). *Music*: J. Hilton (ii), 1652[10], ed. in Brennecke, 1952, p.350. *Commentary*: Brennecke, 1952; Seng, 1959; *VSPS*, 85

'It was a lover and his lass' (5.iii). *Music*: T. Morley, The First Booke of Ayres (1600), ed. in EL, xvi (3/1966). *Commentary*: Chappell, 1855, p.205; Wooldridge, 1893, i, 114; Brennecke, 1939, p.139; *VSPS*, 89. On Shakespeare–Morley controversy see ibid., 98–100; *A Shakespeare Music Catalogue*, 1991, i, no.1423, v, pp.2683–5

Cymbeline

'Hark, hark! the lark at heaven's gate sings' (2.iii). *Music*: R. Johnson (ii), *GB-Ob* Don.c.57, ed. in EL, 2nd ser., xvii (2/1974). *Commentary*: Thewlis, 1941, p.32; Evans, 1945; Cutts, 1953, p.193; *VSPS*, 217

Hamlet

†'How should I your true love know?' (4.v). *Music*: 'Walsingham' ballad in many settings, arr. in Sternfeld, 1964, pp.8, 10; cf Simpson, 1966, p.340. *Commentary*: Chappell, 1855, p.236; Naylor, 1896, 2/1931, p.190; *MST*, 59; *VSPS*, 135

†'Bonny sweet Robin is all my joy' (4.v). *Music*: Sternfeld, 1964, p.13; Simpson, 1966, p.60. *Commentary*: Chappell, 1855, p.234; Wooldridge, 1893, i, 153; *MST*, 67–78; *VSPS*, 154

†'In youth when I did love' (5.i). *Music*: *GB-Lbl* Add.4900, ed. in *MST*, 152; Sternfeld, 1964, p.16; Simpson, 1966, p.340. *Commentary*: Chappell, 1855, p.217; Wooldridge, 1893, i, 52; *MST*, 151; *VSPS*, 158

Henry IV, pt 2

†'When Arthur first in court' (2.iv). *Music*: 'Flying fame' ballad, ed. in Chappell, 1855, p.199; Wooldridge, 1893, i, 91. *Commentary*: *VSPS*, 45; *MST*, 177

†'Do me right and dub me knight, Samingo' (5.iii). *Music*: set by O. Lassus as 'Samingo', ed. in Sternfeld, 1958, pp.105–6. *Commentary*: Dart, 1954, p.93; Cutts, *Shakespeare Quarterly*, 1956; Sternfeld, 1958; *VSPS*, 51; Greer, 1972

King Lear

†'Then they for sudden joy did weep' (1.iv). *Music*: *GB-Lbl* K.1.e.9 (MS addn to 1609[31]), ed. in Sternfeld, 1964, p.20. *Commentary*: Seng, 'Fool's Song', 1958; *MST*, 175–7; *VSPS*, 203

†'Come o'er the bourn, Bessy, to me' (3.vi). *Music*: lute arr. in *Cu* Dd.2.11, *Lbl* Add.5665, ed. in *MST*, 180–88. *Commentary*: Chappell, 1855, p.505; Wooldridge, 1893, i, 121; Stevens, 1961, p.348; *MST*, 167–71; *VSPS*, 209

Measure for Measure

'Take, O take those lips away' (4.i). *Music*: J. Wilson, 1652[8], ed. in Sternfeld, 1964, p.17. *Commentary*: Cutts, 1959, 2/1971, p.114; *MST*, 93; *VSPS*, 181

The Merry Wives of Windsor

†'Greensleeves' (2.i, 5.v). *Music*: B. Jeffery, ed.: *Elizabethan Popular Music for the Lute* (London, 1968), 11; Ward, 1990, pp.182–3. *Commentary*: Chappell, 1855, p.227; Wooldridge, 1893, i, 239; Ward, 1957, p.151; Ward, 1990

'To shallow rivers to whose falls' (3.i) [garbled excerpt from C. Marlowe, 'The Passionate Shepherd to his Love']. *Music*: lyra viol arr. by W. Corkine, 'Come live with me and be my love', The Second Booke of Ayres (1612), ed. in Simpson, 1966, p.120. *Commentary*: Chappell, 1855, p.214; *VSPS*, 164

Much Ado about Nothing

'Sigh no more, ladies' (2.iii). *Music*: T. Ford, *GB-Och* 736–8, ed. P. Warlock, *Four English Songs of the Early Seventeenth Century* (London, 1925) [connection with Shakespeare's lyric doubtful]

†'The God of love, that sits above' (5.ii). *Music*: Francis Willoughby Lutebook (*NO*), ed. in Ward, 1957, pp.164–5. *Commentary*: *MST*, 168; *VSPS*, 62

Othello

†'King Stephen was a worthy peer' (2.iii). *Music*: *MST*, 148–9; Sternfeld, 1964, p.1. *Commentary*: *MST*, 147; *VSPS*, 189

†'The poor soul sat sighing by a sycamore tree' (4.iii). *Music*: (1) *GB-Lbl* Add.15117, ed. in Sternfeld, 1964, pp.2–4; Simpson, 1966, p.789; (2) *IRL-Dtc* D.3.30, ed. in *MST*, 48–9; (3) *US-Ws* V.a.1.59, ed. in Seng, 'Willow Song', 1958, p.419; Sternfeld, 1964, p.6; (4) *NYp* Drexel 4183, ed. in *MST*, 49–52; Ward, 1966, pp.845–55. *Commentary*: Chappell, 1855, p.207; Wooldridge, 1893, i, 106; Brennecke, 1953; *MST*, 24–52; *VSPS*, 194

The Tempest

'Full fathom five thy father lies' (1.ii). *Music*: R. Johnson (ii), 1660[4], ed. in EL, 2nd ser., xvii (2/1974). *Commentary*: Long, 1955, ii; Cutts, 1959, 2/1971, p.24; *VSPS*, 256

'Where the bee sucks, there suck I' (5.i). *Music*: R. Johnson (ii), 1659[5], ed. in EL, 2nd ser., xvii (2/1974). *Commentary*: Cutts, 1959, 2/1971, p.25; *VSPS*, 271

Twelfth Night

'O mistress mine, where are you roaming? (2.iii). *Music*: (1*a*) consort arr. by T. Morley, The First Booke of Consort Lessons (1599), ed. S. Beck (New York, 1959) [Neighbour, 1978, p.145, refutes connections with Shakespeare's lyric]; (1*b*) kbd arr. by W. Byrd, *GB-Cfm* 32.g.29, ed. J.A. Fuller Maitland and W.B. Squire, *The Fitzwilliam Virginal Book* (London and Leipzig, 1894–9/*R*), i, 258–62 [listed by T. Tomkins as 'O mistris mine I must'; see Neighbour, 1978, p.145]; (2) *US-NYp* Drexel 4257 [cf P. Rosseter, 'Long have mine eyes', 1601[17]]. *Commentary*: Chappell, 1855, p.209; Wooldridge, 1893, i, 103; *VSPS*, 96; *A Shakespeare Music Catalogue*, 1991, iii, no.17758. On Shakespeare–Morley controversy see above, *As You Like It*, 'It was a lover and his lass'.

†'Hold thy peace, thou knave' (2.iii). *Music*: (1) 1609[32], ed. P. Warlock, *Pammelia and Other Rounds and Catches* (London, 1928); Long, 1955, i, 173; (2) *GB-Ckc* K C.1, ed. in Vlasto, 1954, p.228. *Commentary*: *MST*, 112; *VSPS*, 103

'Farewell dear heart' (2.iii). *Music*: R. Jones (ii), The First Booke of Songes and Ayres (1600), ed. in EL, 2nd ser., iv (2/1959). *Commentary*: *VSPS*, 106; Greer, 1990, p.213

'Hey Robin, jolly Robin' (4.ii). *Music*: set by W. Cornysh (ii), *Lbl* Add.31922, ed. in MB, xviii (1962). *Commentary*: *MST*, 113; *VSPS*, 117

THE WINTER'S TALE

†'Jog on, jog on, the foot-path way' (4.iii). *Music*: 'Hanskin' ballad, kbd arr. by R. Farnaby, *GB-Cfm* 32.g.29, ed. J.A. Fuller Maitland and W.B. Squire, *The Fitzwilliam Virginal Book* (London and Leipzig, 1894–9/*R*), ii, 494–500. *Commentary*: Chappell, 1855, p.211; Wooldridge, 1893; i, 159; *VSPS*, 235

'Lawn as white as driven snow' (4.iv). *Music*: J. Wilson, 1660[4], ed. in Cutts, 1955, 2/1971, p.20; Long, 1955, ii, 80. *Commentary*: Cutts, 1959, 2/1971, p.128; Cutts, *Shakespeare Quarterly*, 1959, p.161; *VSPS*, 240

'Get you hence, for I must go' (4.iv). *Music*: R. Johnson (ii), *US-NYp* Drexel 4175, ed. in EL, 2nd ser., xvii (2/1974). *Commentary*: Cutts, *Shakespeare Survey*, 1956; *VSPS*, 244

Shakhidi, Ziyadullo (*b* 1914; *d* 1985). Tajik composer. He was a founder of Tajik art music and an important representative of the first group of composers from the republics of Soviet Central Asia, who in the 1930s attempted to create a national art along the lines of the Russian and European traditions. Shakhidi was born and grew up in Samarkand, studied in the nationalities section of the Moscow Conservatory (1946–56), but spent the years of his creative activity in Dushanbe. The synthesis which moulds his work operates on three levels: firstly, in the conjunction of the classical music of the East and of classical Russian art (exemplified in his operas, symphonic

poems, string quartet and romances), secondly, in the combination of the traditions of Tajik folklore and Soviet popular genres (in the cantatas and more than 100 songs) and thirdly, in the unification of trends in contemporary art music with oriental *maqam* practice. This latter development is most marked in the last period of the composer's work; the *Simfoniya makomov* ('Symphony of Makoms') is rich in elements of meditative stasis and sonorous expressiveness.

Drawing on the resources of popular traditions, Shakhidi is sensitive to their different roots, be they musical folklore, hafiz art, traditional urban song or classical *shashmaqam*. His reworkings of folk material, such as *Mullo chortori* in the opera *Rabï* ('The Slaves'), renew the old melodies and render them contemporary. *Maqam* traditions of thematism and the characteristics of *garibi* wailing songs, are dramatised and undergo broad symphonic development. His essential contribution to Tajik music has been recognized and furthered by the composers of a new generation, including Firuz Bakhor, Tolib Shakhidi and Zarina Mirshaka.

WORKS
(*selective list*)

Komde i Modan (op, 3, 5 scenes, A. Dekhoti, after A. Bedil'), 1960; Pesni [Songs], 1v, chorus, pf, 1961–2; Pesni, 1v, pf (1969); Simfoniya makomov [Sym. of Makoms], 1977; Rabï [The Slaves] (op), 1980; Ogon' dushi/Zi suzi sina [The Fire of the Soul] (romance, S. Khiloli); 12 sym. poems, str qt, many cants. and songs

YELENA VLADIMIROVNA ORLOVA

Shakhnazarova [Melik-Shakhnazarova], **Nelli Grigor'yevna** (*b* Makhachkala, Daghestan, 9 Jan 1924). Armenian musicologist. She graduated from the Moscow Conservatory as a pianist (1950), and completed her postgraduate studies there in aesthetics in 1953. She obtained the *Kandidat* degree in philosophy in 1955 and the doctorate in art criticism in 1989. After teaching music aesthetics at the Conservatory (1952–4; 1956–60), and working as a senior editor for the publisher Muzïka (1955–60), she joined the State Institute for Art History (now the State Institute of Art Studies), where she gained a senior academic post in 1992. She was awarded the title of professor in 1992 and Honoured Art Worker of the RSFSR in 1995.

Shakhnazarova's scholarship is mainly concerned with theoretical and aesthetic problems associated with national characteristics in music. In her *Kandidat* dissertation (1955), she had already questioned the prevailing ideological formula of art as 'socialist in content, and national in form'; she then went on to examine the relationship between the traditions of the 'East' (Central Asia and Transcaucasia) and the West. In her book *Muzïka Vostoka i muzïka Zapada* ('Music of the East and the West', 1983) she was the first to compare typologies of professionalism in the European tradition and the 'Eastern' tradition including the areas referred to above and Arab-speaking regions. Later, in her doctoral dissertation (1988), she analyses the process by which the cultures of the Soviet East have assimilated classifications of professions from a European tradition and gives for the first time a comprehensive view of this history.

Shakhnazarova has also studied the aesthetics, theory and criticism of 20th-century music by both Soviet and non-Soviet composers. In her book on Stravinsky, Schoenberg and Hindemith (1975), she was the first author in the former USSR to publish an objective analysis of the aesthetic views of Schoenberg and of Stravinsky's *Poétique musicale*, and she has published a number of articles on contemporary Armenian composers, including Aram Khachaturian, Mirzoian and Oganesian. In her monograph *Khudozhestvennaya traditsiya v muzïkal'noy kul'ture XX veka* ('Artistic Tradition in the Musical Culture of the 20th Century', 1997) she defines artistic tradition and its underlying principles.

GRIGORY L'VOVICH GOLOVINSKY

Shaking Quakers. *See* SHAKERS, AMERICAN.

Shakubyōshi. Wooden CLAPPERS used in most Japanese court vocal genres. It consists of two thin slats, usually of boxwood, each about 36 cm long and widening from 2·5 to 3·5 cm. The narrow ends are held one in each hand, and the long edge of one slat is struck sharply against the flat surface of the other. It was supposedly created by splitting in two a symbol of court rank called a *shaku*; *byōshi* translates as 'rhythm'. The clappers are also used in Geza (off-stage) music in the *kabuki* theatre for scenes involving courtly vocal performance.

DAVID W. HUGHES

Shakuhachi. End-blown NOTCHED FLUTE of Japan. The modern standard version has four finger-holes and one thumb-hole. Originally imported from China by the early 8th century, it reappeared around the 15th century in a Japanized form and has since come to be used in several quite diverse types of music: meditative solos, small ensemble pieces, folksong and modern works by both native and foreign composers. The impressive range of the *shakuhachi*'s sound potential has been well described by Malm (1959): 'From a whispering, reedy piano, the sound swells to a ringing metallic *forte* only to sink back into a cotton-wrapped softness, ending with an almost inaudible grace note, seemingly an afterthought'.

The fundamental pitches of the standard-size (54·5 cm) instrument are approximately *d'-f'-g'-a'-c''*. A skilful player can cover about three octaves although traditional pieces rarely exceed two octaves and a fourth. Pitches in between the basic ones are produced by a combination of part-holing and embouchure. The *shakuhachi* is manufactured in a graduated series of sizes a semitone apart; the size used depends on the genre, the other performers (if any) and the personal preference of the player.

For illustration and further discussion of its history and repertory, *see* JAPAN, §II, 5.

□

Shalishim (Heb.). A musical term of uncertain meaning found in the Bible. *See* BIBLICAL INSTRUMENTS, §3(xv).

Shallon, David (*b* Tel-Aviv, 15 Oct 1950). Israeli conductor. He studied in Tel-Aviv with Noam Sheriff and in Vienna with Hans Swarowsky. Since his first success in 1980 conducting Mahler's Third Symphony with the Vienna SO, he has conducted such leading orchestras as the Berlin PO, the London SO, the Israel PO and the San Francisco SO; he has also appeared at many of the major European festivals and has conducted at leading opera houses, including Vienna, Frankfurt, Düsseldorf and the New Israeli Opera. He was musical director of the Düsseldorf SO, 1987–93, and was appointed musical director of the Jerusalem SO in 1992 and the Luxembourg PO in 1997. Shallon's repertory is wide-ranging, and he has given a number of premières, notably von Einem's *Jesu Hochzeit* (1980, Berlin). Several Israeli composers, among then Noam Sheriff, have dedicated works to him. Among his recordings are viola concertos by Bartók, Hindemith, Schnittke and Mark Kopytman, with his long-time partner, Tabea Zimmermann.

MICHAL BEN-ZUR

Shallot. In an organ reed pipe, a conical or cylindrical tube formed from a piece of brass (or, in large pipes or for special effects, turned from wood) and fitted into the block. The reed strikes against a flattened area of the shallot, filed or ground to reveal a larger or smaller aperture, depending on the tone quality and strength required. *See* ORGAN, §III, 2 and fig.18.

Shalme [shalmie, shalmuse]. *See* SHAWM.

Shalmon, Kar'el. *See* SALOMON, KARL.

Shalyapin, Fyodor. *See* CHALIAPIN, FYODOR.

Shamisen. A Japanese three-string fretless plucked lute. In the Kansai area of Kyoto and Osaka it is called *samisen* and as part of *koto* chamber music it is often known as *sangen*. Since the mid-17th century it has been a popular contributor to the music of many levels of society, from folk and theatrical forms to classical and avant-garde compositions. A *shamisen* player usually accompanies a singer; purely instrumental music occurs primarily during interludes.

For further discussion of history and genres, *see* JAPAN, §V, 6.

Shamo, Ihor' (Naumovich) (*b* Kiev, 21 Feb 1925; *d* 17 Aug 1982). Ukrainian composer. In 1941 he left the N. Lysenko Middle Music School in Kiev to study at the medical institute. In 1942 he enlisted as a volunteer in the army, and until 1946 he was a medical assistant at the front; he graduated from Kiev Conservatory in 1951 (in the class of Lyatoshyns'ky). He is a People's Artist of the Ukrainian Soviet Republic (1975), and a Laureate of the Taras Shevchenko State Prize (1976). His lyrical and patriotic songs enjoyed national popularity in their time and some have survived much longer, such as *Kieve miy* ('My Kiev') which is thought of as the unofficial anthem of the city. Hardly ever employing folk melodies, Shamo nevertheless makes extensive use of turns of phrase from Ukrainian and Russian songs, introducing them into works of various genres. In his instrumental works, which tend towards the programmatic, he succeeded in combining the accessibility of his imagery with a freshness of language, and this ensured his instrumental music almost as great a popularity as his songs. His piano suite *Kartinï russkikh zhivopistsev* ('Pictures of Russian Painters') remains in the Ukrainian teaching and concert repertory to this day. The symphonic quality of his thinking is vividly demonstrated in his lyrical – and frequently dramatic – orchestral works in which he utilizes monothematicism for structural unity. His only opera *Yatranskiye igrï* ('Yatransk Games') is original in that it is written for an a cappella chorus and a quartet of soloists and is constructed from subtly fashioned folksong sources (calendar, ritual and lyrical songs).

WORKS

Shanet, Howard (*b* New York, 9 Nov 1918). American conductor, composer and writer on music. He began his musical career as a cellist. He took the AB in 1939 at Columbia University, where he continued his studies under Lang (MA 1941, with a dissertation on the solo violin repertory before Bach). After military service (1942–6), he studied conducting with Stiedry and Koussevitzky, and composition with Martinů, Lopatnikoff and Honegger. In 1951 he was appointed conductor of the Huntington SO in West Virginia. Having taught at Hunter College, CUNY, from 1941, he joined the faculty of Columbia University in 1953 as conductor of the university orchestra and professor of music; he succeeded Jack Beeson as chairman of the music department in 1972. As a conductor Shanet is noted especially for his support of new music and of unjustly neglected works of the past; he was for a time the conductor of the Music-in-the-Making Concerts in New York and was also responsible for the première of Chávez's *Panfilo and Lauretta* and revivals of Schubert's *Die Zwillingsbrüder*, Sousa's *El capitan*, and other works. In 1975 he founded the String Revival, a string orchestra which featured both new and old music in its repertory. His publications include the widely read manual *Learn to Read Music* (New York, 1956/*R*), and *Philharmonic: a History of New York's Orchestra* (New York, 1975, 2/1998), the standard work on the subject. He has also published articles on subjects including Bach's transpositions and Bizet's 'suppressed' symphony. His compositions include *Allegro giocoso* (for string quartet, 1942; for string orchestra, 1987), two marches for military band (1944) and *Variations on a Bizarre Theme* for orchestra (1946). His reconstruction of Gottschalk's *Night of the Tropics* enjoyed wide popularity during the 1960s and 70s in André Kostelanetz's broadcasts and recordings.

PIERO WEISS

Shanghai. City in the People's Republic of China. The most populous city in China, Shanghai's rise to commercial and cultural prominence is fairly recent, dating from its selection in the mid-19th century as a treaty port open to foreign traders. The traders brought with them their own families, officials, soldiers, architects and missionaries. Meanwhile, foreign and Chinese entrepreneurs established numerous factories and shops, drawing in huge numbers of rural migrants as labour. Until World War II, Shanghai was still divided into a Chinese city and a number of foreign concessions, each of which had its own government, police force and legislation. The heterogeneous mixture of Shanghai's population (Chinese as well as foreign) and its rapid growth to become China's leading port was, and still is, reflected in the city's vibrant and diverse cultural life. For instance, Western theatre, opera and symphonic music were performed in Shanghai long before they were seen elsewhere in China. The local Chinese-language newspaper *Shen bao* of 24 February 1874 described a Western opera performance to curious Chinese readers: 'The performers came and went from [the stage], . . . sometimes speaking, sometimes singing . . . and the Western audience clapped their hands and stamped their feet, smiling at each other.'

Incoming Western and rural forms cross-fertilized in novel ways. In the 1930s, for example, traditional *shenqu* opera troupes adapted stories from Shakespeare and from popular Hollywood films. Apart from *shenqu* (now *huju*; both terms translate as 'Shanghai opera'), Shanghai was an important centre for Beijing opera (the so-called 'Southern School' was located here), *yueju* opera from Shaoxing in nearby Zhejiang Province, Suzhou *tanci* narrative singing, Shanghai narrative singing and Jiangnan *sizhu* ensemble music. Other than traditional-style square teashop-theatres, Shanghai saw the introduction to China of Western-designed stages, of which the most significant example is the Shanghai New Stage Theatre (Shanghai Xinwutai), built in 1908. Many of the styles mentioned above were also performed in large, multi-stage entertainment centres constructed from the 1910s onward, of which the Great World (Da Shijie) is the most famous example and remains in use today.

Shanghai was the centre of China's entertainment music, broadcasting, gramophone and film industries, at least until the 1950s. Local branches of international companies such as Victor and Pathé issued many recordings, and a number of composers specialized in the composition of film and other entertainment music for these new contexts, most notably Li Jinhui (1891–1967). After 1949 these factories were amalgamated to become a major branch of China Records, which still produces many recordings in Shanghai each year. Small musical instrument workshops were similarly nationalized and combined into larger state-run factories. Apart from producing Western instruments, Shanghai-based factories have developed many novel designs of traditional Chinese instruments for the new orchestra of Chinese instruments.

The performance of Western orchestral music in Shanghai has been traced back to 1879, when foreign residents formed a small orchestra for their own entertainment. Initially, Chinese musicians were excluded from the orchestra, the first to gain acceptance being violinist Tan Shuzhen in 1927. The orchestra, now named the Shanghai SO (Shanghai Jiaoxiangyuetuan), is composed entirely of Chinese musicians. Two other orchestras are prominent in the city's musical life, the Shanghai National Music Orchestra (Shanghai Minzuyuetuan, a Chinese-instrument ensemble) and the Shanghai PO (Shanghai Yuetuan), both of which were founded in 1952. The city also supports ballet and opera companies, which commission

new pieces by Chinese composers as well as perform standard Western works. The major biennial Shanghai Spring Festival has drawn in ensembles from many other parts of China, further diversifying the cultural life of the city.

Many performers in Shanghai's ensembles trained at the Shanghai Music Conservatory (Shanghai Yinyue Xueyuan), which opened in 1927. Currently, the conservatory supports departments of composition and conducting, musicology, orchestral instruments, piano, traditional instruments and voice. Undergraduate degree-level studies take four or five years to complete, many students entering the conservatory after graduating from its special attached primary and secondary schools. Much specialist scholarship is produced by members of the conservatory's Institute of Music Research, who also train postgraduate musicologists, and performances and workshops by foreign musicians are frequent. The journal *Yinyue yishu* ('Art of music') is published by this institution. A musical instrument factory and museum is also maintained by the conservatory, as is an extensive library and recording archive. Further valuable recordings are preserved in the Shanghai Library.

In recent decades disco and karaoke have become prominent features of the city's night life, and few hotel bars or restaurants are now without laserdisc technology. Live bands are also common, and the rise of television and changing patterns of leisure and employment have reduced audiences at many traditional or Western classical music performances from the huge numbers reported in the late 1970s and early 1980s. This has forced some ensembles to put on fewer performances or lay off performers, but these forms of music retain their popularity among certain segments of society, and Shanghai's musical life remains both active and diverse.

Shank. In brass instruments, a short length of independent tubing inserted into the leader-pipe of the mouthpipe in order to adjust the pitch. Shanks may be used with instruments that lack other provision for tuning, such as the bugle and older forms of trumpet. Shanks also have, or originally had, the function of a crook in cases where the required length of tubing is too short to be coiled: thus the 'B♭ shank' still used with some cornets (and formerly accompanied by a longer shank for A) is historically the last relic of a full set of crooks. In the manufacture of brass instruments, the term 'shank' also denotes a short length of tube, with reversed taper to receive the mouthpiece stem, which is joined to the mouthpipe under a strengthening ferrule or 'chemise'; it can also denote other short tubes required in the manufacture.

ANTHONY C. BAINES

Shankar, Ravi (*b* Varanasi, 7 April 1920). Indian *sitār* player and composer. After spending the first decade of his life in Varanasi, Ravi was taken by his eldest brother Uday to his headquarters in Paris to participate in his dance company. There and in extensive world tours until 1938 he came to know and hear many of the great composers and musicians of that time, experiences which would help him to bridge cultural gaps between India and other nations in his adult years. In 1935 Uday Shankar invited the performer and teacher '*Baba*' Allauddin Khan to tour Europe for one year as a soloist with the troupe. During this tour Allauddin Khan initiated Shankar's formal training in Indian classical music. In 1938, Shankar left the troupe and his dancing career to undergo seven and a half years of rigorous training under Allauddin Khan's strict tutelage in the traditional *gurūkul* system at Maihar, where Khan served as the chief court musician of the Maharaja. There Shankar learnt the SITĀR, the *sūrbahār* and the forms of *dhrupad-dhamār* as well as the techniques of the *bīn*, the *rabāb* and the *sursiṅgār* in the style of the *Seniā gharānā* of Tansen, the legendary musician of the Mughal emperor Akbar's court.

He began his career of solo concert performance on the *sitār* in 1939 and quickly rose to the forefront of young artists (see illustration). His *sitār* style was distinct from

Ravi Shankar playing the sitār

those of his contemporaries. Drawing inspiration from the rhythmic practices of South Indian classical music, Shankar fashioned a unique approach to elaborating the Indian rāga system. He synthesized his knowledge of numerous instrumental and vocal genres gained during the broad-based training that he received from his *gurū* to develop a distinctive approach to the concert format. In his repertory he maintains a *dhrupad* approach to the solo *ālāp-joṛ-jhālā*, a *khayāl*-inspired approach to slow instrumental compositions (*vilambit gat*), and a late-19th century instrumental approach to fast compositions (*drut gat*). Beyond this core of his repertory, Shankar draws heavily on the light-hearted and erotic themes of *ṭhumrī* in the closing numbers of his performances. During the formative stages of his career, Shankar contributed to the development of new technical practices on the *sitār*, modifying the instrument in consultation with Nodu Mullick, who was later to manufacture several *sitārs* of high tonal quality for Shankar. He perfected the elaboration of the bass octave on the *sitār*, a depth of range that few *sitār* players had included on their instruments prior to Shankar's popularization of this within his *ālāp*. He developed a new right-hand plectrum (*mizrāb*) technique that allowed for greater clarity and an increased dynamic range. Shankar also helped to popularize a duet style of performance known as *jugal-bandī* that paired the *sitār* with the *sarod*. He has added several new rāgas to the Hindustani system including Tilak Śyām, Parameśvarī, Naṭ Bhairav, Ahīr Lalit, Bairāgī and Cārukauṃs.

In 1949 Shankar was appointed director of music by All-India Radio and served as composer-conductor for its newly proposed instrumental ensemble (*vrinda vādya*). He stayed there until 1956, when he began making frequent visits to the United States and Europe. During his late seventies he continued to give between 25 and 40 concerts annually around the world as India's most sought-after classical musician. His liberal outlook brought him into musical collaborations with a diverse set of musicians including the former Beatle George Harrison, who also became Shankar's student, Yehudi Menuhin, Zubin Mehta and Philip Glass. He composed music for several films, including Richard Attenborough's *Gandhi*, for which he received an Academy Award nomination. He composed music placing his *sitār* in combination with the Western orchestra in two concertos and has composed and improvised music combining the *sitār* with the Western flute and the Japanese *koto*. Among his thousands of compositions for solo instruments, voice and ensembles is his melody for the popular national song of India, 'Sāre jahā se acchā . . .', and his CD *Chants of India*.

Shankar has received numerous titles, honorary doctorates and other accolades including the highest award bestowed by the Government of India on an artist, the Padma Vibhusan, and the highest award bestowed on an individual by the Government of Japan, the Praemium Imperiale. He was nominated to the Rajya Sabha of the Parliament of the Government of India in 1986. He is an honorary member of the American Academy of Arts and Letters and a member of the United Nations International Rostrum of Composers. In 1997 he was named a regent's professor at the University of California.

Shankar, Uday (*b* Udaipur, 8 Dec 1900; *d* Calcutta, 26 Sept 1977). Indian dancer and choreographer. He was the eldest son of Pandit Shyam Shankar Choudhury and the elder brother of the *sitār* player and composer RAVI SHANKAR. He showed a strong interest in the performing and expressive arts during his childhood, performing his own interpretations of the traditional dances of Rajasthan and staging magic shows for his family and friends. In 1918 he began to study art at the Sir J.J. School of Art in Bombay. At the request of his father, who had moved to London in the services of the Maharaja of Jhalawar, Shankar enrolled in the Royal College of Art in London in 1920. Sir William Rothenstein, the Principal of that institution, took an interest in Shankar, advising him to study the Indian paintings housed in the British Museum. Shankar's earlier attraction to dance was nurtured by his growing understanding of the movements he found represented in the artworks which he studied. Soon after graduating in 1923, Shankar was selected by the Russian dancer Anna Pavlova to play Kṛṣṇa in the Rādhā-Kṛṣṇa ballet in which she portrayed Rādhā. This role brought Shankar instant celebrity, and he then set out on his own to pursue a career as a dancer. His early tours throughout Europe included concerts in major cities such as Berlin, Vienna and Budapest and featured dances based on Indian themes set to music played on Western instruments. Most of his dance partners during this early period were European women, the most well-known being Simone Barbier, whom Shankar renamed Simkie.

In 1929 the Swiss sculptress Alice Boner funded Shankar's extensive tour of India during which he viewed many of India's works of art in places such as Ajanta, Ellora and Konarak. Shankar established a studio in Calcutta and began the process of 'authenticating' his performances with the inclusion of traditional Indian music and musical instruments as well as themes drawn from Hindu mythology and movements from the classical dance traditions of India. He returned to Europe with Simkie, his mother, three brothers and a cousin forming the core of his dance troupe and Timir Baran Bhattacharya, a *sarod* disciple of the legendary Allauddin Khan, as his music director. On 3 March 1931 Shankar premiered the creative accomplishments of the transformed dance company at the Théâtre des Champs-Elysées. By the end of 1932, Shankar's troupe had given 369 performances throughout Europe. In the same year the American impresario Sol Hurok brought the troupe to the United States, where Shankar's performances were received enthusiastically.

The next phase in Shankar's career was also initiated with the largesse of a Western benefactor. Leonard Elmhirst of Dartington Hall provided Shankar with the funds needed to establish a Centre for Dance and Music in India, and Shankar also received support from other prestigious individuals such as Rabindranath Tagore and Jawaharlal Nehru. The Uttar Pradesh government donated land for the enterprise, and in 1939 the school opened in the Himalayan resort of Almora. Many of the most respected musicians and dancers of India joined its faculty. While overseeing the activities of the school in Almora, Shankar married Amala Nandi, who had joined the troupe in its early days. The Almora school soon ran into financial difficulties and was forced to close in 1944. Shankar resettled in Calcutta and produced a film, *Kalpana*; initially a financial failure, it was soon recognized for its artistic merits and later won several international awards.

Shankar remained active in creating new ballets in India and in undertaking international tours in the 1950s

and 60s. He eventually resettled in Calcutta and once again formed a new dance troupe. On the occasion of Rabindranath Tagore's centenary he produced the ballet *Samanya Kshati*, based on one of Tagore's poems and with music composed by his brother Ravi. Uday Shankar's health began a severe decline in 1969. After his death, Shankar's children Ananda and Mamata continued their father's creative and experimental approach to dance through new multimedia productions during the 1980s and 90s, but the family tradition suffered a debilitating setback with the death of Ananda in April 1999.

Uday Shankar is remembered for his eclectic approach to dance; he respected and blended together the formalized structures of the various classical dance traditions of India but professed allegiance to none of them. Instead he struck out alone to reinvent the cultural heritage of South Asia by creating a new dance form that sought its inspiration in what he perceived to be the Indian essences of the expression of emotion in movement. Shankar also deserves recognition for having taken numerous Indian musicians to the West; he prepared the way for the internationalization of India's classical music traditions by exposing thousands of Westerners to Indian music and educating many Indian musicians in the ways of the professional show business world of the West.

STEPHEN SLAWEK

Shanty [chanty, chantey]. A work song used by sailors to coordinate effort and lighten labour aboard ships powered only by human muscles and the natural elements. Shanties consisted mainly of solo leads and roaring choruses said to be audible up to a mile away. Such songs can be traced back to ancient times, but few texts and no tunes have survived from before the 19th century. The word is obscure in origin and dates from the 1850s.

The spread of steam power at sea ended the need for shantying, but as early as 1900 the songs were revived ashore for use on the concert platform and in schools, a feeble echo of their old wildness and vigour. A second revival, however, starting in the 1950s and drawing inspiration from the last surviving shantymen, produced performances whose salty zest would have been instantly familiar to the sailors of a century earlier.

1. Origins. 2. Derivation. 3. Texts and tunes. 4. Categories. 5. Revival and survival.

1. Origins. Ever since seafarers pulled together at oars or hauled on ropes they seem to have galvanized their muscles and distracted their thoughts with some kind of vocal activity, ranging from grunts, yelps and exhortations to chants or songs. In the 5th century the goatherds Daphnis and Chloe watched a passing ship on the Aegean and noticed that just as 'other Marriners used to do to elude the tediousness of labour, these began [to sing], and held on as they rowed along. There was one amongst them that was the Celeustes, or the hortator [encourager] to ply, and he had certain nautic odes or Sea-songs: the rest like a Chorus all together strained their throats to a loud holla, and cacht his voice at certain intervals' (Lloyd, 1967, p.288). Viking vessels of the 7th century are known to have carried an officer whose task it was to lead a chant for the oarsmen. Over 1000 years later Samuel Johnson (*A Journey to the Western Isles of Scotland*, 1775, ed. R.W. Chapman, London, 1970, p.56) observed during a visit to Scotland:

> They accompany in the Highlands every action, which can be done in equal time, with an appropriate strain, which has, they say, not much meaning; but its effects are regularity and cheerfulness. The ancient proceleusmatick [inspiriting] song, by which the rowers of gallies were animated, may be supposed to have been of this kind.

The earliest known English sea song survives in a 14th-century manuscript describing a pilgrim ship's voyage to Santiago de Compostela. It contains several expressions, including 'Howe, hissa', 'Y how, taylia' and 'Y howe, trussa', encouraging those pulling on ropes (preface to J. Ashton, *Real Sailor-Songs*, London, 1891). Similarly, when Felix Fabri, a Dominican friar, sailed from Venice on a pilgrimage to the Holy Land in 1493 he noticed 'mariners who sing when work is going on, because work at sea is very heavy, and is only carried on by a concert between one who sings out orders and his labourers who sing in response' (Hugill, 1969, p.3). In shouting instructions above the noise of the storm in Shakespeare's *The Tempest* (Act 1 scene i) the boatswain calls: 'Heigh, my hearts! Cheerly, cheerly, my hearts! Yare, yare! Take in the topsail'. Andrew Shewan, a clipper captain who first went to sea in 1860, listed very similar phrases, such as 'Heave, my hearties', 'Cheerly, lads' and 'Rouse him up', while 'at the main sheet it would be "Oh, lug him a-lee!"; at the main tack such a phrase as "Board him in the smoke, boys!"; or, when setting a stunsail, "Boom end her!" All these might be called "sea cheers"' (A. Shewan: *The Great Days of Sail*, London, 1927, p.108).

When 'sea cheers' failed to produce sufficient effort, something more substantial was needed. One of Richard Hakluyt's manuscripts, published by Samuel Purchas only a dozen years after *The Tempest*, records that 'when mariners do hale or pull at anything they do make a noise, as it were crying ha woet hale men hale' (Laughton, 1923, p.48). This device, later known as 'Yo-ho-ing' or 'Yo-heave-oh-ing', also had limited power, however, as R.H. Dana (1840) described: 'Many a time when a thing goes heavy with one fellow yo-ho-ing, a lively song, like *Heave to the girls*, *Nancy oh!*, *Jack Crosstree*, &c., has put real life and strength into every arm'.

The earliest notated British shanty texts (tunes were not written down until over 400 years later) are found in a polemical work ascribed to Robert Wedderburn, *The Complaynt of Scotland* (1548), which includes a description of a ship's departure from the Firth of Forth. Scraps of various shanties are quoted, for example as the anchor is raised and then secured:

> than the marynalis began to veynd the cabil, vith mony loud cry. ande as ane cryit, al the laif cryit in that samyn tune .... and as it aperit to me, thai cryit ... veyre veyra, veyra veyra. gentil gallādis, gentil gallādis. veynde i see hym, veynd i see hym. pourbossa, pourbossa. hail al ande ane, hail al and ane. hail hym up til us, hail hym up til us. Than quhen the ankyr was halit up abufe the vatir, ane marynel cryit, and al the laif follouit in that sam tune, caupon caupona, caupon caupona. caupun hola, caupun hola. caupun holt, caupon holt. sarrabossa, sarrabossa. than thai maid fast the schank of the ankyr.

2. Derivation. After such early examples, references to shantying disappear for some centuries, perhaps because it was deemed too commonplace to be worthy of remark. When allusions are found again in the 19th century they still do not include the words 'shanty' or 'shantying'. In 1811 dockers in Jamaica using a capstan to unload a

vessel sang 'an English song . . . at the end of which all the rest join in a short chorus' (Hay, 1953, p.201). 20 years later a passenger travelling from London to the Orient aboard an East Indiaman hears 'old ditties' sung at the capstan (Doerflinger, 1951). In 1837 Frederick Marryat, a former naval captain and a novelist, travelled from Portsmouth to New York as a passenger on the *Quebec*. 'The seamen, as usual', he wrote in his diary, 'lightened their labour with the song and chorus, forbidden in the etiquette of a man-of-war. . . . The one they sung was particularly musical, though not refined; and the chorus of 'Oh! Sally Brown', was given with great emphasis by the whole crew between every line of the song, sung by an athletic young third mate'.

Dana (1840) listed 11 shanties by title and described shantying in detail, though without using either word: 'The sailors' songs for capstans and falls are of a peculiar kind, having a chorus at the end of each line. The burden is usually sung by one alone, and at the chorus all hands join in – and the louder the noise the better'. A few years later Charles Nordhoff described how his ship was loaded with cotton at Mobile Bay (Doerflinger, 1951). Many of the stevedores (otherwise known as hoosiers or cotton-screwers) were sailors who preferred to spend their winters doing such work rather than going to sea. Nordhoff observed:

> Singing, or *chanting* as it is called, is an invariable accompaniment to working in cotton, and many of the screw-gangs have an endless collection of songs . . . answering well the purposes of making all pull together, and enlivening the heavy toil. The foreman is the *chanty-man*, who sings the song, the gang only joining in the chorus, which comes in at the end of every line, and at the end of which again comes the pull of the screw handles.

This account, published in 1856, predates the *Oxford English Dictionary*'s first record of 'shanty' (1869) and 'shanty-man' (1876). While the dictionary suggests that 'shanty' may be a corruption of the French *chantez* (from *chanter*, 'to sing'), the English word 'chant' could be the root of 'chanty' and 'shanty'. The latter pronunciation has also given rise to the theory first advanced by R.R. Terry, based on his own observations in the West Indies during the 1890s, where he saw what he calls the 'very ancient custom' of resiting huts:

> The object moved was a *shanty*; the music accompanying the operation was called . . . a *shanty* tune; its musical form (solo and chorus) was identical with the sailor *shanty*; the pulls on the rope followed the same method which obtained at sea; the soloist was called a *shanty*man; like the shantyman at sea he did no work, but merely extemporized verses to which the workers at the ropes supplied the chorus.

Another idea suggests a connection with the Canadian lumberjacks, who in the early 19th century were known as 'shantyboys'. This seems more likely to have stemmed from the shanties in which they lived than from their songs, but they did accompany with solo and chorus singing their work of floating great rafts of logs down the rivers in spring. The French-speaking *voyageurs* who travelled the same rivers with similar songs have also been put forward as a possible source of the word but this seems unlikely: their contact with the wider world, like that of the lumberjacks, was very restricted.

3. TEXTS AND TUNES. Shanties were subordinate to the tasks they accompanied. The command 'belay' (known as the shanty full-stop) or 'avast heaving' put an instant end to both work and singing. Solo lines (but not choruses) were often coarse and sometimes obscene, and shantymen might disguise offensive lyrics in deference to passengers or the captain's wife. For example, in the couplet 'Oh Sally Brown [or 'Shenadore'], I love your daughter, And I love the spot where she makes water', the second line could be varied to: 'And I love the place where first I sought her'. Few of the uncamouflaged words, even now, have been published.

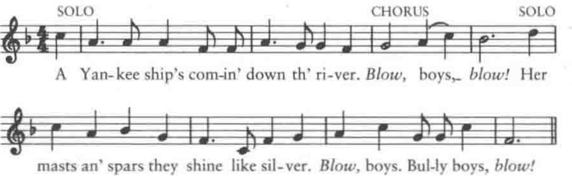
A good shantyman was expected to improvise. He would also borrow verses from different shanties and adapt entire songs to his purposes. British, Irish, West Indian and American seamen all brought material to the common stock, some of it drawn from traditional repertories ashore and some from popular contemporary songs. The capstan shanty *Whoop Jamboree*, for example, started life as one of *White's Ethiopian Melodies*, published in 1851.

Ex.1 Windlass or capstan shanty, *Storm Along*, sung by John Perring, Dartmouth, Jan. 1908 (Grainger, *JFSS*, 1908)

From the hoosiers of the American south sailors picked up songs such as *General Taylor*, *Mobile Bay* and *Roll the Cotton Down*. The 30 versions of *Blow the Man Down* noted by one collector combined the texts of two 'forebitters' or sailors' off-duty songs (*Ratcliffe Highway* and *Tiger Bay*), two traditional songs (*The Farmer's Curst Wife* and *Windy Old Weather*), a broadside (*The Indian Lass*) and four other shanties (*Knock a Man Down*, *The Black Ball*, *The Flying Fish Sailor* and *The Ship 'Neptune'*) (Carpenter, 26 July 1931, p.10). Chaotic though it may be, the shanty corpus provides a vivid picture of sailors' life ashore and afloat, ranging from accounts of sordid encounters in dockside dives to stirring evocations of real or mythical heroes such as Napoleon or Stormalong.

In 1908 Percy Grainger met John Perring of Dartmouth, whom he described as a 'Genius Sea Chanty singing man', who recalled the days when ships' captains vied with one another to sign on the best shantyman. Grainger transcribed several fine shanties, including *Storm Along* (ex.1), in meticulous detail, and was struck by the 'wayward, random impulsiveness, and profuse melodic, rhythmic and dynamic variations' of Perring's singing (Grainger, 1908, p.231). Many shanties, with their opportunities for virtuoso singing such as this, show modal influence. The well-known *Drunken Sailor* is in the Dorian mode, as are versions of *The Plains of Mexico*, *Bring 'em Down* and *Lowlands Away* (the last, like a number of other Dorian tunes, having no sixth, in both its major and its minor-key versions). *Haul away for Rosie* is Mixolydian, and others are Aeolian in at least one version, such as *Randy Dandy O*, *The Hog-eye Man* and *Shenandoah* (the last again lacking the sixth degree). *Sally Brown* swings between minor and tonic major, with a passing Mixolydian inflection in an otherwise major section. *A-rolling Down the River* (also known as *The Saucy 'Arabella'*) (ex.2) passes through three different keys and finishes a tone lower than it began. Often shanties do not end on the tonic, creating an 'unfinished' effect; examples include

Ex.2 Capstan or pumping shanty, *A-rolling Down the River* (Hugill, 1961)



Goodbye, Fare Ye Well (also known as *Homeward Bound*), which modulates to the dominant in the final bar. Most shanties were in cheerful major keys, however, and modal and minor-key melodies tended also to evolve towards the major mode. They seem, nevertheless, to have cast a lasting spell over generations of sailors, and some, such as Grainger's setting of Perring's *Shallow Brown*, can be almost unbearably beautiful.

4. Categories. Shanties fall into two main groups: those for use at the windlass or capstan, and those for hauling on ropes, although the boundaries are by no means rigid.

The windlass had a horizontal barrel turned by levers that were moved up and down. The capstan, a later development, was an upright version of the same device, powered by men who shuffled round in a circle, pushing bars as they went. The boast of a good shantyman was that his singing supplied 'the best bar of the capstan'. The windlass or capstan was used to weigh anchor, to warp a ship alongside her berth, or to raise heavy objects such as a spar or an item of cargo. Songs tended to be quite long, and singing continued throughout a spell of work. Windlass shanties such as *Sally Brown* and *Storm Along* consisted, much like halyard shanties, of four-line stanzas with alternating solo and chorus lines. The last note in a shantyman's line would invariably overlap with the chorus's first note; the shantyman would then re-enter on the chorus's last note, and so on throughout. Although windlass shanties were taken over for use at the capstan, with many like *Shenandoah* and *We're All Bound to Go* retaining the familiar double solo-chorus pattern, others added a further four-line chorus. *The Banks of Sacramento* does this, while *A-rolling Down the River* adds two.

Shanties for hauling on ropes also used a four-line stanza with alternating solo and response. Although all the men involved sang the choruses in a halyard shanty as they hoisted a yard up the mast, they pulled only twice in each case. In *Blow, Boys, Blow* they pulled on the words italicized in ex.3. 'Hand over hand' songs such as *Sally*

Ex.3 Halliard shanty, *Blow, Boys, Blow* (Bone, 1931; Sailors pull on italicized words)

Racket, used for hoisting a light sail, went to a quicker rhythm and had verses of four solo lines alternating with four choruses, on each of which there was one pull: '*Haul* 'em away'. With a bowline or foresheet shanty such as *Haul Away, Joe* or *Haul on the Bowline* the concerted pull came only once, on the last word of the chorus: 'Haul on the bowline, the bowline, *haul*'. Since there was no shantyman aloft when sails were furled, the men would simply sing in unison. Standing on a swaying footrope, perhaps in half a gale, they would cling to the yard with one hand and grasp a fistful of canvas in the other just as they reached the end of each two-line stanza: 'To me way, ay-ee ay, ya!/We'll pay Paddy Doyle for his *boots*'. Unison singing applied, too, though without any particularly emphasized words, in 'stamp and go' songs like *The Drunken Sailor*, when a gang of men would pick up a

rope and run along the deck with it. The manoeuvre took place when the ship went about or a boat was hoisted inboard.

After a month at sea, when the men had worked off their advance in wages, they would sing *The Dead Horse* and raise to the main yardarm an effigy made of scraps of wood, canvas and perhaps a barrel which was then ceremonially dropped into the sea. The same shanty could be heard in ports of the west coast of South America when the last bag of salt petre came aboard before a vessel sailed for home.

For pumping, depending on the type of machine used, windlass or capstan shanties usually served. At the end of a voyage, as a ship was pumped out for the last time or the capstan was manned to warp alongside, the customary choice would be *Leave her, Johnny*, with its bitter criticisms of officers and ship:

> Oh the captain was a bastard and the first mate was a turk,
> Leave her, Johnny, leave her;
> And the bosun was a bugger with the middle name of work,
> It's time for us to leave her.

5. Revival and survival. As early as 1884 a newspaper article lamented: 'The beau-ideal chanty-man has been relegated to the past. His death-knell was the shriek of the steam-whistle and the thump of the engines' (L.A. Smith, 1888, p.5). Three years later the first of many anthologies of shanty texts with their tunes appeared. Haswell's *Collection of Sea Shanties* was published on board ship in Australia in 1879, and as early as 1841 two shanties with music had been included in Olmstead's account of a whaling voyage. Nostalgia stimulated an appetite for memoirs of sailors' lives at sea, and many of these included accounts of shantying. Folksong collectors, too, began to take an interest: Frank Kidson noted a shanty in 1893, Cecil Sharp followed suit with 150 more obtained from retired sailors, while Anne Gilchrist, Percy Grainger and several others found further material.

Sailors had seldom sung shanties ashore, but now landsmen started to take them up, with bowdlerized words and prettified styles of delivery. In 1905 John Masefield, noting that he had 'heard chanties sung upon the stage both in this country and America', complained that 'they were not in the least like the real thing'. The same could have been said for the next half-century of the 'folk-chanteys' set to piano accompaniment by Cecil Sharp that were sung in schools or on the concert platform.

The folksong revival of the 1950s, led by Ewan MacColl and A.L. Lloyd, encouraged the search for a more authentic style of singing shanties and less inhibited texts. Several sailors who had sung shanties at sea were traced and recorded in the 1960s, including Paddy Walsh, a Liverpool Irishman, and Stanley Slade of Pill, near Bristol. The most influential figure, though, was Stan Hugill, an accomplished singer who had served as a shantyman and produced an authoritative book on the subject (1961).

With such models available it proved possible to revive the singing styles of the original shantymen sailors of a century earlier. Although some modern performers have sung as they worked aboard sailing ships at sea, shanties are now overwhelmingly an entertainment and a recreation for people ashore. By a quirk of cultural history the songs of 'the sailor, the stoker of steamers, the man with the clout, / The chantyman bent at the halliards putting a tune to the shout, / The drowsy man at the wheel and the tired look-out' (Masefield) seem destined for a long life on land.

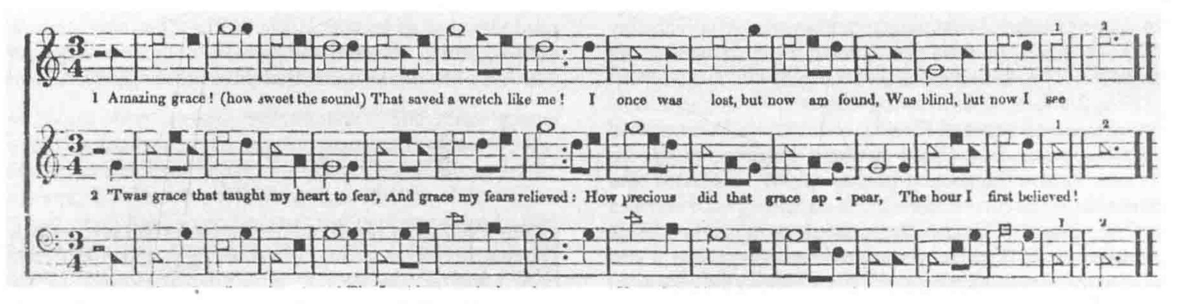
Shape-note hymnody. A body of rural American sacred music published in any of several musical notations in which a note head of a certain shape is assigned to each of the solmization syllables *fa*, *sol*, *la*, *mi* (in the four-syllable 'fasola' system) or *do*, *re*, *mi*, *fa*, *sol*, *la*, *si* or *ti*. Most shape notations (also sometimes called 'buckwheat', 'character' or 'patent' notations) employ key signatures, deploy the notes on a five-line staff and use the rhythm signs of conventional notation (*see* NOTATION, §III, 5, fig.151). They are intended to help singers with little musical expertise to sing at sight without having to recognize pitches on the staff or understand the key system.

1. Repertory and practice. 2. Four-shape tune books. 3. Seven-shape tune books. 4. Shape-note gospel hymnody. 5. After 1924.

1. REPERTORY AND PRACTICE. The shape-note tradition originated early in the 19th century and flourished among many whites and some blacks, particularly in the South and Midwest, where it still survives, and furnished the principal printed sources of folk hymns and white spirituals. A later 19th-century offshoot formed an important branch of white gospel music.

Much of the music in the shape-note hymnbooks was written by the late 18th-century singing-school composers of New England, who also introduced the practice of including a pedagogical preface to a tune book, and were responsible for its oblong format. To the New England repertory of psalm and hymn tunes, fuging-tunes, set-pieces and anthems the shape-note hymnbook compilers made a significant addition – folk hymns and spirituals drawn from oral tradition. All these types of music were set for three or four voices, with the principal melody in the tenor and the other parts composed quite independently to produce a rugged, harmonically crude, 'archaic' style that has reminded some (e.g. Seeger, 1940) of medieval polyphony. The first shape-note tune book to contain a sizable number of folk hymns and to influence later tune books published in the American South and West was the *Repository of Sacred Music, Part Second* (1813/*R*) compiled by John Wyeth.

Shape-note collections not only preserved the 18th-century New England repertory (when it had given way in New England to other kinds of psalmody) and introduced into print a large body of folk melodies, they also became the means of imparting to many generations the pleasures of choral singing by note and of sharing a rich repertory of Anglo-American music. Indeed, the practice of shape-note hymnody was more social and recreational than liturgical; the title-pages of the hymnbooks often emphasize their nondenominational character, and, from very early, groups met in 'singings' apart from worship services. Some singings were informal meetings of small numbers from a single parish or town, held perhaps one evening a month (often a Sunday); others were larger-scale, annual events which functioned as religious services, lasting for many hours and attracting perhaps as many as 100 participants; largest of all, and least numerous, were annual 'conventions' lasting two days (often Saturday and Sunday) or even longer, and attracting singers by the hundreds.



Characteristic of shape-note singings, which persist to this day, are the disposition of the singers in the form of a hollow square; unaccompanied performance, with trebles and tenors often doubling each others' parts; and the rotation among various singers of the responsibility for choosing the work to sing next, setting its pitch and leading the group (usually first singing the solmization syllables, then a second time with the text).

2. FOUR-SHAPE TUNE BOOKS. The first shape-note system to gain acceptance was that in *The Easy Instructor* of William Little and William Smith (1801), based on four-syllable or 'fasola' solmization (ex.1). Another experi-

Ex.1 Shape-note system based on fasola solmization

menter, Andrew Law, developed systems of staffless shapes which he used in tune books published between 1803 and 1819. The appearance of these tune books coincided with a significant migration of settlers into the South and Midwest, and shape-note publications ap-

1. Four-shape notation in 'Amazing Grace' from William Walker's 'The Southern Harmony and Musical Companion' (Philadelphia, 5/1854)

peared in the centres along the routes of travel. Wyeth, an editor and printer in Harrisburg, Pennsylvania, published the *Repository of Sacred Music* (1810) for settlers passing through to the new lands; modelled on Isaiah Thomas's extremely successful *Worcester Collection* (1786) and Andrew Adgate's *Philadelphia Harmony* (1789), it contained anthems, psalm tunes and fuging-tunes of the New England composers. The *Repository of Sacred Music, Part Second*, for which Wyeth's musical adviser was the Methodist minister Elkanah Kelsey Dare, included many folk hymns in addition to the earlier repertory. After 1813 shape-note publications appeared in three areas. The first stretched westwards from the Shenandoah Valley, Virginia, and Cincinnati to St Louis; the second, the centre of German-language shape-note hymnody, lay between the Shenandoah Valley and the city of Philadelphia; and the third was further south, embracing South Carolina and Georgia.

The first southern shape-note tune book was Ananias Davisson's *Kentucky Harmony* (1816), which included 15 tunes from Wyeth's *Repository ... Part Second* (though Davisson claimed that several were his own). Davisson's *Supplement to the Kentucky Harmony* (1820) contained many more folk hymns than his initial book, and included some of the newer spirituals from the frontier camp-meeting revivals. In Tennessee William Caldwell issued his *Union Harmony* (1837), in which he listed himself as composer of 42 tunes. Describing his relation to the folk tradition, however, he admitted 'Many of the airs which the author has reduced to system and harmonized have been selected from the unwritten music in general use in the Methodist Church, others from Baptist and many more from Presbyterian taste'. James M. Boyd borrowed from both Wyeth and Davisson for his *Virginia Sacred Musical Repository* (1818). James P. Carrell and David L. Clayton published *The Virginia Harmony* in 1831. This was very successful and, although Carrell deplored his contemporaries' use of 'light airs' for sacred music, was comparatively rich in the best of the folk hymn repertory.

From the second decade of the 19th century Cincinnati became a significant centre of shape-note publications. The first shape-note tune book, *Patterson's Church Music* (1813), was followed in 1820 by the most popular tune book of the Midwest, *The Missouri Harmony* by Allen D. Carden. Carden drew heavily on Davisson's *Kentucky Harmony*. His other tune books, *Western Harmony* (1824), compiled with S.J. Rogers, F. Moore and J. Green, and *United States Harmony* (1829), did not achieve the success of *The Missouri Harmony*.

The most active publisher of German-language shape-note hymnody was the Mennonite Joseph Funk. In 1816 he compiled *Die allgemein nützliche Choral-Music*, the first German-language shape-note tune book to be widely used. Another collection, *A Compilation of Genuine Church Music* (1832), was in English, reflecting the acculturation of the area; its fifth edition (1851) was retitled *Harmonia sacra, being a Compilation of Genuine Church Music* and published in seven-shape notation (it reached its 25th edition in 1993 under the title *The New Harmonia sacra*). Although Funk was only one of several German-Americans to publish shape-note tune books in German (during the period 1810–83 at least 14 German or German-English books were published, mainly in Pennsylvania), his influence on Southern musical thought and practice was considerable. His family successors adopted the more flexible seven-shape notation and introduced the new gospel songs of the urban North into the South.

The first tune book to become widely popular in the Deep South was William Walker's *The Southern Harmony and Musical Companion* (1835). This was the first Southern shape-note book to be distributed nationally, and Walker reported in 1866 that it had sold 600,000 copies. Walker, a Baptist layman, made extensive use of folk hymns and spirituals and composed or arranged about 90 tunes, including such popular folk hymns as 'Complainer', 'Sweet Prospect' and 'Amazing Grace' (fig.1), one of the best-known, which had first appeared in *The Virginia Harmony* and was widely used by other tune book compilers under the names 'Harmony Grove' and 'New Britain'.

The best-known and most widely used shape-note tune book, *The Sacred Harp* (1844), was compiled by Benjamin Franklin White and E.J. King. King wrote two popular tunes in *Southern Harmony* and *The Sacred Harp*, 'Bound for Canaan' and 'Weeping Savior'. White exerted a lasting influence on so-called Sacred Harp singing, a tradition of hymn singing based on the book, through his own compositions (of which there are more than 30 in *The Sacred Harp*), his work on the revision committees for the editions of 1850, 1859 and 1869, and his establishment in 1845 of the Southern Musical Convention, which fostered Sacred Harp singings. Other singing conventions using *The Sacred Harp* were established in the late 19th century and early 20th; Sacred Harp singings spread from Georgia to Alabama, west to Texas and Oklahoma, north to Tennessee and south to northern Florida.

Four 20th-century revisions of *The Sacred Harp* remain in use. J.L. White's version (1911) is used for a few singings each year in the area around Atlanta. J.S. James's *The Original Sacred Harp* (1911) had alto parts added by Seaborn M. Denson to 327 previously three-part pieces. This revision, reprinted in 1965, is used in about 15

singings in central and southern Georgia. A revision by W.M. Cooper, entitled *The Sacred Harp: Revised and Improved* (1902) and retitled *The B.F. White Sacred Harp* (1949, 2/1960), is used along the Gulf Coast, especially in northern and central Florida, in southern Alabama and Mississippi, and in about a dozen singings in eastern Texas. This is the second most popular version of *The Sacred Harp* in current use. The most widely used revision is *The Original Sacred Harp, Denson Revision* (1936, 2/1960, 4/1971), which is increasing in popularity and gradually replacing some of the others. The Denson revision is most used in central and northern Alabama and western Georgia; it is used at only a few annual singings in Tennessee, Mississippi and northern Florida. It is also used in universities (e.g. the University of Illinois and the University of North Carolina). Singings that use the Denson revision are announced and recorded in the annual *Directory and Minutes of Annual Sacred Harp Singings* (Birmingham, Alabama). J.L. White's and Cooper's editions of *The Sacred Harp* attempted to modernize the book by including gospel-style music, whereas those of James and Denson, while admitting new pieces, remained basically within the style originally associated with four-shape-note music.

A 20th-century tune book modelled on Cooper's revision of *The Sacred Harp*, *The Colored Sacred Harp* (1934/*R*) by Judge Jackson, consists of songs composed by black shape-note singers. As in Cooper's book, some of the songs are in the older, predominantly folk hymn style, and others are influenced by the gospel hymn idiom. Black singers use Cooper's edition of *The Sacred Harp* for most of their singing, but sing from *The Colored Sacred Harp* on special occasions.

Two competitors of *The Sacred Harp* in Georgia before the Civil War were *The Hesperian Harp* and *The Social Harp*. *The Hesperian Harp* (1848) was compiled by perhaps the most learned and versatile of the shape-note musicians, the Methodist minister William Hauser; it was the largest shape-note tune book (552 pages), but does not seem to have been widely used. Hauser provided 36 of its tunes, including many carefully recorded from oral tradition. *The Social Harp* (1855/*R*), compiled by John Gordon McCurry, a Baptist farmer, contained what Jackson (1943, p.121) called 'by far the biggest single-book and single-edition batch of revival spirituals produced in the South'. The 49 pieces in *The Social Harp* attributed to McCurry include numerous folk hymns.

Thus in the period from the second decade of the century until the outbreak of the Civil War the publication of shape-note hymnody spread from Pennsylvania through the Shenandoah Valley of Virginia south to Georgia and west to Missouri. Shape-note tune books were also published in Tennessee, Kentucky and Ohio; use of *The Sacred Harp* spread into Alabama; and *The Missouri Harmony* was used as far south as Mississippi. With the Civil War, however, the publication of new rural shape-note tune books ceased, and after the war newer developments from the urban North brought about a considerable change in shape-note hymnody.

3. Seven-shape tune books. Northern composers influenced by European music, such as Lowell Mason, opposed shape notes and advocated seven-syllable solmization; as their solmization method became accepted in the South there was a gradual change from four-shape to seven-shape notation. The first such system to be widely used was that of Jesse B. Aikin in *The Christian Minstrel* (1846), which retained the *fa*, *sol*, *la* and *mi* shapes of *The Easy Instructor* but added three others (ex.2). Aikin's

Ex.2 Seven-syllable solmization

system eventually prevailed over several rival seven-shape systems, invented because it was thought that Aikin's had been patented (hence the name 'patent notes'). In the development of shape-note hymnody the systems of notation and the physical appearance of the various publications were associated with different types of music. The oblong four-shape tune book, associated with a combination of folk hymnody and earlier New England music, was followed by the oblong seven-shape tune book, with less folk hymnody and earlier New England music and more European music, music of the Lowell Mason school, music with secular texts and early Southern gospel hymnody. When Southern gospel hymnody became the main repertory of shape-note books the format changed again: the collections, known as songbooks, were smaller, taller than they were wide and often had paper covers.

Only two years after the appearance of Aikin's seven shapes, *The Harp of Columbia* (1848) by W.H. Swan and M.L. Swan was published in the compilers' own seven-shape notation. After the Civil War M.L. Swan published *The New Harp of Columbia* (1867), which is still used in eastern Tennessee; the singers who use it are known as 'Old Harp singers'. Also in 1867 Walker yielded to northern influences and published his *Christian Harmony* in his own seven-shape notation; he included in it a preponderance of European music and music by Mason and his followers. Like his earlier *Southern Harmony*, it is still used in singings in several southern states, especially Alabama, which has a state Christian Harmony Convention; an extensively revised version of the book, by O.A. Parris and John H. Deason (1958) is also used at a number of annual singings (25 reported in 1974, mostly in Alabama). Although a number of seven-shape notations had been developed after 1846, in 1877 Aldine S. Kieffer, a grandson of Funk and the leading seven-shape competitor of Aikin, negotiated an agreement to use Aikin's shapes. He promoted shape-note music chiefly through *Musical Million*, a monthly periodical edited mainly by himself and published at Singers Glen and later Dayton, Virginia, from 1870 to 1914. Kieffer's other activities included editing tune books and the new style of songbooks, and writing numerous texts and tunes, both sacred and secular.

Aikin's system became the standard seven-shape notation, and predominated in a large area of the South. Hauser, another of the older tune book compilers to adopt seven-shape notation, published *The Olive Leaf* (1878), in which he used Aikin's seven-shape system and included music influenced by the urban gospel hymns that Bliss and Sankey were publishing in the North. In addition to its use in tune books and gospel music collections Aikin's notation was used extensively in the 20th century for church hymnals, such as B.B. McKinney's popular *Broadman Hymnal* (1940) and those published by the southern branches of such denominations as the Church of God and the Primitive Baptists. Most of these hymnals contain gospel music, but a few, such as C. Cayce's *The*

Good Old Songs (1913, 23/1961) which is used by conservative Primitive Baptists, contain mainly songs from the older shape-note tradition.

4. Shape-note gospel hymnody. The term 'gospel hymn' originated in the popular northern hymnal *Gospel Hymns and Sacred Songs*, compiled from 1875 by Ira D. Sankey. Unlike the northern gospel hymns, those of the South often have melodies that use pentatonic and other scales inherited from the folk hymn tradition. Of the numerous late 19th-century southern shape-note gospel hymn composers, three of the most prominent were Asa Brooks Everett, Rigdon McCoy McIntosh and A.J. Showalter, some of whose hymns are still sung.

A.B. Everett, with his brother L.C. Everett and McIntosh, propagated musical knowledge in the manner of Lowell Mason's normal music schools in the North. Despite Everett's European training, some of his gospel hymns reflect the older shape-note tradition, for example his famous *Footsteps of Jesus*, which has a hexatonic melody. McIntosh exerted influence beyond the usual shape-note musical circles, for he directed the music departments of Vanderbilt University in Nashville, Tennessee, and Emory College in Oxford, Georgia, and was also music editor for the Nashville publishing house of the Methodist Episcopal Church, South, for about 30 years. He produced over 15 music collections, and his reputation can be gauged from the back cover of one of them, *New Life* (1881), where he is called 'The Most Eminent Composer of Music in the South'. A.J. Showalter published over 1000 of his own compositions and left hundreds more in manuscript. His most famous gospel hymn (still widely used) is his setting of the text 'Leaning on the everlasting arms', a predominantly pentatonic melody with diatonic harmony and dotted rhythms. By 1903, 165,484 copies had been sold of his *Class, Choir and Congregation* (1888) and 385,969 of *Rudiments of Music* (1887).

5. After 1924. By the time of Showalter's death (1924) numerous publishers of shape-note gospel music had appeared who were more interested in popularising their songs than elevating musical tastes. Jackson (1933) listed 29 shape-note publishers of gospel music active in ten Southern and Midwestern states in the early 1930s. This number had diminished by the 1940s, and in the decade following World War II three firms emerged as the leading publishers of shape-note gospel music: James D. Vaughan, Stamps-Baxter and Stamps Quartet.

James D. Vaughan established the firm bearing his name in 1912 in Lawrenceburg, Tennessee, and in the period 1912–64 it published 105 shape-note gospel songbooks. These collections were usually published twice a year and were known as convention books because they were used in singing conventions; for many years the company sold an average of 117,000 copies of such books annually. In 1964 the Vaughan Company was bought by the Skyliters Recording Co. of Memphis, a firm formed by the Blackwood Brothers and Statesmen Quartets, but after a few months it was resold to a group in Cleveland, Tennessee, associated with the Church of God, a denomination which has made much use of shape-note gospel music. In 1965 the publication of convention books under Vaughan's name was resumed under the editorship of Connor B. Hall, also editor for the Church of God's Tennessee Music and Printing Co.

In 1926, two years after the death of Showalter, one of his associates, Jesse Randall Baxter jr, joined with V.O. Stamps to establish the Stamps-Baxter Music Co., known from 1929 as the Stamps-Baxter Music and Printing Co., with main offices in Dallas, Texas. Stamps-Baxter became the largest publisher of shape-note gospel music, publishing convention books and other song collections as well as a monthly magazine, *Gospel Music News*. Much of the spread of the gospel music published by Stamps-Baxter can be attributed to the success of their male quartets, through which this tradition became widely known in recordings and radio broadcasts (the firm purchased station KRLD, Dallas).

The music of the new Southern rural shape-note hymnody is a synthesis of the gospel hymnody of the North and the four-shape hymn repertory. It is based on diatonic scales (which, however, often omit the fourth and seventh degrees) and is generally lively; dotted rhythms appear frequently, particularly dotted quaver and semiquaver patterns with the semiquavers on chromatic lower-neighbour notes, imparting a swing to the rhythm. The songs always contain refrains that are inseparable from the stanzas, with frequent answering figures between the voices (fig.2). Performers usually employ a nasal tone quality, without vibrato, but with extensive sliding between notes. The gospel male quartet

2. Seven-shape notation in the gospel song 'I'll fly away' from 'Wonderful Message' (Powell, MO, 1932)

consists of a lead singer (second tenor), who sings the principal melody, a high tenor chosen for his bright frontal tone placement, a baritone and a bass. The quartets often sing *a cappella*, though they are sometimes accompanied by a guitar or (since the 1930s) a piano. Indeed, a 'hot' gospel piano style, similar to that of the urban revivals around 1900, has developed, which in many ways resembles ragtime.

An important force in shape-note gospel music has been its organisation in singing conventions at county, state and national levels. The National Singing Convention was founded in 1936 in Birmingham, Alabama; its annual singings, lasting as long as four days, attract more than 1000 participants. These organizations (unlike the Sacred Harp conventions) do not use a single shape-note collection, but a variety of paperback songbooks supplied by different publishers. It is difficult to assess the full extent of shape-note gospel singings; however, *Gospel Music News* listed more than 1900 for 1974 (calculated from the January issue), not only in the South and Midwest but as far west as California and as far north as Michigan. Nevertheless after 1945 the increasing urbanization of the South and the introduction of traditional notation in the music programmes of public and private schools contributed to a decline in shape-note singing. Singing-schools and singing conventions tended to be replaced by gospel music concerts, where the music was increasingly similar to the popular secular repertory and audiences listened rather than participated.

Shape-note notation [buckwheat notation, character notation]. A type of notation used for SHAPE-NOTE HYMNODY.

Shapero, Harold (Samuel) (*b* Lynn, MA, 29 April 1920). American composer and pianist. He studied the piano with Eleanor Kerr and composition with Sergey Slonimsky (1936–7) and Ernst Krenek (1937), under whom he wrote a 12-note string trio (1938). He also studied with Piston at Harvard (1938–41), Hindemith at the Berkshire Music Center (1940–41) and Boulanger at the Longy School of Music (1942–3). His works from the 1940s earned high praise from Stravinsky and Copland, as well as a series of awards, including the Prix de Rome (1941) and a Naumburg Fellowship (1942). An accomplished pianist, he gave the premières of and also recorded a number of his keyboard and chamber works.

Shapero's first published work, like Piston's, was a set of Three Pieces for the flute, clarinet and bassoon (1939). He dedicated his String Quartet (1941) to Piston, whose influence can be heard in the music's dissonant counterpoint, quartal harmonies and driving rhythms. After hearing Boulanger play Beethoven's string quartets at the piano, he began to assimilate 18th-century models, a practice he defended in his best-known article, 'The Musical Mind' (*MM*, xxiii, 1946, p.31). A series of works strongly reminiscent of old masters followed, including the witty Three Sonatas for piano (Domenico Scarlatti, C.P.E. Bach and Joseph Haydn), the graceful Serenade in D (Mozart), the grand Symphony for Classical Orchestra (Beethoven), and the more romantic Piano Sonata in F

minor (Schubert). These works adhere more closely than those of Piston or Stravinsky to the melodic phrase structure and harmonic rhythm of the Classical style; Copland, while admiring Shapero's 'technical adroitness' and 'wonderfully spontaneous musical gift', questioned this seeming 'compulsion to fashion his music after some great model'. Still, Shapero used traditional resources freshly and the Three Sonatas and the Symphony remained in the repertory, the latter enjoying renewed interest following a 1988 revival by Previn and the Los Angeles PO.

During the 1940s Shapero formed close associations with three fellow Piston students: Arthur Berger, Irving Fine and Leonard Bernstein. Berger included Shapero, Fine and himself in a 'Stravinsky school' of American composers, a phrase first coined by Copland; Shapero had close ties as well to Bernstein, who conducted the première of the Symphony in 1948 and recorded it in 1954. All four shared an interest in jazz and popular music, which Shapero knew well as a pianist and dance band arranger. Together they formed Brandeis University's first music department, where Shapero taught for over 30 years, eventually founding and directing its electronic music studio. His students included Joel Spiegelman, Richard Wernick, David Epstein and Sheila Silver.

Shapero composed less in more than three decades at Brandeis than during the period 1940–50. He never became identified with the 12-note method, as did Fine and Berger, nor a jazz-classical idiom, as did Bernstein, though he participated in both trends with the large 12-note Partita in C for piano and small orchestra (1960) and *On Green Mountain* for jazz ensemble (1957), after Monteverdi. Shapero also explored Renaissance techniques in Two Psalms for chorus (1952), Jewish styles in the Hebrew Cantata for chorus (1943), and electronic media in Three Studies in C♯ for synthesizer and piano (1969). This last composition and similar works were written for himself and his daughter, Hannah, to play together. With its homorhythmic textures, unisons and simple triads, Shapero's later music reveals a continuous search for directness and purity of musical thought.

HOWARD POLLACK

Shapey, Ralph (*b* Philadelphia, 12 March 1921). American composer and conductor. Raised in Philadelphia by Russian Jewish immigrant parents, he studied the violin with Emmanuel Zetlin (1937–42) and composition with Stefan Wolpe (from 1938). At the age of 16 he was selected as the youth conductor of the Philadelphia Youth Orchestra. He graduated from public high school in 1939, but received no other formal education. During the early 1950s he taught at the Third Street Settlement Music School, New York and from 1956 to 1959 worked at the MacDowell Colony. At the invitation of Rochberg, he accepted a part-time position at the University of Pennsylvania in 1963. The following year he joined the composition department at the University of Chicago, a position he retained until his retirement in 1992. He also founded and directed Chicago University's Contemporary Chamber Players and guest conducted such ensembles as the Chicago SO and the London Sinfonietta.

Shapey forged his iconoclastic, highly Expressionist style in postwar New York, influenced by Wolpe and abstract Expressionist painters, many of whom he counted among his friends. Artists such as Willem De Kooning and Jack Tworkov, and critics such as Harold Rosenburg and Dore Ashton attended his concerts. In return, he was one of the few non-painters admitted to the legendary Artists Club. His numerous honours include a MacArthur prize (1982) and first prize in the Kennedy Center Friedheim Competition (1990). In 1992 his *Concerto fantastique* (1991) was chosen to receive the Pulitzer Prize, but, in an event widely publicized at the time, the prize was withdrawn for consumer-related reasons. He was elected to the American Academy of Arts and Letters in 1989 and the American Academy of Arts and Science in 1994.

Shapey has described himself as a classicist structurally, a romantic emotionally and a modernist harmonically. His use of highly flexible, unsystematic 12-note chromaticism derived from Wolpe's style. In 1981 he began to compose based on what he called his 'Mother Lode Worksheet', a document published at the front of his String Quartet no.9. This reference, Shapey explained, 'contains my cantus firmus [a 12-note row] with harmonic aggregates assigned to each cantus note. It is constructed so that there are always common tones from any one aggregate to another. As in traditional tonal practice, this allows me to easily shift from one aggregate to another'.

The emotional quality of Shapey's music arises from many factors. His habit of juxtaposing sections of widely different characters provokes dramatic contrast. Many themes (such as the opening music of *Evocation no.4*, 1994) present bold, clearly memorable gestures. Other works encapsulate basic human passions from the lofty and religious (*Praise*, 1962–71) to the carnal (*Songs of Ecstasy*, 1967). Structurally, Shapey strives to create unforgettable sound images, carving his music into large, distinct blocks. Classical clarity governs most works. Traditional variation form, for example, appears in the *Fromm Variations* (1966, rev. 1973). The theme, a chorale of 20 slow-moving atonal chords, yields 31 variations, each with an individual character. Subsets of

the original group of chorale chords return at the end of each variation to delineate the structure. Less conventional forms also divide into distinct sections, such as the alternation between prologues, duets and solos in the first movement of *Evocation no.4*. Many works, however, also possess a complexity of texture that rivals the style of Elliott Carter. Passages in the String Quartet no.7 (1972), for example, feature dense tangles of distinct, angular lines.

Shapey's *Concerto fantastique* (1989–91) confirms his reputation as a 'radical traditionalist'. The work, adopting a classical four-movement plan, features rugged gestures within traditional developmental processes. The movements divide into discernible, self-contained sections defined by their scoring, texture and rhythmic patterns. In the middle of the first movement, for example, a series of long, well-chiselled passages appear: one combines reiterated dotted rhythms in the wind instruments with a slow string melody; another uses repeating semiquaver string chords to support a craggy four-part counterpoint in the trumpets; a third presents a quartet of piccolo, clarinet, violin and bass, with each instrument maintaining its own rhythmic and melodic character. In other characteristic passages, streams of thick chords in one orchestral grouping are juxtaposed against busy counterpoint in another. In the second movement, an elegy, Shapey presents three elements: a long, lyrical melody; chordal accompanimental material; and a short, distinctive rhythmic figure. As one section gives way to another, the three elements rotate from one instrumental group to another. Characteristic of his style, the elements evolve dramatically during the course of the movement, while remaining consistent within each section.

Although Shapey wrote primarily for traditional instruments and ensembles, several works also use tape. The second song of *Songs of Ecstasy* combines a recording of a soprano quoting Joyce's *Ulysses* with a live performance of her singing the same text. The third song requires a recording of scraped piano strings, notated graphically using the method employed by Cowell in *Banshee*.

STEVEN JOHNSON

Shapira, Arie [Arik] (*b* Kibbutz Affikim, nr Tiberias, 29 Nov 1943). Israeli composer. He studied with two of the most influential Israeli composers at that time, Oedoen Partos and Mordecai Seter, at the Rubin Academy at Tel-Aviv University (BM 1968), but did not follow either stylistically. He turned instead to an extreme, politically motivated avant-garde style, influenced by Webern, Stockhausen, minimalism and the electro-acoustic music of the 1960s and 70s, an artistic direction which has led to his marginalization in Israel. A composer mainly of electro-acoustic music, Shapira is also an established private composition teacher. He was awarded the Prime Minister's Prize for Composers (1986), and, more controversially, the Israel Prize (1994), only the fifth such award to an Israeli composer in 40 years. He started teaching part time at the Open University, Tel-Aviv, in 1986 and at the Rubin Academy, Tel-Aviv, from 1990 to 1995; he became a full time lecturer in Haifa University in 1995. Shapira's style is intentionally tense, atonal, often loud, densely packed and fierce, using repetitive, rapid patterns and attacks in short, minimalistic works. Distortion of

sound, rhythm and text emerges as a crucial characteristic of his style; Shapira claims it to be the only possible compositional means to express the tension of life in Israel, and in Tel-Aviv in particular. The rhythms and sounds of Hebrew are significant in many of his works.

RONIT SETER

Shapiro, Gerald (Mark) (*b* Philadelphia, 14 May 1942). American composer. He studied at the Eastman School (BMus 1964) and with Milhaud at Mills College (MA 1967); he also worked with Subotnick (1964–5), Messiaen and Boulanger (1965–6), and Stockhausen (1966–7). In 1967 he joined the faculty of Brown University, where he is director of the MacColl Electronic Music Studio. Shapiro was attracted early in his career to the musical possibilities of live electronic music. His compositions encouraged performers to be 'involved in an intensely communicative relationship with one another and with the technology of the piece' (Shapiro), which often consisted of circuits built by him that responded to touch or pressure and in turn controlled the frequency, amplitude or other quality of the sound. This approach produced performances that were unique to the time, place and performers, and placed Shapiro among the experimentalists of the 1960s and early 1970s. In the mid-1970s he began using more traditional forms, incorporating them into modern idioms that often employ tape or live electronics. The use of such devices receded during the 1980s as Shapiro increasingly embraced aspects of traditional Western ideals of melody, harmony and texture. His music since has become even more accessible, while retaining a richly evocative quality that has characterized it from the outset.

DALE COCKRELL

Shapleigh, Bertram (*b* Boston, 15 Jan 1871; *d* Washington, DC, 2 July 1940). American composer. He studied composition with G.E. Whiting and Chadwick, graduating from the New England Conservatory in 1891, and also with MacDowell, as well as in France and Germany. A man of wide interests, he received an MD degree from Vermont Medical College (1893) but became a lecturer on the arts. It was a developing concern with South Asian music that led him to give his attention fully to music and to composition. He played the piano and cello, and gave lecture-recitals on music history, Eastern music and Wagner's operas. In 1898 he left the USA for Europe, eventually settling in England in 1902. However, after his house, with his library of 7000 volumes, had been destroyed by fire, he returned to the USA in 1917, to serve as an adviser to Breitkopf & Härtel and editor of the *Concert Exchange*. He lectured widely, wrote for magazines and newspapers, published three books of poetry and a novel, and composed numerous pieces in various forms. His works are in a Romantic style, sometimes using themes and timbres imitative of Indian music. After his death a Bertram Shapleigh Foundation was established in Washington, DC, and his manuscripts are deposited there.

WORKS
(*selective list*)

Chorus, orch: The Raven (E.A. Poe), op.50, 1907; The Song of the Dervishes, op.53, 1905; Mirage, tone poem, op.57, 1910

Unacc. choral: Romance of the Year, op.53, 1v, small chorus, 1907; The Fir Tree and the Brook, op.54, 8vv, 1912; The Tale of the Dismal Swamp, op.55, 8vv, 1912; Vedic Hymn, op.56, 1910

Orch: Ramayana, suite, op.45, 1908; Gur Amir, suite, op.51, 1908; Sym. Prelude, op.61; Sym. no.1, b, op.62; Sym. no.2, A, op.68; Poem, vc, orch

Other works: 2 grand ops, 5 1-act ops; Grand Mass, D, and other Roman Catholic church music; chbr and solo inst pieces; over 200 songs

ERIC BLOM, BARBARA A. RENTON

Shaporin, Yury Aleksandrovich (*b* Glukhov, 8 Nov 1887; *d* Moscow, 9 Dec 1966). Russian composer and teacher. A cellist in the local Gymnasium orchestra, he composed salon pieces throughout his youth, but, under his stepfather's influence, he initially decided against a musical career and in 1906 enrolled at the philological faculty of Kiev University. There he pursued his musical interests as an accompanist to the student choir and as a theory and composition pupil of Lyubomirsky. Two years later, on the advice of the composer Lysenko, he moved to the more stimulating atmosphere of St Petersburg and entered the university as a law student. An attempt to enrol simultaneously at the conservatory failed, so it was not until after his graduation in 1912 that, encouraged by Glazunov, he became a full-time music student. At the St Petersburg Conservatory (1913–18) he studied composition with Sokolov, orchestration with Steinberg and score-reading with Nikolay Tcherepnin. His compositional style was thus formed in the nationalist tradition, and, more particularly, within the school of Rimsky-Korsakov.

After graduating from the conservatory Shaporin became actively involved in the progressive artistic life of Petrograd: he allied himself with the revolutionary trends in drama and stage production, and, along with Gor'ky, Lunacharsky and Blok, he founded the Grand Drama Theatre (1919), with which he worked, eventually as musical director, until 1928. Thereafter, until 1934, he was associated with the Academic Theatre of Drama (now the Pushkin Theatre). This period of work for the theatre was the most dynamic of his creative career, and his intense compositional activity, some of it fairly experimental, was stimulated by his close friendships with the innovatory writers of the time: Aleksey Tolstoy, Blok, Zamyatin, Mayakovsky, Fedin, Gor'ky and others. In collaboration with Gork'y he planned an opera based on *Mat'* ('The Mother'), but the project was abandoned after the writer's death. In return, the young Soviet theatre received invaluable assistance from Shaporin as adviser, conductor and composer of incidental music to plays by Aleksey Tolstoy, Zamyatin, Trenev and Bill'Belotserkovsky, as well as many Western classics.

At the same time Shaporin had a variety of contacts with the musical world of Leningrad, and in particular with Asaf'yev. Both were founder-members of the Leningrad Association for Contemporary Music (1926–30), which promoted professionalism, experiment and (not uncritical) interest in new Western ideas. This period witnessed a concentration on instrumental music that produced two piano sonatas and the orchestral suite *Blokha* ('The Flea'). With the dissolution of the ACM, however, and a subsequent involvement with the Leningrad branch of the Soviet Composers' Union, his career took a new direction. The incidental music apart, his scores always tended to grow slowly to their final forms; from the 1930s his rate of composition became still slower, and in his last 30 years he completed only a handful of major works, many of which occupied him over several years. Of these later works the best known is the opera *Dekabristï* ('The Decembrists'), which was partly responsible for his move away from Leningrad. This work, based on an idea of Aleksey Tolstoy, had been started as early as 1920, and in its first, incomplete form, *Polina Gebl'* ('Paulina Goebbel'), it was performed in Leningrad in 1925. Ten years later, with the work still in progress, Shaporin received a commission from the Moscow Bol'shoy; he settled for a time in Klin, and thereafter resided in Moscow. In 1939 he was appointed professor of instrumentation at the Moscow Conservatory, where he was made professor of composition after the war; his pupils included Shchedrin and Vol'konsky.

With *The Decembrists* still unfinished, in 1939 Shaporin completed the symphony-cantata *Na pole Kulikovom* ('On the Field of Kulikovo'), dealing with the Russian-Tatar war of 1380. The Romantic idiom of the score brought it immediate popularity, and Shaporin followed it with a series of epic-heroic works on themes of national struggle. Symphonic suites from the film scores for *Minin i Pozharsky* (1939), *Suvorov* (1941) and *Kutuzov* (1943) entered the repertory; the oratorio *Skazaniye o bitve za russkuyu zemlyu* ('The Story of the Battle for the Russian Land'), written during a wartime evacuation to Tbilisi, was acclaimed at its Moscow première in 1944 and is possibly his most impressive score; and the 'battle' series concluded with the less successful *Dokole korshunu kruzhit'?* ('How Long Shall the Kite Soar?'). All three of his oratorios show Shaporin's mastery of an essentially Romantic nationalist style, whose refined lyricism has had a continuing appeal.

Shaporin devoted the immediate postwar years to song composition, perhaps in preparation for a final assault on *The Decembrists*, which was directly anticipated in the subject matter of *K Chaadayevu* ('To Chaadayev'). The opera, his most famous composition and his life's work, eventually reached completion and performance in 1953. It has remained firmly established in the Soviet repertory, but has not exported. Wholly in the great Russian tradition, it is a work of nobility and strong lyricism, despite its rather static and oratorio-like presentation; perhaps it has most in common with *Prince Igor*, whose composer Shaporin most closely resembles. After this achievement Shaporin's creative career waned considerably. His last years were devoted to the composition of small-scale works – songs, the Five Pieces for cello and piano, and the piano *Ballad* and to further revision of the larger scores. He continued to teach almost until his death, and in this sphere he won the respect of the youngest Russian composers. His collected essays were published as *Izbrannïye stat'i* (Moscow, 1969).

WORKS
(*selective list*)

Op: Polina Gebl' [Paulina Goebbel], 2 scenes, perf. 1925; rev. and enlarged as Dekabristï [The Decembrists] (4, V. Rozhdestvensky, after A. Tolstoy), 1920–53

Orats and cants.: Na pole Kulikovom [On the field of Kolikovo], op.14 (sym.-cantata, after Blok), solo vv, chorus, orch, 1918–39; Skazaniye o bitve za russkuyu zemlyu [The story of the battle for the Russian land], op.17 (orat, K. Simonov, M. Lozinsky and others), solo vv, chorus, orch, 1943–4; Dokole korshunu kruzhit'? [How long shall the kite soar?], op.20 (orat, after Blok), Mez, B, chorus, orch, 1945–7, rev. 1963; K Chaadayevu [To Chaadayev] (after Pushkin), T, chorus, orch, 1949

Orch: Blokha [The flea], op.8, comic suite, after N. Leskov, 1928; Sym., op.11 (Mayakovsky), chorus, orch, band, pf, 1928–33

Solo vocal: Pesni zhar-ptitsï [Songs of the firebird], op.2, 1v, 7 insts, 1923–4; Songs, op.4 (Ye. Zamyatin), 1v, orch, 1926; 6 Romances, op.6 (Tyutchev), 1v, pf, 1925; 5 Romances, op.10 (Pushkin), 1v, pf, 1937; Dalyokaya yunost' [Faraway Youth], op.12 (Blok), 10 songs, 1v, pf, 1935–9; Pamyat' serdtsa [The Heart's Remembrance], op.26 (F. Tyutchev), 8 romances, 1v, pf, 1958

Pf: Sonata no.1, b♭, op.5, 1924; Sonata no.2, f♯, op.7, 1926; 5 Pieces, op.25, vc, pf, 1956; Ballad, op.28, pf, 1959

Many film scores, *c*80 scores for the theatre

RITA McALLISTER, IOSIF GENRIKHOVICH RAYSKIN

Shaposhnikov, Adrian Grigor'yevich (*b* St Petersburg, 27 May/9 June 1888 or 1887; *d* Moscow, 22 June 1967). Russian composer. He studied at the St Petersburg Technical Institute (1905–9) while taking music lessons with Kalafati, and in 1913 he graduated from the St Petersburg Conservatory as a pupil of Glazunov, Sokolov and Vītols. After working in Moscow as an engineer-economist and freelance composer (1920–35), he lived in Ashkhabad (1937–48) directing the Composers' Union of the Turkmen SSR, which in 1943 granted him the title Honoured Art Worker. He returned to Moscow in 1949. Impressionist influences are discernible in the *Triolettï* for voice and piano; *Zokhre i Takhir* was the first Turkmenian opera.

WORKS
(*selective list*)

Stage: Pir korolya [The King's Feast] (ballet, A. Gorsky), 1912–13; Otravlennïy sad [The Poisoned Garden] (opera-poem, F. Sologub), 1913; Zokhre i Takhir (op, B. Amanov), 1941, rev. (A. Karkliyev), 1953, collab. V. Mukhatov; Gyul' i Bil'bil' (op, K. Burunov), 1943; Shasenem i Garib (op, Burunov), 1944, rev. 1955, collab. D. Ovezov; Kemine i kazï [Kemine and the Goats] (comic op, Burunov, I. Keller), 1945–6, collab. L. Mukhatov; Ayna (op), ?1965, collab. Ovezov
Orch: Baletnaya syuita, 1914; Turkmenskaya rapsodiya, 1939; Dances, 1941–7; Ov., 1946; Pf Conc., 1947, rev. 1953; Turkmenian March, 1949; Sinfonietta, 1954; Liricheskaya poėma, 1962
Folk orch: March, 1945; Rhapsody, 1949
Chbr and solo inst: P'yesï [Pieces], vn, pf, 1921; Pf Sonatina, 1923; 2 suites, str qt, 1924–5, 1947; Sonata (fl, hp)/(vn, pf), 1925–6; Sonata, vc, pf, 1925–6; Pf Sonata, 1926; Vospominaniye [Remembrance], Melodiya, vc, pf, 1948; many other pieces
Songs for 1v, pf: Triolettï (F. Sologub), 1925; many others
Incid scores, film music, choral works, Turkmenian army songs, Turkmenian and Ukrainian folksong arrs.

DETLEF GOJOWY

Sharara, Attia (Hassan) (*b* Cairo, 15 Nov 1923). Egyptian violinist and composer. He studied at the Fuad I Music Institute (1941–5) and, proving a proficient violinist, was engaged to play with several composers. He conducted the Radio Music Ensemble and later the Reda Folkdance Troupe (1982–6).

His earliest compositions, from 1948, are instrumental monodic works employing traditional forms. But in 1950, after becoming acquainted with Western classical music through a private recording collection, he decided to compose Arabic music in a Western idiom. He studied with two Italians residing in Egypt, Menato and Isaiga, and now divides his time between playing and composing. He formed the Sharara Sextet (which includes his two sons Hassan and Ashraf), with which he has toured the Arabian countries, England, France and Germany. From 1956 to 1979 he travelled to Tunisia, Libya, Lebanon and Jordan to teach and help found ensembles of traditional music. Since 1984 he has been teaching violin and traditional song at the Cairo Conservatory. He was awarded a state prize for composition (1983) and an Order of Merit (1985).

His non-monodic works consist largely of concertos, including one for the *nāy* (a wind instrument), one for the *'ūd* (lute) and three for the violin, the first of which draws on folk tunes. His Western-style works are conservative and simple, with short development sections containing frequent sequences. They employ Arabic rhythmic patterns such as the *Maṣmūdī* (in 4/4 time) and the *Dārij* (in 3/4 time).

WORKS

Orch: Arab Suite; 3 ovs.; Dance Suite; Sama'i in the Nahawand Mode
Solo inst and orch: 3 Vn concs, B♭, c, g; Vc Conc., G; 'Ūd Conc., A♭; Nāy Conc.; Fantasy (Rhythm and Tune), perc, orch; Fantasy 'Noor mina'l sharq', qānūn, orch
Ballet: Al-balleh al sharqi (Oriental Ballet)
Works for chorus and orch: Bal el Salam; Masr el khadra [Egypt the Green]; works for children's vv; 6 songs, chorus, pf
Chbr: Sonata, c, str; Str Qt, g; 2 str qnts; Sonata, str qnt, pf; 'Oriental' Trio, pf trio; Longa 'Al farasha' [The Butterfly], str
Film scores; arrs.; monodic pieces for *takht* [small ens]; works for 1 inst and pf

SAMHA EL KHOLY

Sharet, Yehuda (*b* Kherson, 13/26 Jan 1901; *d* Afiquim, 22 June 1979). Israeli composer and violinist of Russian birth. He emigrated to Palestine with his family at the age of five. After studying at the Shulamit Conservatory in Tel-Aviv with Hopenko and Karchevski, he joined the 'Ein Ḥarod Kibbutz, where he formed the Valley Quartet. In 1926 he moved to the Yagur Kibbutz. During 1929–30 he studied choral singing with F. Jöde in Germany. Upon his return to the kibbutz, he wrote many songs on texts by Rachel Blovshtain (1890–1931) and Chaim Nachman Bialik, as well as on versicles from the Bible and prayer books. In addition to songs marking the Israeli agricultural tradition, he wrote sermons for Jewish festivals, the most famous of which is a version of the Passover legend. Sharet's best-known works are the eight *Anot* collections (1937–9) which predominantly contain new Israeli songs. The final part of the collection includes 80 European choral songs, many of which were reset to Hebrew texts.

NATAN SHAHAR

Sharma, Prem Lata (*b* Nakodar, Punjab, 10 May 1927; *d* Varanasi, 4 Dec 1998). Indian scholar of Sanskrit and Indian music and musicology. Her early studies were in classical Indian literature and poetics. She took the PhD in Sanskrit at Banaras Hindu University and enrolled at the university's College of Music and Fine Arts; there she studied singing in the early 1950s and collaborated with the singer and teacher Omkarnath Thakur in his production of *Saṅgītāñjali*, a pedagogical treatise on Hindustani

music, and other works. On Thakur's retirement in 1957 she became principal of the College and took charge of its research section, the interest of which was focused on the collecting and editing of primary sources in the history and theory of music, principally in Sanskrit. The section became the University's department of musicology after a reorganization in 1966. Sharma started new postgraduate programmes in musicology which attracted a large number of Indian and Western students and scholars to Banaras; many of the leading specialists of the last forty years of the 20th century were in some way associated with her and her 'school'. Her experience and interests widened to embrace the southern and eastern traditions of Indian music as well as those of the north. The close study of Sanskrit texts on music became routine, and important editions of some of these texts were published by Sharma and by her students. The first volume of her edition of the *Saṅgītarāja* of Kumbhakarṇa appeared in Banaras in 1963. Under her guidance her one-time research assistant R.K. Shringy brought out the first part of a new translation of the *Saṅgīta-ratnākara* of Śārṅgadeva in 1978, and she continued this project after Shringy's early death. Sharma was involved in numerous other translating and editing projects, not only of music-theoretical treatises but also of important song texts; in 1972 she published the *dhrupad* texts of Nāyak Bakhśū under the title *Sahasarasa* with a substantial historical introduction. She encouraged the study of the history and current performing traditions of *dhrupad* and took editorial charge of the journal *Dhrupad Annual*, of which ten volumes appeared between 1986 and 1995, incorporating scholarly research by Indian and Western scholars.

From 1983 to 1986 Sharma was chairperson of the Uttar Pradesh Sangeet Natak Akademi, and from 1985 to 1988 she became vice chancellor of the Indira Kala Sangit University in Khairagarh, Madhya Pradesh. Thereafter she returned to Banaras, having joined a Government of India committee on the organization of the country's music and arts academies; she had also become involved with the academic and publishing programmes of Kapila Vatsyayan's Indira Gandhi National Centre for the Arts in Delhi. Her scholarly and organizational work continued and in 1994 she became vice chairman of the Sangeet Natak Akademi. Among her later achievements was the planning and staging of three international musicological seminars. A special issue (no.173, Feb 1999) of the Chennai (Madras) music journal *Sruti* contains a detailed account of her life and work by her former student N. Ramanathan.

JONATHAN KATZ

Sharma, Shiv Kumar (*b* Jammu, 13 Jan 1938). Indian *santūr* player. He began his training in vocal music and *tablā* at an early age. He was taught by Pandit Umadutt Sharma, a Kashmiri disciple of Pandit Bade Ramdasji of Varanasi. Having been persuaded to take up the SANTŪR, which although well known in Kashmir was not used in Indian classical music at that time, he set out to build a career as a concert soloist. Even after giving his first public performance in Bombay in 1955, he continued to make changes to the layout and tuning of the instrument, creating new playing techniques in order to perform *dhrupad*-style *ālāp* and *gats* and incorporating many of the rhythmic techniques he had learned as a *tablā* player into his *santūr* playing. His efforts have been successful in establishing the instrument within the Hindustani music tradition, and a number of young *santūr* players are now following in his footsteps. His many honours include the Sangeet Natak Academy Award.

RECORDINGS

MARTIN CLAYTON

Sharman, Rodney (*b* Biggar, SK, 24 May 1958). Canadian composer. He studied composition at the University of Victoria with Adaskin and Komorous, at the Staatliche Hochschule für Musik (Freiburg) with Ferneyhough, and at SUNY, Buffalo (PhD 1990) where he studied with Morton Feldman. Sharman's many awards include the Darmstadt Kranichsteiner Prize (1990). He is one of the few Canadian composers to establish a reputation in Europe, where his compositions are regularly performed at new music festivals. He is also known as a lobbyist and administrator for new music, especially in his role as the president of the Canadian League of Composers. Much of Sharman's work, such as his *Predators of Light* (1989), consists of austere, static sound fields strongly emphasizing orchestral colour. Recent works such as his opera *Elsewhereless* (1996), a collaboration with librettist Atom Egoyan, suggest a move towards a more lyrical style. Sharman has described his compositional aesthetic as follows:

> Although I am always conscious of music as a temporal art, writing music seems to begin with a sonic image. My concern is to work closer to the essence of the image and to allow music to radiate from the sound source outward, blurring distinctions between harmony and timbre, material and instrument.

He is included in T. Gerlich, H.W. Helster and W.W. Sparrer, eds.: *Komponisten der Gegenwart* (Munich, 1996).

PETER HATCH

Sharp (Fr. *dièse*; Ger. *Kreuz*; It. *diesis*; Sp. *sostenido*). In Western notation the sign ♯, normally placed to the left of a note and indicating that that note is to be raised in pitch by one semitone. Such a note is described in English usage as 'sharpened' and in American usage as 'sharped'. The adjective 'sharp' is used to denote intonation above the notated pitch (though the phrase 'sharp six', and so on, is colloquially used to signify a note or chord of the sharpened 6th by reference to the figuring '♯6'). In some sources of the late 13th century to the mid-18th the diagonal *croix* form, ⨳, is used; this is often placed below the note concerned.

A double sharp (Fr. *double dièse*; Ger. *Doppelkreuz*; It. *doppio diesis*), the notational sign 𝄪, indicates that a note is to be raised in pitch by two semitones. In some early sources a double sharp is shown simply as ♯♯.

□

Sharp, Cecil (James) (*b* London, 22 Nov 1859; *d* London, 28 June 1924). English folk music collector and editor. He was educated at Uppingham and Clare College, Cambridge, where he read mathematics and took the first part of the MusB examination. At the end of his life Cambridge made him an honorary MMus (1923). He began working in Australia, where among other activities he played the organ at Adelaide Cathedral and became a partner in a music school. In 1892 he returned to England and became music master at Ludgrove Preparatory School (for which he edited a collection of national songs) and then in 1896 principal of the Hampstead Conservatory, a post that he held until 1905.

Two events turned his attention to folk music: on Boxing Day 1899 he saw the Headington Morris side at Oxford dance *Laudnum Bunches* and four other traditional dances; and in the summer of 1903, while staying at Hambridge, Somerset, he heard a gardener sing *The Seeds of Love* as he mowed a lawn. He quickly realized the potential significance and value of traditional arts, dance as well as song, for musical, social and educational purposes and thereafter devoted his life with missionary fervour to their preservation and propagation. Although not the first English folksong collector (the Folk-Song Society had been founded in 1898), he soon became the most important.

His first publication was *Folk Songs from Somerset*, issued in five parts between 1904 and 1909. *English Folk Song: Some Conclusions* (1907) was the first serious comprehensive study of the subject and remained so for half a century. His first publication on the dance was *The Morris Book* (1907–13). From then on he continued to collect both songs and dances, enlarging both categories to include carols and shanties in the one and John Playford's social dances in the other. By 1911 he was convinced of the need for a society to treat traditional dance as the Folk-Song Society, of which he was a member, treated folksong; he conceived the English Folk Dance Society though as a more active body that practised as well as collected and studied the surviving traditional dances. In 1914 he was able to provide traditional songs and dances for Granville Barker's production of *A Midsummer Night's Dream* in London and later in New York, which he visited during a lecture tour after the outbreak of war.

Sharp's visit to America had far-reaching consequences. It led him to make a large collection of songs of English origin and local 'square dances' in Appalachia. This in turn gave impetus to American efforts, subsequently taken up by American universities, to collect and publish their traditional ballads and songs, both English and indigenous, and to conserve their other traditional arts. Maud Karpeles accompanied him as amanuensis and assistant on his three later wartime visits to the USA, and after his death she edited and published two volumes of his *English Folk-Songs from the Southern Appalachians* in a library edition; Sharp himself published several books of these and other Appalachian songs between 1917 and 1923. After the war he devoted himself to re-establishing the work he had started: he founded vacation schools, gave lectures and demonstrations and revised earlier publications. He also did research on the history of the dance in collaboration with his friend Paul Oppé, who provided the illustrations for Sharp's posthumously published book on the subject. His aim of 'restoring their songs and dances to the English people' was further advanced by his appointment by the Board of Education as occasional inspector of training colleges. Sharp made a unique contribution to the movement to preserve and disseminate the heritage of English folksongs and dances: he collected 4977 tunes, of which he published 1118 and provided accompaniments for 501. This was not only an outstandingly valuable achievement in itself; he also gave an impetus to the renaissance of English art music through the use that composers such as Vaughan Williams, Holst and Butterworth made of material that he had collected and made known to them.

FRANK HOWES

Sharp, Elliot (*b* Cleveland, 1 March 1951). American composer. He was initially inspired to study the electric guitar through an admiration for rock artists such as Jimi Hendrix. His scientific background, however, together with the diverse influences of musicians such as Iannis Xenakis, Albert Ayler, John Coltrane, Ornette Coleman and John Cage, motivated him to deconstruct the existing principles applied to electric guitar composition and supplant them with his own musical language. He is best known for his exploration of alternative methods of sound production on the instrument. Based in New York, he performs and records on a specially designed eight-string Douglas Thompson electric guitar featured as the principal solo instrument of his ensemble Carbon. The group, consisting of percussion, electric harp, computerized sound samplers, electric bass and two bass clarinets, performs in an improvisational format.

Sharp's compositional approach is based largely on his adaptation of Benoit Mandelbrot's mathematical theories. Using Mandelbrot's book, *The Fractal Geometry of Nature* (New York, 1983), Sharp connects or 'maps' mathematical functions onto natural forms and phenomena, such as turbulence, chaos and seeming randomness, and converts them into compositional principles. He has also worked with the Fibonacci series, which he has adapted to govern the production and ordering of pitch, rhythm and timbre. A discussion of his music appears in R. Tomaro: 'Contemporary Compositional Techniques for the Electric Guitar in United States Concert Music', *Journal of New Music Research*, xxiii (1994), 349–67.

ROBERT TOMARO

Sharp, Granville (*b* Durham, 10 Nov 1735; *d* London, 6 July 1813). English philanthropist and amateur musician. Best known for his fight to abolish slavery, he was also a keen amateur musician who played the flute, clarinet, oboe, flageolet and kettledrums. He had a good bass voice and his *Short Introduction to Vocal Musick* was published in 1767. Together with his brothers, William (1729–1810), surgeon to George III, and James (*d* 1783), an engineer, from 1775 until 1783 he held concerts on two barges on the Thames, attended by 'not only men of the most eminent talents and skill, but also those of the highest and most distinguished rank' (Hoare). This activity was recorded in a famous painting by Johan Zoffany which shows 15 music-makers, many of them members of the family, on their barge. The brothers also hosted fortnightly concerts of sacred music on Sunday nights in London.

The Sharp brothers owned a significant collection of music, a library established by their father, Thomas (1693–1758), Archdeacon of Northumberland; a manuscript catalogue is preserved in the New York Public Library. It included works of Handel, solo concertos, catches and glees, symphonies and overtures, as well as a substantial collection of Anglican sacred music; over 350 composers are represented. The description of the orchestral works includes musical incipits and the number of performance parts. A large part of the collection was sold by Leigh & Sotheby at auction in 1814. Some of the Sharp family instruments are now on loan to the Bate Collection of Historical Instruments in the Faculty of Music at Oxford.

LENORE CORAL

Sharp, Ronald (William) (*b* Kogarah, 8 Aug 1929). Australian organ builder. He is self-taught, and built his first organ in 1960 for St Mary's Cathedral, Sydney. Between 1960 and 1982 he built numerous organs for Australian colleges, chuches and concert halls, also constructing ten medieval-style hand-pumped portative organs, each with one or two stops and 20–40 pipes. Between 1969 and 1979 Sharp built his most important instrument, for the Sydney Opera House. At the time this was the world's largest mechanical-action organ. It has five manuals, 127 stops and 10,500 pipes and is acknowledged as one of the most successful concert organs of the 20th century. The façade, *Positiv* and *Brustwerk* pipes are by Jacques Stinkens (Zeist), the large reeds and some of the wooden pipes are by Laukhuff (Weikersheim) and other reed pipes were made by Carl Geisecke (Göttingen). The console, wind-chests and some of the wooden pipes were made by Sharp from local timber.

Sharp conceived the Sydney Opera House instrument as a means to present to an Australian audience the finest tonal characteristics of outstanding European organs. His

design is indebted to the organ building schools of four nations (and to a handful of exemplary instruments in particular): England (Trinity College, Cambridge), northern Germany (St Jacobi, Hamburg), Italy (St Giuseppe, Brescia), the French Classical school (St Gervais, Paris) and the French Romantic school (Ste Clotilde, Paris). Sharp's work is inspired by the desire to create instruments which have a strong audience appeal. and which, in the early 20th-century English 'town hall' tradition, will attract the public to organ recitals. He is concerned that many organs are built to satisfy the technical considerations and demands of a coterie of specialist players and listeners, and that beauty of sound has become a consideration. He employs simple, traditional designs in combination with highly refined voicing and regulation.

Sharp was awarded the Silver Jubilee Medal in 1977 and the British Empire Medal in 1980 for his services to organ building.

W.D. JORDAN

Sharvit, Uri (*b* Jerusalem, 24 Oct 1939). Israeli composer. He studied with Sadai (composition) at the Rubin Academy, Jerusalem (1961–4), and with Besson (composition), Rhodes and Christensen (ethno-musicology, PhD 1975) at Columbia University (1961–71). From 1966 to 1968 he was director of the Israel Institute for Sacred Music, Jerusalem, and in 1971 he was appointed lecturer in the musicology department of Bar-Ilan University and conductor of its orchestra. His works, published by Israeli Music Publications and the Israel Music Institute, include a Duo for violin and cello (1963), Psalm xxx (1963), a Passacaglia for orchestra (1971) and Duets for violin and viola (1975).

WILLIAM Y. ELIAS

Shatin, Judith (*b* Boston, 21 Nov 1949). American composer. She studied composition with Milton Babbitt, Otto Luening, Jacob Druckman, J.K. Randall, Peter Westergaard and Gunther Schuller, earning degrees from Douglass College, the Juilliard School of Music and Princeton University. Founder of the Virginia Center for Computer Music, she has taught at the University of Virginia, Charlottesville, where she has also served as chair of the McIntire School of Music. Among her numerous honours are Juilliard's Abram Ellstein Award (1973) and commissions from the Kronos Quartet and the Women's PO.

Shatin's early works, which employ acoustic instruments in conventional solo and ensemble contexts, later gave way to a style combining electronic and acoustic sound. She has described this development by explaining: 'As I [became] fascinated by the intertwining of electronic and acoustic, my sense of music [grew] to include the rumble of machines in a working coal mine, the crunch of a potato chip, the blast of a shofar, the clink of a fork against a cup'. Her preoccupation with timbre, characterized as an 'exploration of timbral edges', has led to experiments with computer-generated digital synthesis and processing; her works often feature improvised acoustic responses to electronic tape or live electronic music.

ANNIE JANEIRO RANDALL

Shavlokhashvili, Tengiz (*b* Tbilisi, 1 Nov 1946). Georgian composer. He studied at the Tbilisi Conservatory taking composition with Machavariani and counterpoint with Mamisashvili, graduated in 1972, then continued his studies at the Moscow Conservatory with Fortunatov (orchestration) and Yury Kholopov (analysis) for three years before he returned to Tbilisi for postgraduate work which occupied him until 1978. He worked as a music editor for the *Gruzia Film* studio (1975–84) before he took up a post of assistant professor at the Tbilisi Conservatory. He was also secretary of the Georgian Composers' Union (1992–6). During his time in Moscow

he gained first-hand acquaintance with contemporary techniques of composition in the seminars for young composers held in Ivanovo; his use of chromaticism and atonal, sonoristic and aleatory techniques bear witness to this striving for expressive means. Although he works in most genres, he is particularly attracted to instrumental writing, and among the most significant of his works should be counted the First Symphony, the Concerto for flute and chamber orchestra, the String Quartet and the Piano Trio. The instrumental orientation of his thinking is revealed in his demanding and frequently expressionistic vocal writing; these atmospheres, however, are tempered by the rationalism inherent in his approach to formal procedures. The slow, meditative unfolding of the musical argument is underpinned by a strong sense of the contrapuntal and of the spatial possibilities of timbre. The sum of his achievements as a composer is represented by his one-act opera *Tetri mandili* ('The White Shawl').

LEAH DOLIDZE

Shaw. *See* SHORE family.

Shaw, Alexander (*b* c1650; *d* Durham, bur. 23 July 1706). English organist, sackbut player and composer. He was at Durham Cathedral, first as a chorister (1660–64) and then as a 'sackbutter' (1664–72). In 1677 he was appointed organist (but not, uniquely, master of the choristers as well), but he proved to have an unsatisfactory personality and was 'ejectus ob contumaciam' at Christmas 1681. His activities thereafter are not known, though the notice of his wife's burial in 1701 describes him as 'organist' and that of his own as 'musician'. Parts of two anthems and two services by him survive (*GB-DRc*). Since he was associated with Thomas Preston as a copyist of the manuscript *GB-Lbl* K.7.e.2 (bass decani) he was probably the Shaw who was organist of Ripon Minster in 1677.

BRIAN CROSBY

Shaw, Artie [Arshawsky, Arthur Jacob] (*b* New York, 23 May 1910). American jazz clarinettist, bandleader, composer and arranger. He grew up in New Haven, Connecticut, where in summer 1925 he joined Johnny Cavallaro's dance band as an alto saxophonist. While touring with Cavallaro the following year he took up the clarinet, which later became his principal instrument. From 1926 to 1929 he worked in Cleveland as musical director and arranger for an orchestra led by the violinist Austin Wylie. He then toured as a tenor saxophonist with Irving Aaronson's band, and while in Chicago in 1929 played in jam sessions with several local musicians. At the same time he discovered the music of Debussy and Stravinsky; both influences were important in Shaw's musical development.

Later that year Shaw played in Harlem jam sessions and came under the influence and tutelage of Willie 'the Lion' Smith. From 1931 to 1934 he worked as a freelance studio musician and in 1936 he formed his first group, for a concert at the Imperial Theater. Shaw's unorthodox band, consisting of a string quartet, three rhythm instruments and clarinet, created a sensation by performing his chamber composition *Interlude in B♭*. He then added two trumpets, trombone, saxophone and a singer, and led a band at New York's Lexington Hotel. However, the public remained indifferent to the group's unusual style and instrumentation, and Shaw was forced to disband in March 1937.

One month later Shaw formed a conventional swing band. With this group, which briefly included Billie Holiday, he recorded his first big hit – Jerry Gray's arrangement of Cole Porter's *Begin the Beguine* (1938, Bb). This marked his breakthrough to public fame and established him as a rival to Benny Goodman. Constitutionally and emotionally unequal to his role as a matinée idol, however, Shaw withdrew from public view in November 1939, a move which served only to provoke the publicity he sought to avoid.

In early 1940 Shaw worked in Hollywood on the film *Second Chorus* and recorded his next big hit, *Frenesi* (Vic.), using a studio orchestra with a large string section. The success of this recording forced him on tour again with a big band augmented by nine strings. From within this group he organized the Gramercy Five and that group recorded one of his best-known compositions, *Summit Ridge Drive* (1940, Vic.). Despite high critical acclaim, Shaw again dissolved his band a few months later, settling in New York to record with studio groups and to study orchestration.

After enlisting in the US Navy in January 1942 Shaw was asked to form a band which he then led throughout the Pacific war zone in 1943. Following his discharge and convalescence he assembled a new group in 1944, which was by all accounts his best jazz-orientated band; one of its recordings, *Little Jazz* (1945, Vic.) with Roy Eldridge, became a classic. He also continued to perform and record with the Gramercy Five. During the next decade Shaw organized two more big bands. He put together his last Gramercy Five in October 1953, then in 1954 he went into retirement. In 1983, however, he was persuaded to reorganize his band, which he continued to conduct occasionally; it performed mainly under the leadership of the clarinettist Dick Johnson.

Shaw was a leading musician of the swing period, and a public figure whose handsome features and eight

marriages made him a darling of gossip columnists. His clarinet playing has often been compared with that of his rival Benny Goodman; though less hot than Goodman, he demonstrated superb technical facility in his recordings of fast and lively numbers and a genuine sense of jazz phrasing in ballads. The full range of his gifts is displayed in his recording *Concerto for Clarinet* (1940, Vic.). Like Goodman, Shaw was an energetic spokesman for racial equality in jazz, hiring and recording black musicians such as Holiday, Hot Lips Page and Eldridge.

RICHARD WANG

Shaw, (George) Bernard (*b* Dublin, 26 July 1856; *d* Ayot St Lawrence, Herts., 2 Nov 1950). Irish dramatist, novelist, critic and polymath. Born into a musical household headed by a trombone-playing father and singing mother, he was initiated early into Italian opera and Mozart. George John Vandeleur Lee, notable in Dublin music as impresario, singing teacher and conductor, also lived with the family; from him Shaw derived his knowledge of singing techniques, an ambition to become an operatic baritone, and possibly the conviction that *Don Giovanni* was the most important item of his education.

In 1876 he moved to London and wrote his first musical criticisms for *The Hornet* as 'ghost' for Vandeleur Lee. From the start his views were trenchant and articulate, couched in a lithe and vivid prose that would venture with assurance on to any subject that might serve the cause of truth as interpreted by Shaw. His five novels date from 1879–83, and as tempestuous hero of the third one, *Love among the Artists*, he invented the composer-pianist of genius, Owen Jack. Shaw joined the editorial staff of *The Star* in January 1888, began to deputize for E. Belfort Bax as its music critic in June, and took over the job in February 1889 as 'Corno di Bassetto'. In May 1890 he transferred to *The World* and continued to write weekly criticism until August 1894.

Shaw's collected writings on music stand alone in their mastery of English and compulsive readability. He made many foes, if only on the ground that to him poor performance was a personal insult to be treated accordingly; but an exact knowledge of the law of libel earned for his pen a subjective licence without parallel in music criticism. Determined to interest stockbrokers in the art, he eschewed academic jargon, disposing once and for all of standard analytical practice in an outrageous parsing of Hamlet's monologue that must have nipped in the bud many a promising programme note. Shaw was fortunate in having to hand in Wagner a musical giant whose cause still needed pleading in London. His essay on the *Ring*, published in 1898 as *The Perfect Wagnerite*, combined a clear and entertaining interpretation of the myth in terms of the capitalist society Shaw found increasingly damnable with a ready interpretation of the work's power as music. If the case is weakened by his decision to regard *Götterdämmerung* and the last scene of *Siegfried* as grand opera rather than music drama and therefore unworthy of serious attention, he was right to note Wagner's change of direction during the composition of the *Ring*. Shaw's admiration for Wagner never ousted Verdi from his affection, even if it blinded him to the merits of Brahms, whose *German Requiem* inspired some of his most ribald paragraphs, and made him insensible to the worthiness of native oratorios that in Shaw's view seemed to equate inspiration with sin.

After abandoning professional criticism, he followed the development of music with keen interest. He took up the cudgels against Ernest Newman on behalf of Strauss's *Elektra*, recognized Elgar's genius and became his close friend, watched with approval the emergence of a new line of British composers, supported the pioneer work of Arnold Dolmetsch, and was as ready to stretch his ears backwards in time as to sit out the latest Schoenberg or Skryabin. He turned down Elgar's request for an opera libretto, but was involved in the BBC's commissioning of the composer's Third Symphony. Most of his judgments have stood the test of passing years: if he neglected Haydn, he could hardly do otherwise at the end of the 19th century; if he overpraised Goetz, at least he arouses curiosity; if Mendelssohn is dismissed, it is by the standards of the B minor Mass; if Rossini has to go, it is because of *Parsifal*.

He claimed he had learnt force of assertion from Handel, and from Mozart the ability to say important things conversationally. 'Don Giovanni' was his nickname in the early London days, and Mozart's opera haunted his work from the short story of 1887, *Don Giovanni Explains*, to *Man and Superman* of 1901–3, in which Act 3 descends to a hell where 'music is the brandy of the damned', accompanied by the strains of Mozart's overture. The fourth play of *Back to Methuselah*, an ambitious scheme owing much to Wagner, introduces the oracle scene with the priests' chords from *Die Zauberflöte*. Among Shaw's dramatic characters are such musicians as Clementina Buoyant, who charms alligators and rattlesnakes with her saxophone, Lord Reginald Fitzambey and Strega Thundridge, duet-pianists in *The Music-Cure*, Shaw's 'piece of utter nonsense', the temporary Salvation Army trombonist, Andrew Undershaft, and the melancholy flautist Randall Utterword of *Heartbreak House*, while the artistic creed of the dying Louis Dubedat in *The Doctor's Dilemma* looks back to the young Wagner's tale *An End in Paris*. The operatic layout of many Shaw scenes generates a characteristic music of its own, and no heroine in music drama has a more effective curtain than Lilith's monologue in *Back to Methuselah*.

In 1908 Oscar Straus turned *Arms and the Man* into a musical comedy, *The Chocolate Soldier*; and in 1956 *Pygmalion* became Loewe's musical, *My Fair Lady* (with adaptation of the music by Previn for the film). Composers who have written music to Shaw films include Honegger for *Pygmalion* in 1938; Walton for *Major Barbara* (1941);

Auric for *Caesar and Cleopatra* (1945); and Richard Rodney Bennett for *The Devil's Disciple* (1959).

ROBERT ANDERSON

Shaw, Christopher (*b* London, 30 July 1924; *d* Gatehouse-of-Fleet, 27 Sept 1995). English composer. He studied at New College, Oxford (1942–4) with R.O. Morris and H.K. Andrews. Although he subsequently showed some early compositions to Vaughan Williams, and retained a lifelong admiration for that composer, the Clarinet Sonata (1948–9), with which he had his first public success, tends towards the lighter Hindemith, but not in such a way as to call in question the later and more powerful influence of Dallapiccola. While the relatively approachable Sonata found a publisher, every work of the next 20 years, apart from the written-to-order *No Room at the Inn*, remained in manuscript. Although the successful première of the cantata *Peter and the Lame Man* brought an immediate offer of publication, Shaw declined it, and for the rest of his life preferred to compose in relative seclusion while at the same time leading an active life as accompanist, coach, translator and a key figure in the touring programme of the Opera Players. Most of his later works, including the piano Fantasia, the Wind Quintet and a second cantata, *In Memoriam Jan Palach*, remained unperformed at the time of his death.

Whereas *Peter and the Lame Man* proved accessible to a relatively broad public, despite affinities with the Schoenberg of *Moses und Aron* and the Stravinsky of *A Sermon, a Narrative and a Prayer*, *In Memoriam Jan Palach* takes the asceticism of *A Lesson from Ecclesiastes* to its solitary and hermetic conclusion. Already at odds with the spirit of the time when first composed, it was revised in the mid-1980s without the slightest concession to the prevailing climate of post- or anti-modernism. For Shaw there was never any contradiction between the absolute values embodied in the two cantatas and related works, and the practical considerations that dominated his occasional pieces. The most substantial of these is *Garden Songs*, a cantata in all but name, and one that belongs squarely to the tradition of Holst, Vaughan Williams and Britten, despite the fact that each number is a musical homage to a specific (not necessarily English) composer. Like the choral music for church occasions, *Garden Songs* presupposes a broad musical culture embodying a set of shared aesthetic values. Shaw's awareness that such compositions had become in principle anachronistic did not diminish his sense of their usefulness in local circumstances. Among British composers indebted to Schoenberg's serial method, Shaw stands almost alone between the generation of Lutyens, Searle and Darnton, and that of Birtwistle, Goehr and Maxwell Davies.

WORKS
(selective list)

Cants.: Croagh Patrick (E. Fawcett), A, Bar, spkr, str, timp, 1950; Peter and the Lame Man (Bible: *Acts*, iii), T, B, SAT, orch, 1965–7; Garden Songs (G. Chaucer, W. Dunbar, T. Herrick, 16th- and 17th-century Eng.), T, SATB, orch; In Memoriam Jan Palach (J. Hus, Thomas à Kempis), S, B, spkr, orch, 1974, rev. 1985
Other choral: The Shepherd's Wonder (S. Godolphin), SATB, org, 1956; The Year's Christmas (E. Muir), 8vv, 1956; No Room at the Inn, SATB, pf, 1961; A Lesson from Ecclesiastes, SATB, org, 1962; 3 Poems of D.G. Rossetti, SATB, 1963; Music, when soft voices die (P.B. Shelley), SATB, 1972
Other solo vocal: The Cherry Tree (A.E. Housman), 1v, pf, 1944; Ode to Evening (William Collins), S, 2 cl, pf, 1948; 4 Poems of James Joyce, S, hp, str qt, 1951–3; Bright Star (J. Keats), T, cl, 1953; 7 Songs from Chios, 1v, pf, 1958; Jubilate Deo, S, org, 1959; 6 Greek Folksongs, 1v, pf, 1959; 6 Songs from Scotland, 1v, pf, 1963; The Isle of Skye (Jacobite), S, B, pf, 1969; A Love Song (W. Cartright), 1v, lute, vc, 1984
Inst: Variations on a theme by Bartók, pf, 1947; Suite, E, pf, 1948; Sonata, cl, pf, 1948–9; Trio, cl, va, pf, 1953–4, rev. 1973; Variations on 'Le ranz des vaches', pf duet, 1971; Canon, pf, 1971; Fantasia, pf, 1980; 5 Pieces for Wind Quintet, 1983; pf pieces, 1989–95, 6 of projected set completed

DAVID DREW

Shaw, Francis (*b* Maidenhead, 23 June 1942). English composer. He studied at the London College of Music, with Goehr at the University of Southampton (BMus 1972) and privately with Petrassi and Berkeley. From

1990 to 1995 he was head of music at the National Film and Television School, and in 1978 became lecturer in composition at the GSM; from 1997 to 1999 he was coordinator of the film composition course at the RCM. His opera *The Selfish Giant* was awarded first prize at the Caerphilly International Opera Festival in 1972 (the same year his Divertimento for strings was commissioned by Menuhin for the Windsor Festival). Shaw's fluency in a wide range of styles has brought him many commissions for film and television. While he works in a variety of media, including electronic, his strengths as an orchestral composer have enabled him to be particularly effective in supporting suspense and drama, for example in *Merlin of the Crystal Cave*, *Jamaica Inn* and the contemporary action-thriller *Vendetta*.

WORKS
(*selective list*)

Film, TV scores: Crime and Punishment, 1978; Ireland: a Television History, 1980; The Barretts of Wimpole Street, 1982; Shackleton, 1982; The Country Girls (film score, dir. D. Davis), 1983; Jamaica Inn, 1983; The Master Builder, 1987; A Dinner of Herbs, 1988; And a Nightingale Sang (film score, dir. R. Knights), 1989; Merlin of the Crystal Cave, 1991; Flowering Passions, 1991; Held in Trust, 1994; Vendetta (film score, dir. M. Hafstrom), 1994; The Life and Loves of Oscar Wilde, 1995; My Sister, 1997

Other: Divertimento, str, 1972; The Selfish Giant (op, 4 scenes, M. Ffinch), 1972; Voices 'round a Star (meditation for Christmas) (radio score) 1972; The Stable and the Star (meditation for Christmas) (radio score) 1973; A Step to Reality (radio score, G. Baker), 1982; Aspects of Summer, 1986; Variations and Fugue, str, 1987; Pf Conc., 1988; 2 Dreamscapes, vc, str, 1994; Bright Phoenix (J. White), SATB, org, 1997

DAVID BURNAND

Shaw, Martin (Fallas) (*b* London, 9 March 1875; *d* Southwold, 24 Oct 1958). English composer. The brother of the music educationalist and composer Geoffrey Shaw (1879–1943), he studied at the RCM, where he was a composition pupil of Stanford. After a number of years' work for theatrical productions associated with Gordon Craig and Isadora Duncan in England and Europe, he became organist at St Mary's, Primrose Hill (1908–20); he later served as organist at St Martin-in-the-fields (1920–24). An interest in specifically English music led to his foundation of the Purcell Operatic Society and its production of *Dido and Aeneas* in 1900. Traditional vocal music through which the community expressed itself (whether in school, church or on national occasions) also proved to be a lifelong commitment. He worked tirelessly as an arranger, editor and lecturer to bring this music to the public's attention. He received the Lambeth degree of DMus in 1932, was appointed OBE in 1955 and was made a fellow of the RCM in 1958.

As a composer, Shaw wrote stage music, influenced by his early theatrical experiences, choral music and solo songs. His prolific output of songs, which leaves an impression of good taste without strong character, were welcomed by fastidious singers of their day. The *Song of the Palanquin Bearers* (1898) stands out as particularly successful in the evocation of its subject; one or two songs were intended for school use. His more orthodox church music (such as the anthem *Jesu, the very thought is sweet*, 1933) is lyrical and well contrived. His most influential music, the hymn tunes *Little Conrad* and *Marching* for example, was designed for congregational singing.

WORKS
(*selective list*)

Stage: The Vikings (incid music, H. Ibsen), 1900; Brer Rabbit and Mr Fox (musical frolic, 5 scenes, M. Dearmer), 1914; Mr Pepys (ballad op, 3, C. Bax), 1926; The Thorn of Avalon (op, 3, B. Baron), 1931; Philomel (operetta, E. Farjeon and Bax), 1932; The Rock (pageant, T.S. Eliot), 1934; Master Valiant (masque, Baron), 1936; Waterloo Leave (ballad op, Bax); Faithful Jenny Dove (ballad op, Farjeon)

Sacred music: A Modal Setting of the Communion Service, 1914; An Anglican Folk Mass Founded on Native Hymn Melodies, 1918; A Parish Communion Service, 1920; Simple Traditional Music for the Eucharist, 1958

Other: Suite, a, str qt, 1923; The Ungentle Guest, 1v, insts, 1931; Water Folk, 1v, insts, 1932; Sursam corda (cant., L. Binyon), perf. 1933; The Redeemer (cant., Cobbold); over 100 songs

WATKINS SHAW/JULIAN ONDERDONK

Shaw [née Postans], **Mary** (*b* Lea, Kent, 1814; *d* Hadleigh Hall, Suffolk, 9 Sept 1876). English contralto. She studied at the RAM, London (1828–31), and afterwards with Sir George Smart, making a successful début (as Mary Postans) in London (1834). In 1835 she sang at the York Festival and in the same year she married the painter Alfred Shaw and began to appear under her married name. During the Liverpool Festival of 1836 she sang in the first performance in Britain of Mendelssohn's *St Paul*. For the season of 1838–9 she was engaged at the Leipzig Gewandhaus concerts under the direction of Mendelssohn, who referred to her and Clara Novello as 'the best concert singers we have had in this country for a long time'. On 17 November 1839 she made her operatic début at La Scala, Milan, as Cuniza in the première of Verdi's first opera, *Oberto*. She returned to England in 1842 and made her local stage début in Adelaide Kemble's Covent Garden season, also scoring great successes in Cimarosa's *Il matrimonio segreto* and Rossini's *La donna del lago* at Drury Lane. On 22 April 1844 she appeared in the first performance of Benedict's *The Brides of Venice* (Drury Lane). Later that year her husband went insane, and the shock affected her voice so that she had to retire from the stage while at the height of her career. For a few years she taught privately and appeared in public at an annual benefit concert. After her husband's death in 1847 she remarried and retired to the country.

HAROLD ROSENTHAL/GEORGE BIDDLECOMBE

Shaw, Oliver (*b* Middleborough, MA, 13 March 1779; *d* Providence, RI, 31 Dec 1848). American composer, compiler, teacher, singer, organist and publisher. After accidental eye damage leading to blindness, he undertook musical studies with John L. Berkenhead, Gottlieb Graupner and Thomas Granger about 1800. In 1805 he established himself as a teacher of the piano and organ in Dedham, Massachusetts, where he began to issue his music in collaboration with Herman Mann. Moving to Providence in 1807, Shaw became a central figure in the city's musical life as organist, organizer of bands and composer of songs, odes, anthems and marches for patriotic and civic occasions. His 'Military Divertimento', *Welcome the Nation's Guest*, celebrated the visit of Lafayette to Providence in 1824.

Shaw sought to improve the quality of local sacred music, co-founding the Psallonian Society, and provided inspiration to the founding of the Boston Handel and Haydn Society in 1815, frequently participating in its early performance. His tenor voice was described as sweet, simple and natural; his performances of his own compositions were said to be remarkably affective. *Mary's Tears*, *There's nothing true but heav'n* and *All things fair and bright are thine* were particularly popular, establishing him as a leader in the development of American song.

Shaw taught the piano and singing throughout his career, and conducted singing schools in the early decades of the 19th century (Lowell Mason was among his pupils). He also instructed his own children, who later served him as amanuenses. His pedagogical compositions include many easy keyboard pieces, two instructional books for the piano (1811, 1831) and a compilation of ensemble music, *For the Gentlemen* (1807), which was one of the earliest American printed instrumental tutors by a native composer.

WORKS
(*selective list*)

all printed volumes were published by Shaw and contain works by him, listed here in brackets

A Favourite Selection of Music (Dedham, MA, 1800) [3 songs, pf piece]
For the Gentlemen, 2–5 insts (Dedham, MA, 1807) [3 works attrib. O. Shaw, 13 others probably by him]
The Columbian Sacred Harmonist (Dedham, MA, 1808) [13 hymn tunes]
A Selection of Progressive Airs, Songs, &c, pf (Dedham, MA, 1810) [8]
The Providence Selection of Psalm and Hymn Tunes (Dedham, MA, 1815) [13 hymn tunes, choral works]
Sacred Melodies (Providence, RI, 1818) [3 choral works, 3 songs, 2 duets]
Melodia sacra (Providence, RI, 1819) [11 hymn tunes, 3 anthems]
[16] Sacred Songs, Duets, Anthems, &c (Providence, RI, 1823) [all by Shaw]
A Series of Original Songs, Duets, Anthems &c (Providence, RI, n.d.) [5 anthems]
The Social Sacred Melodist (Providence, RI, 1835) [26 songs, duets, anthems, all by Shaw]
Many pf pieces, incl. Welcome the Nation's Guest, 1824, ed. in RRAM, ii (1977); 5 in O. Shaw's Instructions for the Pianoforte (Providence, RI, 1831); other songs, odes, anthems, inst works, many separately pubd

BRUCE DEGEN

Shaw, Robert (Lawson) (*b* Red Bluff, CA, 30 April 1916; *d* New Haven, CT, 25 Jan 1999). American conductor. He studied at Pomona College, Claremont, California (1934–8), where he directed the glee club, which so impressed Fred Waring, the popular radio conductor, that he asked Shaw to help organize the Fred Waring Glee Club in 1938; Shaw conducted it until 1945. He also founded and conducted (1941–54) the Collegiate Chorale in New York, commissioning, among other works, Hindemith's *When Lilacs Last in the Dooryard Bloom'd* (1946). In 1944 he was awarded a Guggenheim Fellowship, the first conductor to receive this honour. He made his début as a symphonic conductor with the Naumburg Orchestra in New York in 1946, and the same year made his first appearance with the NBC SO, for whose concerts under Toscanini he had several times prepared the chorus. He was director of the choral departments of the Juilliard School, and the Berkshire Music Center from 1946 to 1948. That year he founded the Robert Shaw Chorale, and until it was disbanded in 1965 toured internationally with it and made many recordings. For the Chorale Shaw commissioned works from many composers, including Bartók, Milhaud, Britten, Barber and Copland. His interest in orchestral conducting led him to study with Monteux and Rodziński in 1950. He was associate conductor under Szell of the Cleveland Orchestra (1956–67), where he organized a chorus as adjunct to the orchestra. In 1967 he became music director of the Atlanta SO, a position he held until 1988, when he was named music director emeritus and conductor laureate. In 1988 he founded the Robert Shaw Institute at Emory University, Atlanta to promote choral singing.

Shaw's gift with choruses was remarkable; whether with the 120 or so amateurs of the Collegiate Chorale,

Robert Shaw, 1940s

the 40 professionals of the Robert Shaw Chorale, or with transient groups, the result was likely to be extraordinary. Certain of his innovations, such as seating by quartets rather than by sections for the sake of richer blend, have been widely adopted. In Cleveland he created a chorus that for Verdi's Requiem could produce a massive wall of sound such as one seldom hears in the USA, but which could lighten miraculously for Haydn's oratorios. His performance of Bach's B minor Mass in New York in 1946 was the first to be given there with small chorus and orchestra under other than specifically scholarly direction. He made many recordings, several of which have won Grammy Awards. Notable recordings with the Robert Shaw Chorale are Bach's Mass in B minor, Britten's *A Ceremony of Carols*, Poulenc's *Gloria* and Stravinsky's Symphony of Psalms; and with the Atlanta Symphony Orchestra and Chorus the requiem settings of Berlioz and Verdi and Britten's *War Requiem*. Shaw was made a member of the National Council on the Arts in 1979; in 1992 he was awarded the National Medal of Arts, and in 1993 the Conductor's Guild Theodore Thomas Award.

MICHAEL STEINBERG/DENNIS K. McINTIRE

Shaw, Thomas (*b* ?Bath, *c*1752; *d* ?Paris, *c*1830). English violinist and composer. He was the son of Thomas Shaw (*c*1716–1792), one of Bath's leading string players and early 18th-century concert directors. His earliest known performance was in Bath in April 1769, but he was clearly an accomplished player by then, for during the following autumn and spring of 1770 he led the orchestra in Thomas Linley's subscription concerts. He was a member of the theatre band in 1771 and his first known composition, an overture, was performed in a concert at the end of December. By 1772 he was playing his own compositions in Bath and Bristol but difficulties with Thomas Linley made London a more attractive centre for him and his last known performance in Bath was in November 1774. That same year *Six Favourite Minuets* by Shaw were published by Thomas Whitehead in Bath.

Shaw was admitted to the Society of Musicians in 1776 and was a member of the Drury Lane band by 1778. From 1786 until the early 1800s he led the band, and Dibdin thought him a much better leader than Covent Garden's Baumgarten. By 1790 Shaw had published some promising instrumental works and compiled an afterpiece opera, *The Island of St Marguerite* (Drury Lane, 13 November 1789), whose plot was inspired by the recent fall of the Bastille; Michael Kelly played the Prisoner in the Iron Mask. For the Act 1 finale Shaw borrowed the *Figaro* duet, 'Crudel! perchè finora', which had just been published in London. He contributed an interesting overture to *The Island of St Marguerite* in the same unusual form as the one in Mozart's *Die Entführung aus dem Serail*. He also wrote a good overture for a revival of Michael Arne's *Cymon* (Drury Lane, 13 December 1791); according to advertisements both these overtures were published in parts, but they seem to survive only in keyboard arrangement. Thereafter Shaw composed only the occasional song for Drury Lane, even though he later became one of the theatre's proprietors. Sheridan's failure to pay him led to severe financial difficulties, and his debts eventually drove him abroad. In the 1820s Fanny Kemble was sent to school in Paris and found him teaching music there.

Shaw's keyboard sonatas, though seldom striking, have a musical quality that makes them of some interest. The last set (op.13) is perhaps the best, although no.1 is too flimsy for modern tastes. No.2 in B♭ suggests a knowledge of Mozart's Prague Symphony, and no.3 in E ends with a 'Chacone' based on the second subject of the opening movement. The Trio is a seriously intentioned work in G minor that would merit revival.

Shaw may have entertained Haydn to lunch on 14 September 1791; Haydn confided in his second London notebook that Mrs Shaw was 'the most beautiful woman I ever saw'.

WORKS

printed works published in London

INSTRUMENTAL

Violin Concerto in 9 parts (*c*1785)
3 Sonatas, pf/hpd (1787)
3 Sonatas, pf/hpd, op.4 (1790)
3 Sonatas, pf, op.9 (*c*1804)
Trio, g, 2 vn, vc (*c*1805)
3 Sonatas, pf, op.13 (1805)
Solo, fl, op.12 (1819)

ROGER FISKE/KENNETH E. JAMES

Shaw, (Harold) Watkins (*b* Bradford, 3 April 1911; *d* Worcester, 8 Oct 1996). English teacher of music and musicologist. After private music study with Charles Stott he read history at Wadham College, Oxford (1929–32; BA 1932), and then spent a year at the RCM (1932–3) studying with Alcock, Colles and R.O. Morris. In 1936 he was awarded the Oxford University Osgood Memorial prize for his dissertation on John Blow. He taught in London before becoming music organizer to Hertfordshire County Council in 1946. In 1949 he was appointed a lecturer at Worcester College of Education, a position he held until retirement, and while at Worcester was honorary librarian of St Michael's College, Tenbury (appointed 1948), retaining this position after his appointment as keeper of the Parry Room library at the RCM in 1971, from which post he retired in 1980.

Shaw's work as a musicologist was for many years carried out against the background of his work as a teacher. He published books on the teaching of music in schools at primary and secondary levels. Work for his edition of *Messiah* occupied the years between 1957 and 1965, when his textual companion to the work was published: a searching analysis of the sources, it is nevertheless elegantly written and has been described as the only textual commentary that might be read for pleasure. In 1974 he contributed a preface to a facsimile edition of the Tenbury manuscript of the oratorio. Though eventually used, the edition at first aroused suspicion on

account of its attempts in several directions to break the crust of convention surrounding the work in the British Isles. *Messiah* is only one of many Handel works of which he prepared editions both scholarly and practical. As a writer, specializing in English music from the Elizabethan era to the 18th century, his critical work was discerning and precise. In 1967 Shaw was awarded the DLitt in the faculty of music by Oxford University, and he was appointed OBE in 1985.

DAVID SCOTT/R

Shawān, 'Azīz al-. *See* AL-SHAWĀN, 'AZĪZ.

Shawe-Taylor, Desmond (Christopher) (*b* Dublin, 29 May 1907; *d* Long Crichel, Dorset, 2 Nov 1995). English music critic. He was educated at Shrewsbury College, Oxford (1926–30). Before World War II he was employed mainly in literary criticism, but occasionally wrote about music in *The Times*, *The Spectator*, the *London Mercury* and the *New Statesman*. In 1945 he was appointed music critic of the *New Statesman*, and in 1958 he succeeded Ernest Newman as music critic of the *Sunday Times*. He was guest critic of the *New Yorker*, 1973–4. He contributed a quarterly article to the *Gramophone* surveying recordings of vocal music (1951–78) and a series of 17 articles, 'A Gallery of Great Singers', to the magazine *Opera* (1955–88). He retired from the *Sunday Times* in 1983.

Shawe-Taylor's particular interests were opera, song, vocal technique and interpretation, and recordings. His judgements were based on a deep and wide knowledge and a keen discernment, particularly as regards the human voice. Although receptive to new music, he was quick to distinguish pretension or absurdity and sharp in pointing them out. His writing was trenchant and informative, marked by grace, wit, and a strong vein of common sense.

Shawki (Moustafa), Youssef [Shawqī Muṣṭafá, Yūsuf] (*b* Tanta, 1925; *d* Masqaṭ, 20 Nov 1987). Egyptian musicologist. He studied science in Cairo and at Harvard, taking the doctorate in 1950, concurrently investigating Arab and European music. He began teaching at the Cairo Conservatory and later at the University of Cairo. He took part in conferences on Arab music in 1964 and 1969, his paper on Arabic music scales from the latter being one of his most important essays. In 1983 he was invited by the Sultan Qaboos bin Said of Oman to carry out field research on Omani music. He became the supervisor of the Oman Centre for Traditional Music in Masqaṭ, compiled a dictionary of Omani music, published posthumously, and in 1985 organized a conference on traditional Omani music. Shawki is one of the major figures of Arab music in the 20th century. His writings are carefully investigated, and are characterized by their scientific approach.

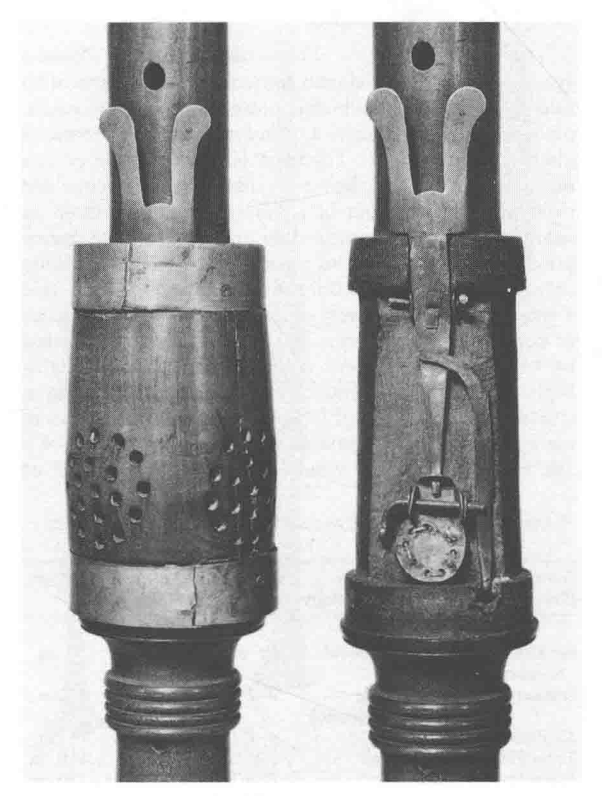
CHRISTIAN POCHÉ

Shawm [scalmuse, shalm, shalmie, schalmuse] (from Lat. *calamus*: 'reed'; Fr. *chalemelle*, *chalemie*, *chelemele*; Ger. *Schalmei*, *Schalmey*; It. *cialamella*, *ciaramella*, *piffaro*; Lat. *celimela*, *gingrina*, *tibia*; Sp. *chirimía*, *xirimía*). A woodwind instrument, usually with a double reed. The

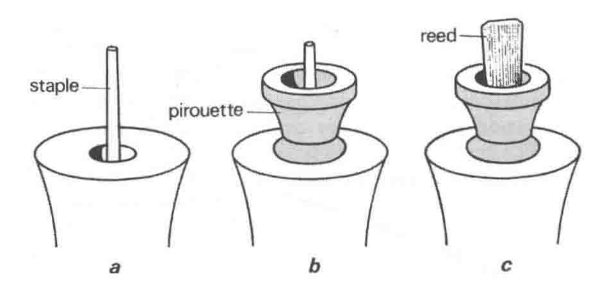
term 'shawm' has developed more than one meaning; since Hornbostel and Sachs ('Systematik der Musikinstrumente', 1914) it has been used as a generic term denoting both single-reed and double-reed aerophones, but in organological literature it is applied for the sake of precision to double-reed instruments only, many of whose names are linguistically related to 'shawm' (e.g. the Arab *zamr*, the Turkish *zūrnā*, the Persian *surnāy*, the Chinese *suona*, the Javanese *saruni* and the Hindu *sahanai/sanayi*). This article is concerned with European types (for non-European types, *see* OBOE, §I, 1), primarily with the shawm as the double-reed instrument extensively used in European art music from the 12th century to the 17th and reappearing in the early music revival of the 20th. It was made in many different sizes.

The larger sizes of European shawm also became known as 'bombarde' or 'bumbard' (from Lat. *bombus*, 'drone, buzz'; It. *bombardo*, Ger. *Pumhart* or *Pommer*), a term deriving from a medieval artillery piece. The distinction already present in German in the middle of the 14th century between 'schalmigen und bumbart' (Strassburg, 1322) did not occur in English of the period, where all sizes were usually called 'shawm' or 'hoboy' indiscriminately. In fact there are some indications that the *Pommer* had an independent type of construction used only for instruments in the lower registers. During the 15th century the term 'hautbois' (from Fr., literally 'high wood') was also applied to the higher instrument, although it was transferred in the late 17th century to the newly developed oboe; an analogous term for lower ones was 'grosbois'. English also had the term 'wayghte' or 'waits pipe' (still used for the English shawm by James Talbot, MS *c*1695, *GB-Och* Mus.1187), named after the city watchman's duty of sounding the hours. In late medieval Germany and the Low Countries the term RAUSCHPFEIFE was sometimes used for the shawm both with and without a wind cap. For discussion of shawms with wind caps, *see* WIND-CAP INSTRUMENTS, §2.



As no original pre-16th-century instruments have been preserved, it is necessary to resort (with due caution) to modern folk survivals and to iconographical evidence for clues as to the early form and history of the shawm. Even the few later instruments that have survived are difficult to date and to classify in accordance with the diversity of original terminology whose meaning is not always clear. It is difficult to reconstruct playing practices from the meagre written documentation, and misleading concepts have become entrenched from attempts to reintroduce the shawm consort by 20th-century early music groups. A thorough history of the shawm and of shawm playing has not yet been written.

1. General description. 2. The shawm family. 3. History. 4. The *deutsche Schalmey*. 5. Other versions of the European shawm.



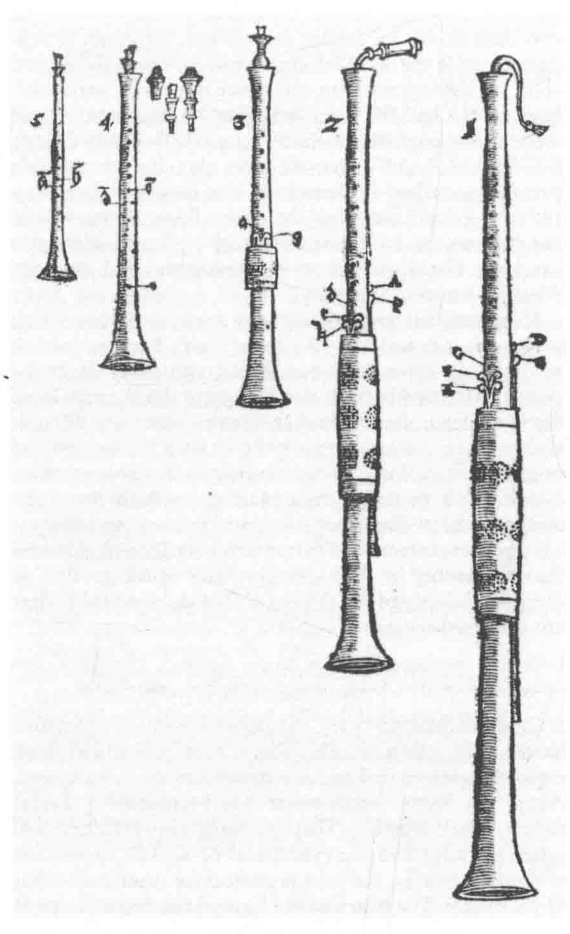
1. GENERAL DESCRIPTION. Shawms were made of various hardwoods, often maple. They have a conical bore expanding into a bell and are usually made in one piece, except the larger instruments which consist of several sections fitted together. They generally have little external ornamentation and are cylindrical or slightly tapered in outline. Internally, the bore is conical for some four-fifths of its length. The instruments have seven finger-holes at the front; in the larger instruments the lowest hole is closed by a key which operates inside a protective, slide-on wooden barrel (Fr. *fontanelle*) perforated by small holes, arranged in ornamental patterns, to let the sound through (fig.1). Below the lowest finger-holes there are several vent-holes to correct the effect of the acoustically overlong bell section (which is necessary for tonal stability), and in some original instruments to make the production of diatonically descending extension notes possible by closing them.

As a rule these instruments, apart from the lowest ones, were played with a pirouette (Fr., also *Rosette*, Engl. 'fliew'); although only a few original pirouettes have been preserved, Mersenne (*Harmonie universelle*, 1636–7) and Talbot both gave precise descriptions of their nature. They were usually made of turned wood in a cup shape with a flat or slightly concave top (fig.2). The double reed was placed on a staple (a conical brass tube), which in turn was fitted into the pirouette so as to leave the upper part of the reed clear. The lower part of the staple is wound with thread and fitted into the neck of the shawm. The player's lips could rest against the top of the pirouette, supporting the embouchure against fatigue and allowing the reed to vibrate freely inside the mouth, or the reed could be subject to direct lip control thus allowing variable sound production. The many depictions of a musical ensemble in which one shawm player is resting illustrates the strain placed on the lips in performance (see fig.8 below). The reeds were probably shorter and somewhat broader than those of modern double-reed instruments, although with a wider opening. However, such details as whether they were bound to a sleeve or constructed on a dummy are not known.

The few early accounts of the sound of the shawm suggest that it was extremely loud and powerful. As early as 1350 Konrad von Megenburg said that the 'bombina'

1. Details showing the fontanelle (left), and single key with fontanelle removed (right), of a German alto shawm, late 16th century (Musikinstrumenten-Museum, Berlin)

2. Diagram of the top of a shawm: (a) the staple, its lower part wound with thread; (b) the pirouette; (c) the reed, also shown in place



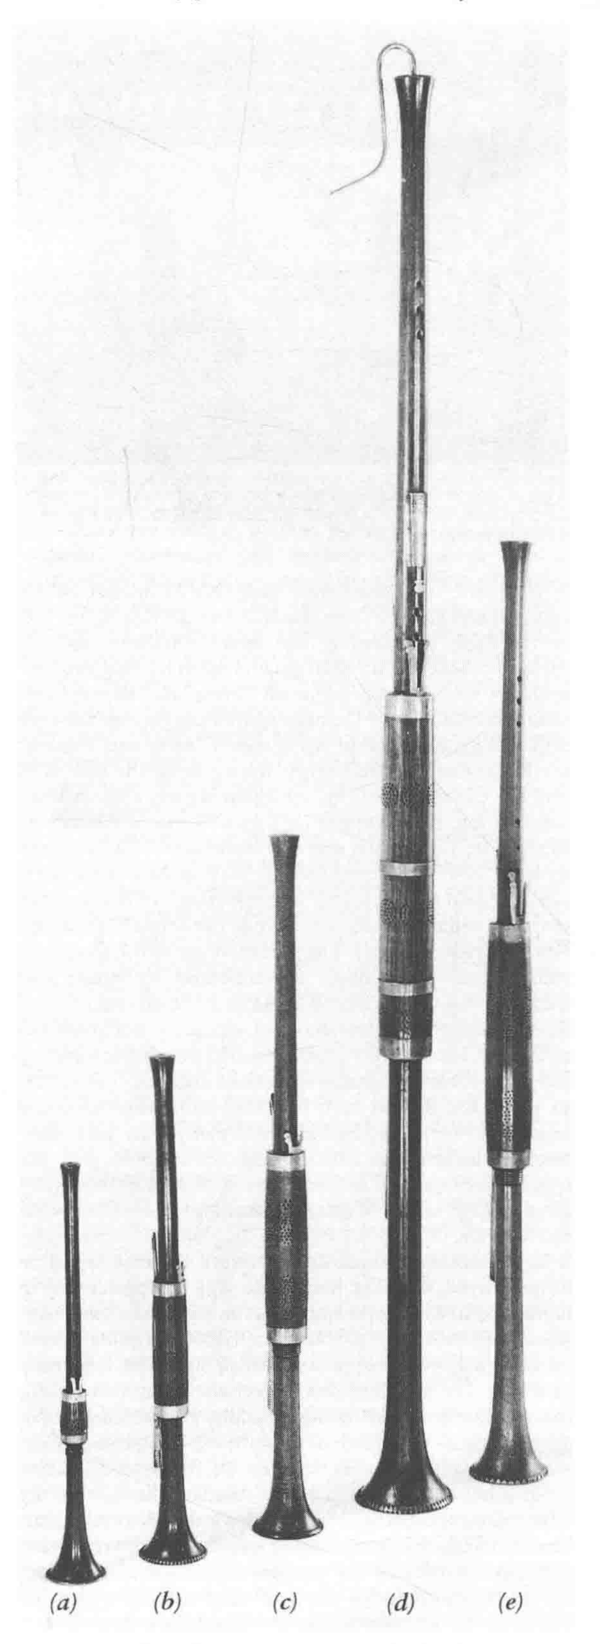
is so called because 'it buzzes with a great trumpet blast or din of sound'. In 1588 Arbeau (*Orchésographie*, f.23v–24) commented that 'the "haulbois" greatly resemble trumpets, and they make a very pleasing consonance, when the large ones play in the lower octave ... with the little "haulbois" playing in the upper octave'. Consequently, he continued, they are 'good for making a loud noise, such as is needed for village feasts and large gatherings'. Praetorius (*Syntagma musicum*, ii, 2/1619) suggested that the Latin term 'Gingrina' for the treble instrument refers to 'the sound it makes, like a goose' (from Lat. *gingrire*: 'cackling'). In 1636 Mersenne wrote of shawms that 'they make the loudest and the fiercest sound of all the instruments, with the exception of the trumpet'. Depending on the reed and the manner of playing, the instrument could produce an open and brilliant sound, which accounts for the popularity of the shawm over many centuries.

2. THE SHAWM FAMILY. The works of Virdung (*Musica getutscht*, 1511) and Martin Agricola (*Musica instrumentalis deudsch*, 1529), which contain drawings of shawms, mention only two sizes: a *Schalmey*, and a *Bombardt* pitched a 5th lower. Tinctoris (*De inventione et usu musicae*, iii, *c*1483), however, had already recognized three sizes of the *tibia* or *celimela*, describing them as *suprema*, *tenor* or *bombardam* and *contratenor*, terms previously used in a list of a consignment of instruments sent from Bruges to the Burgundian court in 1423. Table 1 shows the shawm family of the 16th and 17th centuries as described by Praetorius in 1619 (fig.3) and illustrated by surviving instruments, for example in collections in Berlin (Musikinstrumenten-Museum; fig.4) and Prague (National Museum) and in Salamanca Cathedral. As in many wind families, shawms were built at intervals of a 5th from each other, which can lead to problems of intonation in ensemble playing. Praetorius therefore suggested additional instruments in a series of alternating 5ths and 4ths. It is important to note, however, that normally only two or three members of the family were played together at any one time, and not the whole family, as was sometimes practised in the 20th-century revival in shawm playing.

TABLE 1: Names and approximate sizes of 16th- and 17th-century shawms

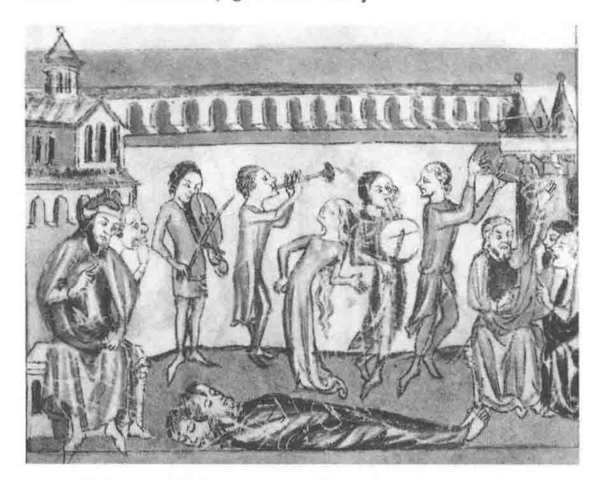
German (Praetorius)	*Modern terminology*	*Compass*	*Length*
gar klein Discant Schalmeye	high treble	*?a′–e‴*	50 cm
Discant Schalmey	treble (soprano)	*d′–b″*	65 cm
Alt Pommer	alto	*g–d″* (1 key)	75 cm
Tenor Pommer	tenor	*c–g′* (1 key)	110 cm
Basset Pommer		*G/A/B/c–f′/g′* (4 keys)	130 cm
Bass Pommer	bass	*C/D/E/F–c′* (4 keys)	180 cm
GrossBass Pommer	great bass	*F′/G′/A′/B♭′–f* (4 keys)	290 cm

The *gar klein Discant Schalmeye* is mentioned only by Praetorius, presumably because of the problems caused by both its short length and its impractical diatonic disposition a 5th above the treble; there is a rare 16th-century example in the Kunsthistorisches Museum, Vienna. The treble shawm (*Discant Schalmey*) is the main descant instrument of the family. The seventh hole, placed on the side to accommodate the little finger, is duplicated left and right to allow the player to choose which hand is held uppermost; the unused hole is plugged with wax. With all finger-holes covered the treble shawm sounds *d′*. The top note given by Praetorius is *b″* and by Mersenne *d‴* (*dessus haut-bois*); the difference may result from a different reed, mode of playing and perhaps from the absence of a pirouette. Fingering is like that of the recorder or cornett, except for the absence of a thumb-hole, since here the octave break is controlled by the lips, air pressure and the reed alone. The instrument's best diatonic scale is



3. Shawm family, (from left to right) Klein Schalmey, Discant Schalmey (with optional wind cap), Alt Pommer, Basset oder Tenor-Pommer (with wind cap), Bas-Pommer: woodcut from Praetorius's 'Syntagma musicum' (2/1619–20)

G major, which nonetheless involves cross-fingering for *g′*, *g″*, *c″* and *d″*. Hence Praetorius's recommendation that when treble shawms are used the music should be transposed from the customary C or F into G (*f′* is in any event difficult to produce accurately on shawms with *d′* as the lowest note).



The alto shawm and all instruments below it were known by the term 'bombarde' (Ger. *Pommer*, *Pumhart*). Instead of the treble's duplicated hole for the little finger, the alto has a brass key to cover the hole, protected by a *fontanelle* (see fig.1). Its tone is mellower than that of the treble shawm, a result of different principles of construction which indicate that it was originally an independent instrument. There is still some uncertainty about the significance of numerous representations of shawms from the late 14th century to the middle of the 15th, depicting the final section from the end of the flare to the bell as cylindrical (cf Duffin, 1997–8). As an extant instrument in Berlin shows (fig.4*b*), the alto shawm could sometimes be fitted with additional keys to extend its range, as was usual for the deeper instruments, the basset, bass and great bass shawm. Here the little finger controls two keys at the front of the instrument, and the remaining two keys are at the back, operated by the thumb (with a covering protecting the longer keys extending below the *fontanelle*). The lower instruments were played with an S-shaped crook; there is no evidence of a pirouette. Because of their great length and weight the lowest shawms were played with the bell resting on the ground. Their tone is more powerful than that of any other woodwind instrument in the same register, and consequently bass shawms continued in use later than the other members of the family to reinforce the bass register (see §3 below).

In addition Praetorius mentioned a *Basset Pommer* in *c* called a 'Nicolo' and provided with only one extension key, as a supplement to the described family. In contradiction to this, his illustration shows an instrument that had three extension keys and a thumb-hole and that was played with a wind cap. It was probably an instrument with a cylindrical bore, a kind of straight bass crumhorn. Such an instrument was described in an inventory of the Hofkapelle in Kassel in 1613: 'a long straight Basset of the crumhorns'. Other scholars have suggested this instrument could be a kind of SCHREYERPFEIFE or HAUTBOIS DE POITOU (see Kinsky, 1925, and Weber and Van der Meer, 1972). In this context it is striking that Praetorius's illustration of the *Diskant Schalmey* and the *Basset oder Tenor-Pommer* shows the possibility that wind caps could be used on these instruments. Using a wind cap would not permit overblowing, and would thus limit the compass of the instrument to a 9th (*see* WIND-CAP INSTRUMENTS).

In contrast to Praetorius's great variety of sizes, Mersenne knew only three different sizes of 'haut-bois'; the *dessus* (lowest note *c′*), the *taille* (*g*) and the *basse* (C); each with a range of two octaves. However, there are indications that up to the middle of the 17th century there was another French size, the *haute-contre*, between the *dessus* and the *taille*. The comments made by James Talbot (op.cit.) on shawms and their construction provide some interesting details. In writing on the 'hautbois' he distinguished between the 'English or Waits' instrument (with treble *c′*–*b″* and tenor *f*–*f′*, that is, respectively a tone lower than Praetorius's *Discant Schalmey* and *Alt Pommer*), and the new 'French hautbois'. He also mentioned a 'Schalmey' (see §4 below).

4. German shawms, 16th–17th centuries: (a) alto; (b) alto with extension keys; (c) tenor (basset); (d) great bass; (e) bass (Musikinstrumenten-Museum, Berlin)

5. *Small shawm with fiddle, cymbals, pipe and tabor accompanying dancing: miniature from a French MS from Savoy, third quarter of the 14th century (F-Pn lat.688. f.17r)*

3. History. Shawms were probably of ancient origin and reached Europe from the Islamic East during the 9th to the 12th centuries at the latest. Medieval sources present problems: no instruments survive, and illustrations are seldom unambiguous. Terms such as the Latin *tibia* or *musa* and the German *pfeifen* can be used for very different kinds of wind instruments. Although shawms are illustrated in manuscripts dating from the late 12th century, clearer depictions are found in early 14th-century sources (e.g. the *Cantigas de Santa Maria* of Alfonso el Sabio, *E-E* T.j.1, b.I.2, and the *Manessische Liederhandschrift*, *D-HEu* Pal.germ.848). Such instruments were usually small (fig.5), similar in appearance to many of the shawm's oriental counterparts (e.g. the Persian *sornā* and North African *ghayṭa*). The medieval use of the shawm in courtly and civic music accompanied by drum and trumpets (e.g. in the city of Siena in 1252 an ensemble of three trumpets, *cialamella* and drum is documented) reflects a Turco-Arab practice perhaps adopted during extensive trading contacts or in the Crusades. The extent to which the shawm itself followed an oriental model is impossible to judge, but it seems likely that such non-oriental features as the missing thumb-hole and the specific material and construction of the double reed may have origins in the Western technology associated with the Bagpipe.

In 14th-century illustrations longer shawms began to be portrayed, and the bombarde was first described in literary sources as accompanying the higher *chalemie* (e.g. Jean Le Fèvre's *Respit de la mort*, 1386, mentions 'musez et challemellez et grossez bombardez nouvellez'). Because of the greater length of this instrument a key was added; this is clearly shown in illustrations by the early 15th century (fig.6). The pitch of a 5th below the treble shawm was first specified by Agricola in his fingering diagrams (1529), but no doubt it had been standard throughout the 15th century, when the principal wind-instrument combination of the *hault menestrels* was shawm (for the treble part), bombarde (for the tenor) and bombarde or trumpet (or slide trumpet; for the contratenor). An order for instruments by Philip the Good of Burgundy, from Bruges in 1423, illustrates such an ensemble, calling for two *bombardes a clef*, one *contre* and two *chalemies*, and a trumpet to be played with them. The presence of a *contre* in the order confirms the fact, for which there is much other evidence, that the contratenor part was performed on a bombarde (in 1406, for instance, Niccolo d'Allemagna was hired in Florence as a player of *ceremella contra tenorem*). This type of ensemble, playing 'loud music' (*see* Alta (i)), accompanied major ceremonies, led processions and played for the basse danse. The shawm's further versatility may be seen from many illustrations portraying shawms (possibly a *douçaine*, or 'styll shawm' as it is called in the court records at the beginning of Henry VIII's reign; *see* Dolzaina) played in a 'soft' consort with fiddle, lute and harp (fig.7). Shawm players were therefore central not only to court music but particularly to medieval town music (e.g. as played by the German *Stadtpfeifer*).

There is an indication of the instrument's musical potential in two late 14th-century songs by the Monk of Salzburg ('Das nachthorn' and 'Das taghorn'; *A-Wn* 2856); the manuscript provides notation for a second part and carries the comment that the simple counterpoint may be played on a wind instrument: 'Das Ist der pumhart darzu'. Chronicling the Duke of Burgundy's wedding in 1468, De La Marche (*Mémoires*, 1562, p.369) related that a motet was performed by 'les haulz menestriers' on three 'schalmayes' (which would have included bombardes) and a 'trompette saicqueboute' (trombone or slide trumpet). The use of the shawm in complex art music is confirmed by Tinctoris in his statement that any composition could be played on the instrument if its holes were correctly placed.

The growing musical literacy of wind musicians and their ability to arrange and perform written polyphonic

6. *Shawm with pirouette, and key under a fontanelle: detail from the 'Assumption of the Virgin' by the Master of the Legend of St Lucy, late 15th century (National Gallery of Art, Washington DC)*

7. Shawm in ensemble with rebec, harp and (not shown here) lutes and dulcimer: detail of a Brussels tapestry, early 16th century (Germanisches Nationalmuseum, Nuremberg)

compositions is demonstrated in a treatise written for the Berne *Stadtpfeifer* in 1491 (*Tütsche musica*, MS, *CH-BEsu* Hist.Helv.LI.76). Although Jean Charlier de Gerson (*De canticorum originali ratione*, before 1426) stated that in church the organ was only rarely joined by shawms, the practice of shawms playing motets together with cornets and trombones is documented, for example, in Mantua at the end of the 15th century (the repertory performed there is possibly that preserved in collections such as *F-Pn* Rés.Vm⁷.676, or *I-Bc* Q18).

Information given by Martin Agricola (1529) indicates that in the 15th century shawms transposed their music 'alla alta', i.e. a 5th higher than written. An echo of this practice may be preserved in various instructions found in 16th-century sources of shawm music, e.g. 'notate in clave da sonare', 'alla quarta bassa' or 'alta'. Praetorius also described the pragmatic transposition of compositions when they fell below the compass of the instruments.

During the 16th century the shawm family was extended by the invention of larger instruments, and the bombarde began to be referred to as the alto shawm (the contratenor and bass roles being taken by a lower instrument). The first documentary evidence of shawms in five sizes comes from the Nuremberg woodwind instrument maker Sigmund Schnitzer the elder in 1539: besides a *grossen Pumhart* he mentions the *vagant*, *thenor*, *discant* and *klain pumhart*, which, except for the high treble, can be identified with the sizes listed by Praetorius. A so-called 'bass pwmhart' mentioned in an Augsburg town band inventory of 1540 had only one key and may (by later standards) have been hardly larger than a basset shawm. But no doubt the 'dobbele bombaerde' which the town of Ghent acquired in 1551 was a real bass, for 'twee bassetten' arrived with it, completing the ensemble already consisting of 'twee boven sanghen ende twee teneuren scalmeye'. In England one of the York waits added a 'Base Shalme' in 1546. While there was a movement during the 16th century towards blended ensembles of strings, cornetts, trombones and organs, shawms remained popular for ceremonial music at court and in town bands. A French court band (later called 'les Douze Grands Hautbois de l'Ecurie ou même de la chambre'), instituted under Louis XIII, is documented as having two shawms and two cornetts on the two treble parts (their exact disposition is not recorded), four alto shawms for the *haute-contre* and *taille* parts (perhaps with an intermediate size, probably in A), two trombones for the *basse-taille* and two bass shawms on the *basse*; all the musicians could also play the violin. Part of their repertory is preserved in the first volume of the Philidor Collection (*F-Pn* Rés.F671 and *F-V* 1163). In London, James I and his successors had a similar band with at least six musicians ('Hoboies and Sagbuttes'), but its precise composition is not known (see *LafontaineKM*). A similar number is found in civic music: Denijs van Alsloot's painting of an Antwerp religious procession in 1616 (fig.9) shows a six-piece band consisting of shawm, cornett, two tenor shawms, trombone and curtal. Examples of the typical repertory of a South German *Stadtpfeifer* band of the second half of the 16th century have survived in manuscript (*D-Rp* MS A.R.775–777), consisting of motets, chansons etc. in four to six parts by Lassus, Striggio, Andrea Gabrieli and others. About that time the curtal (or dulcian; *see* BASSOON, §3) was often used to play the bass part, as for instance in the collection of J.C. Pezel, *Bicinia variorum instrumentorum ... cum appendice a 2 Bombardinis vulgo Schalmeyen e Fagotto* (Leipzig, 1675). A similar combination was found in the 'oboe ensemble' of the Prussian army from 1646 (at the latest) to the 18th century, with two shawms, one alto and a bass dulcian.

While such shawm bands continued in existence, however, there was a perceptible disintegration of the consort during the course of the 17th century with the higher instruments being developed into different types and the lower ones used among ensembles of other instruments. Praetorius's directions for the instrumentation of canzonas and motets (*Syntagma musicum*, iii, 1618) clearly show the reduced status of the shawm consort at the beginning of the century, reflecting changing aesthetic expectations. Praetorius – apart from noting the use of the bass and great bass shawm with other deep instruments in choirs of low tessitura – mentioned the shawm consort only briefly, and commented on the problems created by shawms in consort being at intervals of a 5th from one another. He recommended omitting the high shawms and playing all the music a 4th lower, with the *Altpommer* at the top. J.H. Schein's 'Hosianna dem Sohne David' (*Opella nova*, 1626) contains spirited ritornellos for 'bombardi', apparently two tenors and one bass shawm. The manner of playing the treble shawm began to change too, not least when the pirouette fell into disuse, and it was the point of departure for the new oboe as played at the French court (*see* OBOE, §II, 2).

Although by 1700 even most provincial waits in England were replacing their shawms with the new oboes and bassoons, shawms remained in use in some places

8. Ensemble of two shawms, a pommer and ?slide trumpet, together with a lute and pipe and tabor, accompanying three singers: miniature by the workshop of Cristoforo de Predis from Joannes de Sacrobosco's 'Sphaera mundi', late 15th century (I-MOe lat.209 X.2.14, f.10)

longer than elsewhere, particularly north of the Alps, and especially the deeper *Pommer* sizes. They still featured in *Stadtpfeiferei* to the end of the 18th century. Goethe wrote an account (in *Dichtung und Wahrheit*, 1811) of the anachronistic procession of the Nuremberg *Stadtpfeifer* with *Schalmei* and *Pommer* in the second half of the 18th century, on its way to the Pfeifergericht, an annual confirmation of trading privileges. Two instruments used then, made by Jacob Denner and either Johann Christoph Denner or a successor, are preserved in the Frankfurt Historisches Museum, and there is an example of their music in Fries's treatise (1752). Praetorius had already recommended the doubling of bass lines an octave lower with 'SubBassgeigen, Octav-Posaun, Doppel-Fagotten und gar grossen Bass-Pommern'; *Basspommern* were used in Germany until the end of the 18th century to reinforce the bass register (an example is the 'Schallmeyen-Bass' in the Marienkirche, Halle, used by W.F. Bach). Not surprisingly, therefore, a relatively large number of low shawms are extant, and some of a late date of manufacture (for instance, instruments made by I.G. Strehli after the mid-18th century).

The shawms used in Protestant areas of Switzerland between about 1750 and 1810 are a special case. They were of rather unusual structure, for use in an ensemble of treble and tenor with bassoon to accompany the psalms in divine service, and prefigured the heckelphone (*see* HAUTBOIS D'ÉGLISE).

From the end of the 19th century copies of early shawms were occasionally built to complete the collections of some museums (by makers such as Wilhelm Heckel or the workshop of Victor-Charles Mahillon). Towards the middle of the 20th century more interest in the making and playing of historical instruments arose. Prominent makers and performers include Rainer Weber, who made his first instruments in Hamburg in 1947 before moving to Bayerbach, Bavaria in 1960, and the bassoon player Otto Steinkopf, who worked at the Berlin Instrument Collection of the Institut für Musikforschung before moving to Celle to work with the firm of Hermann Moeck. Early attempts at making reproduction shawms were orientated towards the needs of amateur early music groups and their experiences with recorder playing, which resulted in compromises of construction (with additional keywork, plastic reeds, etc.) and performance, particularly in the simultaneous use of all members of the family. Greater interest in historical evidence after the 1970s led

9. Treble shawm, two tenor shawms, cornett, trombone and curtal in a wind band: detail from 'Procession of the Religious Orders of Antwerp on the Feast Day of the Rosary' by Denijs van Alsloot, 1616 (Museo del Prado, Madrid)

to some makers and players becoming authoritative specialists in these instruments.

4. THE 'DEUTSCHE SCHALMEY'. Parallel to the gradual development of the oboe during the second half of the 17th century, a distinct type of oboe existed; since A.C. Baines wrote about it (1957) it has been described as the *deutsche Schalmey*. This term is also to be found in contemporary sources, for instance the Naumburg inventory of instruments of 1720, and was obviously used at the time to distinguish it from the French oboe, and perhaps to indicate its comparatively high pitch. In musical sources from Germany and the Habsburg territories the term employed is usually *piffaro*, for instance in music manuscripts from Kremsier (now Kroměříž). Baines suggested that the *deutsche Schalmey* might be regarded as 'a German attempt at a quick answer to the new French oboe'; a more recent interpretation is that the *Schalmey* may represent a survival of the earliest form of the prototypical oboe developed in France, one that found a musical niche in the German-speaking area, especially in military *Hautboisten-Banden* beginning in the 1640s. The *Schalmey* and oboe seem to have co-existed rather than being in competition, to judge by the fact that many instrument makers such as Richard Haka in Amsterdam and Christian Schlegel in Basle made both types. The *Schalmey* demanded a less specialized embouchure than the oboe. A great many compositions specify two or three *pifferi*.

Talbot remarked that the instrument he described as a '(Saxon) Schameye' was 'used Much in German Army. Sweeter than Hautbois [i.e. shawm]. Several sizes & pitches.' The instrument was made in two sections; it was slender by comparison with the shawm and the oboe and had considerably thinner walls, a narrow and often roughly turned bore, and smaller finger-holes. Two sizes, treble and tenor, were made and each was provided with a *fontanelle*, although only in the tenors did this cover a key: on the treble instruments it was non-functional, as it covered two or more ventholes (Talbot says that they 'would add a Note if stopd'). The range of the treble is given by Talbot as *c′–c‴*, and the tenor a 5th lower; chromatic tones depend on the kind of reed and manner of playing. The instruments could either have a pirouette or (like the shawm at this date) be blown without one.

A feature of the *deutsche Schalmey* intended for outdoor use (which 17th-century makers in Amsterdam called the *velt-Schelmey*) is the presence of devices fitted to the bell into which the reeds and sometimes the pirouette could be kept for ease of transport; these appear both in pictorial records and on surviving instruments. A *Schalmey* made by Christian Schlegel (*c*1667–1746) in the Basle Historisches Museum has a loosely fitted wooden pin with thickened ends fitted in the cup and extending into the bore; depending on its position, it could function as a drone.

At the beginning of the 18th century the *Schalmey* disappeared. Fleming said in 1726 that as it was 'difficult

to blow, and struck the ear unpleasantly in the higher register' it had been replaced almost everywhere by the 'French hautbois'. Eisel (1738) did not describe it at all, saying merely that it belonged to the outdated group of 'rustic instruments'. However, it remained in use in rural areas for some time longer: it was described disparagingly as a 'boorish Schalmey' by J.C. Weigel (*Musicalisches Theatrum*, *c*1720).

5. OTHER VERSIONS OF THE EUROPEAN SHAWM. Various attempts have been made to revive the concept of the shawm in Germany. From the late 19th century until the 1930s several German firms made simple oboes in a high register (with one to six keys), which were called *deutsche Schalmey*. A similar French instrument, called the *musette*, began to be developed in the 1830s (*see* MUSETTE (2)). The TRISTAN SCHALMEI, combining characteristics of the shawm and the musette, was designed by Wilhelm Heckel in 1904 for a performance of Richard Wagner's *Tristan und Isolde*. The term *Schalmei* was also used for a type of free-reed instrument worked with piston valves, also called MARTINSTROMPETE after its inventor Max Bernhardt Martin of Markneukirchen.

In Catalonia and Roussillon in particular Western shawms have never relinquished their place in civic music. The scores of the 18th-century Catalan villancicos sometimes contain parts for treble and tenor *xirimías* (now known simply as *tiple* (treble) and *tenora*, and modernized with complete keywork in different layouts), the principal melodists in the present-day *sardana* band or *cobla*. The *tiple* is in F, a 4th above the oboe, and has a compass of *d'* to *a'''*. The *tenora* is in B♭ with a compass of *e* to *c'''*. Each has a pirouette (*tudel*) and a broad triangular reed. The dynamic range, from *piano* to *fortissimo*, exceeds that of any other existing woodwind instruments (see Besseler, 1949, and Baines, 1952; for illustration, *see* FRANCE, fig.16*e*, and SPAIN, fig.7).

The Spanish *dulzaina* (or *pito*) and the Catalan *gralla*, smaller shawm-like instruments, were apparently developed independently and in a rural context. Such shawms were taken to America from the early 16th century onwards and are still played there. The demand for the *dulzaina* in Castile and León led to the manufacture of various models with keywork, and in the last decades of the 20th century there has been a revival in making and playing these instruments (music examples are in Ledesma). Bands of players are now a common feature of town and village *fiestas*.

The Breton *bombarde* (*see* FRANCE, fig.16*d*) and south Italian *ciaramella* or *piffaro* (*see* ITALY, fig.22), though they bear former shawm names and may be classified for convenience as traditional shawms, belong more strictly to the class of separate chanters played with bagpipe accompaniment, like the 17th-century HAUTBOIS DE POITOU (first mentioned in 1635 by Mersenne, *Harmonicorum libri*, xii) which could be played with a wind cap and was accompanied by a *cornemuse de Poitou*. A consort of three *hautbois de Poitou* and one *cornemuse* was brought to Paris around 1600 when pastoral arts became fashionable there. The group continued to perform at Versailles beyond the reign of Louis XIV and appears to have played in a 'Menuet pour les hautbois de Poitevins' in the 'Ballet des nations' with which Lully ended his music for *Le bourgeois gentilhomme* (1670); it retained its identity for many years, even after wind-cap instruments in general fell into disuse. It is last recorded in a document of 1733.

A variety of the true shawm – the Wendish *tarakava* – survived in Hungary (as the *tárogató*) and in Wendish parts of Germany until the 19th century. In Hungarian the term TÁROGATÓ occurs as early as the 16th century for reed instruments in general, and in a narrower sense for the shawm adopted from the Turks; a new type, but in the form of a clarinet, was developed by V.J. Schunda at the beginning of the 19th century. Still played today (especially on the island of Krk) is the *sopila* of the Croatian littoral; it is used in two sizes, played together largely in consecutive 6ths and 7ths (description and music examples in Brömse, 1937).

Two instruments of south-east Europe – the *pipiza*, still played by some shepherds in mainland Greece, and the larger *zurla* of the Macedonian Gypsies – are characterized by a thumb-hole placed lower on the pipe than the highest finger-hole, and by a loose lip-disc and soft reed, and are thus related to Turkish shawms. In Turkey the *davul* and *zurna* (drum and shawm) ensemble is traditionally used for dancing, festivals and circumcision ceremonies; the players of the *zurna* practise the continuous-breathing technique, which may also have been used in playing the European shawm.

ANTHONY C. BAINES/MARTIN KIRNBAUER

Shchahlow (Kulikovich), Mikalay [Nikola] **Mikalayevich** (*b* Moscow, 23 March/4 April 1893; *d* Chicago, 31 March 1969). Belarusian composer and musicologist. He studied at the school of the Moscow Synod (where he encountered Kastal'sky's music) and then entered the composition class of Ippolitov-Ivanov at the Moscow Conservatory. He was called up in 1914 and, after having seen active service, was seriously injured two years later. During the 1920s he taught music in Kursk, Voronezh and Smolensk, and in 1936 settled in Minsk, working as a radio editor, critic, composer and teacher of music theory at the Conservatory. During the period of occupation (1941–6) he collaborated with the German authorities and was condemned to death by the Belarusian partisans, but still managed to organize a variety theatre and write several operas and folksong arrangements. He emigrated to Germany in 1944 and to the USA in 1950, after which he was known as Kulikovich – his mother's maiden name. For 12 years he headed the choir of the Uniate Church in Chicago and appeared as a pianist and conductor in addition to activities in journalism and research. When his music was heard at the Ten-Day Festival of Soviet Music which took place in Moscow in 1940, it was judged to be in the mainstream of 19th-century Russian traditions, and while being lyrical in character, it is generally academic in style. An important role is played by Belarusian folklore in his music, which is scarcely known outside the Belarusian émigré Diaspora. His papers are housed at the F. Skorina Library in London.

WORKS

STAGE

Ops: Katerina (M. Klimovich), 1939–40; Lesnoye ozero [The Forest Lake] (N. Arsen'yeva), 1941–2; Vseslav charodey [Vseslav the Sorcerer] (Arsen'yeva), 1944
Operettas: V tyoplïye kraya [Into Warm Lands] (Arsen'yeva), 1944, inc.; Kupalle (Arsen'yeva), 1944; Tsim-li-li (Arsen'yeva, Kulikovich), 1956
Vaudevilles (librettist: Kulikovich): Priklucheniya dyad'kiu Yanki iz Garotnikov [The Adventures of Uncle Yanka from Garotniki); Plennitsa [The Captive Girl]; Bezdushnaya tsatska [The Soulless Bighead]; Golïy nol' [A Bare Nil]

TAISIYA SHCHERBAKOVA

Shchedrin, Rodion Konstantinovich (*b* Moscow, 16 Dec 1932). Russian composer. From 1945 to 1950 he studied at the Moscow Choir School and in 1955 he graduated from the Moscow Conservatory in Yury Shaporin's composition class and also in Yakov Fliyer's piano class; he continued his studies with Shaporin as a postgraduate until 1959. In 1958 he married the ballerina Mayya Plisetskaya. Between 1965 and 1969 he taught composition at the Moscow Conservatory and since 1969 has worked freelance. From 1973 to 1990 he was Shostakovich's successor as Chairman of the Composers' Union of the Russian Federation and in 1990 was made honorary chairman of the organization. In 1989 he was a member of the Inter-regional Group of People's Deputies in Support of *perestroyka*, along with Andrey Sakharov and Boris Yel'tsin. Since 1992 he has divided his time between Moscow and Munich. The many prizes and honours he has received include the USSR State Prize (1972), Lenin Prize (USSR, 1984), honorary member of the International Music Council (1985), State Prize of Russia (1992), Dmitry Shostakovich Prize (Russia, 1993) and Crystal Award (Switzerland, 1995); he has also been made a Corresponding Member of the Bavarian Academy of Fine Arts (1976), Corresponding Member of the Academy of Fine Arts of the German Democratic Republic (1983) and honorary professor at the Moscow Conservatory (1997).

Shchedrin is one of the better-known Russian composers of the later half of the 20th century. While occupying a place within academic musical culture, Shchedrin considers it important not to break contact with a broad range of listeners and holds in high esteem the maxim that 'great art must have a great audience'. His work is distinguished by diversity of musical genres and by breadth of musical language. His style unifies contrasting elements by means of organic fusion: freely serial procedures and avant-garde techniques such as pointillism, sonoristic and aleatory methods rub shoulders with complex polyphony, collage and, on the other hand, reflections of various types of Russian folk music ranging from peals of bells, lamentations, church music, shepherds' tunes, the *chastushka* and the style of folk singing.

Shchedrin's operas demonstrate the most important sides of his work: his taste for the themes of classical Russian literature and his desire to rework elements of Russian music in a 20th-century style. His opera *Ne tol'ko lyubov'* ('Not for Love Alone'), based on the stories of Sergey Antonov, was the first piece to incorporate the *chastushka* into an academic genre of music. This popular Russian folk genre of the 20th century is an aphoristic and melodic formula verse with a topical and humorous subtext. In *Myortvïye dushi* ('Dead Souls') the folk line is continued in the parts of folk characters (for example, the violins in the orchestra are replaced by a chamber choir singing in the folk manner). This creates a counterweight to Gogol's basic characters. This deliberate contrast (along with the division of the stage into two) has been seen as an innovative breakthrough and described as 'parallel'. The opera *Lolita*, based on Nabokov's novel and first performed at the Swedish Royal Opera (conducted by Mstislav Rostropovich) continues Shchedrin's post-avant-garde, neo-Romantic style.

Shchedrin's ballets represent an important step in Russian music theatre. His early ballet *Konyok-gorbunok* ('The Little Hunchbacked Horse') renews the images of the Russian folk tale with a characteristic hint of comedy. The *Karmen-syuita*, created for the dances of Mayya Plisetskaya and for the Cuban choreographer Alberto Alonso, is a brilliant transcription of fragments of Bizet's opera for strings and percussion and has become popular in concert performances. In *Anna Karenina*, the musical language attains a great breadth by virtue of its synthesis of 20th-century chromatic harmony and sonority with collages of themes from Tchaikovsky (thus conveying the colour of the epoch) in addition to concrete sound effects (an approaching train). The ballets *Chayka* ('The Seagull') and *Dama s sobachkoy* ('The Lady with a Lapdog'), both on Chekhov, were also written with Plisetskaya's participation in mind. The latter is an unbroken dance duet in which the music, set in a rondo form, unites neo-romanticism and classical stylistic elements. All Shchedrin's operas and ballets written before the 1990s were performed at the Bol'shoy.

He has also written a musical, a rare thing for composers of an academic orientation, for a commission from Japan; performed in Japanese and entitled *Nina i 12 mesyatsev* ('Nina and the 12 Months'), it is based on a tale by Marshak. It is in his symphonic works that Shchedrin is more experimental: his symphonies and concertos are always marked by an unconventional design. The Second Symphony is structured as 25 preludes; the Second Piano Concerto employs a 12-note series, while the finale of the same work includes a collage featuring jazz improvisation); the Third Concerto is set in the form of variations on a theme which is only heard at the end; the Fourth is based only on 'sharp' keys. His concertos and orchestral pieces continue, under 20th-century conditions, the traditions of Glinka's *Kamarinskaya*, namely the symphonic development of Russian national material. This may be seen in the First Concerto for Orchestra, *Ozornïye chastushki* ('Naughty Limericks') and the Second Concerto for Orchestra, *Zvonï* ('Chimes'), with the use of various types of old Russian bell peals. The Third Concerto for Orchestra is based on old music of Russian provincial circuses, while the fourth, *Khorovodï* ('Round Dances') is based on Russian melodic formulae and rhythms. *Stikhira na tïsyachiletiye kreshcheniya Rusi* ('Stikhira for the Millennium of the Conversion of Russia') is built up as variations on the freely stated monophonic stikhira (a form of old Russian sacred music) of tsar Ivan the Terrible. The melodic style peculiar to the named pieces is also characteristic of his other instrumental concertos.

Shchedrin's chamber music may be divided into groups of pieces linked with either the memory of J.S. Bach or with the Russian national tradition. His *Muzïkal'noye prinosheniye* ('Musical Offering') is an instrumental meditation of 90 minutes' duration, interspersed with quotations from Bach's organ works and monograms. Shchedrin's *Ėkho-sonata* ('Echo Sonata') for solo violin is a response to J.S. Bach's D minor Chaconne, with brief quotations from the latter's other solo violin pieces. In terms of piano music the Bach group is represented by 24 preludes and fugues, and by the *Polifonicheskiy tetrad'* ('Polyphonic Notebook') – 25 polyphonic preludes which form a textbook of polyphony. The Russian group developed as a response – in 20th-century language – to the folk traditions of instrumental playing.

Shchedrin has been familiar with choral music since childhood. He has written pieces for choir and orchestra that have both a satirical and a social colouring. These include *Byurokratiada* ('The Bureaucratiad') and *Poėtoriya* ('The Poetorio'). In his purely choral compositions he carries on the tradition of unaccompanied Russian sacred music; his *Zapechatlyonnïy angel* ('The Sealed Angel') for mixed choir and reed pipe (with Orthodox canonical texts in Church Slavonic), inspired by the story by Nikolay Leskov, may be considered a Russian liturgy and one of the finest pieces of Russian sacred music written in the 20th century. Based on the smooth contours of Russian church melody, the piece includes the effects of bell chimes, echo, the characteristically Russian sound of bass 'octavists' and boy soloists, as well as contemporary choral glissando and shouts. Rodion Shchedrin expresses the traditions of Russian culture more directly than any other composer of the second half of the 20th century.

VALENTINA KHOLOPOVA

Shcherbachyov, Andrey Vladimirovich (*b* Poltava province, 18/29 Jan 1869; *d* Kiev, 1/12 Feb 1916). Russian composer, second cousin of Vladimir Vladimirovich Shcherbachyov. In 1887 he entered the St Petersburg Conservatory, where he studied composition with Blumenfeld, Lyadov and Rimsky-Korsakov, and piano with N. Khristianovich, who had been a pupil of Henselt. He composed piano music, including a sonata, and several songs, and his orchestral march op.5 had some success. So too did his ballet *Evnika*, with a scenario by Count Stenbock-Fermor based on Sienkiewicz's novel *Quo vadis?* It received its première at the Mariinsky Theatre on 8/20 February 1907 in a production by Fokine and with Anna Pavlova in the principal role. At the outbreak of World War I Shcherbachyov joined the Red Cross as a medical attendant, and died of typhoid on Kiev railway station.

JENNIFER SPENCER

Shcherbachyov, Nikolay Vladimirovich (*b* St Petersburg, 12/24 Aug 1853; *d* ?Monte Carlo). Russian composer. He was the uncle of Vladimir Vladimirovich Shcherbachyov. He studied in St Petersburg, and in 1871 joined the Balakirev circle; though he was made welcome, Borodin in particular seems to have been uncertain as to the seriousness of the boy's aims as a composer. During the next few years, however, Shcherbachyov demonstrated his ability in a number of piano pieces and orchestral works: Musorgsky admired an étude for piano in B major, which he described as 'splendid ... hot, nervous and dashing'. Cui, never the most generous of critics, admitted to being envious of the young man's creativity, and Stasov

went so far as to place him second only to Musorgsky and Borodin. Nevertheless, his fears that the young composer might 'stand still' were justified, for Shcherbachyov soon succumbed to the temptation to play the part of the affluent dilettante, and he never fulfilled his early promise. For a time he was away from St Petersburg, but he returned in 1877 and renewed his acquaintance with the Balakirev circle. After much coaxing he played some of his piano pieces; Rimsky-Korsakov recorded that they were much liked, but that many of them were never completed. Shcherbachyov continued to dabble in composition for a few years, and produced more than 40 pieces for piano and a number of songs, including six to texts by Heine and six to texts by A.K. Tolstoy. Two small piano pieces (no.1, *L'étoile du berger*, tableau pastoral; no.2, *En passant l'eau*, scherzino) were orchestrated by Balakirev in 1886, performed in St Petersburg and published by Belyayev. He also contributed a paraphrase on the 'Tati-tati' ('Chopsticks') theme to the 1893 Belyayev edition of the collaborative work by Borodin, Cui, Lyadov, Rimsky-Korsakov and others. (A.S. Lyapunova and E.E. Yazovitskaya: *Miliy Alekseyevich Balakirev: letopis' zhizni i tvorchestva* [Balakirev: chronicle of his life and works], Leningrad, 1967). Family legend has it that Shcherbachov died in Monte Carlo after gambling away all his money and working for a time as a croupier.

JENNIFER SPENCER/EDWARD GARDEN

Shcherbachyov, Vladimir Vladimirovich (*b* Warsaw, 12/24 Jan 1887; *d* Leningrad, 5 March 1952). Russian composer and teacher. An orphan, he was sent as a boarding student at the age of 12 to the First High School of Warsaw, and completed his studies there in 1906. He then studied in the faculty of history and philology and in the faculty of law at the St Petersburg University (1906–10); he also graduated from the composition classes of Lyadov (fugue), Kalafati (harmony), Vītols (form), Nikolay Tcherepnin (score reading) and Steinberg (orchestration) at the St Petersburg Conservatory (1908–14). At this time, he showed an interest in the artistic association *Mir iskusstva*, and met its members; he later (1911–12) worked as a pianist with Diaghilev's company, being accepted on the recommendation of Glazunov, and with them he visited Paris, Rome, Monte Carlo and London. After his return he combined his conservatory studies with teaching theory. Despite still being a student, he ran a piano class for the students of the composition faculty at the conservatory (1912–14), and at the same time taught at a music college. In 1914, again on Glazunov's recommendation, he went to teach privately in Italy, but the war forced him to return to Russia. A four-month course at the Kiev Military College and his commission as an ensign prepared him for military service (1914–17), but he did not lose touch with artistic life and during this period he became friendly with Mayakovsky. He was called up into the ranks of the Red Army, where he served (1918–22) working in army and civilian cultural organizations. He was appointed music director of the Petrograd Everyman Theatre (1920), for which he wrote *Nonet* (for voice, seven instruments and female dancer). He worked as a librarian and scientific officer at the Petrograd (later Leningrad) Institute for the History of Art (1919–25), directed the music department of the People's Commissariat for Education in Petrograd (1920–23) and gave public lectures. By 1926 he was the acknowledged leader of the New Music Circle but he later joined the Leningrad branch of the Association for Contemporary Music (ASM) (1925–27), where young musicians grouped around him, and where he had the temerity to contradict his highly authoritative teachers in the name of contemporary art. At the end of the 1920s and early 30s he was severely criticised by RAPM (the Russian Association for Proletarian Musicians) for his modernist tendencies.

Shcherbachyov was an outstanding teacher and innovator, and the founder of a modern system of professional higher education in Russia. He made foreign trips to Germany and France to study Western systems of musical education (1922–3, 1927). From 1923, when he became professor at the Leningrad Conservatory, he initiated a reform of higher music education, and in particular helped to institute reforms in composition teaching that were accepted in all Soviet conservatories. In the mid 1920s he taught at the Fourth (after 1926 – the 'Central') music training college, which was regarded as Leningrad's 'second conservatory'; here he was in charge of the department of theory and composition. In 1930 he was forced to leave his post at the conservatory, and subsequently he worked in Tbilisi (1930–33) as a teacher, administrator and music journalist. From 1932 he served on the administrative board of the Composers' Union, and also headed the Leningrad Composers' Organization (1935–7, 1944–6). In 1944 he was invited once again to become a professor at the Leningrad Conservatory, but his work was interrupted once more in 1948 by the persecution of the intelligentsia by the Party authorities. He endeavoured to teach his pupils according to each one's artistic nature; he was intolerant of dogma and of unimaginative and mediocre technique. The 'Shcherbachyov school', as it was called in the 1920s, was noted above all for its lack of uniformity. The school included Boris Arapov, M. Chulaki, Yevgeny Mravinsky, Gavriil Popov, Pyotr Ryazanov, Iona Tuskia, Viktor Voloshinov and Valery Zhelobinsky.

Originally self-taught as a composer, pianist and improviser, he produced his first works in 1908; these show the influence of the St Petersburg formal tradition of Rimsky-Korsakov and Glazunov. His works of the 1910s reveal a Romantic nature: the songs have an intimate and dreamy lyricism, other works are passionate, dramatic outpourings (the Second Piano Sonata, the First Symphony), or delicate and poetic landscapes, such as *Vega* and *Skazka* ('A Fairy tale'), influenced by symbolist poetry. Particularly characteristic is the piano suite *Nechayannaya radost'* ('Unexpected joy'), where each piece is prefaced by a poetic programme drawn from Blok's early pantheistic collections. In such works there is evident the influence of the late romantics (ranging from Liszt and Wagner to Skryabin and Rachmaninoff), and also of Debussy and of Russian impressionists (such as Lyadov and early Stravinsky). In these years before the Revolution he was shaped as an artist of the 'Silver Age'.

During the 1920s Shcherbachyov's style changed. The influence of Blok's poetry became more pronounced, and the theme of Blok became central to his work. The culmination came with the Second Symphony '*Blokovskaya*' ('the Blok Symphony') set to the poet's verse. The many other Blok settings are tinged with gloom, or are marked by frenzied drama and tragedy. Shcherbachyov's instrumental pieces have a slight tendency towards the grotesque and sometimes employ motor rhythms within

a dry, unemotional framework. In the piano suite *Vïdumki* ('Inventions') and in the Third Symphony he makes extensive use of linear polyphony and polytonality; stylistic reference points can thus be found in Prokofiev, Bartók and Hindemith.

A further metamorphosis took place in the 1930s when his interest in historical themes took root with the film score for *Pyotr Pervïy* ('Peter I') and the proposed opera on the same subject, as well as the projected opera *Ivan Groznïy* ('Ivan the Terrible'), neither of which were brought to fruition. He studied the music of the Petrine era (the *kantï*, marches, military calls, znamennïy chant and the *stikhirï* of Tsar Ivan). At the same time Shcherbachyov's music became simpler and clearer, acquiring a distinct association with the 19th-century Russian urban song and with the sentimental middle-class ballad. The period was dominated by programmatic pieces such as the Fourth Symphony, a depiction of certain episodes in the revolutionary history of the Izhorsk Factory near Petrograd. Another major work was the suite *Groza* ('The Thunderstorm') taken from his film score for Aleksandr Ostrovsky's play. Shcherbachyov's last composition was his Fifth Symphony, an epic work in the manner of Borodin and Glazunov.

WORKS
(*selective list*)

Orch: Vega, 1910; Shestviye [Procession], 1912; Skazka [A Fairy tale], 1912; Sym. no.1, 1913; Sym. no.2 (A. GENRIKH ORLOV/LYUDMILA KOVNATSKAYA

Shcherbakov, Igor' [Ihor] **Vladimirovich** (*b* Dnepropetrovsk, 19 Nov 1955). Ukrainian composer. In 1974 he graduated from the piano faculty of the M.I. Glinka State Music School in Dnepropetrovsk (his teacher was F.I. Shagdaleyeva), and in 1979 from the composition faculty of the Kiev Conservatory (V.D. Kireyko's class). He worked at the Ukrainian Ministry of Culture (1981–4), then as a music editor (1985–92, from 1987 as deputy chief editor) at the Muzichna Ukraïna publishers. Since 1993 he has taught composition at the Ukrainian National Academy of Music. He gained first prize at the 'Young Composers of the Ukraine' competition for his *Pokayannïy stikh* ('Verses of Repentance'); he has participated in festivals at Kiev and Warsaw and since 1992 has been musical director of the 'International Forum of Music by Young Composers' festival (IFMYC). He is an Honoured Representative of the Arts of the Ukraine (1996).

A representative of Ukrainian neo-Romanticism, Shcherbakov first exhibited this tendency in the *Aria Passione* for chamber orchestra (1992), and later in the elegy for piano *Koli vtomlene sertse* ('If your Heart is Weary') and the Concerto for piano and strings, of 1994 and 1996 respectively. Although he employs – with mastery – the full arsenal of contemporary techniques, the aesthetics of his music are far from those of the radical avant garde. His compositions are frequently conceptual and can be understood as a rapprochement between the idea of dramatic development and their actual subject matter.

INESSA RAKUNOVA

Shcherbakova, Taisiya Alekseyevna (*b* Mariupol', Donetsk province, Ukraine, 10 Dec 1932). Belarusian musicologist. She studied at the Glinka State Conservatory in Gor'kiy with Zhitomirsky, graduating in 1959. She was appointed to teach at the A. Lunacharsky State Conservatory of Belarus in 1960, later becoming head of the music history department there in 1990. She became a member of the Belarusian Composers' Union in 1962. Her main areas of research are the history of Russian and Belarusian music. She gained the *Kandidat* degree in 1972 with a dissertation on Shostakovich's version of Musorgsky's *Boris Godunov*, and in 1990 achieved the doctorate with a dissertation on music in Russian towns and the professional musical culture of 19th-century Russia. Her interests include textology, the study of sources, the historiography of Russian 19th-century music, and the problems of everyday musical culture and its links with professional music. She has contributed articles on Belarusian composers

and the problems of style and genre in 20th-century Belarusian music to the collections *Historiya belaruskay savetskay muziki* ('The History of Belarusian Soviet Music', ed. H.S. Hlushchanka, Minsk, 1971 (in Belarusian)) and *Istoriya belorusskoy muziki* ('The History of Belarusian Soviet Music', ed. G.S. Gushchenko, Moscow, 1976 (in Russian)). She has also studied the history of Jewish domestic music in Belarus. She has in addition written a course for the training of musicologists (1990) and has produced a variety of programmes for Belarusian radio and television, including a series of broadcasts in 1971–2 entitled *Vechera belorusskoy kamernoy muziki* ('Evenings of Belarusian Chamber Music').

YEKATERINA NIKOLAYEVNA DOULOVA

Shchetyns'ky, Oleksandr Stepanovych (*b* Kharkiv, 22 June 1960). Ukrainian composer. Although he studied composition officially with Valentyn Borysov at the Khar'kiv State Institute of Arts (1978–83), his mentor, and strongest influence in his formative years, was Valentyn Bibyk. He taught at the Children's Music School (1982–90) and later composition, instrumentation and techniques of contemporary music at the Khar'kiv Art Institute (1991–5). He has been much in demand as a lecturer on Ukrainian contemporary music. In 1990 he was awarded the main prize and a special prize at the Third International Kazimierz Serocki Composers' Competition in Poland for his chamber orchestra work *Glossolalie*, and since has won prizes in competitions in Fribourg, Switzerland, and in France. His compositions have been performed at festivals in London (1989, 1994), Zagreb (1990), Warsaw (1990, 1991), Denmark (1992), Moscow (1992, 1994, 1996) and Kiev (1994, 1995) among others, and performed by the BBC National Orchestra of Wales, the Warsaw PO, the Arditti Quartet, Yvar Mikhashoff and Phyllis Bryn-Julson. His style is essentially that of a structuralist, relying on a synthesis of a variety of modernist techniques and exploring in each piece a particular musical metaphor. This method explains his reliance on pieces with descriptive titles. The influence of an especially eastern European variety of minimalism (more meditative and less didactic) is also apparent in the carefully worked out relationship between different degrees of sound and silence, the predominance of soft dynamics, and in the smallest details and changes in pitch, timbre and rhythm.

VIRKO BALEY

Shearing, George (Albert) (*b* London, 13 Aug 1919). American jazz pianist of English birth. He was born blind and began playing the piano at the age of three. His only formal training in music was at the Linden Lodge School for the Blind, which he attended from the age of 12 to 16. By 1936 he was listening to recordings of Earl Hines, Fats Waller, Teddy Wilson, Meade Lux Lewis and Art Tatum. He absorbed the musical vocabulary of jazz so quickly and convincingly that the *Melody Maker* poll voted him the top British pianist for seven consecutive years. In 1947 he emigrated to the USA and settled in New York, where he was strongly influenced by the bop style – particularly the aggressive rhythmic playing of Bud Powell.

The historic 'Shearing sound' originated in recordings for Discovery in 1949, notably *Sorry, Wrong Rhumba*, made with a quintet of piano, vibraphone, guitar, double bass and drums. Using the piano as the leading instrument, Shearing played in the block chord style known as 'locked hands', which he developed from Milt Buckner's earlier model and from the chordal playing of Glenn Miller's saxophone section. In this style, each note of the melody is harmonized with a three-note chord in the right hand, the left hand doubling the melody an octave below. In Shearing's quintet the upper melody note was then doubled by the vibraphone, and the lower one by the guitar (ex.1). By popularizing this particular ensemble sound Shearing achieved commercial success on a scale rarely known in the jazz world. Among the sidemen who played in his quintet are Cal Tjader, Gary Burton, Toots Thielemans and Joe Pass. Shearing also played the accordion.

Ex.1 From *Sorry, Wrong Rhumba* (1949, Dis.); transcr. B. Dobbins

During the late 1950s Shearing began performing classical concertos with symphony orchestras in concerts which sometimes included orchestral arrangements featuring his quintet. From 1967 he performed as a soloist and in duos, notably with Mel Tormé (from 1976), which best display the full range of his abilities as a pianist and improviser. His best-known composition, *Lullaby of Birdland* (1952, MGM), was written as a theme for the legendary jazz club and its radio shows. A volume of transcriptions, *The Genius of George Shearing*, was published in 1984.

BILL DOBBINS

Shebalin, Vissarion Yakovlevich (*b* Omsk, 29 May/11 June 1902; *d* Moscow, 28 May 1963). Russian composer and teacher. Completing his studies at the Omsk gymnasium, in 1920 he simultaneously entered the Institute of Agriculture and a music college (where he studied the piano with B. Medvedev). A year later he was transferred to M. Nevitov's special music theory class before being accepted in 1923 into Myaskovsky's composition class at the Moscow Conservatory. His first compositions – some romances and a string quartet – received favourable reviews in the press. His romances, op.1 *Iz Demelya* ('From Dehmel') and op.3 *Iz Saffo* ('From Sappho') attracted attention for their 'freshness and lucidity', although 'the strong influence of the French impressionists' was noticed by one reviewer, who complained that 'the stylisation which was deliberately introduced by the composer is not always sufficiently sustained'. However, the quartet, op.2, revealed greater maturity of compositional technique 'Shebalin, a pupil of N.Ya. Myaskovsky, is at the present moment . . . under the influence of this major contemporary Russian symphonist, after the example of his teacher uses themes of a folk character in his compositions, refracting them through a prism of contemporary harmony . . . In his First Quartet, the young composer has revealed, besides the ability clearly and economically to set forth his ideas, a rather splendid flair for the quartet style and undoubted taste in the choice of

the resources of string instruments' (Shirinsky, p.114–5). In 1928 Shebalin graduated from the conservatory, presenting as his diploma work a symphony in three movements which he had written in 1925. The influence of Myaskovsky continues to manifest itself in this work in many ways: 'the symphony is highly polyphonic, and has enormous cohesion both as regards each movement, as well as between the individual movements. This is achieved by the remarkable unity of the thematic material: the themes have a kinship through the structure of their elements, they often cross over one into another, but at the same time they do not lose their usual vividness and expressiveness. A diatonic structure predominates in his melodies, which have for the most part a folk character. In many ways, the Russian folk song is the starting point in the works of Shebalin . . .'. (Starokadomsky, p.153). In 1928 he started teaching (with breaks) at the Moscow Conservatory, was made a professor in 1935, and from 1940–41 was head of the composition faculty.

From 1942 to 1948 he served as director of the conservatory, guiding it with skill and devotion through the difficult years of war and reconstruction. By that time he had received many honours: a doctorate in arts in 1941, the title People's Artist of the RSFSR in 1947, and two Stalin Prizes – for the String Quartet no.5 in 1943 and the cantata *Moskva* ('Moscow') in 1947. An unexpected blow came with his dismissal in 1948 from the conservatory in the wake of the musical 'purge' of that year; he spoke with great courage during the public discussions. 'He suffered deeply and painfully under this, highly unjustified, dismissal', wrote Shostakovich, fellow victim of the purge. Shebalin was demoted to a subordinate job, teaching theory at a bandmasters' school, but he was reinstated as professor of composition at the conservatory in 1951. Although he suffered a stroke in 1953 which left him partly paralysed on the right side, he continued to teach and to compose; he learned to write with his left hand. His greatest success came late in life, with the opera *Ukroshcheniye stroptivoy* ('The Taming of the Shrew'), staged in 1957 and acclaimed as a masterpiece.

With Kabalevsky, Khachaturian and Shostakovich, Shebalin belongs to the first group of composers educated entirely under the Soviet regime. Yet his career was less spectacular than that of his confrères; it evolved rather more slowly and methodically. If, during the 1920s he was one of the young composers with modernistic leanings, then around the 1930s he began to re-examine his attitude to folklore and Russian traditionalism, having been caught (like Myaskovsky and others) in the ideological feud between the ACM and the aggressive Association of Proletarian Musicians (RAPM). Refusing to bow to pressure, Shebalin, Myaskovsky, Kabalevsky and others formed a new group which was soon (1932) superseded by the official Union of Soviet Composers. Undaunted, Shebalin worked to achieve a clarification of his musical idiom and a closer affinity to the evolving concept of socialist realism. However, he suffered several critical rebuffs: in 1931, his large-scale dramatic symphony *Lenin* (on texts by Mayakovsky) was 'buried by the critics' (as he ruefully observed in 1959). Not much better received was his Symphony no.4 (1935), dedicated to 'The heroes of Perekop', which incorporated his own mass song 'The Third Crimean Division'. More successful were his shorter orchestral works based on folk material, such as the Overture on Mari Themes (1936) and the Variations on the Russian Folktune *Uzh tï pole moyo* (1939–40). 'One must know how to develop the elements of folk material, reshape it into dynamic images, and transform them into large-scale works', Shebalin wrote in 1940. While he continued the traditional method of Glinka and the Balakirev school, he lent a more modern touch by theme transformation and harmonic spicing.

By nature more lyric than epic, Shebalin gave his best in more intimate genres such as chamber music and vocal forms. Resuming the composition of string quartets in 1934, he produced a series of excellent works, among which the Fifth ('Slavonic') became best known. A large-scale work in five movements, it uses Russian, Ukrainian, Slovak, Serbian and Polish themes, yet despite the variety there is a feeling of inner cohesion. His use of folk material is not literal, his method of elaboration often polyphonic. Compared to the more complex earlier quartets, the Fifth is a further step towards artful simplification, evident also in his later quartets and the Piano Trio op.39; occasionally it led to over-simplification, as in the ballet *Zhavoronok* ('The Lark') or the cantata *Moskva*. Shebalin's exquisite feeling for poetry marks his songs and his masterly unaccompanied choruses. He was an erudite musician, more methodical than inspired, a masterful technician carefully planning every step, a musical intellect without the ultimate spark of genius. He was also an outstanding teacher (among his students were Khrennikov, Karen Khachaturyan, Gubaidulina, A. Nikolayev, V. Tormis (Estonia), Karetnikov and Denisov), and carried out conscientious editorial work: he unearthed and completed the Overture-Symphony on Russian Themes by Glinka (1937), and produced the best existing version of Musorgsky's unfinished opera *Sorochintsy Fair* (1931–2), superseding previous restorations by Lyadov, Cui, Sakhnovsky and Nikolay Tcherepnin.

INNA BARSOVA

Shedlock, J(ohn) S(outh) (*b* Reading, 29 Sept 1843; *d* London, 9 Jan 1919). English pianist and writer on music. He gained the BA at London University in 1864, then went to Paris to study the piano with Ernst Lübeck and composition with Lalo. When he returned to England he became a piano teacher and occasionally played in public. He succeeded Prout as music critic for *The Academy* in 1879, and from 1898 to 1916 was music critic for *The Athenaeum*. He also edited the *Monthly Musical Record* and taught the piano and music history at the RAM (1901–5). Shedlock's most important contribution was in Beethoven scholarship. His pioneering studies of manuscripts in the British Library, entitled 'Beethoven's Sketch Books', are similar to Nottebohm's *Beethoveniana* essays and have provided a basis for further research. He discovered Beethoven's annotated copy of Cramer's piano studies and published a two-volume translation of Beethoven's letters. His other works include a treatise on the piano sonata and an edition of Kuhnau's *Biblical Sonatas* (1895) and of Purcell's *The Fairy Queen* (as vol.xii of the Purcell Society edition, 1903).

J.A. FULLER MAITLAND/WILLIAM DRABKIN

Sheffield. City in England, in South Yorkshire. Except for the activities of the town waits, there is little to record of music-making in Sheffield before the 18th century. At the parish church of St Peter and St Paul (the cathedral since 1913) a group of instrumentalists accompanied the singing until a modern organ by G.P. England was installed in 1805; in the nonconformist chapels, modest choral services were fairly common. But it was the opening of St Paul's Church (1740) that made possible oratorio performances on a large scale, especially after the Snetzler organ was constructed (1755). A musical society was in existence by 1758; later, subscription concerts were held in the Assembly Rooms (1762). Before the 19th century, an impetus to musical effort came from the necessity of raising money for charity, and when the Sheffield Infirmary was founded (1797) an ambitious festival was arranged. Sheffield musicians took part in the Yorkshire Choral Concert and other events; by 1800 the nature of Sheffield society was such that there were excellent prospects for professional teachers and performers.

Under the Million Pound Act Sheffield gained four new churches, at one of which, St Philip's (1828), an elaborate choral tradition developed in the era of the Anglican revival. The town possessed no sizable concert room until the Music Hall was built in 1824; this made commercial concert-giving possible and enabled concert promoters to engage such artists as Thalberg, Jenny Lind, Paganini and Sivori. With the improvement of rail communications, opera companies mounted 'seasons' at the Sheffield Theatre (1762) every year and similar productions were put on at the Surrey and Alexandra theatres. The singing-class movement encouraged the formation of choral societies (the Vocal Union, Sacred Harmonic Society etc.); but no permanent orchestra was established until the pianist J.M. Wehli (1832–87) formed the Sheffield Orchestral Union, which survived until Wehli left to tour abroad. There had been several unsuccessful attempts to put on regular choral festivals; it was not until the growth of civic pride after about 1860, however, that prospects improved considerably. The abundant enthusiasm for Tonic Sol-fa in Sheffield was responsible for, among other things, enhancing the career of a great English choral trainer – Henry Coward (1849–1944). Out of the local Tonic Sol-Fa Association (1876) evolved the Sheffield Musical Union, which Coward directed until its dissolution in 1938; this choir undertook several foreign visits, culminating in a world tour (1911). Coward also conducted the first major Sheffield Musical Festival (1895) and acted as chorus master for the triennial series that began in 1896. These important events were conducted by Manns, Weingartner, Henry Wood and others, the

carefully selected festival chorus being accompanied by London orchestras in programmes that included a high percentage of commissioned works. Although interrupted by World War I, the festivals were belatedly resumed in 1933 and 1936, by which time the City Hall (1932) had superseded the Albert Hall (1873) and the Victoria Hall (1908) as the main concert centre. In 1937 the Albert Hall (then used as a cinema) burnt down and its fine Cavaillé-Coll organ destroyed.

The period from 1880 to 1920 was the richest in Sheffield's musical history. Professional concerts were innumerable and on the operatic stage local singers occasionally assisted visiting companies; amateur music-making, as represented by such societies as the Collegiate Orchestral Society, the Choral Union and the Teachers' Operatic Society, was prodigious, with musicians of all kinds finding scope for remunerative employment. In 1899 Henry Coward formed the Sheffield Professional Orchestra; for some years promenade concerts were given in the Albert Hall under J.A. Rodgers (1866–1920), a gifted pianist, organist and critic. Music contributed to social welfare, with the corporation sponsoring band performances in the parks and 'Court and Alley Concerts' in densely populated districts. Church and chapel festivals were frequent and brass bands (of which the most famous was perhaps the Dannemora Band) were well supported by factory managements; other notable events of the time were the competitive festivals. The outbreak of war in 1914 did not seriously jeopardize musical affairs. Fund-raising recitals were popular and choral societies continued to thrive; on a more professional level the 'Five O'Clock Concerts', started by Marie and Lily Foxon in 1915, soon became famous. The Foxon sisters enjoyed a high reputation as teachers of singing and the piano respectively; equally successful were their activities on the concert platform.

The interwar years in Sheffield were marked by a decline in the enthusiasm for mass choral performance; some societies held their own, but greater interest was now taken in orchestras and soloists of national repute. The era of radio and the 'talkies' had an adverse effect on local enterprise and the Depression meant that new ventures were short-lived. The well-established Amateur Musical Society (1864) and the Musical Union were dissolved at about the same time, being succeeded by the Philharmonic Society (1935) which supports the (amateur) Philharmonic Chorus and Orchestra. In 1943 the corporation agreed to underwrite the scheme whereby the Hallé and other orchestras perform regularly in the City Hall under the auspices of the Philharmonic Society. Since 1945 such organizations as the Sheffield Bach Choir, the Oratorio Chorus, the New Sheffield SO and the South Yorkshire SO have helped to maintain the high standards for which Sheffield musicians have long been respected.

The opening of the Crucible Studio (part of the Crucible Theatre complex in Tudor Square) in 1971 provided an additional venue for concerts by the locally based Lindsay String Quartet. This ensemble has been the mainstay of annual festivals run in collaboration with visiting celebrities. The Crucible Theatre's thrust stage lends itself to large-scale performances by the semi-professional South Yorkshire Opera and touring companies, while the Lyceum Theatre (1897, refurbished 1990) hosts a variety of musical events. The university drama studio is used for chamber opera, musical comedy and recitals.

Apart from William Sterndale Bennett, Sheffield has produced no noteworthy composer. It can, however, boast a number of distinguished teachers (Frederick Dawson, the Foxons, G.F. Linstead), ecclesiastical musicians (T.T. Trimnell, T.W. Hanforth, J.W. Phillips, Tustin Baker, Graham Matthews) and concert performers (Eva Rich, Peter Glossop, Kendall Taylor). In music education the record of Sheffield's schools and colleges is excellent. The City of Sheffield Youth Orchestra has been a training ground for many professional instrumentalists. At a critical period (1919–31) the university was fortunate enough to have as its vice-chancellor William Henry Hadow, during whose term of office the James Rossiter Hoyle Chair of Music was established. The successive occupants of the chair, F.H. Shera, J.S. Deas, Basil Deane, Edward Garden and Eric Clarke, have maintained an excellent relationship between the university and the city, and such musicologists as Denis Arnold and Gilbert Reaney were trained there.

Shekere [sekere]. *See* CABACA.

Shekhter, Boris Semyonovich (*b* Odessa, 9/20 Jan 1900; *d* Moscow, 16 Dec 1961). Russian composer. He completed his studies under Maliszewski at the Odessa Conservatory in 1922 and under Vasilenko and Myaskovsky at the Moscow Conservatory in 1929, where he taught from this date. In 1925, together with Davidenko, he co-founded Prokoll, a 'production collective' that represented and defended a relatively 'popular' style which was not modernist but which avoided the excesses of the zealous proletarian groups. He composed many popular songs and choruses; of his instrumental works, the orchestral suite *Turkmeniya* owes much to Turkmenian models.

DETLEF GOJOWY

Shekili [Abdullayev], **Alesker** (*b* Sheki, 1866; *d* Baku, 1 April 1929). Azerbaijani *khanende* (singer and *mugam* specialist). In his youth he worked as a stonemason. He began to study the art of *mugam* in Sheki, completing his studies in Baku with Aga Seid oglu Agabalï. Shekili had an outstanding voice of wide compass and a profound knowledge and mastery of *mugam*. He had a complete written and spoken command of Azerbaijani and Persian and was a fluent speaker of Georgian, Armenian, Turkish, Uzbek and Turkmenian; he also had a thorough knowledge of Persian music and of Persian and Azerbaijani classical literature. He was a popular singer throughout the Transcaucasian region, performing widely in Azerbaijan, Persia, Armenia, Georgia, Daghestan, Turkey and Uzbekistan. He won a gold medal in a competition held in the Persian Shah's palace, and when he won another competition held in Tashkent he was awarded a *gaval* (one-sided frame drum) which is preserved in the city museum of Sheki. In 1913 and 1914 Shekili recorded various Azerbaijani songs and classical *mugams* for the companies Sport-Record (Tbilisi) and Ekstrafon (Kiev); the recordings included the *mugams*, *Shur*, *Rakhab*, *Segyakh*, *Zabul*, *Shyushter*, *Chagyakh*, *Katar Rast* and *Bayatï-Kadzhar*, sung mostly in Azerbaijani and Persian, with some in Turkish, Georgian and Armenian. His accompanists included the *tar* players Shirin Akhundov (1878–1927), Kurban Pirimov (1880–1965) and Akhmed bey Tairov (1887–1958). Shekili's son Mikail Abdullayev (1907–78) was also a well-known *tar* player.

Shekili also composed a number of songs which were still performed by the end of the 20th century. His influence on the development of Azerbaijani *mugam* song was immense.

FAIK CHELEBI

Shelbye [Selby], **William** (*d* Canterbury, 1584). English composer. He held the combined office of master of the choristers and organist at Canterbury Cathedral from about 1541 to 1584, apparently with some interruption between 1554 and 1564 when payments were made to Thomas Bull. Shelbye wrote an antiphon, *Miserere*, and an offertory, *Felix namque*, both of which are in the Mulliner Book (ed. in MB, i, 1951, 2/1954). *Felix namque* sets the Sarum plainchant in breves throughout in a four-part texture. The *Miserere* is an early instance of a curious proportional device used by English composers, in which nine minims are set against two semibreves in the original notation. Later composers to employ this technique included Tallis, Byrd and Thomas Tomkins.

Shelem [Weiner], **Matityahu** (*b* Zamos, Poland, 25 March 1904; *d* Israel, 10 May 1975). Israeli composer of Polish birth. After emigrating to Palestine at the age of 18, he was a founding member of the Beit-Alpha Kibbutz in the Israel Valley (1922). His first songs, written in 1931, were shepherd songs and songs for kibbutz festivals and events on his own texts. In 1941 he moved to the Ramat Yoḥanan Kibbutz. There he worked on reforming holy day festivities, examining their roots and traditions, and finding ways to update their celebration in light of the rejuvenation of Israeli agricultural life. Shelem saw Jewish holy days as social events unique to the kibbutz way of life. He composed celebrations in three parts – ceremony, banquet, assembly – specifically written according to this belief and published a number of articles on the subject. The most well known of his celebrations are: *Ha-va'at ha-'omer* ('Harvesting', 1947), *Simḥat klulot* ('Wedding Celebration', 1970), *Ḥaġ ha-gez* ('Shearing Festival', 1954), among others. A collection of his work entitled *Zmarim* ('Songs') was published in 1969.

NATAN SHAHAR

Shelemay, Kay Kaufman (*b* Houston, 26 March 1948). American ethnomusicologist. She completed the BA, MA and PhD at the University of Michigan, where she took the doctorate in 1977 under W.P. Malm. She was appointed assistant professor of music at Columbia University (1977) and New York University (1981), and professor at Wesleyan University (1990), prior to being made chair of the music department at Harvard University in 1992. She is editor of the series The Garland Library of Readings in Ethnomusicology. Her principal areas of research include the music and history of the Falasha of Ethiopia, the notation system of the Ethiopian Christian church, the cultural intermingling of Jewish and Arabic musics in the Syrian Jewish community, and the relationship of music and memory. Shelemay's discovery that contemporary Jewish identity among the Falasha is an artefact of 19th-century contact with Jewish travellers, rather than the result of an unbroken historical link to ancient Judaism, is an important but controversial contribution to the field. She is also known for her thoughtful works on fieldwork and its relationship to historical investigation.

INGRID MONSON

Shelley, Howard (*b* London, 9 March 1950). English pianist and conductor. Precociously gifted, he appeared on television at the age of ten in a recital of works by Bach and Chopin, and the following year made his début, in a Haydn concerto, at the Royal Festival Hall. He went on to study at the RCM (1967–71) with Harold Craxton, Kendall Taylor, Lamar Crowson and Ilona Kabos. In 1972 he made his Proms début, and in 1983 he performed the complete solo works of Rachmaninoff in a series of recitals at the Wigmore Hall. All of these were later recorded (he was joined in the suites for two pianos and the Symphonic Dances by his wife Hilary Macnamara), and soon afterwards he recorded Rachmaninoff's complete piano concertos and Paganini Rhapsody. Shelley's repertory is, however, exceptionally wide-ranging, and includes much 20th-century English music. The piano concertos of Edward Cowie, Brian Chapple and Peter Dickinson are all dedicated to him, and he has played and recorded concertos by Tippett, Vaughan Williams, Howard Ferguson, William Alwyn and others. His recordings also include a series of Mozart concertos which he directs from the keyboard. In the 1980s he developed a parallel career as a conductor. He was appointed associate conductor of the London Mozart Players in 1990, becoming principal guest conductor in 1992. He has recorded Mozart and Schubert symphonies with the RPO and has conducted a complete recorded cycle of the Beethoven piano concertos with Michael Roll. Shelley's impeccable taste and urbane musicianship are matched by a fluent technique, and his Rachmaninoff performances and recordings, in particular, have won high critical praise.

BRYCE MORRISON

Shelley, Percy Bysshe (*b* nr Warnham, W. Sussex, 4 Aug 1772; *d* nr Lerici, Italy, 8 July 1822). English poet. His major writings, *Queen Mab* (1813), *Alastor* (1816), *The Revolt of Islam* (1818) and *Prometheus Unbound* (1820), evinced striking intellectual courage, political radicalism and atheism. In his book *The Perfect Wagnerite* Shaw proclaimed *Prometheus Unbound* 'an attempt at an English Ring' where the conflict between humanity, religion and government, the redemption of man from tyranny, the transfiguration of the world and the growth of man's will and self-confidence formed a striking parallel with Wagner's dramatic scheme. Such a connection was made by the 32-year-old Hubert Parry in his strongly Wagnerian dramatic cantata *Prometheus Unbound* for the Gloucester Festival (1880). However, the difficulties Parry experienced with Shelley's blank verse epitomized the problematic nature of such material for musical setting. It was instead the lyric poetry that excited a wide response. John Barnett's *Lyric Illustrations of the Modern Poets* (1834), a collection of 15 songs, included eight settings of which 'I arise from dreams of thee' is an outstanding early example. Mid-19th-century settings also emanated from Macfarren, Loder, H.H. Pierson, Sterndale Bennett and Sullivan, but it was towards the end of the century and in the first half of the 20th that Shelley became a national icon for British composers. Arguably his finest extended lyric poem, *Ode to the West Wind* was set by Charles Wood in 1890 for tenor, chorus and orchestra; however, it was the shorter poems that had the widest appeal. Of the many solo songs, Parry's *Good night*, Stanford's duet *When the lamp is shattered* and the two settings of *Love's Philosophy* by Delius and Quilter stand out as do Parry's *Music, when soft voices die* and Elgar's *Wild West Wind* op.53 no.3 in partsong form. Other genres were also inspired by Shelley's lyric impulse, notably Parry's ballet *Proserpine* and Bax's *Prelude to Adonais*, written for the Keats-Shelley Festival at the Haymarket Theatre in 1912, while Elgar's Second Symphony (1911) is prefaced by the two memorable lines 'Rarely, rarely, comest thou, Spirit of Delight!'. On the Continent Shelley received conspicuously less attention than his friend and contemporary, Byron, though he was favoured by Respighi in three works for solo voice and orchestra: *Aretusa* (1910), *La sensitiva* (1914) and *Il tramonto* (1914).

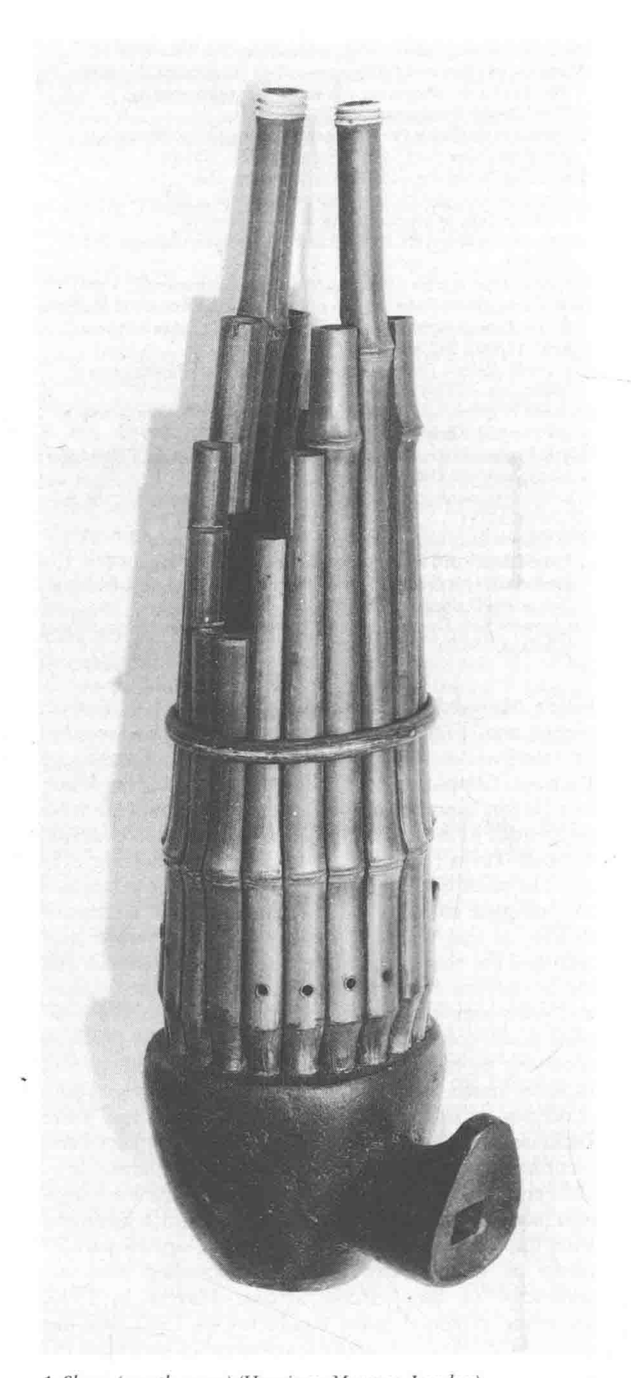
JEREMY DIBBLE

Shemer, Naomi (*b* Palestine, 13 July 1930). Israeli composer. After completing her studies at the Academy of Music in Jerusalem, she returned to the kibbutz on which she was born and worked as a music teacher and song composer. In 1956–7 her music burst onto the Israeli music scene and she became a very popular composer and poet. Her songs, many of which set her own lyrics, were performed by such artists as Yaffa Yarkon, the Central Command Band and the Ha-duda'im Duo, and were released by a number of publishing houses. In 1967 she was commissioned to write a song about Jerusalem for the Jerusalem Song Festival; *Yerushalayim shelzahav* ('Jerusalem of Gold') was first performed on Independence Day of that year. During the Six Days War that began three weeks later, the song was played and sung widely in Israel and abroad. Thought to express perfectly the love of the nation for Jerusalem, the song was proposed in the Knesset as a new Israeli national anthem.

By the mid-1980s there was not an Israeli singer or ensemble who had not performed one of Shemer's songs.

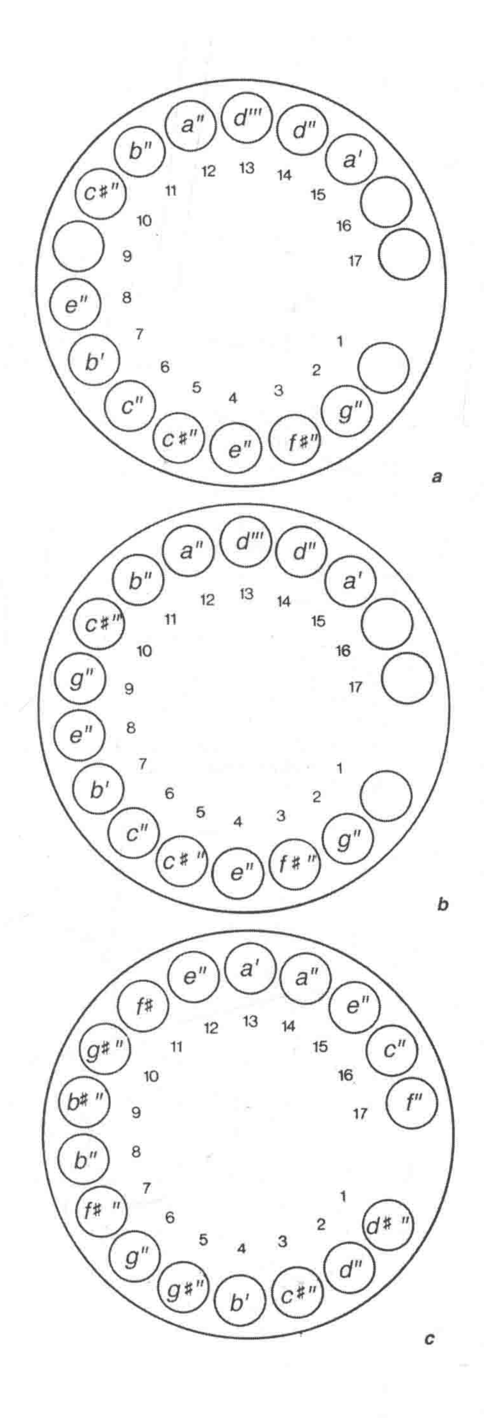
Nicknamed the 'national poet', she demonstrated a unique ability to express the national mood. Although her first works were published in the 1950s, her first book of songs, *Kol ha-shirim* ('All the Songs'), did not appear until 1967. Later publications have included three additional song books (1975, 1982, 1995), as well as various collections for children. As a singer she has recorded a selection of her own songs. Her honours include the Jerusalem Prize (1983) and honorary doctorates from the universities of Jerusalem (1994) and Beersheba (1999).



NATAN SHAHAR

Sheng. Mouth organ of the Han Chinese. It is especially prevalent in north and central-eastern China. The instrument is constructed of a bowl-shaped wind-chest of wood or metal (formerly of gourd), with a blow-pipe extending out from one side. Through the flat upper surface of the wind-chest, 17 (or more) bamboo pipes are inserted in an incomplete circle. The pipes are of varying graded lengths, the tallest pipes appearing on opposite sides of the circle (fig.1). This arrangement, according to the 2nd-century CE dictionary *Shuowen Jiezi*, represents the two folded wings of the mythical phoenix. Most pipes on traditional instruments are operational, with a free reed at the bottom of each (enclosed within the wind-chest), a small finger-hole (above the surface of the wind-chest) and an upper vent-hole which defines the vibrating length of each pipe. On traditional instruments, however, three or four pipes are usually mute (i.e. blocked and without reeds or finger-holes), their presence being to maintain the 'phoenix-wing' profile.

1. Acoustics and performance. 2. History. 3. Types.



1. ACOUSTICS AND PERFORMANCE. The reeds (*huangpian*), which are secured by wax to the bottoms of the pipes, are made from 'resonant bronze' (*xiangtong*), an alloy comprised of approximately three parts of copper to one part of tin. *Sheng* reeds are free-beating reeds, the tongue cut from the same material as the reed frame, rectangular in shape and seated flush with the frame. The reed tongues are tuned with small dots of 'red wax' (*hongla*) applied near their vibrating ends, and are activated by either exhale or inhale. The tuning system normally employed is based on pure overblown 5ths, starting on the keynote of the instrument (*d″* for the *sheng* used in central-eastern China), extending over the diatonic gamut of one and a half octaves (sometimes including one or more chromatic pitches as well; see fig.2 for three of several common pipe arrangements).

The *sheng* reed, primarily because it has a rectangular tongue, behaves differently from other reed types. Unlike single reeds, double reeds and pointed free reeds (e.g. on *bawu* reed-pipes), which vibrate at any pitch as defined by the length of the attached air column, the rectangular free reed sounds a pitch of fixed frequency. But because the tongue is seated flush with the reed frame (unlike the accordion tongue which is elevated), it relies on a coupled reinforcing pipe to provide back pressure for vibration. The function of the finger-hole (located on the lower wall of each pipe), when open, is to break the reinforcing air column so that no reed will sound unless selected. The closing of a finger-hole seals the air column and allows it to reinforce reed vibration. The length of each pipe is regulated by an upper aperture cut through the inner wall, the resonating distance matched to the pitch of the reed tongue. As shown by Hayashi, these correlated measurements have been handed down from maker to maker since at least the 8th century, though they were undoubtedly known earlier.

1. *Sheng (mouth organ) (Horniman Museum, London)*

In performance, air is alternately exhaled and inhaled through the blow-pipe. The fingers of both hands are responsible for the activation of specific pipes, the right index finger activating pipes 3 and 4 from inside the circle. The traditional system of producing harmonizing pitch clusters is known as *peihe* ('cooperation') and by other names. In practice, each 'root tone' (*zhuyin*) of a melody is performed together with an 'accompanying tone' (*peiyin*) a perfect 5th above. Owing to the instrument's

2. Diagram showing pitches of the 17 pipes in the three most widespread types of sheng (mouth organ), the number of sounding pipes being (a) 13, (b) 14, (c) 17

narrow range, some 'accompanying tones' are played instead at the 4th below, and octave pitches are often added as well. The tonal position of *ti*, which is used infrequently, is usually sounded alone.

2. History. Mouth organs are first mentioned in the ancient oracle bone inscriptions (14th–12th centuries BCE) by the names *he* and *yu*. The name *sheng* appears first in the *Shijing* ('Classic of odes') around the 7th century BCE. Both *he* and *yu* are identified as types of *sheng* in the later classic texts. While there are discrepancies in pipe and reed numbers appearing in these sources (and with archaeological finds), the *he* is clearly identified as being a small *sheng* (usually with 13 reeds), the *yu* a large *sheng* (with 23, 36 or other numbers of reeds and pipes). Another moderate-size *sheng* variant, *chao* ('nest') with 19 reeds, is also cited. Recent archaeological finds have shed additional light on these early instruments. The tomb of the Marquis Yi of Zeng (Hubei province), dating to about 433 BCE, contains five small mouth organs with gourd wind-chests, varying numbers of pipes (12, 14 and 18) in two parallel ranks and bamboo reeds. The Han tombs 1 and 3 of Mawangdui (Hunan province), dating to the 2nd century BCE, contain two large *yu* with wind-chests of wood and 22 long bamboo pipes in two parallel ranks, one instrument with reeds of metal similar to those in use today. It seems, therefore, there was considerable regional diversity in construction of these ancient mouth organ types.

During the 8th century CE the Japanese court received from China three *sheng* and three *yu*, now preserved in the Shōsōin treasury. In number and arrangement of pipes (17 pipes, in an incomplete circle), tuning and shape, there is remarkable continuity between these instruments and the traditional *sheng* in use today. Throughout this period, in fact, other variants emerged, such as the various 19-pipe types and the fully chromatic instruments documented in the music treatises *Yueshu* (early 12th century) and *Lülü jingyi* (late 16th century). A semi-chromatic 17-pipe, 17-reed *sheng* dating from the 16th or 17th century is preserved in Beijing. Chromatic instruments, however, were most probably restricted to ritual usage within the courts and Confucian shrines.

3. Types. The traditional *sheng*, which is still used in village ceremonies throughout North China and in *Kunqu* opera accompaniment and *sizhu* ('silk-and-bamboo') chamber music of eastern China, generally has a small round wind-chest of lacquered wood, with 17 pipes arranged in an incomplete circle, but usually only 14, 13, or fewer reeds. Tuning is essentially diatonic, though sometimes including the lowered seventh and/or raised fourth degrees. During the 20th century larger instruments have also become common, often with wind-chests of nickel-plated brass. One type distinctive to area of Henan province and south-western Shandong province is the *fangsheng* ('square *sheng*'), with rectangular wind-chest of wood, and 14 pipes arranged in three parallel ranks but traditionally only 12 reeds.

With the emergence of the new concert-hall music (*guoyue*) in the mid-20th century, the *sheng* underwent several important changes to accommodate expectations for increased volume, larger range and greater chromatic capability. Two new types have become commonly accepted. The *guoyue sheng* ('national music *sheng*') has a large wind-chest and sounding reeds in all pipes, such as the 17-pipe, 17-reed semi-chromatic *sheng* of the early 1950s. Additional pipes were subsequently added for increased range, such as the 21-pipe *guoyue sheng*, for which four extra pipes are positioned inside the circle. On these (and other) new models, some low pipes are lengthened by being 'folded' back at the distal end (*dieguan*) and all pipes are also amplified by the external

attachment of metal tubes (*kuoyin guan*). The *jiajian sheng* ('keyed *sheng*') is a larger, fully chromatic instrument capable of being played in eight or nine keys. While 24- and 26-pipe models were common during the 1950s, present-day models more normally have 36 or 37 pipes. The *jiajian sheng* is different from traditional design in that there are gaps in the circle for both right and left index fingers, and reed vibration is controlled not by finger-holes but by way of keys which close pipe ends. Some models have a long, curving blow-pipe. There are yet other more specialized new *sheng* types, such as the organ-like *da paisheng* ('large row *sheng*', a floor model with foot pedals), the more moderate-sized *baosheng* ('held *sheng*', which rests on the player's lap or stand), and variants in between. These types, however, are limited to only the largest of contemporary ensembles.

It is striking that, given its very extended history, mythological associations and sophisticated acoustical system, a solo repertory for the *sheng* has developed only since the 1950s. Yet in every traditional ensemble of which it is a part, the *sheng* serves primarily to accompany other instruments.

ALAN R. THRASHER

Sheng, Bright [Zong Liang] (*b* Shanghai, 6 Dec 1955). Chinese-American composer. He studied the piano with his mother from the age of four. For seven years during the Cultural Revolution he worked in a folk music and dance troupe in Qinghai province near the Tibetan border, where he also studied and collected folk music. In 1978 he entered the Shanghai Conservatory, earning the BA in music composition. After moving to New York in 1982, he continued his studies at Queens College, CUNY (MA 1984), and Columbia University (DMA 1993). Among his principal teachers were Leonard Bernstein, Chou Wen-chung, George Perle and Hugo Weisgall. He has served as composer-in-residence for the Lyric Opera of Chicago (1989–92) and the Seattle SO (1992–5), and as artistic director for the San Francisco SO's Wet Ink Festival (1993). In 1995 he joined the composition department at the University of Michigan, Ann Arbor. His many honours include Guggenheim (1990), Naumberg (1990) and Rockefeller (1991) foundation fellowships and a Kennedy Center award (1995).

Sheng has described his biggest compositional challenge as integrating Asian and Western cultures without compromising the integrity of either. His dramatic orchestral composition *H'un* ('Lacerations'), given its première by the New York Chamber Symphony in 1988, is a formidable remembrance of the Cultural Revolution. *The Song of Majnun* (1992), based on an Islamic story but using Tibetan folk melodies, explores tensions among Chinese, Tibetan and European styles. In 1996 Sheng returned to China for the first time after a 14-year absence to compose the cello concerto *Spring Dreams*, commissioned by Yo-Yo Ma for cello and Chinese traditional orchestra. While in China, he reacquainted himself with Chinese instruments and Chinese musical thinking.

WEIHUA ZHANG

Shenshin, Aleksandr Aleksandrovich (*b* Moscow, 6/18 Nov 1890; *d* 18 Feb 1944). Russian composer, conductor and teacher. He received lessons from Grechaninov in music theory (1907–8), Glière and Yavorsky in composition (1910–12 and 1914–15 respectively), Saradzhev in orchestration and conducting (1911–13) and piano lessons from Ye. Gnesina (1921–2). In 1915 he graduated from the history and philology faculty of Moscow University. From 1915 to 1921 he was a teacher of history and Latin, later to become head of the music section, and conductor of the orchestra at the Moscow Central Children's Theatre (1921–5); he also served as a member of the history and aesthetics section of the Academic subsection of the Music department of the People's Commissariat of Enlightenment, and was an editor of the journal *Sovremennaya Muzïka* (1922–4). Shenshin taught at the Moscow Conservatory.

Vocal music and music for the theatre are central to Shenshin's work; his intimate and elegant vocal writing is exemplified in miniatures which are examples of a psychologically subtle reading of a poetical text, whether it be Bal'mont or Sappho. During the 1920s and 30s Shenshin was a popular choice of composer for incidental music by directors such as A. Tairov (of the State Chamber Theatre) and V. Meyerhold. He also collaborated with the State Belorussian Jewish Theatre.

He studied the interaction between the plastic arts and music and was the author of *List i Mikel'-Andzhelo* ('Liszt and Michelangelo'), *List i Rafael'* ('Liszt and Raphael') in addition to a work entitled *Printsipï i metodï obshchego muzïkal'nogo obrazovaniya* ('The principles and methods of a general musical education') intended for use by schoolteachers. He was one of the organisers of the

Academy of Artistic Sciences (GAKhN) under the aegis of which the Association for Contemporary Music (ASM) was set up; he was a member of the latter organisation.

WORKS

Stage: O Tao (op), 1927; Shuanka, 1931; Antichnïye plyaski: Dionis [Classical dances: Dionysus] (ballet, K. Goleyzovsky), 1933; Povest′ o Karmen [A Tale about Carmen] (choreog. drama, after P. Merimée, scenario K. Lipskerov), 1934; Dvenadtsataya noch′ [Twelfth Night] (comic op, after W. Shakespeare), 1938–9

Orch: Letniye kartinki [Summer Pictures] (after K. Bal′mont: *Liricheskaya Syuita* [Lyric suite]), 1913; Lyola, poem, 1913; Scherzo, 1935, from the collective suite Saradzhevu [To Saradzhev]; Dramaticheskaya uvertyura [Dramatic Ov.], 1943

Choral: 4 stikhotvoreniya [4 Poems] (A.S. Pushkin) 1 solo v, chorus, orch, 1937–9; Pugachovtsï [The Followers of Pugachov] (A. Prokof′yev); 4 songs, chorus, 1940

Songs (for 1v, pf, unless otherwise stated): Iz yaponskikh antologiy [From Japanese anthologies], 6 settings, 1912; Iz Safo [From Sappho] (Sappho, trans. Bal′mont, V. Ivanov), 1918; Iz liriki zapada [From the Lyric Poetry of the West] (Byron, trans. M.Yu. Lermontov, R. Lenau, trans. Verkhovensky, P. Verlaine, trans. F. Sologub), 1920; Iz russkoy liriki [From Russian Lyric Poetry] (S. Bogomazov, V. Ivanov, M. Lorkh, N. Yazïkov) 1920; Krug nerazmïkayemïy [The Circle that Cannot be Broken] (A. Blok), 1923; Radost′ dorog [The Joy of Travelling] (Sologub), 1922; 5 stikhotvoreniy [5 poems] (C. Baudelaire, trans. S. Shervinsky), 1924; 5 stikhotvoreniy (Shervinsky), 1924; Kamïshovïye pesni [Bulrush Songs] (Lenau, trans. Shervinsky), 1925; Gorod [The City] (Blok), 1928; Pesni o sholke [Songs about Silk], 1v, fl, ob, cl, bn, vn, va, vc, 1930; 9 stikhotvoreniy [9 Poems] (Pushkin), 1930–7; Anyutin denyok [Anyutin's Day] (Shervinsky), children's songs, 1932; Koktebel′ (M. Voloshin), 1932; 4 pesni iz vengerskogo podpol′ya [4 Songs from the Hung. Underground] (A. Gidas), 1933; 7 ispansikh narodnïkh pesen [7 Spanish Folksongs] (trans. O. Rummer), 1935; Moy Koktebel′ [My Koktebel] (N. Gabrichevskaya), 1935; 10 ital′yanskikh narodnïkh pesen [10 Italian Folksongs] (trans. Rummer), 1936; Bïlïye godï: ėlegicheskiy tsikl [Former Years: Elegiac Cycle] (Lermontov)], 1940; Rodina [Homeland] (Prokof′yev)], 1940; 3 pesni [3 Songs] (S. Shchipachov), 1942

Chbr: Pf Qnt, 1912; Str Qt, 1943

Pf: 7 prelyudiy, 1917; 9 prelyudiy, 1923; Sonata, 1924; 5 prelyudiy, 1930

ALLA VLADIMIROVNA GRIGOR′YEVA

Shen Zhibai (*b* Wuchang, 18 March 1904; *d* Shanghai, 15 Sept 1968). Chinese musicologist and teacher. After graduating in 1931 from a teachers' college in Shanghai, he studied privately from 1932 to 1935 with the Russian Jewish musician AARON AVSHALOMOV. He also kept contact with leading Chinese traditional musicians, and later with Beijing opera actors. He taught the history of Western and Chinese music at Hujiang University from 1940 to 1946, and the State Music School of Shanghai (later the Shanghai Conservatory of Music) from 1946 to 1949. After the Communist revolution he held leading positions on the faculty at the Conservatory. He died tragically in the Cultural Revolution.

Apart from his broad and thorough knowledge of both Chinese and Western music, Shen was much admired as an inspirational teacher. He was chief editor, compiler or translator of several influential publications. He also composed works for orchestra such as *Xiao zuqu* ('Little Suite', 1959) and *Hua zhi wuqu* ('Dance of Flowers', 1964), and *Dongxian wu* ('Dance of the Cave Fairies', *c*1933) for Chinese ensemble. Zhao Jiazi's brief biography of Shen Zhibai, 'Shen Zhibai xiansheng zhuanlue', appeared in *Yinyue yanjiu* (1990), no.1, pp.15–18

SU ZHENG

Shepherd, Arthur (*b* Paris, ID, 19 Feb 1880; *d* Cleveland, 12 Jan 1958). American composer, conductor and teacher. At the age of 12 he was sent to the New England Conservatory, where he studied with Goetschius and Chadwick. There he became immersed in Classical music and in the crosscurrents among Wagner, Brahms, and their French contemporaries. From 1898 to 1909 he worked as a conductor and teacher in Salt Lake City, where he founded a branch of the American Music Society after meeting Farwell in New York; the ideals of the society inspired the folklike tunes (though not the grand designs) of the First Piano Sonata (1907) and *Horizons* (1927). He then returned to Boston to aid Farwell, but their close association confirmed Shepherd's greater affinity with traditional musical craftsmanship than with Farwell's simpler nationalism. Shepherd taught at the New England Conservatory (1909–1920, interrupted by military service in France, 1918–19) and established himself as a modernist. Nevertheless, in the face of the vigorous dissonance of Stravinsky, Bartók, Schoenberg and Hindemith, he was unable to renounce 'the necessary *inevitable beauty* of the simpler euphonies' (letter to Goetschius, 1934). Neither nationalist nor iconoclast, Shepherd remained a stubborn traditionalist of original bent.

In 1920 Shepherd moved to Cleveland where he served as assistant conductor (1920–26) and programme annotator (1920–30) of the Cleveland Orchestra, critic (1928–31), and professor at Western Reserve University (1927–50); he was elected to the National Institute of Arts and Letters in 1938. His musical style continued to develop, as he explored expressive chromaticism (Piano Quintet, *Lento amabile*), modal themes (*Reverie*), 'Celtic' tunes (Second Sonata, fourth variation), dissonant yet tonal harmony of a mixed-mode character, and loose Romantic forms. His settings of English texts are particularly sensitive (*Triptych*, *Virgil*). He is the author of *The String Quartets of Ludwig van Beethoven* (Cleveland, 1935).

RICHARD LOUCKS/GRAYDON BEEKS

Shepherd, John. *See* SHEPPARD, JOHN.

Shepherd, John Charles (*b* Surbiton, 25 Jan 1947). Canadian music sociologist of British origin. After reading music at Carleton University, Ottawa (1967–72), he studied the flute at the RCM (1971); he then took the doctorate at the University of York under Wilfrid Mellers (1977). He taught at universities in Manchester (Metropolitan University) and Peterborough, Ontario (Trent University) and was appointed a professor at Carleton University in 1984. He also lectured abroad, was general secretary of the International Association for the Study of Popular Music (1983–7) and in 1990 became chair of the editorial board for the *Encyclopedia of Popular Music of the World*. His scholarship has focussed on the sociological and cultural criteria by which popular music is evaluated within the academic community. He has studied the effects of popular music in a wide range of communal situations and more recently worked on the theory of music cognition and perception.

ELAINE KEILLOR

Shepp, Archie (Vernon) (*b* Fort Lauderdale, FL, 24 May 1937). American jazz tenor and soprano saxophonist, playwright and teacher. He grew up in Philadelphia, and studied dramatic literature at Goddard College (BA 1959). While seeking theatrical work in New York he played the alto saxophone in dance bands, but under the influence of John Coltrane he took up the tenor instrument and performed in avant-garde groups. He was a member of Cecil Taylor's quartet (1960–62) and served as co-leader of a quartet with Bill Dixon (1962–3) and of the New York Contemporary Five with Don Cherry and John Tchicai (1963–4). He also recorded with Coltrane in 1965 (*Ascension*, Imp.). Thereafter he led his own groups. Shepp became an eloquent spokesman and apologist for free jazz, which he interpreted as a medium for political expression. He also wrote plays including *Junebug Graduates Tonight!*, which ran briefly in early 1967. From 1969 to 1974 he was a member of the faculty of black studies at SUNY, Buffalo, and in 1974 he transferred to the University of Massachusetts, where four years later he was named an associate professor. He remains active in the 1990s.

Shepp's early recordings abound in such elements of free jazz as collective improvisation, atonality and harsh fragments of melody. From the mid-1960s he began to make use of powerful poems evocative of life in the black ghettos (*Malcolm, Malcolm, semper Malcolm*, on the album *Fire Music*, 1965, Imp.) and African percussion, and to play marches, slow blues and sentimental ballads (*Prelude to a Kiss*, also on *Fire Music*; *In a Sentimental Mood*, on *On this Night*, 1965, Imp.); his tone became correspondingly full-bodied, and he employed old-fashioned growls and bends and wide vibrato. He simplified his style radically in the early 1970s, however, as he embraced rhythm-and-blues (*Attica Blues*, 1972, Imp.), and later bop, early blues and electronic music.

BARRY KERNFELD

Sheppard [Shepherd], **John** (*b c*1515; *d* Dec 1558). English composer. There is no evidence to support assertions that he was a choirboy at St Paul's Cathedral. At Michaelmas 1543 he went to Magdalen College, Oxford, as *Informator choristarum*. His character has regularly been blackened as a result of misreading of, and scribal inaccuracy in, the college records, which frequently attribute to him the misconduct of Richard Shepper, Fellow and Preston scholar of Magdalen from 1547 to 1557: the composer was at Magdalen only until 1548. In 1552 his name is in the list of the Gentlemen of the Chapel Royal, but because of the gap in Chapel Royal records from 1547, it is not known when Sheppard joined the Gentlemen. He was at the chapel throughout the 1550s. His will was made on 1 December 1558, and although he was allocated liveries for the funeral of Queen Mary on 13 December and the coronation of Elizabeth I on 15 January 1558/9, he was buried on 21 December 1558. In 1554 Sheppard had supplicated for the degree of DMus at Oxford, stating in his submission that he was 'studiosus Musices, quatenus viginti annos ei facultati operam continuo navaverit, multasque cantiones composuerit'. Unless he came to music unusually late in life, his birthdate can be put no earlier than 1512. It appears that the degree was never awarded. The John Sheppard who was a member of the Fraternity of St Nicholas in 1519 cannot be identified with the composer.

If Sheppard was composing about 1534, as he claimed, it would appear that most of his early work has been lost. Almost all of his music for the Latin liturgy exists only in post-Reformation anthologies. Were it not for the survival of the partbooks at Christ Church, Oxford (*GB-Och* Mus.979–83), probably copied by John Baldwin in the decade or so before 1600, far less of Sheppard's Latin music would have survived. The extant works testify well to the splendour of the Latin rite up to Elizabeth's accession. Most of it is incomplete but it is often restorable. The style and type of the pieces suggest that much of it dates from Mary's reign. Certain works, however, may be earlier. The six-voice *Magnificat*, for example, corresponds to the style of *Magnificat* composition between the 1490s or earlier and about 1540, when it apparently went out of fashion. It is incomplete, but enough survives to show that the use of full and solo sections for given verses, the use of the faburden of the chant and the division into duple and triple metre all adhere to type. It shows a fine handling of florid counterpoint, expansive and not structurally imitative, and seems to belong to the tradition developed by the Eton Choirbook composers and continued by Taverner. Sheppard's other *Magnificat*, for four voices, is far more modern in style, and must belong to the revival of *Magnificat* setting in the 1550s. It is in duple metre throughout, with no solo sections, and is based on the chant itself. *Gaude virgo Christipera* may date from the period of votive antiphon composition which seems to have ended by 1540. Large pieces of this kind were certainly composed in Mary's reign (by Tallis and William Mundy, for instance), but Sheppard's work handles the antiphon style much more in the manner of Taverner, with some masterly sequential organization in the solo sections. Regrettably, no large mass by Sheppard has survived from his early period; *Missa 'Cantate'*, based on a short, unidentified melody, must be a Marian work. Like the large votive antiphon, the festal mass seems to have been revived in the 1550s, and this mass shares features with other works from this period. The four short masses in the Gyffard Partbooks (*GB-Lbl* Add.17802–5) include a plainchant mass, employing only the most basic rhythmic values, and the Mass '*The Western Wynde*', which, like Tye's mass on the same secular tune, seems to be modelled on Taverner's plan. The other two masses show how the use of homorhythm, antiphony and structural imitation had become an accepted feature of the short mass. In both, melodic phrases recur in a way that suggests a pre-existing tune. In the Mass '*Be not afraide*' this could be a type of ad hoc cantus firmus used as a unifying device.

Sheppard's outstanding qualities can be seen clearly in his cantus firmus settings of Office music. He was at his best when writing vigorous counterpoint around a monorhythmic plainchant for a many-voiced choir. The number and scale of his responsories and hymns reflect the increased importance accorded to Office polyphony in the last decade or so of the Latin rite, and they form, with those by other composers (notably Tallis), a body of ritual Office polyphony for the major church feasts. With the exception of a few pieces of special ceremonial significance, which do not use a monorhythmic cantus firmus, Sheppard conformed to accepted practice, setting the chant in the tenor in his responsories and in the top voice in his hymns. In the responsories he surrounded the chant with rich and vigorous counterpoint, using imitation not structurally but for its sonority; its melodic patterns are rarely related to the chant. Contrasted rhythms and phrase lengths are played off against the slow-moving chant with fine effect, seen in the final 'alleluias' of *Filiae Jerusalem*. In the hymns, the chant tends to be presented syllabically and the style is more concise. *Sacris solemniis* (for eight voices, though never in eight real parts) is one of the more remarkable exceptions. A rich spatial effect is obtained by pairing the upper voices, sometimes singing the same music, sometimes in a gymel. The chant is irregularly ornamented, the only instance of this in the cantus firmus pieces. In his large-scale works, Sheppard regularly used the lowest voice in short phrases between rests as a kind of punctuation. In the first verse of *Sacris solemniis*, these phrases are short descending scalic passages derived from the chant and gradually taken up by the other voices. There is even a short section of antiphonal writing for seven voices against the high unornamented chant in the *primus triplex*. In its imaginativeness and technique it is one of Sheppard's richest and most masterly works, and is a model of the successful reconciliation of the older florid ornamental writing with the more modern continental techniques that characterizes the best mid-century liturgical music in England.

The English music survives in a far worse condition than the Latin. Most of the pieces appear to have been

composed in Edward's reign. Such anthems as *Christ rising again* and *I give you a new commandment* are sonorous examples of the small-scale anthem popular during Edward's reign. However, some more grandiose music also seems to have been cultivated at the Chapel Royal which would have appealed to Sheppard, who obviously liked rich textures. The lengthy *Lord, how are they increased* is probably one such piece. It is Sheppard's only known English work for six voices (only one part survives). The most splendid examples are the services. Even the simplest of them, the First Service, uses *divisi* parts and antiphony. The Second Service is more elaborate, really belonging to the tradition of the 'Great' services, and the evening canticles in the Batten Organbook (*GB-Ob* Tenbury 791) must have vied in splendour with even the richest of the Latin music.

DAVID CHADD/R

Sherard [Sharwood], **James** [Giacomo] (*b* Bushby, Leics., 1 Nov 1666; *d* Evington, Leics., 12 Feb 1738). English amateur violinist and composer. Sherard was a successful London apothecary who moved in the society of some of the most eminent men of his day. He became an FRS in 1706 and later an honorary MD of Oxford University. His business seems to have brought him considerable wealth, which he devoted to travels abroad, the study of botany and the creation at Eltham (then in Kent, now part of London) of what was then one of the finest gardens of rare and exotic plants in England.

Through his brother, the botanist William Sherard, who was at one time a tutor in the Russell family, James became associated with Wriothesley, 2nd Duke of Bedford, to whom he dedicated his first set of trio sonatas, which are the first evidence of his interest in composition. They were probably first performed at Southampton House by the composer himself with the Duke's two Italian chamber musicians, Nicola Haym and Nicola Cosimi. It has been stated that Sherard was acquainted with Handel, an assertion made plausible by their mutual dealings with Haym. After the publication of his second set of sonatas, about the time of the duke's death in 1711, Sherard's active interest in music seems to have declined. Gout prevented his playing the violin, and botany became his chief interest.

Unpublished research by Margaret Crum has identified Sherard's hand in several manuscripts in the Bodleian Library, Oxford, including *GB-Ob* Mus.Sch. D.252 (a scribal copy of his own op.2 in which he made autograph corrections), D.249 and D.254–6. It has also been established that important additions made to the Bodleian Music School collection during the 18th century, including manuscripts of German and Italian music and many printed sources not recorded in earlier catalogues, came indirectly from Sherard's library, probably as part of Richard Rawlinson's bequest. Much of this information has been incorporated in the typescript *Revised Descriptions* in the Bodleian Music Room.

Sherard's 24 trio sonatas are all of the *da chiesa* type. Like some other English sonatas of the time they were modelled, according to the dedication of op.1, on Italian works, presumably those of Corelli, though their harmonic idiom retains distinctive English touches. They lack Corelli's inventiveness but are nowhere marred by amateurish technical incompetence and show how a gifted amateur could at this period achieve real understanding of the technicalities of musical composition.

MICHAEL TILMOUTH/ROBERT THOMPSON

Shere, Charles (*b* Berkeley, 20 Aug 1935). American composer and music critic. After studying at San Francisco State University and the University of California, Berkeley (BA in English literature 1960), he studied at Mills College with Luciano Berio among others, and at the San Francisco Conservatory of Music, where his teachers included Robert Erickson; he also studied conducting with Gerhard Samuel (1961–4). He held the posts of music director at KPFA-FM (Berkeley) and critic, director and producer at KQED-TV (San Francisco) before gaining a teaching position at Mills College (1973–84). He has also served as critic for the *Oakland Tribune* (1972–88) and co-founder, publisher and editor of *Ear Magazine West* (1973–8); some of his articles are written under the pseudonym Charles Remolif. As a composer, Shere has received commissions from the San Francisco Chamber Orchestra, the San Francisco Contemporary Music Players, the Arch Ensemble (Berkeley) and the Noh Oratorio Society (San Francisco). His concertos for the piano and the violin have been performed at the Cabrillo Music Festival (1965, 1990).

Shere has described his early compositions, many of which are notated in open form and scored for unspecified or variable ensembles, as 'rural and contemplative rather than urban and assertive'; much of his music is rooted in the indeterminacy and conceptual experimentation of the 1960s. His most important influence is Marcel Duchamp, whose perceptual conundrums and whimsical humour are reflected in many of Shere's scores, especially the opera *The Bride Stripped Bare by her Bachelors, Even* (1964–86).

WORKS

Stage: The Bride Stripped Bare by her Bachelors, Even (op, 3, Shere, after M. Duchamp), 1964–86; Interval: Sustaining Music for Audience for Dick Higgins (theatre piece), pfmrs, 1969; The Box of 1914 (Duchamp), nar, dancer, S, T, chbr orch, tape, 1978–80; Ladies Voices (chbr op, 5, G. Stein), 1987; I Like It to Be a Play (chbr op, G. Stein), 1989

PAUL ATTINELLO

Sheridan [Burke Sheridan], **Margaret** (*b* Castlebar, Co. Mayo, 15 Oct 1889; *d* Dublin, 16 April 1958). Irish soprano. She studied with William Shakespeare at the RAM in London (1909–11) and with Olga Lewenthal, and was much in demand at fashionable musical soirées. In 1916 she went to Rome to continue her studies with Alfredo Martino. Her début was in *La bohème* (Rome, 1918) and in 1919 she appeared at Covent Garden (Mimì, and Iris in the first London performance of Mascagni's opera). She returned there in 1925 and 1926, and from 1928 to 1930, but sang mostly in Italy at the leading theatres, including La Scala (1922–4). Vocal and other physical problems led to her retirement in 1930. Her voice was pure and colourful, naturally suited to the gentle and sentimental, but also passionate, music of Puccini's heroines. A fine actress, she was outstanding as Manon, Cio-Cio-San and also as Madeleine in *Andrea Chénier*.

RODOLFO CELLETTI/VALERIA PREGLIASCO GUALERZI

Sheridan, Richard Brinsley (*b* Dublin, 30 Oct 1751; *d* London, 7 July 1816). Irish playwright, politician, theatre owner-manager and opera impresario active in England. A major figure in the House of Commons for over 30 years, much of the time effectively as leader of the opposition, Sheridan is chiefly remembered as a playwright, author of *The Rivals* (1775) and *The School for Scandal* (1777). He was also successful in English opera: *The Duenna* (1775), with music composed and arranged by his father-in-law Thomas Linley (i), was so popular that Sheridan delayed its publication for nearly 20 years to prevent pirating. With his permission, however, *The Duenna* was translated into an Italian opera, *La governante* (1779), by Carlo Francesco Badini and set by Francesco Bertoni. Later settings of the play include those by Sergey Prokofiev (1946), Roberto Gerhard (1949) and T.N. Khrennikov (1983).

Sheridan's lifelong ambition, which was unfulfilled, was to control the London patent theatres. He bought Garrick's interest in Drury Lane in 1776, but the most coveted prize was the King's Theatre in the Haymarket, the Italian opera house. In January 1778 he and Thomas Harris (principal owner and manager of Covent Garden, the other patent theatre) agreed to purchase a majority interest in the Haymarket. They completed the transaction on borrowed money, saddling the theatre with mounting debts from which it never recovered. Unfamiliar with the world of Italian opera, Sheridan appointed Antoine Le Texier to run the artistic side of the company. In 1781 he brought the later notorious William Taylor into the company as comptroller, which exacerbated its financial problems. By then Sheridan was deeply involved in the day-to-day running of the theatre, but at the end of the 1780–81 season he handed over his interest in the opera house to Taylor, whose even less competent management soon led to the theatre's bankruptcy. The playwright had no further involvement with Italian opera until 1791–2 when, as co-proprietor of Drury Lane and a man of

considerable political and social influence, he helped arrange the so-called Opera Settlement whereby Italian opera was re-established at the new Haymarket theatre after the Pantheon opera house fire of January 1792. Sheridan's actual connection with opera was brief, but the ruinous debts with which he saddled the King's Theatre were to have a disastrous effect on opera in London for fully 60 years.

CURTIS PRICE

Sheriff, Noam (*b* Tel-Aviv, 7 Jan 1935). Israeli composer and conductor. He studied philosophy at the Hebrew University, Jerusalem (1955–9). He started his musical training with Ze'ev Priel (conducting and piano), Horst Salomon (horn) and Paul Ben Haim (composition, 1949–57). He attended a conducting course with Markevitch in Salzburg (1955) and studied composition with Blacher at the Berlin Musikhochschule (1959–62). From 1972 to 1982 he was music director of the Kibbutz Chamber Orchestra. He taught at the Cologne Musikhochschule (1983–6) and was music advisor to the Israel Festival (1985–8). He was music director of the newly founded Israel SO from 1989 to 95, during which time he became the first Israeli conductor to include works by Richard Strauss in public concerts. He taught conducting and composition at the Rubin Academy in Jerusalem (1986–9) and from 1990 taught at the Rubin Academy in Tel-Aviv (director from 1998).

Sheriff's style is a synthesis of East and West, using a largely atonal idiom. His first major composition, *Akdamot le'moed* (1957), won the 'Sol Yurok' prize and was performed by the Israel PO under Bernstein at the opening of the Mann Auditorium in Tel-Aviv. In some of his works Sheriff used traditional models: the 'Folia' Variations (1984) are a set of eight variations with prologue and epilogue, and the 'Folia' theme can be heard in the fourth variation. *Akeda* (1997), written in memory of Prime Minister Yizhak Rabin, is an orchestral work built over a passacaglia theme. Among his chamber works *Trey-Assar* (1978) was written for the 12 cellists of the Berlin PO. His Violin Concerto (1986) combines Western and non-Western, mostly folk-like, elements such as Russian folk and Yemenite Jewish music. In the 1980s and 1990s he wrote a trilogy of vocal works which, like several of his other pieces written at that time, use several Jewish sources: *Mechye Hametim* (1985) combines Jewish prayer melodies and hymns, Yiddish folksongs and original material to address the theme of the Holocaust and the revival of the Jews in Israel. The *Sephardic Passion*, first performed in Toledo in 1992 with the Israel PO under Zubin Mehta with Placido Domingo singing the tenor solo, relates the story of the Jewish community in 15th-century Spain. The *Psalms of Jerusalem* (1995), sung in Hebrew and Latin, are scored for four choirs and percussion groups placed at the four corners of the concert hall, the orchestra and audience being located in the middle.

WORKS
(*selective list*)

Vocal: Ashrei, A, fl, hp, tom-toms, 1961; Mechye Hametim [Revival of the Dead], T, Bar, boys' chorus, male chorus, orch, 1985; A Sephardic Passion, T, A, chorus, orch, 1992; Psalms of Jerusalem, T, B, 4 choruses, orch, 1995; Wenn das Pendel der Liebe schwingt, A, chbr orch, 1996; Bereshit [Genesis], vv, children's chorus, orch, 1998

MIRI GERSTEL

Sherley [Sherlie], **Joseph.** *See* SHIRLEY, JOSEPH.

Sherman, Richard M. (*b* New York, 12 June 1928). American popular songwriter. He is known for his collaborations with his brother Robert B. Sherman (*b* New York, 19 Dec 1925). Their father was the songwriter Al Sherman. In the 1950s they wrote the hit song *You're sixteen* for Johnny Burnette and songs for Annette Funicello, which gained them the attention of Walt Disney, for whom they subsequently wrote the songs for the film *The Parent Trap* (1961). From the early 1960s, as staff writers for Disney, they contributed songs to films including *The Sword in the Stone* (1963), which began a long-term association with the feature-length animated film. In the same year they wrote *It's a small world* for the 1964 World's Fair, a song which has subsequently become identified world-wide with the Disneyland concept. They went on to contribute the now classic score to *Mary Poppins* (1964), with such numbers as 'Supercalafragelisticexpialidotious', 'Feed the birds' and 'A spoonful of sugar'. Their later Disney scores to wholly animated films include *The Jungle Book* (1967; 'I wanna be like you'), *The Aristocats* (1970; 'Everybody want to be a cat') and *Bedknobs and Broomsticks* ('The beautiful briny'). Their song score for *Chitty Chitty Bang Bang* (1968) illustrates their consistent ability to provide contrasting memorable songs encompassing the rousing theme ('Chitty Chitty Bang Bang'), the sentimental ballad ('Hushabye Mountain'), the vigorous dance number ('Me old bamboo') and the swaggering march ('P.O.S.H.'). Other film scores include *Charlotte's Webb* (1972) and the Cinderella remake, *The Slipper and the Rose* (1976). They also wrote for the stage with *Over Here* (1970), a World War II tribute show that included the remaining two Andrews Sisters (Maxene and Patti), and the unsuccessful musical *Stage Door Charley* (1995). Sherman, Robert B. *See* SHERMAN, RICHARD M.

Sherwood, Percy (*b* Dresden, 23 May 1866; *d* London, June 1939). Anglo-German composer and pianist. His father, John Sherwood, was an English university lecturer in Dresden, and his mother, Auguste Koch, was a German singer. Percy Sherwood studied piano and composition at the Dresden Conservatory (1885–8) with Felix Draeseke and Theodor Kirchner, and in 1889 he was awarded the Mendelssohn prize with a Requiem for solo voices and orchestra. He was appointed a teacher at the Dresden Conservatory in 1893, and professor in 1911. He made a name for himself as both a pianist and a composer in Germany, but subsequently moved to London.

Sherwood's compositions include five symphonies, and several concertos, including two apiece for piano, violin (one of which was dedicated to Marie Hall) and cello. He also wrote a considerable amount of chamber music. The majority of his published works appeared in Germany; they contain a large proportion of small-scale character-pieces for piano, although he is better represented by two substantial cello sonatas. His music belongs to the classical German tradition, with a Brahmsian majesty and warmth. A collection of about 40 autograph manuscripts by Sherwood (also copyist's full scores of his Requiem and Piano Quintet) has recently been deposited in the Bodleian Library, Oxford, allowing a reassessment of his work.

WORKS

many MSS in GB-Ob

Vocal: Requiem, S, A, T, B, chorus, orch, 1889; Sechs Lieder, op.2 (Dresden, 1893); 5 Songs from the Golden Treasury, op.16 (Boston, 1908); Elfin Song, op.17 (Boston, 1908)

Orch: 5 syms. [nos. 4 and 5 lost]; 2 serenades; 2 suites; 2 pf concs.; 2 vn concs.; 2 vc concs.; conc. for vn, vc

Chbr: Sonata, vc, pf, no.1, op.10 (Leipzig, 1898); Trio, pf, ob, hn, 1901; Pf Qnt, 1907; Sonata, vc, pf, no.2, op.15 (Hanover, 1908); 3 sonatas, vn, pf, incl. no.1, c, op.12 (Berlin, 1912); Suite, 2 vn, op.23 (Leipzig, 1913); Sextet, pf, hn, str; 6 str qts [4 lost]; Sonata, C, va, pf; 5 Kleinestücke, vc, pf

Pf: 10 Miniaturen für das Klavier, op.1 (Dresden, 1892); Walzer, op.3 (Dresden, 1894); 3 Romanzen, op.11 (Berlin, *c*1899); Humoresken, op.20 (Berlin, 1900); Nachgesang und Nachtstück, op.21 (Berlin, 1900); Sonata, c, 2 pf, 1901; 2 Sonatine, op.22 (Leipzig, 1913); other pieces, unpubd

RICHARD PLATT

Sheryngham (*fl c*1500). English composer. Two pieces by him appear in the Fayrfax manuscript (*GB-Lbl* Add.5465), an important collection of early Tudor partsongs: *My wofull hart* for two voices, and *A gentill Jhesu* for four. The verses of *A gentill Jhesu* have been attributed to Lydgate; in this setting the poem has been made into a carol by the addition of a burden, probably by Sheryngham himself. Burney included a transcription of *My wofull hart* in his *General History of Music*. Both are edited in MB, xxxvi (1975).

Shibata, Minao (*b* Tokyo, 29 Sept 1916; *d* Tokyo, 2 Feb 1996). Japanese composer. He graduated in botany (1939) and aesthetics (1943) from Tokyo University, concurrently taking private composition lessons from Saburō Moroi and working as a cellist in the Tokyo String Orchestra (1939–41). In 1946 he founded the Shinsei Kai with Irino and Toda. His works of this period are in the main for chamber ensemble, piano or vocal forces, their style developed from German Romanticism with formal structures such as the fugue and the sonata. *Koten kumikyoku* for violin and piano, for example, is modelled on the Baroque suite, while the *Magnificat* for five-part chorus and organ (1951) has passages of modal quasi-Renaissance polyphony. In the early 1950s, however, he became interested in 12-note serialism and also made some essays in *musique concrète*. His serial music combines the strictly wrought construction of Webern with the dramatic intensity of Schoenberg; a good example is the pair of songs, written in 1954, to poems of Katsue Kitazono, *Kigō-setsu* and *Kuroi shōzō*, for soprano and large instrumental ensemble including xylophone, vibraphone, marimba and percussion (for which the writing is particularly lively); a third song, *Kuroi kyori*, was added in 1958. Shibata's keen interest in instrumental sonorities is further illustrated by the 12-note Sinfonia (1960), where special emphasis is laid on the triple brass and large percussion ensemble. He taught music theory at the Tōhō Gakuen School of Music (1948–55), at Ochanomizu Women's College (1952–9) and, as professor, at the Tokyo National University of Fine Arts and Music from 1959 until 1969, when he retired to concentrate on composition and writing.

Shibata's works from between 1963 and 1973 often make use of aleatory and other avant-garde techniques. A typical example is *Zō* for marimba, written in 1969 for the virtuoso Keiko Abe and consisting of four phrases which may be played in any order; one is in graphic notation and another requires a 'cluster mallet' for which the notation is only approximate. The *Hachi-kan kyōsō* (1971), composed for Ririko Hayashi and her pupils, is scored for eight flutes, four of them tuned down a quarter-tone; at one point in the performance three players leave to play offstage and three others begin a piece for recorders chosen from the 17th or 18th century. *Kadensho* (1971), based on texts from the famous 15th-century nō treatise and composed for six solo voices and six choral groups, is again partly in graphic notation and requires a fair amount of improvisation. His *Consort* for orchestra, considered his masterpiece, in which he successfully synthesized a variety of European techniques, won an Otaka Prize in 1973.

A turning-point in Shibata's creative activity came with *Oiwake-bushi kō* (1973), the first of a new genre called by the composer 'theatre pieces'. In this work, a celebrated folktune is presented in various versions with actions, overlapping and often freely improvised; some versions are authentic local variants, some in popular or European styles, some are performed by a solo singer, some by instruments. Somewhat akin to the *Musiktheater* of Kagel or Ligeti, Shibata's theatre pieces differ in their content and treatment, mainly deriving from traditional or folk

material. In collaboration with the choral conductor Nobuaki Tanaka he produced a series of successful theatre pieces, notably *Nenbutsu-odori* (1976) and *Uchū ni tsuite* (1979).

In the 1980s Shibata used traditional and popular music instruments to explore a variety of musical media. Among these are *Hanano irodori*, a duet for saxophone and *koto*, *Engaku*, written for gagaku, the traditional Japanese court music, and solo pieces for gamelan and glass harmonica. His songs from this period are often accompanied by a Japanese instrument or percussion, while his opera *Orufeo no shōri* is accompanied by recorders, Irish harp, maracas and Chinese gong, among other instruments, and is performed on a nō stage. Never abandoning traditional Western techniques, such works as *Mugen kōya* (1995) demonstrate his skilful application of conventional harmony and counterpoint.

An influential teacher and an eloquent writer on music, he gave occasional lectures as professor of music history at the University of the Air (1984–90). His *Seiyō ongaku-shi: inshō-ha igo* ('A history of Western music: after Impressionism') is an important outline of music from 1900 to 1960; his *Ongaku no gaikotsu no hanashi* ('A skeleton of music') demonstrates his unique method of musical analysis, with examples from Japanese folksongs and from the music of Schoenberg, Webern and Messiaen. With Tōyama he was co-editor of the Japanese edition of the New Grove (1993–5).

MASAKATA KANAZAWA

Shicoff, Neil (*b* New York, 2 June 1949). American tenor. He studied at the Juilliard School, where he sang in Virgil Thomson's *Lord Byron* (1972). In 1975, after making his professional début in Washington DC, as Narraboth (*Salome*), he sang Ernani at Cincinnati and Paco (*La vida breve*) at Santa Fe. He made his Metropolitan début in 1976 as Rinuccio, later singing the Duke of Mantua, Lensky, Massenet's Des Grieux, Werther, Hoffmann, Don Carlos, Faust and Cavaradossi (1991). Since making his Covent Garden début in 1978 as Pinkerton, he has sung Rodolfo (*La bohème*), Macduff, Alfredo, the Duke of Mantua and Hoffmann, one of his finest roles, which he has also sung in other major European houses. He has sung Werther, another favourite role, at Houston, Zürich,

Vienna and Aix-en-Provence and made his début at Chicago (1979) as Rodolfo, at San Francisco (1981) as Edgardo (*Lucia*) and at the Paris Opéra (1981) as Gounod's Romeo. His voice, at first essentially lyrical, has strengthened and darkened, enabling him to take on roles such as Don José, which he first sang at Seattle (1987) and performed at Covent Garden in 1994, Rodolfo (*Luisa Miller*) and Riccardo (*Un ballo in maschera*), which he sang at the Deutsche Oper, Berlin, in 1994. Shicoff's recordings include Macduff, the Duke of Mantua (a brilliant, debonair reading under Sinopoli) and Lensky.

RICHARD LESUEUR/ELIZABETH FORBES

Shield, William (*b* Swalwell, nr Newcastle upon Tyne, 5 March 1748; *d* London, 25 Jan 1829). English composer, viola player and song collector. As the son of a music teacher he learnt the rudiments of music early, but after the death of his father in 1757 he was apprenticed to a boat builder, Edward Davison of South (or North) Shields. He resumed musical studies with Charles Avison of Newcastle, playing the violin in local concerts. His earliest known composition, now lost, was an anthem written for the consecration of St John's, Sunderland, on 6 March 1769. About 1770, after finishing his apprenticeship, he became leader of the theatre band and conductor of the concerts first at Scarborough and then at Durham. Encouraged by Luigi Borghi, in 1772 he moved to London to play second violin at the King's Theatre, transferring to principal viola the following season. He held that position for 18 years, even after replacing Michael Arne as house composer to Covent Garden in autumn 1784. The position at Covent Garden paid him £7 a week, and he remained in it until summer 1797 (except for the 1791–2 season, when, after an altercation with the manager, he left to travel in Europe). Shield was admitted to the Society of Musicians on 4 April 1779 and was a member of the King's Music by the 1790s. He also helped found the Glee Club and the Philharmonic Society.

Shield came to public notice with *The Flitch of Bacon* (1778), which became one of the most profitable and often performed afterpieces at the Haymarket Theatre. This pasticcio typifies much of Shield's theatrical writing: of the afterpiece's 14 musical numbers, nine are by Shield, the rest being borrowed from an assortment of sources, including Italian opera, Tudor songbooks and British folksong. Shield emphasized the military slant of the libretto with appropriate rhythms that contrast nicely with the numerous pastoral and romantic pieces in 6/8, and the older borrowings reflect the traditional roots of the Dunmow flitch tradition.

Rosina (1782; fig.1), Shield's most often performed work (over 200 London performances by 1800), follows the same blend of charming original and borrowed music. As *Rosina* shows, Shield excelled in harmonizing traditional music without destroying its character. He could also write more complex, italianate arias like 'When William at eve' and 'Light as Thistledown'. Unlike some earlier comic opera composers, he did not fall into the habit of assigning traditional ballads to rustics and italianate arias to the gentry: in *Rosina*, all the principal characters sing both types of music, and the blend seemed to please audiences. According to the Covent Garden accounts, Shield received £100 for the music (not £40, as Parke claimed in his memoirs) six months after the opera opened. After Robert Burns's death a folk melody in the overture to *Rosina* (played by bassoons imitating the bagpipe) was revised and attached to Burns's poem 'Auld Lang Syne'.

Shield was greatly interested in preserving musical heritages, both in his theatrical work and in his collaborations with the antiquarian Joseph Ritson. Together they edited *Select Collection of English Songs* (London, 1783) and *Scotish Songs* (London, 1794). He incorporated in his comic operas much native folk music, which Isaac

1. Title-page of the first edition of the vocal score of Shield's 'Rosina' (London: Napier, 1783); engraving by Francesco Bartolozzi after Giovanni Battista Cipriani

Bickerstaff, the creator of comic opera in the 1760s, had regarded as a tasteless abomination. Shield's work with O'Keeffe included many works with Celtic settings that allowed for appropriate music: *Love in a Camp* (1786), *The Highland Reel* (1788), *The Lad of the Hills* (1796). *The Poor Soldier* (1783) relied on an Irish slant in the music to reflect its setting, and O'Keeffe claimed to have sung to Shield tunes that he remembered from his youth in Ireland so that they could be used in the opera (Fiske, 1973, traced the sources of many). Also, the presence of John Johnstone, a successful tenor in the Covent Garden company, no doubt encouraged Shield to write Irish parts for him. Shield could also mimic the folk idiom. For example, 'Sweet Transports' from *Rosina* makes generous use of the Scotch snap while other numbers sound like old ballads. The song in *The Farmer* (1787) about a ploughboy with social and political aspirations sounded traditional enough for Benjamin Britten to include in his *Folk-Song Arrangements*, iii (London, 1947). Other musical cultures also interested Shield: in *The Czar* (1790), a comic opera about Peter the Great's shipbuilding days in Deptford, and in *Hartford Bridge* (1792) he incorporated Russian folksongs, some obtained from Muzio Clementi, others from a Russian he met when travelling in Europe.

Covent Garden needed to keep abreast of fashions to compete with Drury Lane, and as house composer Shield provided music appealing to the latest tastes. In the early 1780s he wrote comic operas with rural settings and romantic plots, such as *Rosina*, which displayed his talents at writing what his contemporaries praised as 'sweet' music. When medievalism became fashionable he wrote operas with medieval settings such as *Robin Hood*; Shield had no doubt been influenced by Ritson's research into the ballads about Robin Hood. Some of his later gothic operas also had evocative music: *The Mysteries of the Castle* (1795) accented its Sicilian setting with the newly published tune 'Sicilian Mariners'.

Other operas made use of recent events. The pantomime *Omai* (1785) was a fantasy version of the late Captain Cook's *Voyage to the Pacific Ocean*, published the previous year. To set the mood Shield used conch-shell sounds and unusual percussion instruments, as well as the first notated sea shanty. *The Highland Reel* (1788) followed soon upon the publication of Boswell's *Journal of a Tour to the Hebrides* (1786). *The Crusade* (1790) featured 'Turkish' rhythms that capitalized on the fact that Turkey had sent its first ambassador to London that year. *The Woodman* (1791), Shield's last big success, exploited the season's rage for female archery. This work borrows some devices from the rival theatre by adding spectacular onstage rainstorms and archery contests; critics noted that music now had the primary, not the secondary, role in comic operas at Covent Garden. Shield's acquaintance Haydn saw a performance of *The Woodman* on 10 December 1791 with Elizabeth Billington in the role of Emily, and he complained about the sleepiness of the orchestra and the impertinence of the audience in the galleries. Busby claimed that Shield was paid £1000 for the score.

Although Shield experimented widely with orchestration and exotic flavours in all his music (his published string trios, for example, contain some striking movements in 5/4 time), it was the operas with large doses of middlebrow glees, strophic songs and vaudeville finales that succeeded best with Covent Garden audiences and established his fame. During the 1790s Drury Lane composers such as Stephen Storace set a more spectacular style that Shield could not, or would not, adopt; after a dispute with the manager in 1797 Shield retired from Covent Garden. He turned his talents to theoretical matters, publishing two anthology-textbooks of music: *An Introduction to Harmony* (London, 1800) and *The Rudiments of Thoroughbass* (London, 1815), which discuss such matters as how to harmonize folksongs. He also continued composing glees and songs for use in the theatre.

2. William Shield: portrait by George Dance, pencil, 1798 (National Portrait Gallery, London)

In 1817 Shield became Master of the King's Music, and in 1818 he wrote the last court ode. On his death he left his viola to George IV and his library to his wife, Ann Stokes Shield. He was buried in the south cloister of Westminster Abbey.

LINDA TROOST

Shields, Hugh (*b* Belfast, 8 Sept 1929). Irish folksong collector. He studied languages at Trinity College, Dublin (1948–52), where he took the doctorate in 1966; he was appointed senior lecturer (1967) and subsequently fellow at Trinity (1980), and retired in 1994. Although he received no formal tuition in music, Shields has studied oral traditions, particularly traditional singing in Ulster, for over 40 years; this activity is coupled with his research on medieval manuscripts. A prolific writer on Irish and French traditional folk music, he has also worked as broadcaster and critic and he co-founded the Folk Music Society of Ireland in 1971.

PATRICK F. DEVINE

Shifrin, Seymour (*b* New York, 28 Feb 1926; *d* Boston, 26 Sept 1979). American composer and teacher. He began music studies at the age of six and later attended the High School of Music and Art in New York; the high quality of his work there prompted Schuman to offer him a scholarship for private study (1942–5). He received a BA (1947) and an MA in composition (1949) at Columbia University where he studied primarily with Luening. During the academic year 1949–50 he served as lecturer at Columbia and the following year filled a similar post at the City College, CUNY. On a Fulbright scholarship in 1951–2 he studied in Paris with Milhaud. He taught at the University of California, Berkeley (1952–66), and then joined the faculty at Brandeis University, where he remained until his death. Among his many awards were two Guggenheim Fellowships (1956, 1960), a Bearns Prize (1949), a Mark Horblit Prize from the Boston SO (1963) and grants from the National Institute of Arts and Letters (1957), the Koussevitzky Foundation (1965) and the NEA (1978).

During the 1950s Shifrin was associated with a small group of composers in New York, including Babbitt, Perle and Monod, who were deeply involved with the Second Viennese School. Yet Shifrin's music from this time is loosely tonal. The truncated phrases of the *Serenade* (1954) and the nervous interjections of the *Lament for Oedipus* (the first movement of the *Cantata to Sophoclean Choruses*, 1957–8) would become characteristic. The latter work, in which a 19th-century sensibility animates a 20th-century language, is perhaps the most remarkable of this period.

Shifrin reached a turning-point in his career with the composition of *Satires of Circumstance* (1964), a setting of three poems by Thomas Hardy. From then on he commanded a rhetoric of great originality, characterized by subtle and complex phrasing. Apparent irreconcilables are frequently interlinked – long lyrical lines with fragmentary interjections, metrical regularity with rhythmic dislocation – and tonal references are abandoned in favour of more unpredictable harmonies. However, these in fact serve to shape phrases and harmonic plans do emerge: *In eius memoriam* (1967–8) explores the notion of pitch circularity whereby each phrase turns back to its beginning, and *Responses* (1975), a short piece for piano, is governed by the gradual unfolding of the circle of 5ths. But even in these pieces compositional details are free from prior constraints.

Shifrin usually avoided repeating patterns or static elements, but towards the end of his career he came to feel that his complex and restless style could accommodate literal repetition. His *Five Last Songs* (1979), written while he was very ill, show no loss of intensity; the harmonic language has a density and richness akin to the early music of Schoenberg.

WORKS

INSTRUMENTAL

CHARLES H. KAUFMAN/MARTIN BOYKAN

Shift. The movement of the left hand from one position to another on the fingerboard of any string instrument. Although terms for shifting did not appear until the early 18th century, Ganassi, in his *Regola rubertina* (1542–3), a treatise for viol players, had already referred to playing beyond the frets. He gave fingerings indicating two types of shift: 1-2-1-2-, necessitating numerous small hand motions, and 1-2-3-4-1-2-3-4, requiring fewer large hand motions.

The 17th-century violin compositions of Marini, Biber, J.J. Walther and Marco Uccellini require, variously, the 3rd to 7th positions, particularly on the E string, and in double-stopped passages. In his *Violinschule* (1756) Leopold Mozart gave three reasons for changing positions: necessity, convenience and elegance. He advocated that the violin be held with the chin to facilitate playing in high positions. (*See* VIOLIN, §I, 4(iii)(b).)

In the 18th century the two composer-performers who brought playing in the high positions on all strings to a peak unsurpassed even in our time were Pietro Locatelli and Paganini. Locatelli's *Capricci*, probably written as cadenzas to *L'arte del violino: XII concerti* (1733), are as fiercely difficult, in terms of shifting to high positions, as Paganini's famous 24 Caprices op.1 (Milan, 1820). The 19th-century treatises for violin and cello treat shifting and playing in high positions as a matter of course. Modern string playing has tended to free itself from the convention of dividing the fingerboard into clear positions and makes extensive use of shifting by extension.

On plucked instsruments such as the lute and the guitar, shifting is essential when the instruments are used soloistically.

See also FINGERING, §II; POSITION; and SLIDE (2).

SONYA MONOSOFF

Shigayev, Dauletkerei (*b* 1820; *d* 1887). Kazakh *dömbra* player, composer of *kyui* and singer. He was descended from khans and sultans of the Junior *juz* (horde). His father Shigai, a ruler of the Bukeyev horde, died when Shigayev was six years old, and Shigayev was brought up in the family of his cousin M. Bukeikhanov, a hereditary sultan who had had a European education. Shigaev later became the ruler of the Nogai *taipa* (clan). He travelled extensively, met many famous musicians, attended the coronation of Tsar Aleksandr II in St Petersburg in 1885 and became acquainted with Russian culture.

His creative life may be divided into three stages. During the 1840s and 50s he created melodic *kyui* such as *Kyz Akjelen* ('Akjelen the Maid'), *Kos alka* ('Double Necklace'), *Jeldirme* ('Gallop of a Speedy Horse'), *Kos shek* ('Two Strings') and *Kudasha* ('Sister-in-Law'). During the 1860s and 70s he varied the themes of his *kyui*; works from this period include *Bulbul* ('Nightingale'), created during a famous meeting with the *kyui* singer Kurmangazy Saghyrbayev, and *Salyk olgen* ('On the Death of Salyk'), a mourning *kyui* composed following the untimely death of his beloved nephew Salyk Babajanov. The last period of Shigayev's creative life was marked by the creation of philosophical works such as *Zhiger* ('Strive' or 'Energy'), *Korogly* and *Tartys kyui* ('Kyui Contest'). Part of the composer Gaziza Zhubanova's 'Zhiger' Symphony was based on Shigayev's *kyui* of that name. Shigayev was one of the most distinguished representatives of the *dömbra* tradition of western Kazakhstan.

ALMA KUNANBAYEVA

Shilkret, Nat(haniel) [Schüldkraut, Naftule] (*b* Queens, NY, 25 Dec 1889; *d* Long Island, NY, 18 Feb 1982). American conductor, composer and arranger. Details of his education are obscure, though an honorary doctorate was awarded by Bethany College (Kansas) in 1935. Pietro Floridia was his principal teacher of composition and orchestration. A fine clarinettist, Shilkret played with the Russian SO, as well as New York's SO, PO and Metropolitan Opera orchestra. He also performed in bands led by Sousa, Pryor and Goldman. Freelance recording engagements led to employment at the Victor Talking Machine Corporation (later RCA Victor) before

1920. He is best known for his work at Victor where, as Director of Light Music, he conducted recordings by his Victor Salon Orchestra and other ensembles, of which dozens were bestsellers in the 1920s and 30s. While most of his recordings were of a popular or light-classical nature, he also provided orchestral accompaniments for the singers Bori, Crooks, Gigli, Garden and McCormack. His conducting activities in New York included thousands of network radio broadcasts. He also wrote several popular songs, the most successful of which, *The Lonesome Road*, was inexplicably included in the first filmed version of *Show Boat* (1929).

A longtime associate of Gershwin and Paul Whiteman, Shilkret conducted the 1927 electrical recording, credited to Whiteman, of *Rhapsody in Blue*. He was chosen to conduct *An American in Paris* in its first broadcast, first recording and at the 1937 Gershwin Memorial Concert in Los Angeles. Though he retained ties to RCA, Shilkret moved to Hollywood in 1935, working principally at RKO and MGM. Among his several dozen films as composer, arranger or musical director are *The Bohemian Girl*, *Mary of Scotland* and Kern's *Swing Time* (all 1936), and Gershwin's *Shall We Dance* (1937). Though his concert works have not proven durable, he attracted considerable attention with several of his first performances, such as his Concerto for Trombone for Tommy Dorsey. He commissioned fellow Californians Schoenberg, Stravinsky, Milhaud, Toch, Tansman and Castelnuovo-Tedesco to provide a movement each for the biblical *Genesis Suite*, including also his own 'Creation' segment. Shilkret remained professionally active into the 1950s, conducting several light-classical LPs and serving as the musical director for Kay Swift's musical *Paris '90* (1952).

WORKS

Orch: Skyward, sym. poem, 1928; Christmas Ov, chorus, orch (1930s); Trbn Conc., 1942; Jealous Ballerina (1940s), Genesis Suite, narrator, orch, 1945 [collab. Castelnuovo-Tedesco, Milhaud, Schoenberg, Stravinsky, Toch and Tansman]; Firefly Scherzo; Seasons, 4 tone poems; other descriptive pieces

Chbr: Southern Humoresque, vn; Jealous Ballerina, vn, pf; Plantation Dance, vn, pf; Cl Qnt (1930s); Humoreske, 3 vn, va, vc, bn, timp, harp/pf

Many film scores, popular songs and arrangements

GEORGE J. FERENCZ

Shiloah, Amnon (*b* Lanus, Argentina, 28 Sept 1928). Israeli musicologist. Of Syrian-Jewish origin, he emigrated to Palestine in 1941 and devoted himself first to a career as a flautist. Studies with Uri Toeplitz at the Rubin Academy of Music, Jerusalem (1952–4), and at the Paris Conservatoire (1954–5) were followed by a position in the Israel Broadcasting SO (1958–60). Formal ethnomusicological studies took place in Jerusalem (Hebrew University, MA 1960, Hebrew and Arabic literature and biblical studies) and Paris (Sorbonne, PhD 1963, musicology and oriental sciences). After heading the folklore department of the Israel Broadcasting Authority (1965–9), he joined the musicology department at the Hebrew University, where he taught throughout the remainder of his career (senior lecturer, 1969–71; department chair 1971–4; associate professor, 1971–8; professor, 1978–96; emeritus professor, 1996). Important administrative posts at the Hebrew University (director of the Jewish Music Research Center, 1969–71; head of the Institute of Languages, Literatures and Arts, 1980–84) were mixed with distinguished visiting positions, especially in the USA (University of Illinois, 1968 and 1974; University of Louisville, 1979–80). In 1986 he received the Jerusalem Prize, and in 1995 the Prix des Muses.

Shiloah devoted his early scholarly activities to the study of Arab music theory and to fieldwork in the Jewish and Arab communities of the Middle East. Using philological and ethnographic comparison, he was particularly interested in documenting musical processes that crossed ethnic, linguistic and religious boundaries. His translations of individual treatises and compendia of Arab writings devoted to music provide the foundation for the history of music in the Middle East from the early Middle Ages up to the present. His recordings of folk and traditional musics (especially for UNESCO and Folkways projects) gather examples from throughout the Mediterranean and document processes of change and migration in the 20th century, especially the emigration to Israel of Jewish ethnic communities in the second half of the 20th century.

Shiloah's broad knowledge of Arab music theory led him to open new avenues of inquiry into the music cultures of Sephardi and Eastern Jewish communities, whose vernaculars were Arabic or dialects thereof. He has increasingly turned attention toward the diverse multiculturalism displayed by Israel's ethnic communities, producing seminal works on contemporary popular and religious musics. During the 1990s several important volumes that surveyed the entire field of Jewish music, its history and its methodologies appeared in Israel, France, Britain and the USA.

PHILIP V. BOHLMAN

Shimizu, Osamu (*b* Osaka, 4 Nov 1911; *d* Tokyo, 29 Oct 1986). Japanese composer. His father was a gagaku player, and so he was encouraged to study traditional Japanese music, including gagaku, Buddhist music, nō music and koto playing. At the same time he acquired considerable skills in European music theory and composition under Hashimoto at the Tokyo Music School (1936–9). In his graduation year he composed the *Hana ni yosetaru buyō kumikyoku* for orchestra, which won a prize at the 1939 Mainichi Music Competition. He wrote few orchestral works after then, proving far more successful and prolific in vocal genres, particularly choral music and song. Essentially his songs take up the lied tradition, but with characteristically Japanese elements in texture, melodic phrase and mood; some of them have been stimulated by the ideas and music of Buddhism. Shimizu's choral pieces are among the most frequently performed Japanese works, a position they owe probably to their memorable melodies, smooth harmony, familiar subjects (legendary or romantic) and generally popular character; most successful of all has been *Yama ni inoru* for reciter, male chorus and orchestra (1960), which is concerned with the emotional reactions of a mother who has lost her son in the mountains. After World War II Shimizu became more interested in dramatic music, composing several operas, of which *Shuzenji monogatari* has been one of the more successful in postwar Japan. In 1961 he composed the *Three esquisses* for three koto, after which he has written steadily for Japanese instruments, renewing his interest in gagaku in *Taihei-raku* for orchestra, based on the gagaku piece of the same name, and *Kan'yō-raku* for gagaku ensemble.

WORKS
(*selective list*)

DRAMATIC

operas

Shuzenji monogatari [Tale of Shuzenji] (1, Kidō Okamoto); Osaka, Asahi-za, 4 Nov 1954 (Tokyo, 1962)
Sero-hiki no Gōshu [Gōshu the Cellist] (1, K. Miyazawa); Tokyo, Nihon Seinen-kan, 11 Oct 1957
Utai gaikotsu [The Singing Skeleton] (chbr op, 1, Kazuhiko Okamoto); Tokyo, NHK, 26 Nov 1961; stage, Tokyo, Metropolitan Festival Hall, 15 March 1962 [pt 3 of Mittsuno mukashiko (Three Old Tales); pt 1 by Moroi; pt 2 by Irino]
Shunkan (1, Shimizu and Kazuhiko Okamoto, after a kabuki play); Tokyo, Metropolitan Festival Hall, 9 March 1965
Muko erabi [The Marriage Contest] (1, Kazuhiko Okamoto); Riverside, CA, University, 3 Oct 1968
Daibuisu kaigan [The Great Image of Buddha] (3, H. Nagata), Tokyo, Nissei, 2 Oct 1970
Ikutagawa [The Ikuta River] (chbr op, 1, Kazuhiko Okamoto, after O. Mori); Tokyo, Metropolitan Festival Hall, Small Hall, 10 Nov 1971
Yokobue [The Flute] (mono-op, 1, Kazuhiko Okamoto, after C. Takayama); Tokyo, Yūbin-chokin Hall, 15 June 1973
Kicchomu shōten [The Assumption of Kicchomu] (2, H. Sakata); Ōita, Kenmin Opera, 1 Oct 1973
Shishi-odori no hajimari [The Origin of the Deer Dance] (1, H. Terasaki, after K. Miyazawa); Yūbin-chokin Hall, 4 Oct 1978

ballets

No no hi [Fire in the Field], orch, 1962; Ai no shishō [Love-poems], Jap. insts, str, 1966

MASAKATA KANAZAWA

Shimmy. A dance characterized by rapid shaking of the shoulders and torso. It rose to national and international popularity in the 1910s and early 1920s. It was also known as 'shaking the shimmy' or 'shaking the chemise', and its name probably originated from 'chemise'. The first documented reference to the dance occurs in Spencer Williams's song *Shim-Me-Sha-Wabble*, published in Chicago in 1916. After observing the dance in a Chicago south-side black American nightclub around the same time, Mae West, and other entertainers who included Bee Palmer and Gilda Gray, disseminated the dance

nationally. By 1919 it was being featured in numerous Broadway and vaudeville acts, and Tin Pan Alley responded with dozens of songs such as A.J. Piron's *I wish I could shimmy like my sister Kate* and Irving Berlin's *You cannot make your shimmy shake on tea*. The dance was for a time closely associated with the new jazz music of the late 1910s. Song lyrics linked the two, and entertainers such as Bee Palmer shimmied to the accompaniment of jazz bands. Gilda Gray brought the dance to its widest national attention in 1922 through her performance in the Ziegfeld Follies. Although widely performed as an exhibition dance by female performers, the shimmy also appeared as a social dance in the USA and Europe during the 1920s as a variation of the foxtrot or one-step. The dance was widely criticized and banned by conservatives troubled by its overt sexual character.

REBECCA BRYANT

Shingli tunes. A genre of liturgical music based on folk melodies performed by the Jews of Cochin, India. *See* JEWISH MUSIC, §III, 8(v).

Shinohara, Makoto (*b* Osaka, 10 Dec 1931). Japanese composer, active in the Netherlands. After studying composition with Ikenouchi at the Tokyo University of Fine Arts and Music, graduating in 1954, he studied in Cologne with B.A. Zimmermann and Michael Koenig at the Hochschule für Musik and with Stockhausen at the Conservatory. He was appointed scientific researcher at the Institute of Sonology in Utrecht (1965–6, 1978), and was visiting professor of Japanese and electronic music at McGill University, Montreal. His commissions include *Obsession* (for the National Conservatory of France, 1960), *Liberation* (for Iranian National Radio, 1977) and *Cooperation* (for the Koussevitzky Music Foundation, 1990); his music has been featured at international music festivals in the Netherlands, Japan, Germany, Poland, Austria and the United States.

While his earliest influences arose from his research into sonology and his interest in the music of Bartók, Stravinsky and Messiaen, in the early 1970s he began to explore new methods of combining Western and traditional Japanese musics to minimize their differences and allow for harmonious existence. He is best known for his versatile experimentation with Western acoustic and electronic music and Japanese traditional music (*KdG*, Y. Sawabe).

JUDITH ANN HERD

Shiomi, Mieko [Chieko] (*b* Okayama, 13 Dec 1938). Japanese composer and performance artist. She studied music theory and composition with Shibata and Hasegawa and the piano with Koji Taku at the Tokyo National University of Fine Arts and Music, graduating in musicology in 1961. In 1961 she began to work exclusively as a freelance composer and performer, founding Group-Ongaku, an experimental ensemble focussing on improvisation, taped music and events, with Kosugi and Mizuno. In 1963 Nam June Paik introduced her to Fluxus, and, with the encouragement of George Maciunas, she went to New York to participate in the movement from 1964 to 1965. Most of her works before 1977 are event pieces such as *Direction Music* (1964), in which ten participants pull strings attached to a performer's fingers, or the series of international mail events published as *Spatial Poem* (1965–75). In later, notated compositions Shiomi continued to produce intermedia and theatrical works. In *If we were a Pentagonal Memory Device* (1979) each singer focusses on a single vowel sound, while madrigalian sections and block chords contrast with polyphonic treatment of the timbres of spoken and sung words. During the 1990s Shiomi developed several of her event pieces into musical works. Artistic collaboration has continued throughout her career, recently including a computer musician in *Billiards on the Grand Piano* (1991) and a glass artist for *The Twelve Embryos of Music* (1995). Shiomi's perception of natural phenomena informs her preference for free rhythm and loose structure and provides a source of inspiration for such compositions as her series linked with eclipses and with fractal theory.

WORKS

J. MICHELE EDWARDS

Shirai, Mitsuko (*b* Tokyo, 28 May 1949). Japanese mezzo-soprano. After training in Tokyo and Stuttgart, she took prizes in competitions at Vienna, Zwickau, 's-Hertogenbosch and Munich between 1973 and 1976. She made her recital début at Tokyo in 1975, her European début at Amsterdam the following year and her US début at Carnegie Hall in 1985. In 1973 Shirai formed a duo with the pianist Hartmut Höll, who became her husband. The pair have toured extensively, performing repertory from Scarlatti to the complete vocal works of Webern, and have given masterclasses in Europe, the USA and Israel. Shirai has made occasional excursions into opera, including an admired Despina at Frankfurt in 1987, and has appeared in concert versions of *Lucio Silla*, Wagner's *Das Liebesverbot* and Dukas's *Ariane et Barbe-bleue*. In 1982 she was appointed professor of singing at the Staatliche Hochschule für Musik in Stuttgart. She has shown herself a sensitive interpreter with an expressive voice and an intelligent ear for verbal nuance in a wide variety of lieder recordings, with special emphasis on Schumann and Wolf.

ALAN BLYTH

Shire, David (Lee) (*b* Buffalo, NY, 3 July 1937). American composer and lyricist. He learnt the piano and played in his father's dance band in Buffalo, then studied music at Yale (BA 1959) and Brandeis University. He collaborated with the lyricist and fellow Yale student Richard Maltby jr (*b* Ripon, WI, 6 Oct 1937) on songs for the Broadway musical *The Sap of Life* (1961). He played the piano in the orchestra for *Funny Girl* on Broadway, beginning an association with Barbra Streisand who recorded Maltby and Shire's *Autumn* and *No more songs for me*; Shire became an assistant arranger and conductor and an accompanist to Streisand. After some successful television work he moved to Hollywood (1969) and has written or contributed to many film scores, winning an Academy Award for the song 'It goes like it goes' (lyrics by N. Gimbel) from the film *Norma Rae* (1979); he also adapted music for the hugely successful *Saturday Night Fever* (1977). Further music for television includes the score for the mini-series *The Kennedys of Massachusetts*, which was nominated for an Emmy Award (1990).

Shire has a malleable style that can encapsulate simply a defining mood and so is well-suited to the demands of film and television scoring. This is shown in his musical theatre work through the creation of individually satisfying musical numbers, drawing mainly on light pop and jazz idioms, that underpin the strong, self-contained narratives of the lyrics by his regular partner, Richard Maltby jr. Consequently their greatest successes have been in shows that use a revue format, particularly *Baby* (1983) and *Closer than Ever* (1989). Shire's eclectic style and ability to write concise and memorable tunes is shown in the former through the infectious funk of 'Fatherhood Blues', and in the latter through the sophisticated jazz inflections of 'Miss Byrd', the rock influence of 'What am I doin'?' and the lyricism of the poignant ballad 'Life Story'. A revue, *The Story Goes On: the Music of Maltby and Shire*, was presented in New York (1998).

WORKS

JOHN SNELSON

Shirelles, the. American popular vocal group. Led by Shirley Owens (*b* Passaic, NJ, 10 June 1941), the group was formed as the Poquellos at Passaic high school in 1957, and included Addie 'Micki' Harris (*b* Passaic, NJ, 22 Jan 1940; *d* Los Angeles, 10 June 1982), Doris Coley Kenner (*b* Passaic, NJ, 2 Aug 1941; *d* Sacramento, 4 Feb 2000) and Beverley Lee (*b* Passaic, NJ, 3 Aug 1941). The following year, as the Shirelles, they recorded their own composition *I Met Him on a Sunday* for the small record label Tiara, owned by the mother of a classmate. The song was a minor hit, but the group scored a major

success with Carole King and Gerry Goffin's *Will You Still Love Me Tomorrow* (1961). Although the group considered the plangent ballad 'too white' for their rhythm and blues style, the song became a number one hit in the USA. It was followed by further hit singles in *Soldier Boy*, *Baby It's You* and *Dedicated to the One I Love*. The group disbanded in 1976 but later re-formed to appear at 1950s nostalgia concerts.

DAVE LAING

Shirley, George (Irving) (*b* Indianapolis, IN, 18 April 1934). American tenor. He studied in Washington and New York, making his stage début in 1959 as Eisenstein at Woodstock, New York. In 1960 he sang Rodolfo at the Teatro Nuovo, Milan, and in 1961 made his New York City Opera and San Francisco débuts in the same role. At Spoleto he sang Herod (1961) and Don José (1962). In 1961 he also sang in Verdi's *Aroldo* (New York) and made his Metropolitan début as Ferrando; later roles there included Don Ottavio, Alfredo, Pinkerton, Romeo and Almaviva. At Santa Fe he sang Alwa in *Lulu* (1963), then Apollo in *Daphne* (1964) and Leandro in Henze's *König Hirsch* (1965), both American premières. Shirley made his British début at Glyndebourne in 1966 as Tamino, then sang Idomeneus (a role he recorded to acclaim) and Percy (*Anna Bolena*) there. Having made his Covent Garden début in 1967 as Don Ottavio, he returned for David (*Die Meistersinger*), Pelléas and Loge (an unusually sharp study, scornful and cynical), which he repeated in Berlin (1984). He created Romilayu in Kirchner's *Lily* (1977, New York City Opera). He had an individual, bright-toned voice of considerable dramatic power and acted intelligently.

ALAN BLYTH

Shirley, James (*b* London, bap. 7 Sept 1596; *d* London, bur. 29 Oct 1666). English dramatist. After spending three years as headmaster at St Albans Grammar School he settled in London in 1625 and became a playwright, producing 36 plays before 1642 when the theatres closed because of the Civil War. In 1634 he provided the text for an elaborate masque, *The Triumph of Peace* (set by William Lawes and Simon Ives), which was staged by the Inns of Court as a demonstration of their loyalty to the crown at Whitehall on 3 February 1634 and was repeated by royal request in the Merchants' Hall eight days later (ed. M. Lefkowitz, *Trois masques à la cour de Charles Ier d'Angleterre*, Paris, 1970). It consisted of a series of loosely related spectacular scenes and marks a decline in the masque form. Many details of the performance are preserved in the papers of Bulstrode Whitelocke and the Middle Temple archives.

Shirley fought for the Royalists from 1642 to 1644, when he reverted to school teaching. His last dramatic works were designed for school performance. These included two masques: *The Triumph of Beautie* (published in 1646 and set, at least in part, by William Lawes, indicating that it was written before Lawes's death in September 1645) and *Cupid and Death* (with music by Christopher Gibbons and Matthew Locke). The latter was given on 26 March 1653 as a private entertainment for the Portuguese ambassador, and revived in 1659. Locke's contribution was probably written for this revival. Both masques were less elaborate and more dramatic than the later court masques had been. In *Cupid and Death* especially, speech and music, masque and antimasque are integrated into a consistent dramatic plot to form the most important English work of its kind at that period (ed. in MB, ii, 1951, 2/1965).

MARGARET LAURIE

Shirley [Scherley, Sherley, Sherlie, Shirlie], **Joseph** (*fl* London, 1607–10). English lutenist, viol player and composer. On 16 July 1607 he played the lute in a banquet at Merchant Taylors' Hall and on 24 November that year his son Joseph was baptized in the London parish of St Dunstan in the West. Between October 1609 and October 1610 he was the viol teacher of Christian Crusse, a Danish apprentice in Robert Cecil's household (see Hulse). His surviving output consists of 20 lyra viol pieces (*DoddI*), so he was presumably an exponent of the technique; one of them, *The Princes Coranto*, appeared in a four-part setting in Thomas Simpson's *Taffel-Consort* (RISM 1621[19]; ed. B. Thomas, London, 1988). They are graceful works, similar in style to the lyra viol dances of Alfonso Ferrabosco (ii).

PETER HOLMAN

Shirley, Wayne (Douglas) (*b* Brooklyn, NY, 28 April 1936). American writer on music and music librarian. He studied with Allen Sapp at Harvard College (AB 1957), at Stanford University (MA 1960) and with Paul Brainard at Brandeis University (1960–63). He was American co-editor, with John Vinton, of RISM (1963–5), and joined the music division of the Library of Congress as a reference librarian and music specialist in 1965. Shirley specializes in 20th-century American music, particularly gospel music and the work of Copland, Cowell, Gershwin, Ives, William Grant Still and Bessie Smith. He was editor of *American Music* (1990–93) and is a music editor for the Charles Ives Society and the Kurt Weill edition.

PAULA MORGAN

Shirley-Quirk, John (*b* Liverpool, 28 Aug 1931). English bass-baritone. After teaching chemistry at a technical college, and studying with Roy Henderson, he turned to singing professionally and became a member of St Paul's Cathedral choir, 1961–2. He made his operatic début as the Doctor in *Pelléas et Mélisande* at Glyndebourne in 1962. He joined the English Opera Group in 1964 to create the part of the Ferryman in *Curlew River*, and then sang regularly with the company, creating other Britten roles, among them Shadrach in *The Burning Fiery Furnace* (1966), the Father in *The Prodigal Son* (1968) and all seven baritone roles in *Death in Venice* (1973). He was also the first Mr Coyle, a most compassionate study, in *Owen Wingrave* on television in 1971 and at Covent Garden in 1973. With Scottish Opera he sang Count Almaviva, Don Alfonso, Mittenhofer (*Elegy for Young Lovers*, 1970, Edinburgh Festival), Yevgeny Onegin and a saturnine Golaud. He made his Metropolitan Opera début in *Death in Venice* in 1974 and in 1977 created Lev in *The Ice Break* at Covent Garden.

Shirley-Quirk's wide concert repertory ranged from Bach to Britten, and he was a fine interpreter of Friar Lawrence in Berlioz's *Roméo et Juliette* and the solos in Bach's Passions, Handel's oratorios, Haydn's *The Creation* and *The Seasons*, Brahms's *German Requiem*, *The Dream of Gerontius*, *Belshazzar's Feast* and Tippett's *The Vision of St Augustine*. He was also a thoughtful, sympathetic interpreter of lieder, *mélodies* and English song. As his numerous recordings reveal, his work was distinguished by a peculiar intensity of expression, refined phrasing and mellow, well-focussed tone. He was made a CBE in 1975 and in 1982 became an associate artistic director of the Aldeburgh Festival.

ALAN BLYTH

Shirwānī [Faṭhallāh], **al-** (*d c*1453). Persian scholar. Educated in Samarkand, he later moved to Anatolia, settling in Kastamonu. His output consists largely of commentaries on religious and scientific works, but also includes a treatise on music theory, the *Majalla fī 'l-mūsīqī* ('Codex on music'). It survives in two forms, the second much enlarged by quotations from the Timurid theorist 'ABD AL-QĀDIR al-Marāghī, whose work was presumably unknown or unavailable to him when the first version was written. The *Majalla* lies squarely within the Systematist theoretical tradition (*see* ARAB MUSIC, §I, 4(i)). It is indebted in particular to ṢAFĪ AL-DĪN al-Urmawī, although it adds to his definitions of the intervals of the gamut, based on a circle of 5ths, a more recent method which proceeds by dividing a string into 256 parts, the first fret being set at 243, thus yielding a limma. In addition to intervals, it covers the standard topics of modal and rhythmic structure, to which the enlarged version adds form, and it points out incidentally one or two regional differences of terminology. It is alone among theoretical works in that it explicitly eschews any treatment of instruments on religious grounds.

WRITINGS

Majalla fī 'l mūsīqī [Codex on music] (first version MS, Topkapi Ahmet III 3449); facsimile ed., *Publications of the Institute for the History of Arabic-Islamic Science*, series C, no.29 (Frankfurt, 1986) [with introduction by E. Neubauer]; (second version MS, *GB-Lbl* Oriental 2361, ff.168b–219b); Fr. trans. in *La musique arabe*, iv, ed. R. d'Erlanger (Paris, 1939), 3–255

OWEN WRIGHT

Shivaree [shivareo]. *See* CHARIVARI.

Shleh, Lyudmila Karpawna (*b* Baranovichi, 21 Sept 1948). Belarusian composer. She graduated from the Conservatory of Belarus in 1972, having studied with Aladaw and Smol'sky, and then completed her training with Sergey Slonimsky in 1980 while an assistant lecturer at the Leningrad Conservatory. She joined the Belarusian Composers' Union in 1974 and has composed full time since 1980. The stylistic path her work has taken has been largely governed by the folkmusic of Belarus and by the liturgical music of the Orthodox and Catholic traditions; she is recognized as one of the most consistent representatives of the Belarusian folkloristic style. Her first significant works which appeared in the late 1970s (*Lubok*, *Trava-murava* and the requiem *Pamyatayse*) were written as impressions of World War II, while her works of the 1980s – such as the oratorio *Skaz pra Igara* ('A Tale about Igor') after texts from ancient Russian chronicles – set the pattern of interest in folk and church music. The 1990s saw her turn to the Orthodox tradition in various choral works. Her uniqueness lies in the constant versatility of her approach to her folk sources; in her combination of a 20th century language with a sensitivity towards the ancient styles, harmonic implications and performing traditions of folkmusic she comes close in aesthetic terms to the 'new wave of folklore' in Russian music of the 1950s and 60s, as exemplified by Slonimsky and Gavrilin.

VALENTINA ANTONEVICH

Shlifshteyn, Semyon Isaakovich (*b* Saratov, 20 Jan/2 Feb 1903; *d* Moscow, 9 Aug 1975). Russian musicologist and critic. In his youth he settled in Moscow, and during the

1940s and 50s worked in a number of musical institutions, including the Moscow Philharmonic and the committee of art affairs at the USSR Council of Ministers. At this time he wrote most of his works, notably his book *Glinka i Pushkin* and also a number of pamphlets on Beethoven, Tchaikovsky, Prokofiev and Myaskovsky in the series *V pomoshch' slushatelyu muzïki* ('On Behalf of the Concert Audience'). In 1956 he edited a collection of material on Prokofiev, and in 1962 produced two reference works on Prokofiev and Myaskovsky. During the 1960s he contributed articles and reviews on, particularly, Russian and Soviet music to the journals *Sovetskaya muzïka* and *Muzïkal'naya zhizn'*. Together with the more prominent Soviet musicologists, Shlifshteyn came under attack from the authorities in 1948, being accused of 'anti-patriotic, harmful activity'.

JOACHIM BRAUN

Shlonsky, Verdina (*b* Kremenchug, 22 Jan 1905; *d* Tel-Aviv, 20 Feb 1990). Israeli composer and pianist of Ukrainian birth. While a student at the Berlin Hochschule für Musik, she studied the piano with Egon Petri and Artur Schnabel. She first travelled to Palestine in 1929, but decided to settle in Paris where she made contact with Arthur Honegger and Darius Milhaud, and studied composition with Nadia Boulanger, Edgard Varèse and Max Deutsch (1930–32). Her First Symphony (1935), originally scored for piano, was orchestrated in 1937 while she was participating in a course given by Enescu. After the German invasion of France, Shlonsky escaped to London, where she wrote her Piano Concerto in Two Movements (1942–4). She emigrated to Palestine in 1945. Considered an avant-garde composer, she found it difficult initially to have her works performed. As well as teaching the piano at Tel-Aviv University, she served as a music critic for several Israeli newspapers.

Shlonsky's first work, the song *Poème hébraïque*, is written in an European orientalist style featuring an ostinato in parallel 5ths and improvisational, chromatic scalar flourishes. A setting of a poem by her brother, the Israeli poet Avraham Shlonsky, the song won first prize in a competition arranged by the Femmes de Professions Liberalis in 1930, later becoming part of the cycle *Images Palestiniennes* (1930). In following years she wrote over 100 songs, some for children and many in collaboration with her brother. Her inclination towards improvisatory piano writing is also evident in works such as *Teva domem* ('Still Life', 1932) and *Toccata* (1932). During visits to Palestine (1934–7) she wrote music for theatrical productions. Her 1948 String Quartet won the Bartók Prize and later received an award from the Israeli performing rights society (ACUM, 1973). *Euphonia* (1967, rev. 1979) for chamber orchestra, which exploits the technical possibilities of string instruments, was her first serial work. During the 1970s she reorientated her compositional style towards works for chamber ensemble; these include *Silhouettes* (1977), which won an ACUM prize in 1979, and *Nid ha'Avir* ('Movement of the Air').

MICHAL BEN-ZUR

Shneyerson [Shneerson], **Grigory Mikhaylovich** (*b* Yenisseysk, Siberia, 28 Feb/13 March 1901; *d* Moscow, 5 Feb 1982). Russian musicologist. He received his musical education at the Petrograd Conservatory (1915–18), where he studied the piano and theory. In 1918 he moved to Moscow, where he studied privately with Nikolay Medtner (1918) and Konstantin Igumnov (1921–3) while working as a pianist in the drama studio of the Moscow Proletkul't. After serving as a music director at a number of Moscow theatres, he became general secretary of the International Music Bureau in Moscow (1931–5), and head of the foreign bureau of the Union of Soviet Composers (1935–40). He was also head of the music department of the All-Union Society for Cultural Links with Foreign Countries (1942–8) and editor of the overseas section of the journal *Sovetskaya muzïka* (1948–61). He became president of the Soviet committee for

RILM abstracts in 1968, and in the same year was elected a corresponding member of the Academy of Arts of the German Democratic Republic. Shneerson's work was concerned with contemporary music of western countries, particularly France, England, Germany and the USA, and he made a special study of the music of China. Some of Shneyerson's works, such as *O muzïke zhivoy i mertvoy*, show a tendency towards harsh criticism of 'Western bourgeois art'; at the same time he assisted in familiarizing the Russian reader with contemporary foreign culture – an area in which he himself was an expert.

LEV GINZBURG/LYUDMILA KORABEL'NIKOVA

Shō. Japanese mouth organ. It is descended from the Chinese SHENG, of which *shō* is the Japanized pronunciation, and is used in various genres of *gagaku* (court music). The Japanese version has 17 bamboo pipes (two of which have no reed), a lacquered wood bowl and a short mouthpiece.

Six mouth organs are preserved in the 8th-century Shōsōin imperial repository in Nara; three are *shō* and three are the larger *u* (i.e. Chinese *yu*). All had 17 pipes and long curving detachable mouthpieces. The *u* soon disappeared from Japanese music, although it was artificially revived briefly in the late 19th century.

Two of the 17 pipes of the modern *shō* are silent – with neither reed nor soundhole. This situation is thought to have come about by the 10th century, although a convincing reason for such a development has yet to be discovered. It seems likely that all 17 pipes sounded on the Shōsōin instruments. The long mouthpiece also disappeared over the centuries. (The Korean *saenghwang* underwent a somewhat different development.)

Although resembling the *sheng*, the *shō* is unique in its musical applications. In the vocal genres *saibara* and *rōei* it plays a single-note melody in support of the voice (occasionally adding a second note); in *tōgaku*, however, except during the introductory sections (*chōshi* and *netori*), its part consists entirely of tone clusters known as *aitake*. Each of the ten basic *aitake* chords is linked with a particular degree of the *tōgaku* scale, which is usually also the lowest note of the chord. The chords are chosen to correspond with the main melody note. Each chord contains five or six notes, all of which, as Garfias (1975) has pointed out, are within seven consecutive 5ths of the fundamental note. It is these ethereal tone clusters, slowly swelling and fading, then reforming in anticipation of the next main melodic shift, which give modern *gagaku* much of its distinctive flavour. (The *sheng* was reimported from China with *minshingaku* music and is played in the contemporary Chinese way in that context.)

The *Shō* has, like other court instruments, attracted the interest of modern composers, from Takemitsu to Tōgi Mideki (the son of a court musician, now a 'pop' star of sorts).

Another Japanese character, pronounced the same but written differently, refers to a separate instrument, a set of PANPIPES derived from the Chinese *paixiao* (*see* CHINA, §III) and the Korean *so*. An example survives from the 8th-century Shōsōin imperial repository, although it soon became largely obsolete in Japan.

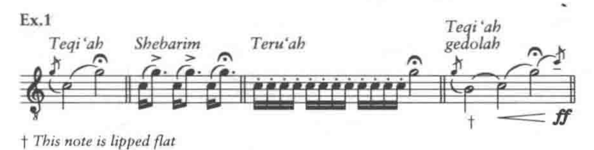
DAVID W. HUGHES



Shofar (Heb., pl. *shofarot*). The ram's horn of the Bible; it is the only ancient Jewish liturgical instrument that survived the destruction of the Second Temple of Jerusalem by the Romans in 70 CE and is still in use. For a discussion of the shofar in biblical times, *see* BIBLICAL INSTRUMENTS, §3(x); *see also* JEWISH MUSIC, §II.

In post-biblical times, the shofar was still widely used for signalling, not only as an alarm but also with some symbolical intent on occasions of natural or man-made catastrophe such as droughts, famine or raging inflation. It was also used on occasions of rejoicing and jubilation (the word 'jubilee' is derived from the name of a special form of the instrument, the *shofar ha-yovel*), a practice still in use today among the Sephardim.

The Ashkenazim, however, use the shofar only during the month of Ellul, on Rosh Hashanah (New Year; the first day of the following month) and Yom Kippur. On Rosh Hashanah it is blown at several points during the service, symbolically to call Israel together and to summon all Jews to repentance and to God; all adult male Jews are under obligation to hear the shofar on this day. Four calls are blown in varying combinations at each point

Shofar, Israel (Horniman Museum, London)

(ex.1). On Yom Kippur only one call is sounded, at the end of the service, to symbolize God's forgiveness of Israel's sins.

† *This note is lipped flat*

The calls themselves vary considerably according to the various traditions, synagogues and players, while the actual pitches produced differ according to the shape and size of each shofar. The *teru'ah*, while often played as shown in Ashkenazi synagogues, is sometimes blown with a flutter-tongue on the lower partial; this is probably the older version. In the Sephardi synagogue the *teqi'ah gedolah* is usually replaced by a *teru'ah gedolah*, a greatly lengthened version of the normal *teru'ah*, the lower pitch being reiterated for as along as the blower has breath.

The Talmud lays down very precisely the materials from which the shofar could be made (wild goat is permitted, but the bovidae are prohibited), the extent to which it may be repaired without rendering it invalid, and the occasions on which, and the way in which, it may be used. The horn is often softened by heat and the narrow end straightened, leaving the wider end to form an upturned or twisted hooked bell. The point of the horn is cut off and a narrow, cylindrical tube bored from that end to meet the natural irregular cavity of the horn. As a result the intervals obtained, while always regarded as the 2nd and 3rd harmonics, vary from 4ths to 6ths. Ashkenazi shofars do not usually have a shaped mouthpiece, the embouchure being left as an irregular ovoid. Israeli and other Sephardi instruments usually have the end of the horn shaped into a miniature trumpet or horn mouthpiece, the embouchure being about the size of that of the cornett. Incised decorations and inscriptions are not uncommon (e.g. *Psalm* lxxi.4). Among the Yemenite Jews a much larger shofar is customary, made from the horn of the kudu, an African antelope.

The shofar has been used in a few musical works, most notably in Elgar's oratorio *The Apostles*. A trained shofar player (*ba'al toqe'ah*) is sometimes engaged, but more often a substitute such as a flugelhorn is used.

JEREMY MONTAGU

Shoot [Shut'], **Vladislav Alekseyevich** (*b* Voznesensk, 3 March 1941). Russian composer. Although wartime upheavals meant Shoot was born in the Ukraine, by culture, upbringing and experience he is Muscovite. After graduation in 1967 from the Gnesin Institute, where he studied with Peyko, he became music editor at the state publishing house *Sovetskiy Kompozitor*. There, he made a name by his determination to publish underground or non-conformist composers such as Denisov, Gubaydulina, Mansuryan and Schnittke.

In 1982, Shoot responded to increasing interest in his own music by turning freelance, supporting himself by writing occasional film-scores. With the collapse of the Soviet Union in 1991 came the collapse of most prospects of future performance for soviet composers and the following year he emigrated with his family to the UK, where he had been invited to be composer-in-residence at Dartington Hall.

Shoot belongs to the generation of Moscow composers which includes Firsova, Korndorf, Smirnov and Vustin that came of age in the early 1970s and constituted a second wave of the post-Stalinist avant garde after the more celebrated generation of Denisov, Gubaydulina and Schnittke. The music of all these composers is best viewed as part of the wider unofficial culture of the Moscow intelligentsia of the 1970s and 80s, a culture typically

opposed to state ideology and either strongly pro-Western or, just as strongly, tending to a newly modish and reinvented Slavophilia.

Shoot's music stands at an intriguing tangent to this situation, and although it can certainly be considered part of it, it strikes no obvious political or aesthetic stance and displays few of the more provocative mannerisms of his colleagues, whether the modernistic heterophony of Denisov, the stylistic anarchy of Schnittke, the neo-romanticism of Sil′vestrov or the neo-medievalism of Pärt. What is distinctive about what he writes is its deliberate whimsy, and especially the way it courts the kinds of awkward sounds, uncomfortable instrumental writing and dislocated grammar that other composers prefer to avoid. He is fond of lurching suddenly, as in a cinematic rough-cut, between disparate fragments and gestures which feel sometimes familiar but remain historically, and therefore (in the context of Soviet assumptions of the period) politically, unplaceable. As Gubaidulina once observed, '[Shoot's pieces] do not always possess an outward gloss – indeed, some of them are downright rough-edged'.

His most characteristic work has been for mixed ensembles; most notable are five chamber symphonies (1973, 1975, 1978, and two from 1992) and the colourful and defiantly eccentric *Largo sinfonia* for organ and ensemble (1981). He has contributed frequently and notably to the bassoon repertory with such pieces as the Mozart-inspired *Romantic Messages* (1979) and *Four Versions* (1990). Two impressive symphonic works, *Ex animo* (1988) and *High Cross Symphony* (1998), give proof that this unusual composer is also well capable of handling large-scale musical argument.

GERARD McBURNEY

Shore [Shaw, Show, Showers]. English family of musicians.

(1) **Matthias** [Matthew] **Shore** (*d* London, on or before 14 May 1700). Trumpet player. On 5 January 1682 he was appointed a trumpeter-in-ordinary to Charles II and later (in the early summer of 1685) to James II. Shore had been employed by the monarch prior to his coronation, while he was Duke of York, playing trumpet on the *Gloucester*; he survived the shipwreck of 6 May 1682. On 5 October 1687 he succeeded Gervase Price as 'Sergeant of the trumpeters, drummers, and fifes in ordinary'; as such he attended James II and later William III in various progresses both in England and on the Continent, and he is depicted in contemporary illustrations of the coronations of James II and of William and Mary. However, although he was the 'Chief Trumpettor' he was not chosen one of 'four of the best trumpeters to attend his Majesty's Ambassadors and Plenipotentiaries for the Treaty of Peace' in 1697 (those chosen were (2) William Shore, Jervais Walker, John Stephenson and William Pyke). As Sergeant-trumpeter, Matthias received £160 a year; the established fee for the Sergeant-trumpeter was £100 and Shore received an additional £60 for his position as trumpeter-in-ordinary. The Lord Chamberlain's rolls for 1699, however, mention that he received only £100, while the other 16 trumpeters were each paid £91 5s., the standard annual fee for trumpeters in the army; musicians-in-ordinary received only £40. On 14 May 1700 *The Post Boy* stated that 'Mr Showers, Serjeant Trumpet to His Majesty, fell out of his Calash and Died immediately.' His daughter CATHERINE CIBBER was a soprano.

(2) **William Shore** (*d* London, 11 Dec 1707). Trumpet player, son of (1) Matthias Shore. This is confirmed by the wills of both William and Matthias, and by a notice in the *London Gazette* for 8 July 1700: 'Matthias Shore Esq: ... lately deceased, all Trumpeters, Drummers, Fifes, and others, who had, or ought to have had, Licences from him, are to apply themselves for new Ones before the 20th August next to his Son William Shore ...'. Some doubt on the accuracy of this evidence is cast by the relative chronology of the two as members of the royal establishment: William was admitted as a trumpeter-in-ordinary to Charles II before Matthias, on 27 June 1679. William, like Matthias and (3) John Shore, was one of the trumpeters and musicians who accompanied William III to Holland between 1 January and April 1691 and in March 1697 was mentioned as one of 'the best of the King's 16 trumpeters'. William seems to have had some difficulty in maintaining his instruments: records show that for various reasons he was issued with new ones in 1684, 1694, 1698 and 1700. On 21 May 1700 William was appointed Sergeant-trumpeter 'in the room of Matthias Shore ... deceased'. The song *Prince Eugine's March into Italy* (*c*1700) bears the attribution 'the Tune by Mr. Wm. Shore', and *Shore's Trumpet* by Jeremiah Clarke (*GB-Lbl*) may be based on another trumpet tune by him. William was buried at St Martin-in-the-Fields on 11 December 1707.

(3) **John Shore** (*b* *c*1662; *d* London, 20 Nov 1752). Trumpet player, lutenist and probably violinist, son of (1) Matthias Shore. He was the most famous member of the family. He was appointed trumpeter-in-ordinary to James II on 30 March 1688. He was placed on the waiting list for a position among the musicians of the Private Musick on 29 March 1695, and on 28 January 1697 became one of the 24 musicians-in-ordinary to William III on the death of William Clayton (a 'musician for the wind instruments and violin'). From that time his name no longer appears in lists of court trumpeters but is included with the orchestra along with such well-known musicians as John Blow, John Banister (ii) and Henry, John and Solomon Eccles. In October 1699 he was mentioned as having been in the service of Princess Anne of Denmark and by 1700 he was a musician to Prince George of

Denmark. He succeeded (2) William Shore as Sergeant-trumpeter on 13 January 1708 and was appointed lutenist in royal service on 7 March of the same year. Hawkins reported that he split his lip while playing and was 'ever after unable to perform', though the post of Sergeant-trumpeter did not require any playing, merely organization of others and official duties. He held all his posts until his death.

John Shore was a man and musician of many parts. He has been credited with the invention of the TUNING-FORK. He may well have been the 'John Shaw' who from November 1689 to June 1692 was 'musical instrument maker-in-ordinary' to William III. He was in all likelihood the 'Mr. Showers', mentioned in the *Gentleman's Journal* in 1692, who played 'some flat Tunes, made by Mr. [Gottfried] Finger' at the St Cecilia Day festivities at Stationers' Hall in November 1691. He is mentioned in numerous sources as having performed many of Purcell's difficult trumpet parts. His performances and those of other members of his family may explain the number of probable puns on the word 'shore' in texts used by Purcell and others. The most obvious of these is in Purcell's Queen Mary Birthday Ode for 1694, *Come, ye sons of art, away*, where, between music including parts for two trumpets, surely played by (1) Matthias and (2) William Shore, the two countertenors sing 'Sound the trumpet till around You make the list'ning shores resound'. Sometimes John was also a soloist, with Richard Elford, the well-known countertenor, in performances out of London. Winton Dean (*Handel's Dramatic Oratorios and Masques*, London, 1959, p.275) suggested that the three trombones used in the performance of Handel's *Saul* in January 1739 were obtained through his good offices; it was his cornett which was described in James Talbot's manuscript (written between 1690 and 1700).

Shore, Andrew (*b* Oldham, 30 Sept 1952). English baritone. He studied at the RNCM and the London Opera Centre, then sang with Opera For All and various university groups. With Kent Opera (1981–7) he gave notable performances as Antonio (*Le nozze di Figaro*) and Rossini's Bartolo, while for Opera North he has sung such roles as King Dodon (*The Golden Cockerel*), Mr Flint (*Billy Budd*), Gianni Schicchi, Leander (*The Love for Three Oranges*), Varlaam, Don Pasquale, Don Jerome (in the first British staging of Gerhard's *Duenna*, 1992), Geronimo (*Il matrimonio segreto*) and Wozzeck. Shore's ENO roles have included Doeg in the UK première of Glass's *The Making of the Representative for Planet 8* (1988), King Priam, Don Alfonso and Falstaff, which he also sang at Glyndebourne (1990). He made his Covent Garden début (1992) as Trombonok (*Il viaggio a Reims*) and his US début as Dulcamara (*L'elisir d'amore*) in San Diego. He has also appeared with Scottish Opera, the WNO, New Israeli Opera and at the Opéra Bastille, Paris, as the Sacristan in *Tosca*. His other roles include Bottom (*A Midsummer Night's Dream*) and Dr Kolenatý (*The Makropulos Affair*). A superb comedian, with a strong, flexible voice, Shore particularly excels as Falstaff and as Rossini's Dr Bartolo, a role he has sung throughout Britain and in Canada and has recorded. He has also been admired for his subtlety and dramatic intensity in tragic parts, above all King Priam and Wozzeck.

ELIZABETH FORBES

Shore, Bernard (Alexander Royle) (*b* London, 17 March 1896; *d* Hereford, 2 April 1985). English viola player. He entered the RCM in 1912, studying the organ with Sir Walter Alcock, the viola with Arthur Bent and composition with Thomas Dunhill. In 1914 he was awarded an exhibition for organ playing, but owing to an injury to his right hand suffered during World War I he gave up the organ, and on his return to the RCM after the war concentrated on the viola, studying with Lionel Tertis. In 1922 he joined the Queen's Hall Orchestra and three years later made his first solo appearance at a Promenade Concert. From 1930 to 1940 he was principal viola of the BBC SO. After World War II he became a professor of the viola at the RCM, and from 1948 to 1959 was also a staff inspector of schools. He was made a CBE in 1955. A gifted musician of varied talents, Shore composed a number of songs and pieces for the violin and was responsible for the first performances of several new works by other composers, including Gordon Jacob's Viola Concerto. He was also active in chamber music and was a member of the Spencer Dyke String Quartet. He published two books, *The Orchestra Speaks* (London, 1937) and *Sixteen Symphonies* (London, 1947).

ELIZABETH FORBES

Shore, Dinah [Frances Rose] (*b* Winchester, TN, 1 March 1917; *d* Beverly Hills, CA, 24 Feb 1994). American popular singer. She was raised in Nashville and was first heard professionally on her own local radio show during her sophomore year at Vanderbilt University, where she studied sociology and took singing and acting lessons. Within a year of her graduation in 1938, she achieved recognition in New York with the Leo Reisman Orchestra. Popular recordings with Xavier Cugat in 1939 and spots on many notable radio programmes, such as the 'Ben Bernie Show', the 'Chamber Music Society of Lower Basin Street' and the 'Eddie Cantor Show', soon followed. By 1940 she was nationally known and was named the 'New Star of Radio' by several polls, the first of many honours she was to receive for her singing. Her best-selling recordings, such as *Yes, my darling daughter* (1940) and *Blues in the Night* (1942), and her radio show added to her popularity, although she was unable to establish herself in films. Her greatest success was the variety programme 'The Dinah Shore Show' (1951–61), one of the most important shows of its kind in the early years of television. Shore's earnest and often sentimental interpretations were marked with a characteristic southern graciousness and charm, and her mellow contralto voice, often darkened with husky timbres and melodic nuances, reflected her awareness of African-American singing styles. After the mid-1960s, she sang periodically in night clubs and on television.

MICHAEL J. BUDDS

Short, Bobby [Robert] **(Waltrip)** (*b* Danville, IL, 15 Sept 1926). American popular singer and pianist. He taught himself to play piano as a child, and was sometimes referred to as 'the miniature Fats Waller'. He began recording in 1954 but the turning-point in his career came in 1968, when the recording of a highly successful joint concert with Mabel Mercer in Town Hall, New York, was well received; in the same year he began what was to become a longstanding engagement at the Café Carlyle in New York. In the early 1970s he recorded a series of albums, each one with music by a different composer; most notable was one devoted to songs by Cole Porter, which contributed to a resurgence of interest in the composer and did much to broaden Short's following. He continued his association with Mercer; they gave their third concert together at Carnegie Hall in 1977. Short became one of the most popular performers of American and British theatre songs in a café setting, achieving his greatest success in the early 1970s when this type of performance style and setting had almost disappeared. Although he is not a technically gifted singer, his style is generally termed 'sophisticated', and is characterized by a wide range of vocal inflections, elegant diction and accomplished, jazz-like piano accompaniments.

SAMUEL S. BRYLAWSKI

Short, Peter (*d* 1603). English music printer. He already had a flourishing general printing business when, in 1597, he first began to print music. From about 1584 he had established premises in Bread Street Hill, London, at the 'signe of the Starre'; all his printed music bears that imprint. In 1597 he issued six major musical works: John Dowland's *The First Booke of Songs or Ayres*, Antony Holborne's *The Cittharn Schoole*, William Hunnis's *Seven Sobs of a Sorrowfull Soule for Sinne* and Morley's *Canzonets or Little Short Aers*, *Canzonets or Little Short Songs* and *A Plaine and Easie Introduction to Practicall Musicke*.

The layout of the pages in the Dowland volume established the English 'table-book' style for printing lute-songs, a style adopted by all other London printers for music of this kind. The *Plaine and Easie Introduction to Practicall Musicke*, a remarkably complex volume, includes among its many diagrams and illustrations the only surviving example of two-colour printing from London at this period; this volume alone would have been sufficient proof of Short's skill. He worked with type and possessed one of the few tablature founts known to have been used in London at that time. He printed only seven more music volumes, two of which were reprints of Dowland's *The First Booke of Songs or Ayres*. On his death in 1603, Short's widow published a few titles, and in 1604 she married Humfrey Lownes, who took over the business.

MIRIAM MILLER

Shorter, Wayne (*b* Newark, NJ, 25 Aug 1933). American jazz tenor and soprano saxophonist and composer. He began playing the clarinet at the age of 16, then changed to the tenor saxophone. From 1952 he studied music at New York University (1956, BME) and played in a local band. He performed briefly with Horace Silver in 1956 before being drafted, and in 1958 he joined Maynard Ferguson's group, in which he first met Joe Zawinul. Shorter then began an important association with Art Blakey's Jazz Messengers (1959–64), ultimately serving as the band's music director. After a brief period of rest and work on his own recordings he joined Miles Davis's quintet in September 1964. He remained with the group until 1970, taking up the soprano saxophone in late 1968 as Davis experimented with electronic instruments and new ensembles, though during the same period he recorded regularly as a leader. Late in 1970, with Zawinul, he founded WEATHER REPORT, which the two men continued to lead into the 1980s. Shorter also recorded an acclaimed album presenting Milton Nascimento (1974) and returned to acoustic jazz when he toured and recorded with Ron Carter, Herbie Hancock, Freddie Hubbard and Tony Williams as V.S.O.P. (1976–7). From the mid-1970s he has devoted his time equally to playing tenor and soprano saxophones. In 1985 he greatly reduced his activities with Weather Report, concentrating instead on recording, making international tours with his new group and appearing in reunion concerts with many of his colleagues from the 1960s, most notably Hancock. He also performed in the film *Round Midnight* (1986). In 1988, with Carlos Santana, he led a Latin jazz-rock group which toured internationally. He toured further with Hancock in the 1990s.

Shorter is a leading figure in hard bop and jazz-rock, both as an instrumentalist and as a composer of jazz tunes. In the early 1960s his tone and ideas strongly resembled those of John Coltrane, with whom he had practised after leaving the army. As his personal style emerged he developed varied approaches on the tenor and soprano instruments that had in common a certain terseness. Typically he plays subdued bop runs or Coltrane-like flourishes, liberally interspersed with periods of silence and sometimes with fragments of thematic material, especially as signposts in unconventional compositions. From soul music he has adopted a funky style (the simplicity of which suits his sense of economy), combining a biting attack and bluesy, syncopated dance phrases with an often esoteric selection of pitches. His tenor style is well illustrated in his albums *Juyu*, *Speak No Evil* (both 1964, BN) and *Adam's Apple* (1966, BN). On the soprano saxophone he produces a remarkably beautiful tone as on Miles Davis's *In a Silent Way* (1969, Col.).

Shorter's jazz compositions are highly original. One type is illustrated by *E.S.P.* (on *E.S.P.*, 1965, Col.; historically significant as the title track of the album that marked Davis's turn towards a new repertory) and by *Pinocchio* (on *Nefertiti*, 1967, Col.). Here Shorter's point of departure is the bop tradition: walking bass lines, complex swinging drum patterns and a structure in which solos are interspersed among statements of the theme. His jittery melodies are set to successions of non-functional and dense harmonies that at times are grouped in

asymmetrical phrases; improvisations are virtually pantonal. Another type, which provided the inspiration for Weather Report, is represented by *Nefertiti* (on *Nefertiti*) and *Sanctuary* (on *Bitches Brew*, 1969, Col.). Here the 'accompanists' improvise while the 'soloists' reiterate strange, slow-moving melodies. Much of Shorter's writing for Weather Report is based on simple dance ostinatos and lyrical melodies. The rapidly changing textures of his *Surucucú* (on the group's album *I Sing the Body Electric*, 1971–2, Col.), on the other hand, probably resulted from Weather Report's collective improvisation rather than from the composer's design.

BARRY KERNFELD

Short octave (Fr. *octave courte*; Ger. *kurze Oktave*). A term to denote the tuning of some of the lowest notes of keyboard instruments to pitches below their apparent ones. The practice was employed from the 16th century to the early 19th to extend the keyboard compass downwards without increasing the overall dimensions of the instrument.

The short octave was not described in theoretical writings before the 1550s; the alleged description of it in Ramos's *Musica practica* (1482) results from a misinterpretation. However, the system originated earlier in stringed keyboard instruments. It was basically a variable tuning adapted to the requirements of individual pieces, comparable to the SCORDATURA of string instruments. It was first applied to keyboards showing *F* as the lowest key; the *F♯* and *G♯* keys, if present, were tuned to sound lower notes, usually *C*, *D* or *E*. By the middle of the 16th century an apparent *E* was added as the lowest key, but it was often tuned to a lower pitch. This soon resulted in the standard tuning known today as the '*C/E* short octave' (fig.1), but keyboard music sometimes called for other tunings, including some chromatic notes. The system was applied to the organ only at the end of the 16th century, since retunings were impractical and the pedal often provided the required low notes. At the beginning of the 17th century some composers applied scordatura to the

1. *C/E short octave*

2. *G′/B′ short octave*

chromatic keyboard beginning with C, the C♯ key being retuned to *A′*. This led to the standard '*G′/B′* short octave' shown in fig.2.

The short octave developed because the bass part of the keyboard repertory was usually diatonic. It may have been conceived at first as a means of allowing to play on the manual keyboard of string instruments what, on the organ, would have been played on the pedal-board. Several early keyboards show traces of pedal pull-downs under the short octave keys. The short octave arrangement has also been used for diatonic pedal keyboards, perhaps because it made the identification of the keys easier than in a single row of identical keys. From the 17th century onwards, however, composers often demanded a chromatic compass in the bass and so manual keyboards were enlarged, a process known as RAVALEMENT (literally 'enlargement towards the bass'); or else the two lowest upper keys were split into two parts, the front tuned to the short octave note, and the back to its proper note, a system known as BROKEN OCTAVE (i).

NICOLAS MEEÙS

Short score. *See* SCORE, §1.

Shostakovich, Dmitry (Dmitriyevich) (*b* St Petersburg, 12/25 Sept 1906; *d* Moscow, 9 Aug 1975). Russian composer. He is generally regarded as the greatest symphonist of the mid-20th century, and many of his string quartets, concertos, instrumental and vocal works are also firmly established in the repertory. His numerous film scores, extensive incidental theatre music and three ballets are of more variable quality. In 1936, political intervention cut short his potentially outstanding operatic

output; such interference continued to blight his career, belying the outward signs of official favour and recognition that increasingly came his way. Amid the conflicting pressures of official requirements, the mass suffering of his fellow countrymen, and his personal ideals of humanitarianism and public service, he succeeded in forging a musical language of colossal emotional power. The music of his middle period is often epic in scale and content; it has been understood by many Russians, and in more recent years also by Westerners, as chronicling his society and times, conveying moods and, as some would argue, experiences and even political messages in notes, at a time when to do so in words was proscribed. Since the appearance in 1979 of his purported memoirs, which expressed profound disaffection from the Soviet regime, his works have been intensely scrutinized for evidence of such explicit communication. However, his intentions in this respect continue to provoke disagreement, not least because of the problematic status of the sources involved. He published articles and made speeches under varying degrees of duress; for much of his life his correspondence was liable to be read by censors; he destroyed almost all letters sent to him; he kept no diary; and his reported confidences to friends and family are of varying reliability. Meanwhile, the musical dimensions of his works remain comparatively little examined. He played a decisive role in the musical life of the former Soviet Union, as teacher, writer and administrator. He was also an active pianist, frequently performing his own works until disability prevented him. His last concert appearance was in 1966.

1. Up to 1926. Shostakovich's family on his father's side had Polish roots. These are reflected in the orthography of the name common until 1904, which was Shestakovich. His great-grandfather on his father's side, Pyotr Mikhaylovich Shostakovich (1808–71), took part in the Polish and Lithuanian uprisings of 1831, later settling in Yekaterinburg where Shostakovich's grandfather Boleslav Petrovich (1845–1919) was born. Implicated in the assassination attempt on Tsar Aleksandr II in 1866, Boleslav was arrested, tried and sentenced to exile in Tomsk, some 1300 km east of the Urals. Following a further denunciation for revolutionary activities he was sent north to Narïm, deeper in the Siberian lowlands, where his second son, Dmitry Boleslavovich (1875–1922), Shostakovich's father, was born.

Shostakovich's grandfather on his mother's side, Vasily Kokoulin (1850–1911), rose from a humble background to become manager of the gold mines at Bodaybo in Eastern Siberia, north-east of the Baykal Sea. His daughter Sof'ya Vasil'yevna (1878–1955), Shostakovich's mother, studied languages and piano in Irkutsk, and went on to be a pupil of Aleksandra Rozanova at the St Petersburg Conservatory. Here she met Dmitry Boleslavovich Shostakovich, who was studying histology at St Petersburg University and was a respectable amateur singer. After his graduation in 1899, Dmitry Boleslavovich joined the Palace of Weights and Measures. He was promoted to the rank of senior inspector in 1902 and married Sof'ya Kokoulin the following year. Dmitry Dmitriyevich was the second of their three children; his elder sister Mariya (1903–73) became a pianist, his younger sister Zoya (1908–90) a veterinary scientist. In these immediate pre-Revolutionary years, the young Dmitry Dmitriyevich grew up in comparatively privileged surroundings. The family had the use of two cars and a dacha, owned a Diderichs piano, and employed a German tutor, servants and a nanny. Shostakovich reportedly inherited from his father a liking for clownish behaviour and for early rising (habitually around 6 a.m.).

A quiet boy with a liking for nature and walking, he attended the private Mariya Shidlovskaya Commercial School from 1915 to 1919, along with children of the intelligentsia, such as those of Trotsky, Kustodiyev, Kamenev and Kerensky. Close to the school was the Finland Station, where Shostakovich and some school friends reportedly witnessed Lenin's historic arrival and speech on 3/16 April 1917. In 1919, he moved on to Gymnasium no.13, which he attended at the same time as pursuing his musical studies at the Conservatory.

His parents and his elder sister all made music in the house. Shostakovich enjoyed the gypsy songs his father sang and by the age of nine was well acquainted with Tchaikovsky's *Yevgeny Onegin*, even before seeing it staged. In 1915, he saw his first opera, Rimsky-Korsakov's *Tale of Tsar Saltan*. He had resisted the idea of musical instruction until that year, and his mother had had to persuade him to take piano lessons. As soon as these began, however, his musical gifts blossomed. He had absolute pitch and within a month was playing simple pieces by Mozart and Haydn. At about the same time he started to compose, and he liked to improvise illustrative pieces with verbal running commentaries. Later in 1915 he enrolled at Ignaty Glyasser's private music school, and initially studied with the director's wife, Olga Federovna. Within a year, Shostakovich was studying with Glyasser himself and progressed to Bach's preludes and fugues; by the end of 1917 he could reportedly play the entire *Das wohltemperirte Clavier*. He also composed short piano pieces, most of which were later destroyed. Those that survive, in various gift albums, include *The Soldier*, a *Hymn to Freedom*, and a *Funeral March for Victims of the Revolution* strongly reminiscent of the first movement of Beethoven's Sonata op.26. Evidence of the Shostakovich family's political interests at this time is scant, but it seems that they greeted the Revolutions of 1917 with enthusiasm, as did the majority of the intelligentsia.

Glyasser showed little or no interest in his pupil's compositions, and sometime in 1917 or 1918 Shostakovich became dissatisfied and eager to leave the school. His mother took him to her former teacher Rozanova for preparatory lessons before entrance to the Petrograd Conservatory; in the summer of 1919 she sent him to Glazunov to have his compositions assessed. He entered the Conservatory in autumn 1919, studying harmony, orchestration, fugue, form and composition with Rimsky-Korsakov's son-in-law and pupil Maximilian Steinberg, and counterpoint and fugue with Nikolay Sokolov; he also attended the history classes of Aleksandr Ossovsky and towards the end of his studies took violin and conducting lessons. Some of his orchestration exercises from this time survive, notably his scoring of Beethoven sonata movements and of Rimsky-Korsakov's song *I waited for thee in the grotto* op.40 no.4. His prodigious gifts of aural perception, sight-reading and memory quickly became famous, and he absorbed the orchestral repertory by playing piano duets with his student friends.

His op.1, a Scherzo for orchestra, was composed in late 1919 during his first year at the Conservatory.

In his second year, Shostakovich moved to Leonid Nikolayev's piano class, where his fellow-students included Mariya Yudina and Vladimir Sofronitsky. Yudina spurred him on to tackle such repertory as Beethoven's 'Hammerklavier' Sonata, which he performed in spring 1922, and encouraged him in his exploration of the latest works of Hindemith, Bartók and Krenek which were filtering into Russia after the period of post-Revolutionary cultural isolation.

The tradition established by Rimsky-Korsakov of rule-bound training in basic theoretical disciplines still prevailed. The arrival on the staff of composer-teacher Vladimir Shcherbachyov (in 1923) and of scholar-composer Boris Asaf'yev (in 1925) eventually provoked reforms, but these were instituted only near the end of Shostakovich's formal studies. He was ambivalent about Steinberg's teaching. He expressed respectful appreciation, but in later life did not hesitate to criticize his teacher for academic short-sightedness; Steinberg in turn was vexed by his pupil's interest in Western-inspired grotesquerie. Unlike Prokofiev a decade earlier, Shostakovich did not rebel as a student, however, and his determination to combine a degree of experimental freedom with strong compositional discipline laid the foundations for a multifaceted musical idiom, capable of rapid modulations of tone and style. At the same time as going through the prescribed academic hoops, most obviously in the Theme and Variations op.3, he participated in the 'Circle of Young Composers', consisting of students meeting in the conservatory cafeteria (1921–4), and in the Anna Fogt Circle (1921–5), where he made contact with Asaf'yev, Shcherbachyov and conductor Nikolay Malko, all of them keen followers of contemporary musical trends in the West. It was in the Fogt Circle that Shostakovich introduced his *Two Fables of Krïlov* op.4 and his *Three Fantastic Dances* op.5.

1. *Dmitry Shostakovich*

During the years following the Revolution and leading up to the end of Civil War and the introduction of Lenin's New Economic Policy in 1921, most artistic institutions were severely under-funded. The Conservatory was no exception and classes often took place in icy conditions. Shostakovich's once comfortably-off family also shared in the deprivations of the 'War-Communism' era. On several occasions Glazunov appealed to higher authorities, including the Commissar for Enlightenment Anatoly Lunacharsky and the writer Maksim Gorky, for ration cards and funds for his outstanding student; he eventually arranged for a stipend from the Borodin fund. When Shostakovich's father died of pneumonia in February 1922, his mother had to take up typing, and his sister gave private piano lessons. For the time being the 15-year-old Dmitry continued his studies, composing his Suite for two pianos, op.6, in the following month and dedicating it to the memory of his father.

Ever a sickly child, he developed tuberculosis of the lymph glands and in spring 1923 had to have an operation. He completed his final piano examinations at the conservatory in June with his neck still bandaged, including in his programmes Beethoven's 'Waldstein' Sonata, Liszt's 'Venezia e Napoli' from the *Années de pèlerinage*, and the Schumann Concerto. He then continued work on his second orchestral Scherzo op.7 and began to sketch ideas for what would eventually become his First Symphony. He was then sent for a summer sanatorium cure at Gaspra in the Crimea. This trip stimulated a love for travel that lasted most of his life (he generally preferred to travel south in the spring but to spend the summer months in the north of Russia). In Gaspra he met Tat'yana Glivenko, daughter of a well-known Moscow philologist, and some would say the greatest love of his life. He composed his Piano Trio op.8 with his feelings for her very much in mind; he wrote to his mother in praise of free love, only defending the institution of marriage as a safeguard for family life. Over the next years he backed away from full commitment to Glivenko, but he continued to see her, even trying to persuade her to be with him after her marriage in 1929; he only ceased to court her after the birth of her first child in 1932. His letters to her, now in private hands, are a rare source of information concerning his political views. They reveal a balanced attitude to the issues of the day, generally supportive of the communist regime but sceptical of some of its practical manifestations.

In March 1924 Shostakovich was excluded from the post graduate piano course, officially because of 'insufficient maturity'; he came close to transferring to the Moscow Conservatory, where he already had a number of friendly contacts, to study piano with Konstantin Igumnov and composition with Nikolay Myaskovsky. After he had enjoyed a second rest-cure in the Crimea he was reinstated with Nikolayev in Leningrad. He set to work in earnest on his symphony, now a prescribed graduation task. In October 1924, he began to earn pin-money playing the piano for silent films, having previously passed a qualifying exam. This gave him an outlet for his

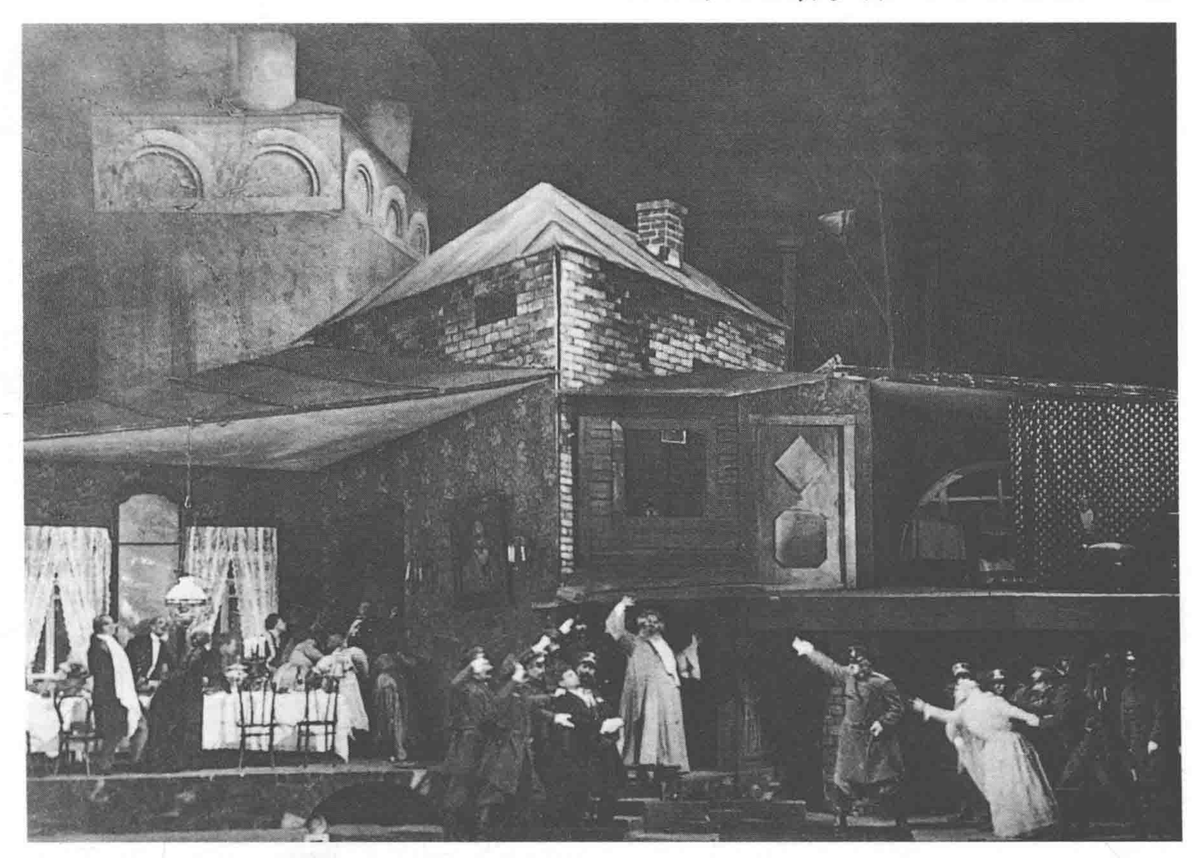
natural sense of fun and talent for lampooning, but the work itself was irksome and energy-sapping, not least when he had to take one of the cinema-owners to court for non-payment of wages.

In March 1925, when he was having difficulties with the last movement of the symphony, Shostakovich presented a selection of his music in Moscow. On this occasion the young Vissarion Shebalin made the bigger impression, but the visit at least helped Shostakovich to develop and inaugurate some important friendships – with Shebalin, with the theorist Boleslav Yavorsky, and with the music-loving marshal Mikhail Tukhachevsky. The latter helped the Shostakovich family financially and put his protégé in touch with the composer and theorist Nikolay Zhilyayev, who became another important mentor. Tukhachevsky would be shot at Stalin's behest in the Red Army purge of 1937; Zhilyayev, implicated by his friendship with the marshal, was arrested in November that year and executed the following January.

By April 1925, the symphony was complete in piano score, and the orchestration was finished by 2 July. Shostakovich dedicated the score to his Moscow student friend Mikhail Kvadri, who in 1929 would become the first of his close acquaintances to perish in the Stalinist repressions. The 12 May performance, coincidentally the first radio broadcast from the Great Hall of the Leningrad Philharmonic, was a major public and professional success. Critical reaction, however, was measured rather than ecstatic.

The success of Shostakovich's First Symphony catapulted him to international fame. The piece was taken up in rapid succession by Walter, Toscanini, Klemperer, Stokowski and others in the West, and it drew congratulatory letters from Milhaud and Berg. Its cachet lay partly in the fact that it was the first symphony composed in the Soviet Union to win a place in the general repertory and partly in that it had been composed by a teenager.

However, Shostakovich had tried and tested many of its ingredients in preceding compositions, beginning with his op.1, a Scherzo in F♯ minor composed in 1919 at the age of 13 and dedicated to Steinberg. Tchaikovskian in its balletic character, in construction the Scherzo already shows some ingenuity in its contrapuntal combination of themes, and it has a sophisticated retransition in which the climax of the central lyrical trio section and the return of the scherzo are telescoped together. Like the young Stravinsky, Shostakovich composed an exceptional number of scherzos in his apprentice years and used the form to develop facility in musical characterization and structure in tandem. The op.7 Scherzo shows an awareness of Stravinsky's rhythmic innovations and features the first of Shostakovich's irresistibly daft polkas. In addition to these self-sufficient scherzos, three of the symphony's four movements and the last of the *Three Fantastic Dances* for piano op.5 are predominantly scherzo-like in character; the second of the two String Octet pieces op.11, completed immediately after the symphony, is yet another scherzo. By contrast, the Romantic tone of the symphony's slow movement is foreshadowed in the Piano Trio op.8, composed at the time of his love affair with Glivenko, while the fateful gloom which descends on this movement and on much of the finale was foreshadowed in the Suite for two pianos op.6, in which the example of Rachmaninoff is evident.



The first of Shostakovich's surviving songs are the *Two Fables of Krïlov* op.4, the second of which ends with a characteristic 'false triumph'. Concluding the tale of the ass who offends the nightingale by suggesting she should go to the cockerel for singing lessons, the singer remarks, 'Deliver us, O God, from judgments of this kind'. The accompaniment swaggers off in a philistine victory-march, powerfully echoed 30 years later at the end of the Tenth Symphony.

The First Symphony itself covers an extraordinary range of character, from its introduction in which the forlorn search for a stable key and tempo is reminiscent of *Petrushka*, through to an almost epic sense of resistance to fate at the end of the Finale. It maintains a fascinating tension between the progressivist interests Shostakovich had developed – in the music of Stravinsky, Hindemith and Krenek – and the restrictive conservatory disciplines to which he submitted more or less willingly. For these reasons, the music's progress is constantly surprising, yet in its very volatility consistent and true to itself. It manages to steer a course around the two most influential attitudes to large-scale form current in 1920s Russia: form as architecture, as preached and practised by Rimsky-Korsakov's pupils Steinberg and Myaskovsky, and form as process, as preached by Asaf'yev and both preached and practised by Shcherbachyov and his pupils.

2. 1926–36.

(i) Life. In the ten years between the triumph of his First Symphony and his first fall from official grace Shostakovich pursued several different avenues. His initial instinct was to sow some musical wild oats by composing in the latest avant-garde styles imported from the West. But the need to earn money, not least to support his mother, increasingly dictated the nature of the work he took on. This was especially the case from 1928 when he undertook a succession of commissions for incidental music, film scores and ballets, all of which had to conform to external requirements. Otherwise his income consisted of a mixture of honoraria from sporadic piano performances and publications (notably of the First Symphony and First Piano Sonata), some teaching (two days a week score reading at the Central Musical Technical College from October 1926 to at least May 1927), similar work at the Choreographic Technical College from January to April 1929, and stipends in respect of his postgraduate status at the Conservatory which continued until 1 January 1930, although his studies had effectively ended by 1926. By the end of 1932 dissatisfaction with the procrustean demands of theatre and film studio provoked a return to instrumental music, but now in a more restrained and thoughtful idiom.

One of his first priorities in this period was to test out his proficiency as a pianist. In January 1927 he took part in the first Chopin Piano Competition in Warsaw, where he was one of eight finalists but not a prizewinner (his Moscow friend Lev Oborin won first prize, Grigory Ginzburg came fourth). He put this disappointment down to pain from appendicitis (he eventually had his appendix removed in April) and to the national pride of an all-Polish jury. The competition marked the end of Shostakovich's serious aspirations as a professional concert soloist, although later in 1927 he played Mozart's Concerto for Two Pianos with Gavriil Popov, and he kept the first concertos of Prokofiev and Tchaikovsky in his repertory until the end of 1930. After that he still played

2. Arrest of Katerina and Sergey (Act 3 scene viii) in Shostakovich's 'Lady Macbeth of the Mtsensk District', Maliy Opera Theatre, Leningrad, 22 January 1934; set by Vladimir Dimitriyev

his own works but otherwise confined himself to chamber music.

1927 was a particularly eventful year. He used his honorarium from Warsaw to finance a return trip via Berlin. Soon afterwards, he met Prokofiev who was making the first of many visits to Russia before his definitive return nine years later. Shostakovich played his own recently completed First Piano Sonata, which was one of the few works by the younger generation of Soviet composers to impress Prokofiev. In the aftermath of this visit, and with the encouragement of Yavorsky, Shostakovich produced his even more extreme *Aforizmï* ('Aphorisms') op.13, a series of perversely mistreated genre pieces that seem like attempts to out-scandalize Prokofiev's *Sarcasms*. The Leningrad première of Berg's *Wozzeck* in June gave a further impetus to Shostakovich's avant-garde inclinations. Although he tried to play down the notion, the influence of this opera's tragic-satirical tone and expressionist style was decisive. Its influence can be found in the *Symphonic Dedication to October* (later retitled Symphony no.2, 'To October') on which he had just embarked as a commission from the Propaganda Department of the State Music Publishing House for the tenth anniversary of the October Revolution; it pervades the opera based on Gogol's *Nos* ('The Nose'), then in the planning stages; it also remains a powerful force behind his second opera, *Lėdi Makbet Mtsenskogo uyezda* ('Lady Macbeth of the Mtsensk District'), composed between October 1930 and December 1932. In the symphony, he also amused himself with the idea of introducing factory hooters into the score; their parts are optionally performable by unison brass. The later stages of composition proved an uphill struggle as he wrestled with the final chorus, to a propagandistic text by Aleksandr Bezïmensky which he found contemptible.

His work on *The Nose* received another stimulus from a new friendship with Ivan Sollertinsky, beginning in May 1927. Four years the composer's senior, this polymath intellectual soon became his mentor, confidant, correspondent and champion in succession to Yavorsky. Sollertinsky's forceful views on the symphonic tradition were vital factors in Shostakovich's development. He was already taken with the post-Mahlerian Germanic neoclassicism of Hindemith and Krenek. With Sollertinsky's encouragement he now made a deep study of Mahler's music and in so doing discovered the most important composerly affinity of his career.

In the summer of 1927 Shostakovich met Nina Varzar, an 18-year-old physics student, whom he would marry in May 1932 after a courtship complicated by their mothers' resistance and by his own continued feelings for Tat′yana Glivenko. In September 1927, he encountered the theatre director, Vsevolod Meyerhold, who invited the composer to work with him in Moscow and to stay at his apartment. Shostakovich accepted in early 1928, and worked on *The Nose* as well as performing in Meyerhold's theatre. Meanwhile, in December he was elected secretary of the Conservatory's Postgraduate Society, the first of numerous professional and public service posts he would occupy.

The second half of 1927 and the first half of 1928 were largely taken up with work on *The Nose*, interrupted by a spell of two months as pianist in the Meyerhold Theatre. Having originally intended to write the entire libretto himself, Shostakovich soon enlisted the help of Georgy Ionin, Aleksandr Preys and, to a lesser and contested extent, Yevgeny Zamyatin. The actual process of composition was extremely swift, as it would be routinely throughout the remainder of his career. He rarely made sketches beyond an aide-mémoire of salient themes; it is, however, likely that he destroyed a good deal of draft material and it is known that several of his major works had false starts (such as the fourth and ninth symphonies) or were entirely recomposed (Symphony no.12, String Quartet no.9).

Having passed the newly required compulsory examination in Marxist ideology in December 1926, Shostakovich contrived to extend his postgraduate registration at the Conservatory until New Year 1930. Fulfilling student requirements, he submitted his Third Symphony, subtitled 'Pervomayskaya' ('The First of May'), composed in mid-1929. Its impact was overshadowed, however, by the fuss surrounding *The Nose*. By the time the opera was finally given its first performance, at the Maliy Theatre on 18 January 1930, the critical climate had changed. Although questionnaires proved that the audience was responsive, reviews were largely hostile, even from former supporters of the opera. Shostakovich was accused for the first time in his life of 'formalism', a word that by now had lost its former connotations, either of conservative academic routine or of a radical foregrounding of formal devices, and had become an all-purpose insult to be directed at any artistic production that was deemed either incomprehensible to the 'People' or in any way ideologically wrong-headed.

As a student, Shostakovich had benefited from the relative pluralism and liberalism in the Soviet arts world, results of policies enshrined in a Party resolution of 1925. This favourable situation was, however, gradually giving way to monopolistic state control. By 1929 the Russian Association of Proletarian Musicians (RAPM) achieved hegemony over the Western-orientated Association for Contemporary Music (ASM), only to be swept aside in turn by another Party decree in 1932. Some RAPM members later allied themselves with Shostakovich (Daniil Zhitomirsky, Lev Lebedinsky); others remained a thorn in his flesh (Vladimir Zakharov, Marian Koval, Klavdiya Uspenskaya). The ascendancy of RAPM was brief but intimidating. While Shostakovich's compositions were lambasted in the press, his own official pronouncements, including self-assessments for the Conservatory, became defensive in tone and voiced concerns to create music 'for the People'. When he gave his first interview for the foreign press in 1931, he voiced orthodox Leninist views on the association of music and ideology and on the special place of Soviet music in the 'struggle'; where his actual convictions stood at this time is still a matter for debate.

The Union of Soviet Composers replaced the RAPM after the three-year hegemony of this independent organization. The Union was, supposedly, broadly-based and centrist in outlook, relatively tolerant in its policy and with a remit to rationalize the entire infrastructure of Soviet musical education, composition and criticism. As such, it was welcomed by Shostakovich and most of his fellow-composers, but its additional function as an instrument of Party control soon became evident. The dogma behind that control was the doctrine of Socialist Realism, officially defined in 1934 as 'the truthful and historically concrete representation of reality in its revolutionary development'. In practice, it meant almost precisely the opposite. Unsurprisingly, Soviet ideologues never succeeded in spelling out the implications for music, beyond the desirability of lyricism, a heroic tone and popular appeal based on the language of the 19th-century Russian classics. It could be argued that, to a certain extent, Shostakovich was ready to move in these directions anyway. Shostakovich had briefly been associated with the Leningrad branch of the ASM and other groups for the discussion and dissemination of new music, but he had held aloof from overt propagandizing of modernism. With regard to the support he professed from about 1930 for more traditional musical values, it is impossible to separate the expression of genuine belief from expediency. He contradicted one or the other of these points of view in many instances. In 1930, for instance, he sounded off in RAPM-ist fashion against the supposed bourgeois delinquency of jazz and 'light genres' and 'apologized' for his own contributions, such as his famous arrangement of 'Tea for Two', tossed off for a bet in 45 minutes in October 1928. Yet he continued to indulge in such things himself, and when the Party line allowed a relative permissiveness, he produced his First Jazz Suite (February 1934) and took part in a jazz competition and commission in Leningrad.

In these years Shostakovich produced incidental music for some ten films, eight theatre pieces and three ballets, all of them either downright propagandist or at least thinly disguised allegories of capitalist vice and communist virtue. In later life, the evident association of their subject matter with the brutal Stalinist policies of agricultural collectivization, the industrialization of the first Five-Year Plan, class war and its associated purges, was a severe embarrassment to him. His unease was not lessened by the lack of evidence that he had been ideologically committed to the subject matter: if anything, his letters express contempt for the simplistic plots. At the time Shostakovich defined ideology in music in terms not of the subject matter alone but of the composer's attitude to it, which at least allows his motives in these works to be read in more than one way.
